Lupe – how would you feel about an event like this:

- Symposium on Renewable Energy and Green Building
  - Sponsors:
    - Stewards of the Earth
    - EDCO
    - Edison
    - City of Oxnard
    - Workforce Investment Board (WIB)
  - Goals:
    - Highlight AB32 goals and mandates.
    - Show state of the art in related technologies.
    - Describe emerging job opportunities, and related training needs.
    - Show renewable energy options for use in Green building design.
    - Discuss local regulatory incentives to promote the above.
- Business Expo on Renewable Energy Companies and Products
  - Sponsors:
    - Oxnard Chamber of Commerce
    - Edison
    - Others?
  - Goals:
    - Showcase local businesses and products.
    - Incentives for conservation.
- Organization and Funding
  - Organization: the Symposium and Expo would take place simultaneously, all in the same overall venue, with the Symposium consisting of presentations and panel discussions in one room and the Expo being displays set up in an adjacent area.
  - Funding: Edison, EDCO, WIB, others?

This is very similar to what you gave me yesterday in terms of overall goals. The only substantive change is that this format will give a little separation and clarity to the policy discussions (Symposium) and the current business products and opportunities.

Delighted you have additional ideas; structure of this event is critical.  
Thanks!  
Lupe

Lupe -- I'm mulling over a couple of other thoughts about the structure of this event, so I'll need another day or so to get this back to you. But I'm working on it!

I started Friedman's book yesterday evening. Great stuff! Thanks again.

11/8/2008

Steve,  
Super great meeting, Thanks!  
Please add your comments to this and return to me; I want to forward to Rudy Gonzales at Edison.  
Lupe
