

## COURSE NUMBERING SYSTEM

### DEFINITIONS AND ELIGIBILITY

#### Lower Division Courses

Numbers 1-99 designate *lower division (ld) courses* designed for first- and second-year students, but open to others.

#### Upper Division Courses

Numbers 100-199 designate *upper division (ud) courses* designated for third-, fourth-, and fifth-year students. Such courses will count as graduate work when taken by students who have graduate status. Freshmen and first-semester sophomores are not normally eligible for upper division courses; but second-semester sophomores who have completed a minimum of 45 units are permitted to enroll in the upper division courses for which they have adequate preparation. Course number 190 designates independent study. See *Regulations and Procedures* and specific course prerequisites.

#### Graduate Courses

Numbers 200-299 designate *graduate courses*, open to bachelor's degree holders with adequate preparation and ability. Graduate courses are generally conducted as seminars, requiring original research; some are lectures based upon instructors' research; all involve originality, initiative, and independence of judgment. A second-semester senior with superior preparation and ability may be admitted by the instructor. Course number 290 designates *independent study* at the graduate level; 299 a master's degree thesis or project. See *Regulations and Procedures; Degrees and Credentials*; and specific course prerequisites.

When 200 series courses are taught by extension and carry the designation E after the number, they are counted as upper division courses (100 series) in master's degree programs. For limitation of credit in these courses, see *Extension Classes*.

Numbers 300-399 designate courses whose purpose is to meet professional needs which cannot be served by established undergraduate or graduate offerings. These courses assume completion of the bachelor's degree and professional competence and focus on problems the enrolled students are encountering in their professional service. Although 300 series courses are designed primarily for purposes other than use on degrees and credentials, in individual cases and subject to departmental approval, 300 series courses may be applied toward degree or credential programs for which the course work is appropriate.

### OTHER DESIGNATIONS

For *symbols* appearing after course numbers, A-B indicates a two-semester sequence normally to be taken in order; A and B courses which may be taken independently are normally listed as separate items. The following symbols usually indicate: L, a laboratory for another course; F, a field course; E, an extension course; S, a course listed only in the *Summer Session Bulletin*.

*Figures* in parentheses following course titles indicate the number of semester units a course carries, and the maximum total credit allowed is indicated by *max total* following the number of units. In general, each unit represents one hour per week in class and two hours in preparation. Courses involving laboratory, activity, or other application, normally require additional hours of class attendance. Lecture, laboratory hours, etc., following course descriptions indicate deviation from the usual one class hour per week for each unit of credit. Under special circumstances, courses may be offered with reduced unit value with approval of the Dean of the College.

Course *prerequisites* are listed at the beginning of the course description and under *Definitions and Eligibility* above. Unless otherwise stated, the A part is prerequisite to the B part of year courses. Student should check prerequisites before enrolling.

*Course offerings* for each semester are listed in the *Schedule of Courses*.
