Health Education.....Henry F. Fricker

School Administration.....Raymond H. Harrison

Secondary Education.....Stephen V. Ballou

Administrative Assistants

Laboratory School.....David Haimbach

Graduate Studies.....Morris L. Bigge

Field Studies.....Andrew D. Rippey

The Education Division utilizes the resources of the college in the preparation of teachers, administrative officers, and special service personnel for elementary and secondary schools. Teacher education curricula are developed on the assumption that a teacher or administrative officer needs a broad and liberal education, and should be master of the subject or subjects he teaches. This training which is supplemented by professional education gives knowledge of pupils, familiarity with teaching problems, and meaning to the subjects of instruction.

The division offers majors and minors in education and health education for the bachelor of arts degree; the bachelor of education degree; the master of arts degree in education; and programs leading to various types of credentials for school service.
