

We are the graduates that didn't have a graduation ceremony when it was our turn to leave the school but we did everything we could to make our journey memorable. It is an unforgettable end for not having the chance to sit on the stage thinking about stumbling after receiving a diploma and that last picture with college colleagues. I wish we would have gotten the chance of experiencing these thoughts and feel these emotions. Even so, we have the memories of these 2 amazing years that have helped us mature and achieve so many things that we would have not thought, we would achieve by this age. For this, I would like to thank the mentors, peers, professors, friends, and family who supported us.

For now, remember that if we stay together we will have the strength to go through this pandemic and when we see each other again we will make sure to cherish every moment together. COVID-19 ain't got nothing on us! #proudspartan #sjsu2020
