

*This is probably the most important issue facing Oxnard.*  
County AIRPORT! The councilmen must concern themselves with keeping services updated -- <sup>to mention one</sup> ~~for example~~, we need to bring our neighborhood parks program up to what is needed for our current population. ~~Children grow fast -- their needs~~ can't be postponed. *well lighted*

There are so many important issue that will need to be resolved that it is impossible to mention them all. Some are overall, such as double taxation, protecting Oxnard's proper role in the <sup>Proposed</sup> ~~Brother~~ County water and sewer districts, ~~etc~~  
Some issues relate to areas. We need to unite as a city under the leadership of the council to solve all these problems, not pit one neighborhood against another, one shopping area against another. If there is a problem anywhere in the city it is ours as a city. Together we can solve them.
