CASA DEL MAR

SAN SIMEON, CAL.

Dean Miss Morgan; The ^{hot water} heating plants in the small houses are not very satisfactory. I think when we build the new service building all the hot water for everything should circulate from there. We will have immediate hot water then and plenty of it.

2. May we plan to finish music room as next indoor work?

3. I don't need swing mirrors in my bath room. I don't suppose they are going there.

4. I was over at the other ranch yesterday. We should furnish the dining room and living room and plant a small garden. I think some climbing roses would be good among other things.

What looks to be a very fine lightbox is in Mrs. Taylors hall; is it old or modern. It looks like a burr walnut. I mean Anne price but of course I did not stop to examine it closely.

There are a couple of very mother's quilts there. I think these are such personal things that I should have them here.

I will go over the Hacienda things and see what I can send to this ranch house. ^{Sincerely} W. R. H. H.
