STUDIO FOR DELIVERY TO
MISS MORGAN WHO WAS EX-
PECTED THERE BY MR. HELLENTAL SATURDAY.

Feb. 16, 1934.

Dear Miss Morgan :

I have just returned from the ranch. Things are progressing slowly but sufficiently.

I had a few suggestions to make to Mr. Looz.

I think the bear pits ought to be divided. We have spoken of this before. They are unnecessarily large, and by divisions down the middle, perpendicular to the road, we could make four pits out of two.

I think by arching each one of the four pits at the back we could make them look right, and at the same time provide a little cage space or closet space between the arches. The divisional could be iron bars or a concrete wall.

I suppose the concrete wall would look best, but I am not sure that it would. What do you think?

The difference in cost would not be great. In fact the whole proposition is inexpensive, and Mr. Looz thinks that by letting it out we could have it done cheaply and without interference with our other construction.

Sincerely yours,

W R HEARST

Miss Julia Morgan,
Los Angeles --
