

I cogitated (meditated or considered) intently &
eventually succeeding, through an incomparable
feat of sheer cerebral (of the brain, intellect)
legerdemain (trickery, or deceit), in conjuring
(producing images or appeal to a summoned youth)
up a mental facsimile (exact reproduction or
copy), a veritable (actual, true) mnemonic
(helping or meant to help, the memory) hallucinator
(imaginary obj^s seen) as it were, embodying
all your socio-physical attributes (characteristics
or ~~qual~~ quality of a thing) and idiosyncracies
(idiosyncrasies), but believe me ---
... it ain't like you ever been.
