

BAKERSFIELD CENTER

The Bakersfield Center operated by Fresno State College on the Bakersfield College campus was established by legislative action in September, 1956. The program at the center is an integral part of Fresno State College and is under the general direction of the Dean of Educational Services and Summer Sessions. It includes the recommended college program of courses leading to a bachelor's degree with a major in elementary education and the kindergarten-primary and/or general elementary credential. The program is restricted to upper division courses applicable to this degree and these credentials.

Students who plan to attend the Bakersfield Center as regular or limited students must apply for admission to the Coordinator of the Bakersfield Center, Fresno State College, Bakersfield, California.

Students who plan to complete credential requirements at the Bakersfield Center must be separately admitted to the credential program. This is in addition to the general admission procedures above for regular or limited students. For information concerning procedures for admission to a credential program write to the Coordinator of the Bakersfield Center.
