

requirements shall be evaluated. Students planning to prepare for school service credentials, see *Education Division—Admission to Credential Programs*.

Changes in Credential Requirements

Students who, on July 1, 1963, were enrolled in the teacher education program and who, on that date, had completed two years of college work may continue in the various credential programs described in the *General Catalog*, provided they complete the requirements within established time limits. *Students who do not meet these conditions will be required to qualify for school service credentials under the revised credential structure. See Education Division.*

RECOMMENDED HIGH SCHOOL PREPARATION

The following high school work, while not required, is advisable as minimum preparation for any college course leading to a bachelor's degree.

| | |
|---|----------------|
| English | 3 year credits |
| Algebra | 1 year credit |
| Geometry | 1 year credit |
| One foreign language..... | 2 year credits |
| American history or American history and civics..... | 1 year credit |
| Other junior or senior social science | 1 year credit |
| Botany, chemistry, physics, physiology, or zoology..... | 1 year credit |

Since certain fields of study require high school preparation in definite subjects, the student should consult the requirements indicated in the field of his choice.

In fields such as natural science, mathematics, social science, and humanities a maximum number of high school credits should be obtained in appropriate subjects in English, mathematics, science, and foreign languages.

ENTRANCE EXAMINATIONS

The examinations listed below are required of entering undergraduate students as a part of their admission procedure.

College Aptitude Test: All entering undergraduate students, except foreign students, are required to submit scores on the College Entrance Examination Board Scholastic Aptitude Test (SAT). This test may be taken at any testing center established by the Educational Testing Service on any date listed in their published schedule. In general, students should arrange to take the test at least a month before entering college. Information may be obtained from local high schools and colleges regarding test schedules, application for test reservations, and payment of the \$5 registration fee for the test charged and collected by the Educational Testing Service.

Reading Examination: Because success in college is dependent upon efficiency in reading, accurate information about a student's degree of reading skill is essential to intelligent planning of his program. To provide this information, Fresno State College requires all entering undergraduate students to take a reading test. Students must file reservations for this test on forms provided by the Admissions Office upon receipt of a completed application for admission. Students whose scores in this test are significantly lower than their scores on the college aptitude test should enroll in English 6.

English Examination: Entering undergraduate students must take an objective examination which measures competence in spelling, grammar, diction, sentence structure, and punctuation. Students must file reservations for this examination on forms provided by the Admissions Office upon receipt of a completed application for admission. Students who do not pass the examination or who enter too late to take the examination are required to enroll in English A. Transfer students who have completed freshman English or who have satisfactorily completed a course in English fundamentals equivalent to English A at another collegiate institution are excused from the examination.
