

Dearest Patricia : Sept. 11, 1966

It certainly was good to see your lighted windows when I drove in from Asilomar tonight - and to get your note in my mail box! Seems as if you've been gone a long time though it's only a week and a busy one for me. I've got lots to tell you and, of course I want to hear all about your week from here to Mexico & back.

Tomorrow morning I go over to The Science Bldg. for a Science Division meeting. Matt

Vessel is the interim head of the new division and he is calling the meeting. I'll be back shortly before noon and waiting for your call.

Have had a very full 3 days at Freshman Camp & played one of the key roles. Quite enjoyable throughout.

Went to Point Lobos yesterday P. M. hoping to find a yellow jacket nest I'd seen there early in July but all I found was some of the paper of which it had been made. It was too obvious & had been destroyed by some one. I wanted to photograph it. Well I'll see you tomorrow
Love - Carl.
