

The major issue facing Oxnard in the coming ten years is growth, whether it improves Oxnard or destroys it.

The council's full attention should be toward making Oxnard a better place in which to live.

To use planning as a device in achieving and maintaining a balanced city free of noise, air and water pollution requires uninfluenced intelligent, informed and courageous councilmen/ whose decisions are ~~unaffected~~ by special interests. We need to aggressively and selectively seek the best clean industries, cautiously stick with planning standards relation to ideal percentages of industrial, commercial and residential zoning and in the placing of industry away from residential areas.

I am opposed to expansion of the Ventura County Airport and the Oxnard Airforce Base to a jet airport.

We need improved services and more neighborhood parks.

The only property on the Oxnard plain that I and my family own is our home. My votes on the council can ^{not change} ~~have no effect~~ on our income.
