Concerning Fans and Irons.

~~Notice~~ To all people living within the center. . . .
All electric fans and irons, which were taken when the baggage was searched by the police, are being returned under the following conditions:

1. Irons are to be used in the laundries only.
2. Fans with mechanical attachments to cause them to change direction of air flow must have such mechanical devices disconnected.

(The wiring in the barracks is not strong enough to allow the irons to be used in them. Likewise the same goes to the fans unless the attachments are disconnected as stated above.)
