

Saturday Aug. 20, 1966

Hi, Patricia:

As per instructions, I gave your plant its $\frac{3}{4}$ cup of water late yesterday P.M. It drank the full allotment - at least none of it showed up in the saucer below the pot.

Also, your yucca plant under the stairs outside my door is growing vigorously. Soon it will need to be transplanted and I suppose a place should be sought

for it at 457 Los Padres. What
think you?

Doris seems to be improving on
celery juice and Rumsfeld's pills but
she puts in long days.

Mrs. Shepard at the Sewing Machine
Co. says they'll hold your Necchi for you
& she'll be pleased to give you time for
learning the machine on the 29th. So
everything is moving smoothly.

I'll be listening for your call Mon. or
Tues. before you take off with Leon for the
high places. Love as always - Carl
