

New York American

March 22, 1921.

Dear Miss Morgan :

Please make a little model of house B. I have A and C and would like to have B, with the new terraces. Of course there is no hurry for this-- whenever you can conveniently have it done.

2. We ought to have a dove cote on the hill and we ought to have a decorative water tower. Will you please consider the locating of these two things?

3. Have you also considered where we should put the swimming pool and structures around it? You will remember we were discussing whether we should put it on the flat below where we had our tents last year or whether we should put it on the hill northwest of house C.

The latter would seem to be the place where any architectural effect would be best seen; and still, it might not be the best place to have it.

4. I am sending out a lot of flowers, seeds, and vegetable and grain seeds. We ought to have someone down there not only to plant the flowers but to lay out a vegetable and grain patch. The vegetable and grain should be laid out down near the farmhouse, and of course the flowers on the hill.

Sincerely,

JW
