

Phone me when you have the birth certificate. To the you
dearest Patricia: I pick it up here
May 20, 1965

First my thanks for the snapshot of you and me standing together in front of your apartment. It caught you at your best and I seem to have been in good shape too - with the beautiful tie you selected for me at the S.F. airport showing strongly. Keep your eyes open for other ties that please you & look well on me (the two are synonymous) for any day I expect to be with you I'll wear one of them - I keep them for the purpose. I felt especially good the day that photo was taken - because you asked me to stand with you and you put your arm around me as the only natural thing to do - and as I had had several emotional reverses - as I have tried to tell you in the preceding few days - This put everything to rights. I knew then that beyond doubt - you felt that I belonged, I hope that feeling will never change. Just give me indications from time to time as you've been doing as to what you expect of me - let me do things for you & with you as much as possible like taking your player back to Alcor P. - and let me spend a little time informally with you in your apt. or mine.

I had to say that just because I so prize the picture and the little note - the testimonial

of faith that accompanied it.
However, I've just listened to an hour's
talk from K PFA by Felix Greene, a man
born a Britisher - now an American -
about the interplay between thought in Britain
the U.S., Soviet Russia, and Red China - Greene
travels a great deal - his ideas seem to be
sought by many social & political leaders - and
educational. He has spent much time in Russia
& China as well as Britain & the U.S. He is an
lively speaker & one of the persons who must be
listened to by Americans if the American world
is not to collapse inward in a few years. He
is an animated & attention holding speaker.
We must get him to talk at San Jose State
some time in the fall. His home base is
Palo Alto and I'm going to try to make con-
tact with him some time soon - or as soon as
possible & start the wheels rolling. It doesn't
matter under whose auspices he comes
as long as his coming can be adequately pub-
licized & he can be heard! You'd be excited
if you'd heard his talk. I'd rather have him
come under (or at least with joint sponsorship
ship) some student group. SEE - y can
be cleared of petty political implications -
through Ron. - if you still feel that he is the
best avenue - or some other - and I'll
do all I can through Spartan Daily, Campus
Digest and the City Papers - He should have a

maximum possible audience!!!
~~Also~~ You've said very little to me
about how lately - you'll have to bring me
up to date - please keep me in your con-
fidence - It will be life or death to me
and remember what I've repeatedly told you
"You can trust me utterly." I mean it and
I'll not break your confidence. You will be
strengthened & made more secure in your
own feelings, too, if you can consider me
a true confidant & friend & not (which
I'm sure you don't think others may) just a
source of advice about mundane things
or of financial help - which is between you and
me - You are a source of great pride and
uplift to me also. I'm proud to be your
father - a happy term that is easily under-
stood - but I'm proud most of your strength
& hearty as a person & a personality and
of your achievements scholastically.

Also - I'm beginning to get excited
about my proposed program growing
and I was much encouraged by Dr. Rubins-
feld's saying that in most respects I seem
to have improved a great deal. Now I'm begin-
ning to think that maybe I can last a
number of years - long enough to get the major
part at least of all my envisioned projects com-
pleted -

together perhaps with you and your mom
on a combined effort to get her story into
print. It might well bring her enough
income to ease the next 10-15 years for
her while the little brothers are growing
up. - but it will have to be good and
that will take all three of us - but if I am to
have the strength + to grow stronger who
knows - maybe I'll last another
20 years + see you completely successful
in some field.

If I'm better, we can begin with a
few days of camping this summer +
with some other activities. Then I'll "break
my figurative back" for a chance to go to
Europe with you - (in summer of 1966?) The
possibility takes my breath.

Anyway - believe or not - God bless
you - in everything you do, for
I'll be helping in any way I can.

Think over the schedule I gave you
yesterday - so we can accomplish such of it
as is possible. On Thurs June 10, I'll be giving
my ~~Entire Test~~ Philos. of Sci. Test from 10-12:30
so if we look at suit on that day, it should be in the
P.M. - Will you have the time? And do I still get the
chance to hear you read any Shakespeare? "Marriage
Italian Style" is back in town at the Little Italy Center since from
but I don't suppose we can spare the time. - Anyway
Do we have one more shopping date? Much love - Call
