

Am looking forward to
seeing the candle. Tell
all the family Hello for Tuesday evening
me. When'd you get your
cute correspondence paper? June 14, 1966
Dearest Patricia:

Will wonders never
cease? Your letter was postmarked
"June 13 PM" (yesterday) and it was
delivered to me before the evening
program tonight! From San Jose to
Manzanita Lake via Redding in 24 hrs!
If mine has the same good luck in
reaching you it will be delivered on
Thursday. Here's hoping.

All is going well. I was fogged
by the heat in the Sacramento Valley
when we came up and my first
work day - which was a long one - pretty
well broke me but I was much better
today and I've made me gain health-
wise that pleases me mightily. My
appetite for fresh fruit is back - It's
been gone three years. I used to eat
two or three pounds of fresh fruit daily

then I got to the point where I'd
buy some + completely forget
about it because my craving was
gone. The last two days my appetite
has been back and I've eaten
about $3\frac{1}{2}$ pounds of grapes, peaches,
nectarines and cherries! Somehow
I expect to continue and it has
helped me greatly. My interior seems
to be behaving semi-normally
now + I have a lunch I can stand
on laxatives completely or nearly so,
in a few days. This will please John
Rumsfeld and, I suspect, surprise
him also.

Lassen + surroundings are as
wonderful + beautiful as ever. The
big Jeffrey pine trees and white fir
are as beautiful + inspiring as I've
ever seen them. I constantly wish that

2

you and Connie could be here to
share their beauties with me.

The evening Wayne Rhoden & I
came in we had an absolutely
gorgeous sunset. There wasn't a cloud
in the sky but the whole sky dev-
eloped an intense, slightly brownish
golden color. It was magnificent.

Yesterday & today we had clouds in
the P.M. This P.M. They nearly covered
the sky for an hour and a half and
it looked as if we might be due for
a thunderstorm like the one two years
ago when you were here. Then the sky
cleared again and we had a cloudless
sky for the evening meeting and the
alpen glow on Lassen & the associated
peaks.

There is a nice new crop of
college girls & boys working for the
lodge and they seem to be doing their

best to make everything agreeable to us. I like these resorts that the college kids. There is a freshness and a aliveness about them that professional waiters, hotel clerks etc. never have.

We tried to start folk dancing last night but the player (one of Audio-Visuals "best") was out of order. The needle was bent and a new cartridge is needed. This is the machine that was given to "Tilt School" though the request for a carefully checked machine was in to A-V. a week and a half before we left San Jose. We got a last minute grab with nothing checked. One of our boys straightened the needle today and so we got started tonight with a good crowd & much enthusiasm. Will time and space be about up (8:11:20) so bye-bye. It doubtless will be too late tomorrow for another letter. Love - Carl

Dear Patricia:

Made trip in
prime state. In-
sufficiently certain seats
Veddy, Nicolson.

My loved you on
the Sunday phone call

to hear, having a beautiful
as ever. I'll get to you
to meet my heart soon.

Love,
Hubert A. Lowman
