Subject: RE: Funding - Proposal

Hi Lupe,

A meeting by phone at this point of the semester works best for me. The university has the ability to conference call.

Best,

frank

Subject: Funding - Proposal

Frank, Don:

Carmen and I thought it would be best to channel funding for the Renewable Energy Project through CSUCI rather than start a non-profit organization, I hope you agree this would be a better way to administer the project. I met with Amanda yesterday to discuss this option - I also spoke to Marti DeLaO - both indicated the arrangement would work.

Amanda kindly and patiently helped me outline basic costs involved - if the University is to become the principal administer of the project. She will forward the figures to us in a few days.

In order to complete the proposal, Amanda suggested that we meet to discuss exactly how each of the proposed activities and recruitment of students will be carried out. The Draft paper (proposal) outlines some of the activities and recruitment of students.

Question? how do you want to do this - via phone or meet in person? We also need to call the

meeting with Edison, Citibank and other supporters. I would like to talk to you about that ASAP
- I will be calling you.
Lupe
