Councilwoman Jane Tolmach  
Oxnard City Hall  
305 West Third Street  
Oxnard, California 93030

Enclosed copy of Rule 60 you adopted yesterday. I thought someone could have seen that you had a copy.

Your judgement in not adopting Rule 67 from L.A. and Orange county has been born out by this article in L.A. Times of today. Rule 67 didn't stop a thing P.U.C. is concerned.

As a member of the Ventura County Air Pollution Advisory Board, representing this supervisorial district, might I encourage your continued practical concern of our environmental health. Adoption of rules and regulations on emotionalism has resulted in drastic setbacks at a later point in time. No more fossil fuel plants in the Oxnard Area is what Rules 60 and 67 are saying.

To translate, hence nuclear power or equal in the future. This you can see your and our discussion opens up other provocative questions at a later point in time, as will the ecology impact of Falcon Plastics disposal and International Paper disposal and local chemical disposal including our own sewer plant disposal.

God bless you for your dedicated time. I, for one, feel we have now a dedicated, practical, decision making city council. Though I do not agree with each of you all the time in your decisions I am impressed with your collective cross section integrity.

Sincerely Yours,

A handwritten signature in blue ink, appearing to read "John F. Conroy".

John F. Conroy  
Director of Engineering and Maintenance
