Dear Mr. Lacy - I want more light in the new rooms than Miss Morgan gives us. It will save time and money to have the lights put in at the beginning instead of later. In the lower of the three small rooms now needing completion there is one lantern. There should be four or six. The table in that room I do not like. It is poor quality. It is too big and it is poor quality. We have a great number of good

ones why not use one.
 We should also have one or two
 bed side tables in each room
 We must get another window in
 that room no matter whether it is
 symmetrical or not. It needs light
 in the day time as well as at night.
 Please see that there are many
 connections for lights in every room.
 This is a matter with me I like
 a room that you can see your way
 out of.

by cutting down the
bricks at the back
two or three inches
and the floor of
the fireplace could
be raised a couple of
inches.

These things would
help some

but
the fire should be
enlarged.

W.R.V.

Dear Mr. Loony

The flue in
the study fireplace
will undoubtedly
have to be enlarged.

There is little that
can be done otherwise
and the fireplace smokes
at the beginning. When
it clears up when there
is a big draught but
not until the room is
full of smoke.

The fireplace could be
made a little deeper

Candle stands and to
put shades on them
and to have about
three bulbs at the
top of the candles under
the shades.

If we don't do this
I will have to get a
dark lantern to find
my way about the
place.

Oh! and one thing more
please give me white
ground glass globes
and not these chocolate
ones Sincerely

M. R. Straut

Memorandum for
Mr. Loary

As soon as convenient
will you kindly give
me ^{more} light in
the ~~lecture~~ ^{book} study

If we cannot have
more lights in the
upper part of the lantern
at least let us have
a good strong light
there and a cluster
of five lights in the
lower part of the lantern.

Furthermore I think
it would be well to make
lamps out of the iron
