LINK  
HEARTS AND RIVERS  
FOR  
PROSPERITY  
AND INTEGRATION  
OF INDIA

6326 WOODMERE COURT  
FLINT, MI 48504  
U. S. A.

Perrineal disasters of floods and drought require concern and action. It takes all of us to ensure proper water resource development and management. Everyone should participate for improvement in quality of water and its equitable distribution for prosperity of India.

## TRUST OBJECTIVES

- Create an awareness of the problems and solutions to the Indian water resource development and management.
- Support the linkage of northern and southern river systems in India.
- Develop a Ganga Kaveri exposition center for public education on water related problems.
- Establish a Ganga Kaveri Institute for youth in India for scientific and vocational education.

## PROJECTS

### *CREATE AWARENESS*

- Afforestation at Talakaveri.
- Deepening tanks for drinking water in Rajasthan.
- Water recirculation and efficient utilization for conservation in Malladihalli Karnataka.
- Kumbhamela march from Talakavri to Allahabad.
- Publication of GANGAYANA.

### *Interlinking of Rivers*

- Seminars with Engineers and Scientists.
- Discussions with Economists and Environmentalists.
- Reviews of literature on national water grid.

### *Exposition Center*

- Create audio and video programs.
- Build a circular movie theatre.

### *Ganga Kaveri Institute*

- Hold youth activities, workshops, and camps

## DROUGHT

Drought  
Affected Areas

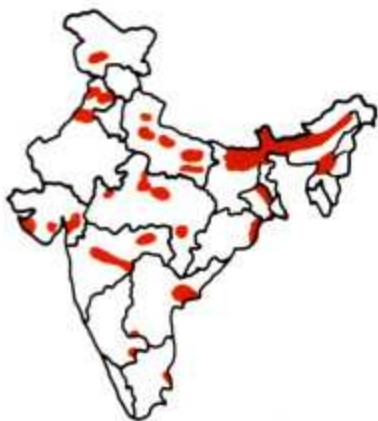

Every year:

- Loss of over 1000 crores of rupees
- $\frac{1}{3}$  of India stricken by drought (151 districts in 12 states).
- Increase of urban migration.
- 300 millions of people affected.
- 150 millions of loss of labor.
- Increased impoverishment.

## FLOODS

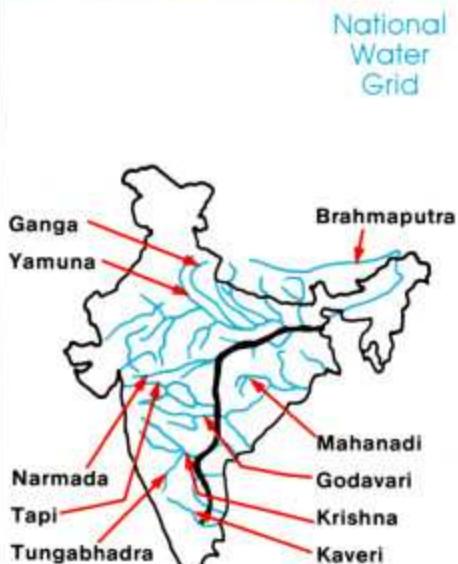

Flood Affected Areas

Every year:

- Loss of over 2000 crores of rupees
- $\frac{1}{4}$  of India under floods.
- Loss of life and property.
- Excessive waterborne diseases.
- Loss of millions of houses.
- Soil erosion.
- Siltation of rivers.
- Increased impoverishment.

## SUGGESTED SOLUTIONS

- Interlinking of rivers.
- Afforestation.
- Watershed management.
- Optimum water utilization.
- Rejuvenate tanks for drinking and irrigation.
- Change crop pattern and food habits.
- Consumer of water must be part of decision making.
- Water be declared as national asset.
- Improved national and international water resource development and management.

## HOW CAN YOU PARTICIPATE

- Contribute time, effort, and funds towards G.K.B. Trust Projects.
- Sponsor and participate in scientific seminars.
- Subscribe to GANGAYANA Journal and contribute articles on water.
- Participate in the committee activities.
- Disseminate and organize local groups to support and promote objectives of the trust.
