

limited to graduate students; H, an honors section of a departmental course; HP, an honors program course or seminar; IS, an international studies course; L, a laboratory associated with another course; ML, a Moss Landing Marine Laboratories course; S, a course listed only in the *Summer Session Bulletin*; T, a topics course which can have varying subject matter within an area, usually repeatable for credit (at times only the generic title is given in the catalog; the *Schedule of Courses* and the transcript of record give the specific title); X indicates an Experimental College course which will be listed in the *Schedule of Courses* and be described in the *Experimental College Bulletin*.

*Figures* in parentheses following course titles indicate the number of semester units a course carries, and the maximum total credit allowed is indicated by *max total* following the number of units. In general, each unit represents one hour per week in class and two hours in preparation. Courses involving laboratory, activity, or other application, normally require additional hours of class attendance. Lecture, laboratory hours, etc., following course descriptions indicate deviation from the usual one class hour per week for each unit of credit. Under special circumstances, and with the approval of the Academic Vice President, courses may be offered with modified unit value.

Course *prerequisites* are listed at the beginning of the course description and under *Definitions and Eligibility* above. Unless otherwise stated, the A part is prerequisite to the B part of year courses. Student should check prerequisites before enrolling.

*Course offerings* for each semester are listed in the *Schedule of Courses*.
