Lagos statement

Sept 26, 1961

Where I stand

Concerning several of the issues I deem most important, I will fight for:

Whatever laws are necessary to protect the people of this state from the No 1 menace facing our Nation today - godless communism - both from within and without.

Additional legislation & action to effect relief ~~confront~~ the narcotics problem. I would introduce legislation to increase the number of state narcotics agents; & I would ask Fed agents more fully on Fed Government to compel through our foreign aid program, great corporations from countries that are a source of narcotics.
