Julia Morgan,
San Simeon, Calif.

Think big Victrola discs and Radio discs should be inserted in panelling in Assembly Room at ranch and that it should be inserted in such way as to be practically part of decoration naturally imagine same thing should be done at beach

Am perfectly willing wait until tuesday night to fill pool would like have pool after that because ranch at this time of year without pool lacks half its attractions Dont think we should resume work on marbling big pool until we all go east then there will be ample time to finish it without putting pool out of use Want have Salt water pool and good place for it would either be in contemplated persian garden or on Chinese Hill will you kindly consider that think it should be very big pool say ~~forty~~ forty by one hundred twenty suppose we could pump salt water up with series of stations and then perhaps continue using it over and over with local pump and filtering station
