Re MAIN BLDG.

Dear Miss Morgan,

I think we have the ~~[illegible]~~ trophy room too big. I have cut off the end of it in your sketch and made it go back even with the panels and coat room. It is then just a big lobby or rear hall.

above it I have made the
bed rooms over the pantry
and coal rooms and the
sitting room between. The
last opens on the balcony
~~and has~~ to the side of the
repeating and has a bigger
on the east or sun side

On the third floor there can be a roof terrace or else the rows of cells can be brought further back and two bed rooms and a bath in each side added.

This might give a good architectural effect

Sincerely W R Lethaby
