Dear Ms Tolmach,

We will be setting up interviews this week in an effort to more clearly outline your views in this campaign. I will be asking each of the following questions:

1. Some county officials say that Governor Brown's "lowered expectations" just mean increases in the county tax burden to pay for the State mandated programs. Is this true or not? Explain.
2. Would you support refinancing the Agricultural Labor Relations Board or not? Justify your answer.
3. Do you feel schools should be financed through local property taxes? If not, give the alternative.

explains - shift of burden of burden - need people - state - etc.

the creation of this board - This solution was found after prolonged agreement by all parties. It is possible to give time to function
