"The Case Against LNG" by Loretta Lynch

"The Case Against LNG" is a four part video of a talk by Loretta Lynch, who served as chair on the California Public Utilities Commission from 2000 - 2005. The video is of a talk given by Ms. Lynch June 20, 2006 at Cafe on A in Oxnard, California.

Few facts have changed since Ms. Lynch gave this talk last year.

Notably BHP Billiton lost their bid to build a LNG terminal 14 miles of the coast of Malibu, CA, only to be replaced by NorthernStar's proposal 10.5 miles of the coast of San Buenaventura (Ventura), CA. there may be a connection that all new and proposed natural gas pipelines head east out of the Rocky Mountains, none head west towards California.

Kinder Morgan Energy Partners, L.P. and Sempra Pipelines & Storage are in the process of building a 1600 mile pipeline from the south east Wyoming hub to Ohio which will carry 2 billion cubic feet a day (Bcfd) of natural gas.

"Gas flowing from Wyoming and Colorado to the east has been constrained by inadequate [pipeline] capacity. Most of this gas has either been used locally or moved down the Kern River Pipeline to markets west of the Rocky Mountains." (Apache Corporation report) Kern River Pipeline delivers 1.8 Bcfd to California.
