Speaker 1

Of much of. Our members, honorable judges and distinguished guests. My name is Maya Christine Garcia. Welcome. Latino, Chicano, Mexican, American, Hispanic and Mexican American. These are on different ways which we identify ourselves regardless of what we want to be addressed. Each of us have something in common. We want to be successful. For me, success is not determined by how much

money we make or how many years we've gone to college, but by our happiness and the determination to accomplish our own goals.

00:17:33:16 - 00:18:02:28

Speaker 1

In order to achieve a success, we must take advantage of the educational system and the opportunities that are available. It is. It is great the education that we can. That is knowledge that will open more doors for success. Another part I am proud of the gen and past generation that have made it possible for my generation to have the opportunity to seek an equal education.

00:18:03:00 - 00:18:32:18

Speaker 1

Another part of success is the importance of family. For me, family is the first and most important part of success. In it, we are fortunate to belong to a culture in which family is strongly valued. At a family that teaches us moral and values. It is where self-pride and self-respect is established. It is where trust and honesty is learned.

00:18:32:22 - 00:19:02:04

Speaker 1

And most importantly, it's what love is created for ourselves, for our family, and for the people around us. Another important part of success is the realization of one's culture. It is through our culture that we learn who we are and where we are from. From this realization, we can only feel a sense of pride. And from this pride we gain self determination to challenge and conquer any girl.

00:19:02:06 - 00:19:35:09

Speaker 1

It is then that we can teach others to respect us for who we are and where we are from. Lastly, to achieve success, we must have a vision. My vision is to become a national leader, prominent a congresswoman. It is then that I will continue to represent our people and the struggles and obstacles that we face to the continuation of my education, the love and the support of my family, the understanding and pride in my culture.

00:19:35:11 - 00:19:52:05

Speaker 1

That I am a realization of my vision. That I will accomplish my goals and achieve success. But as yet.

00:19:52:08 - 00:19:54:06

Unknown

Never Veronica, Nicole.

00:19:54:06 - 00:19:56:15

And being a tutor in her spare time, she enjoys volunteering on city and community project and is a lifeline.

00:20:36:24 - 00:20:53:19

Speaker 1

But I would like to attend a four year university to a degree in human biology, followed by a medical degree. Ladies and gentlemen, Miss Veronica Auti.

00:20:53:22 - 00:21:24:19

One of the things you know, senora, you didn't know that there were other senora is a it. I feel privileged to have this opportunity tonight to share with you a journey, a dream that is possible because

of my family and generations. You cannot Americano Chicano. An organization like the GI forum. You have sacrificed a great deal for me and others like me to realize the possibilities of being.

00:21:24:21 - 00:22:01:13

Speaker 1

As a first generation American and Mexican descent, I was raised in an environment which emphasized those traditional family values which characterize the best of both of these cultures. In addition to the ethic behind work, I was taught that education represents the key to social, economic, and political success. And while we certainly had a profound influence in shaping my current aspiration to begin undergraduate studies, other lessons, models, and imparted by my mother have been equally important to my present academic and emotional development.

00:22:01:15 - 00:22:25:02

Speaker 1

When I was three years old, my mother was left to raise her children by herself, despite having acquired only a high school education. My mother recognized the importance of academic achievement, made many personal sacrifices to ensure that her children would be afforded the benefits of private schooling, but only did she worked for another day. She also often did, with many pensions, to provide the many other necessities that the family required.

00:22:25:05 - 00:23:02:29

Speaker 1

In the course of this upbringing, I recognized my mother's sacrifices and began a real child to assume major responsibility, such as working part time to contribute to my family's resources. And an important complement to the formal education process was the empowerment of being served in a family, creating a home environment conducive to learning. While my grandparents and uncles and godparents could not help financially, they did contribute in other, perhaps more important way by transporting me to and from school, by preparing meals, and by showing that I completed my homework.

00:23:03:01 - 00:23:32:18

Speaker 1

This feature throughout my upbringing created most directly my current impression considering the importance of teamwork and the support of family, particularly during the difficulty. While I am confident that this work in the family welfare of my life, I have already discovered the contemporary

relevance of this teamwork philosophy to my family and peers. Both of my classmates and I have been favorites that Archbishop many high school over the last four years, and consistently excelled in school.

00:23:32:18 - 00:23:54:20

Speaker 1

As a direct result and offer convinced that there are many advantages to forming such groups. When I have done this, I have found that my knowledge has deepened beyond that which I would normally acquire had I attempted to learn the same subject independently. I'm the first person in my immediate family who has had the opportunity to attend college.

00:23:54:22 - 00:24:24:20

Speaker 1

I believe that the lessons of my formative youth, for sure my successful completion of this endeavor, especially since I can apply as the primary motivator, the teamwork of philosophy I pursued from my family. I intend to use these life experiences to show others that working as a team can promote both motivation and determination. This fall, I will begin my studies as a biology major in preparation for four years of medical school, followed by a residency in obstetrics.

00:24:24:22 - 00:24:33:19

Speaker 1

I will return the benefits of experience that I will acquire through higher education back to this community.

00:24:33:22 - 00:24:36:11

I love the opportunity to speak with many teenagers from local high schools in junior high about their dreams and go for college. Career. Many of the 25% came from lower income in my own family, and know that there is no place for them in college. They want to see that these changes had occurred, giving someone lessons in who they really were. And moreover, eight ideas after they have been forced into society that lack of education and low income and minority children. With the help of concerned parent, teacher citizens, more governmental aid, and has made the implementation of more motivational programs rather good.

Speaker 1

Those ones can be held. I can only hope that more people will be kind. Thank angry as I am and get involved in the local educational system. Education is a key not only to the future of our country, but for the future of our Chicano Latino community, and we cannot afford to continue learning from each other and talking to crap as well.
