Flor y Canto, an ancient theme brought to life again with a contemporary vitality.

Flor y Canto... flower and song, the art, music, dance and drama of the ancient Mexicano. This was more than an expression, but also a reflection of his roots and reason.

Flor y Canto does not speak of, but rather evokes an ever present communication of thought and feeling.

Tonight's presentation is a combination of both past and present artistic form. The content, however, remains to be that same expression and reflection.

This timeless theme is regenerated in a spirit of celebration...
