Dear Michelle Serros,

Thank you for coming over to Anoyo Seco to talk to us about your books. Your life is very interesting how you tell your stories are great. You are a great author and I think you can write more books with the ideas you come up with.

I hope you can come and visit us again. Even if I'm in the 8th grade you can visit for other kids to know about your books.

I like hearing your books because each story isn't long and very interesting to keep your head in. I hope you keep being successful.

My goal is to make or program video games. It will take a lot of knowing math and science but I think I can do it.

Take care

Sincerely,

Michael Wilson
