RE: Monoplan

Dear Mr. Towle:

On March twelfth I wrote you inquiring into various aspects of your unit planning processes, and requested that I be "plugged in" to these processes.

In particular, I expressed an exceptional interest in planning for the Mammoth Lakes/Agnew Meadow/Reds Meadow area. I received some descriptive material of a general nature outlining the "Monoplan" concept, and assumed that I would receive more specific information as it became available.

I have just learned that a plan proposal has been made public as part of Phase III, but I have received nothing from you or any other entity. I would greatly appreciate immediate receipt of whatever information has been made public. This would include, but not be limited to, plan proposals, plans, draft EIS/EIR, final EIS/EIR, etc.

I am requesting that, in the future, I receive such materials automatically as soon as they become available.

Thank you.

Sincerely,

George W. Whitmore

Hal,

This is in Tehipite Chapter area (ie. Madera County) in part, and is of vital concern because of its very close relationship to the Minaret Summit Highway proposal. The chapter should be developing a position on it for recommendation to the NCRCC.
