Human Development, B.A.: Early Childhood Development Concentration (Available Online)

Human Development, B.A. Program (120 units)

Program Description

Human Development is an interdisciplinary program that integrates theory and methodology from disciplines such as anthropology, biology, linguistics, psychology, and sociology. The program explores the processes and mechanisms underlying developmental change and stability across the lifespan and the socio-cultural and historical contexts in which development takes place.

The Program's curriculum aims to develop in students a basic understanding of major research findings and core concepts in human development, the ability to analyze and evaluate theoretical and practical issues in the field, and the skills to apply learning to diverse communities outside the University. The Program strives to create an optimal learning community that values and fosters collaborative learning and dialogue between and among students and faculty from diverse backgrounds.

Program Learning Outcomes

Students graduating with a B.A. in Human Development from California State University, East Bay will be able to:

1. Demonstrate core knowledge in biological, psychological, and socio-cultural aspects of human development.
2. Model critical thinking ability by summarizing, comparing, synthesizing, and critiquing interdisciplinary human development perspectives.
3. Assess information; design and conduct individual and/or group research projects, and present them clearly, logically, and persuasively.
4. Identify and evaluate problems by applying human development knowledge in diverse contexts; and
5. Infer the ability to understand themselves reflectively and others empathetically.

Career Opportunities

The interdisciplinary approach of the Human Development Program provides students with excellent preparation for graduate study in a wide range of disciplines, including anthropology, education, social

work, sociology, medicine, public administration, law, criminal justice, psychology, and counseling. It also prepares students to work with people of all age groups from diverse racial, cultural, ethnic, socioeconomic, religious backgrounds, and sexual orientations. Students majoring in Human Development find a variety of career options in areas such as:

Education • Social work • Health care • Counseling • Law and law enforcement • Human resource and organizational work in community or corporate settings

Features

- Human Development faculty members come from a wide range of academic disciplines, including anthropology, biology, human development, linguistics, neuropsychology, psychology, and sociology.
- Students select one of five Concentrations: Early Childhood Development, Childhood Development, Adolescent Development, Adult Development and Gerontology, or Women's Development.
- Minor in Human Development and Minor in Women's Studies (please see Women's Studies Minor) are also offered.
- As part of its commitment to educational access, the Program incorporates a broad range of educational formats, including online classes, hybrid classes that combine an online component with face-to-face interaction, and face-to-face lecture/discussion and seminar classes.
- The program also offers its major through P.A.C.E. (Program for Accelerated College Education). Please contact the P.A.C.E. office for further information.

Degree Requirements Unit-Outline

- A baccalaureate of arts degree requires a total of 120 units:
 - The major requirements consists of 53-55 units;
 - General Education (GE) & Graduation Requirements (GR) consists of 57 units;
 - Free Electives may consist of 8-10 units (*actual number of free elective units may depend on GE/GR units*).

Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.

Human Development Major Requirements (53-55 units)

Lower Division Core

Select three (3) courses for 9 units from the following categories, with no more than one course from each category (each course must be a minimum of 3-units each):

1. Anthropology (cultural or social)
2. Psychology
3. Sociology
4. Human or child development
5. Ethnic or area studies
6. Human biology or physical anthropology
7. Additional categories (e.g., statistics, gerontology, developmental disabilities) may be approved by the department

Upper Division Core

The following 30 units of coursework are required:

- HDEV 300 - Introduction to Human Development for Human Development Majors *Units: 1*
- HDEV 301 - Theories of Human Development *Units: 4*
- HDEV 302 - Research Methods in Human Development *Units: 4*
- HDEV 311 - Infant and Child Development *Units: 4*
- HDEV 312 - Adolescence and Emerging Adulthood *Units: 4*
- HDEV 321 - Gender, Race & Class in Human Development *Units: 4*
- HDEV 322 - Adult Development and Aging *Units: 4*
- HDEV 400 - Futures and Careers for Human Development Majors *Units: 1*
- HDEV 401 - Applying Theories and Methods in Human Development *Units: 4*

4

Concentration Requirement

Students must select one (1) of the following concentrations listed below for 10-12 units to complete the major:

- Human Development, B.A.: Adolescent Development Concentration
- Human Development, B.A.: Adult Development and Gerontology Concentration (Available Online)
- Human Development, B.A.: Childhood Development Concentration
- Human Development, B.A.: Early Childhood Development Concentration (Available Online)
- Human Development, B.A.: Women's Development Concentration (Available Online)

Senior Capstone Requirement

The following 4-unit course is required as the senior capstone:

- HDEV 499 - Senior Research Seminar *Units: 4*

Early Childhood Development Concentration

Select any three (3) courses for 12 units from the following:

*Note: *Students intending to obtain CTC's Child Development Permits must select HDEV 413 and HDEV 414 as they are required by California CTC for the Child Development Permit.*

- HDEV 411 - Early Childhood Cognitive Development: Theory and Research *Units: 4*
- HDEV 412 - Early Childhood Social Development: Theory & Research *Units: 4*
- HDEV 413 - Children in Families and Communities *Units: 4 (*)*
- HDEV 414 - Creative and Artistic Development in Early Childhood *Units: 4 (*)*

- HDEV 419 - Contemporary Research Topics in Early Childhood *Units: 4*
- HDEV 423 - Child Language Development *Units: 4*

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

Women's Studies Minor

Minor Requirements (16 units)

The minor is designed for students who are interested in Women's Studies. Complete 16 units as outlined below:

Core Coursework

Take two (2) courses for 7 units as outlined:

Choose one (1) of the two courses for 3 units:

- WOST 101 - Perspectives on Women *Units: 3*
- OR WOST 102 - Introduction to Feminist, Gender, and Sexuality Studies *Units: 3 ; G.E./G.R. Area: Diversity*

Plus, take the following 4 units:

- WOST 401 - Feminist Theory *Units: 4 ; G.E./G.R. Area: Diversity*

Electives

Choose three (3) courses for 9 units from the following:

- WOST 301 - Women and Work *Units: 3 ; G.E./G.R. Area: Diversity*
- WOST 302 - Women and Families *Units: 3 ; G.E./G.R. Area: Diversity*
- WOST 303 - Violence Against Women *Units: 3 ; G.E./G.R. Area: Diversity*
- WOST 402 - Women's Bodies and Health *Units: 3 ; G.E./G.R. Area: Diversity*
- WOST 403 - Comparative Perspectives on Global Feminism *Units: 3 ; G.E./G.R. Area: Social Justice*

Certificate

Early Childhood Development Certificate

Program Description:

Completion of the Early Childhood Development Certificate Program enables students to complete the required Early Childhood Education or Child Development coursework for the first 3 levels of Child Development Permits (the Assistant Permit, the Associate Teacher Permit, and the Teacher Permit), as specified by the California CTC (Commission on Teacher Credentialing). These permits are required for teaching at early childhood care and education settings for children from birth to 5 years of age. The HDEV courses completed at CSUEB for the Certificate can be applied to the Human Development Major with Early Childhood Development Concentration.

Admission Requirements:

Upper Division standing at CSUEB

Certificate Requirements (15-16 or 24 units)

Teacher Permit Track

The Teacher Permit track requires 24 units:

Take the following 8 units:

- HDEV 413 - Children in Families and Communities *Units: 4*
- HDEV 414 - Creative and Artistic Development in Early Childhood *Units: 4*

Plus, choose 16 units from the following:

- HDEV 311 - Infant and Child Development *Units: 4*
- HDEV 411 - Early Childhood Cognitive Development: Theory and Research *Units: 4*
- HDEV 412 - Early Childhood Social Development: Theory & Research *Units: 4*
- HDEV 419 - Contemporary Research Topics in Early Childhood *Units: 4*
- HDEV 423 - Child Language Development *Units: 4*
- ECE, ECD, CHDEV, or equivalent course(s) from a community college (4 units)

Associate Teacher Permit Track

The Associate Teacher Permit track requires 15-16 units:

Take the following 8 units:

- HDEV 413 - Children in Families and Communities *Units: 4*
- HDEV 414 - Creative and Artistic Development in Early Childhood *Units: 4*

Plus, choose 7-8 units from the following:

- HDEV 311 - Infant and Child Development *Units: 4*
- HDEV 411 - Early Childhood Cognitive Development: Theory and Research *Units: 4*
- HDEV 412 - Early Childhood Social Development: Theory & Research *Units: 4*
- HDEV 419 - Contemporary Research Topics in Early Childhood *Units: 4*
- HDEV 423 - Child Language Development *Units: 4*
- ECE, ECD, CHDEV, or equivalent course(s) from a community college (3 units)

Department of Kinesiology

The Department Office is located on the 1st Floor of the PE building, Room 130.

Open Hours: 8:00 am to 5:00 pm Monday through Friday.

Dept. Phone: (510) 885-3061

Faculty

Professor Emerita

Penny McCullagh, Ph.D. University of Wisconsin

Professors

Rebecca Beal, Ed.D. University of Northern Colorado

Paul Carpenter (Chair), Ph.D. University of California, Los Angeles

Rita M. Liberti, Ph.D. University of Iowa

Jeffery P. Simons, Ph.D. University of Illinois, Urbana-Champaign

Associate Professors

Matthew Atencio, Ph.D. University of Wollongong (Australia)

ZáNean D. McClain, Ph.D. Oregon State University

Catherine Inouye, Ed.D. University of Northern Colorado

My Phung (Jenny) O, Ph.D. University of Western Ontario (Canada)

Vanessa R. Yingling, Ph.D. University of Waterloo (Canada)

Assistant Professors

Bradford Bennett, Ph.D. Stanford University

Albert Mendoza, Ph.D. University of Massachusetts, Amherst

Jennifer Sherwood, Ph.D. Marquette University

Elizabeth (Missy) Wright, Ph.D. Michigan State University

Graduate Coordinator: Catherine Inouye

Mission Statement

Kinesiology is the discipline related to the scholarly study of sport, exercise and related activities from anatomical, biomechanical, developmental, physiological, psychological, sociological, philosophical and historical perspectives. Our mission is to prepare graduates who are knowledgeable, professional, and take a multidisciplinary approach to promoting physical activity.

About the Department

Bachelor

Kinesiology, B.S.

Kinesiology, B.S. Program (120 units)

Program Description

Kinesiology is the disciplinary study of physical activity and how it impacts individual and societal health and well-being. The discipline explores physical activity from a wide range of cognate disciplines, including, but not limited to, biomechanics, physiology, history, psychology, sociology, philosophy, and pedagogy. It involves areas of study that include sports performance, fitness leadership, sports medicine and related allied health professions, socio-cultural analysis of sport, sport and exercise psychology, physical education, and coaching.

The BS in Kinesiology degree prepares students for careers in the fitness and exercise and allied health professions. Our mission is to prepare graduates who are knowledgeable, professional, and take a multidisciplinary approach to promoting physical activity. The degree not only examines the theoretical underpinning of sport, exercise, fitness and health, but is committed to addressing the practical issues concerning coaching and instructing, exercise, fitness and sport. It also addresses prescription; programming and safety in promoting health and performance-related physical activity; and issues of social justice in and through sport. The diverse curriculum strives to be innovative and encourage creative thinking and practice.

Values

The Department is dedicated to providing a quality engaged educational experience that will prepare students for their chosen profession and beyond. Six key principles guide the department:

- Student-centered.
- Evidence-based practice.
- Comprehensive discipline-based and transferable skills and knowledge.
- Dedicated and committed faculty and staff.
- Relevant, interesting, and contemporary program of study.
- Commitment to professional service.

Objectives

- to provide a high quality learning experience which is relevant to personal and career aspirations and which will prepare students in the best way possible to gain employment or to continue with further study.
- to provide a scientific and multi-disciplinary approach to the study of sport, exercise, fitness, and health.
- to develop a framework of intellectual and conceptual skills aimed at broadening knowledge, understanding and critical appraisal of the scientific processes of the subject area.
- to encourage independent thinking, research awareness, investigation and analytical techniques to the study of kinesiology.

Career Opportunities

Activities Director • Allied Heath Fields (Physical Therapy, Occupational Therapy, Chiropractic) • Coach • Community College Teacher • Community Fitness • Agency Director • Exercise/Nutrition Counselor • Physical Education Teacher • University Instructor • Wellness Specialist

Features

The department has an array of facilities that support the kinesiology program, including laboratory space, extensive assessment equipment, and accessing a diverse range of physical activity spaces, including swimming pools, tennis courts, handball courts, a fitness center, a gymnasium (basketball, volleyball, badminton), and outdoor fields.

The department has a number of programs that support the student experience, such as the Kinesiology Research Group that provides opportunities for students to get hands-on research experience, the Center for Sport and Social Justice that offers workshops and community engagement around issues of social justice, and the Get Fit, Stay Fit program that is an in-house fitness program that provides students with hands-on experience working with clients on their fitness goals.

One scholarship is housed within the Department of Kinesiology. Recipients of the Joe Morgan Scholarship, named for the Hall of Fame baseball player who is a Cal State East Bay graduate, are identified each Spring with the award(s) applying to the subsequent year. The amount of the Joe Morgan award varies and multiple awards may be given.

Program Learning Outcomes

The program outcomes are aligned with the University's Institutional Learning Outcomes, the College of Education and Allied Studies Conceptual Framework, and the American Kinesiology Association's Learning Outcomes. At the completion of the program graduates will be able to do the following:

- Apply multiple disciplinary perspectives in developing foundational kinesiology knowledge and skills
- Explain the importance of a commitment to life-long physical activity
- Act professionally with a commitment to social justice for all sports participants
- Communicate using relevant and compelling kinesiology content
- Design, implement, and evaluate evidence-based kinesiological practices
- Critically evaluate situations, questions, and issues in kinesiology

Degree Requirements Unit-Outline

A baccalaureate of science degree requires a total of 120 units:

The major requirements consist of 65 units;

General Education (GE) & Graduation Requirements (GR) consists of 57 units;

Free Electives may consist of 0 units (*actual number of free elective units may depend on GE/GR units*).

Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.

Pre-degree Preparation Recommendations

The Kinesiology degree has a strong science base. Students interested in pursuing a degree in Kinesiology should have a strong High School background in the Sciences as reflected in grades in Science classes (C or better) and having taken more than the minimal high school science requirements to graduate.

Kinesiology Major Requirements (65 units)

Lower Division Core

The following 14 units are required:

- BIOL 270 - Human Anatomy & Physiology I Units: 4 ; G.E./G.R. Area: B2, B3
 - BIOL 271 - Human Anatomy & Physiology II Units: 4
 - KIN 160 - Introduction to Kinesiology Units: 3 ; G.E./G.R. Area: D1-3
 - KIN 162 - Nutrition and Performance Units: 3 ; G.E./G.R. Area: B2
- OR
- KIN 270 - Women and Sport Units: 3 ; G.E./G.R. Area: D1-3; Diversity

Notes:

- KIN 162 is recommended for students with an interest in Exercise and Nutrition. KIN 270 is recommended for students with an interest in Sport and Social Justice.
- Completion of BIOL 270 and BIOL 271 with a grade of C- or better, junior standing, and declared as a Kinesiology major is required to be able to enroll in the Upper Division Core Classes. Transfer students ideally should complete these classes before transferring and have done so with a C- or better.
- For Freshman students, KIN 160 must be completed before attaining junior standing. For transfer students who have not taken KIN 160 before transferring it should be completed in the first semester on transferring.

Upper Division Core

The following 36 units are required:

- KIN 300 - Critical Inquiry in Kinesiology Units: 4
- KIN 301 - Applied Musculoskeletal Anatomy Units: 3
- KIN 302 - Social Justice in Kinesiology Units: 4
- KIN 303 - Biomechanics Units: 4
- KIN 304 - Motor Development Units: 3
- KIN 305 - Critical Issues of the Body Units: 4
- KIN 306 - Exercise Physiology Units: 4
- KIN 307 - Motor Skill Acquisition and Training Units: 3
- KIN 308 - Psychology of Physical Activity and Performance Units: 4
- KIN 498 - Internship Units: 1 - 3 *

Note: *Three (3) units of KIN 498 are required.

Elective Courses

Students must select a minimum of 15 units of electives. At least one elective must be selected from two of the three groups below. Students who are planning to pursue specific educational or career objectives in Kinesiology should consult an advisor to select appropriate electives, and may wish to take additional electives to meet graduate school requirements.

GROUP A

Select at least one (1) course:

- KIN 406 - Introduction to Adapted Physical Activity *Units: 3*
- KIN 409 - Spinal Biomechanics & Low Back Disorders *Units: 3*
- KIN 410 - Musculoskeletal Injuries in Work and Sport *Units: 3*
- KIN 420 - Exercise Prescription *Units: 3*
- KIN 421 - Clinical Exercise Physiology *Units: 3*
- KIN 422 - Exercise Nutrition *Units: 3*
- KIN 423 - Exercise and Stress *Units: 3*

GROUP B

Select at least one (1) course:

- KIN 310 - Bone Health and Exercise *Units: 3*
- KIN 372 - Teaching Fitness and Self Defense *Units: 1*
- KIN 375 - Concepts of Teaching Aquatics *Units: 1*
- KIN 404 - Elementary Physical Education Curriculum *Units: 3*
- KIN 424 - Exercise and Gerontology *Units: 3*
- KIN 447 - Motor Skill Expertise *Units: 3*
- KIN 448 - Mental Skills for Learning and Performance *Units: 3*

GROUP C

Select at least one (1) course:

- DANC 341 - Dance for Children *Units: 3 ; G.E./G.R. Area: C4*
- KIN 340 - Ergonomics *Units: 3*
- KIN 379 - Games Concepts I *Units: 2*
- KIN 380 - Games Concepts II *Units: 2*
- KIN 405 - Theories of Teaching Secondary Physical Education Curriculum
Units: 3
- KIN 470 - Sport in the Local Community *Units: 3*
- KIN 480 - Gender and Sexualities in Sport *Units: 3*
- KIN 489 - Sport, Racism, and Ethnicity *Units: 3 ; G.E./G.R. Area: D4; Social Justice*

Elective Substitutions

The following courses may be substituted for elective requirements with **approval of department chair**:

- KIN 490 - Independent Study *Units: 1 - 3 (Note: Please see Errata page for corrections to this course.)*
- KIN 493 - Project *Units: 1 - 3*
- KIN 495 - Practicum in Kinesiology *Units: 1 - 3*
- KIN 497 - Contemporary Issues in Kinesiology *Units: 3*

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

Master

Kinesiology, M.S.

Kinesiology, M.S. Program

Program Description

The Department of Kinesiology offers programs focusing on fundamental analysis of sport, exercise and physical activity phenomena. The purpose of the Master of Science degree program is to give students a cross-disciplinary knowledge of kinesiology, develop their scholarly skills, and hone their professional application. The program serves as a terminal degree for professionals as well as preparation for those intending to complete a doctorate in Kinesiology or in one of the Allied Health Professions. Because most students are working professionals, graduate courses are offered during the evening hours.

Program Learning Outcomes

Students who graduate with an M.S. in Kinesiology will be able to:

- Synthesize and apply multiple cognate disciplinary perspectives.
- Design and implement collaborative innovative professional applications.
- Make decisions using critical analysis of issues, theories, methods, ideas, and artifacts.
- Communicate persuasively using a contextually-grounded approach.
- Systematically reflect on the practice of social justice.

Career Opportunities

Athletic Director • Cardiopulmonary Rehabilitation Specialist • Community College Teacher • Corporate Fitness Director • Intercollegiate and Interscholastic Coach • Exercise Physiologist • Personal Trainer • Physical Education Administrator • Physical Education Teacher • Sport Psychology Consultant • University Instructor • Wellness Counselor/Educator

Features

Upon acceptance into the program, students are immediately directed to a faculty member who will assist them in developing a course of study.

The department offers a complete range of laboratory facilities and technologies for graduate students. These resources enable comprehensive research opportunities in all areas of study. Motion analysis software, ventilatory gas analysis, biofeedback, coincidence timing, nutritional analysis, bone scanner, body composition analysis and computer statistical packages are examples of available tools.

Other features include the potential for individualized programs of study to meet specific interests and needs, extensive library resources, and an instructional format which stimulates high interaction among students and promotes independent scholarship.

Admission to the Program in "Classified Graduate" Status

Eligibility for admission to the M.S. degree program in "Classified Graduate" status requires a student to have a baccalaureate degree with a major approximately equivalent to the Cal State East Bay B.S. degree in kinesiology. The graduate coordinator or department chair will determine degree equivalencies. Students must also have attained at least a 3.00 grade point average in the major and have satisfied the University Writing Skills requirement.

The department encourages students to meet university prescribed deadlines for admission into the program beginning in the fall semester, although the department is willing to accept graduate students into the program during spring semester.

"Conditionally Classified Graduate" Status

Students who are judged to be admissible, but who do not meet all of the admission requirements specified above for "Classified Graduate" status, receive "Conditionally Classified Graduate" standing. Such students may need to complete certain undergraduate prerequisites in preparation for graduate study and/or may have other deficiencies, such as the University Writing Skills requirement, that must be resolved within the first semester of enrollment. Each student will be judged on an individual basis. The department may require the Graduate Record Examination (GRE), Aptitude Test Score, three letters of recommendation from former professors, written essay, and/or the repeat of undergraduate coursework in the case of below-standard grade point averages.

Generally, courses taken to resolve deficiencies will not count for credit in the M.S. program. In no case will more than 12 semester units taken in "Unclassified Post-baccalaureate" standing or at another university be counted toward the M.S. degree.

Advancement to Candidacy

"Classified Graduate" students are eligible for Advancement to Candidacy based on the criteria given below.

1. Maintain a 3.00 grade point average in all graduate work completed.
2. Submit to the graduate coordinator an approved program of study developed in conjunction with the appropriate faculty committee.
3. Have passed the Writing Skills requirement or equivalency.

Kinesiology Degree Requirements (32 units)

Prerequisites or Foundation Requirements

In the absence of an appropriate undergraduate degree, 25-26 units of prerequisite coursework must be completed. Generally, courses taken to resolve deficiencies will not count for credit in the M.S. program. Preparatory work for students with undergraduate degrees in other fields is described below.

Waiver of one or more of these area requirements will be considered if comparable coursework has been completed, or if the student has strong compensating academic strengths in areas related to the graduate program. *All requests for such waivers and their justification must be approved by academic advisor and submitted in writing to the graduate coordinator.*

Note: these courses must be completed upon the first attempt with a grade of "B" or higher in each course, prior to enrollment in any graduate class. Students attempting to meet these proficiencies at Cal State East Bay who do not receive a grade of "B" or higher on the first attempt are subject to declassification from the program and dismissal from the University.

The following two (2) courses (7 units) are required:

- KIN 300 - Critical Inquiry in Kinesiology Units: 4
- KIN 301 - Applied Musculoskeletal Anatomy Units: 3

Plus, two (2) courses (8 units) selected from the following courses:

- KIN 302 - Social Justice in Kinesiology Units: 4
- KIN 305 - Critical Issues of the Body Units: 4
- KIN 308 - Psychology of Physical Activity and Performance Units: 4

Plus, three (3) courses (units vary from 10-11 units) selected from the following courses:

- KIN 303 - Biomechanics Units: 4
- KIN 304 - Motor Development Units: 3
- KIN 306 - Exercise Physiology Units: 4
- KIN 307 - Motor Skill Acquisition and Training Units: 3

Core Courses

The 24 units of core coursework is required:

- KIN 601 - Knowledge Construction in Kinesiology Units: 4
- KIN 602 - Critical Perspectives on the Body Units: 4
- KIN 605 - Physiological Basis of Exercise and Wellness Units: 4
- KIN 606 - Current Trends in Kinesiology: Myth Busters Units: 4
- KIN 607 - Assessment of Human Performance Units: 4
- KIN 608 - Biomechanics of Musculoskeletal Injury Units: 4

Note: The following courses may substitute one (1) or more core courses with department permission. Course(s) must be taken for 4 units.

- KIN 685 - Supervised Research Units: 1-4
- KIN 690 - Independent Study Units: 1-4
- KIN 698 - Internship Units: 1-4

Elective Courses

Select one (1) course for 4 units from the following:

- KIN 603 - Psychomotor Aspects of Learning and Performance Units: 4
- KIN 604 - Effective Movement Instruction Units: 4
- KIN 697 - Contemporary Issues in Kinesiology Units: 4

Capstone Requirement

A capstone experience for 4 units is required:

- **KIN 693 - Project** *Units: 4 *Preferred Capstone*
An alternative capstone* may be substituted with department approval:
- **KIN 691 - University Thesis** *Units: 4 (*only upon department approval)*
- **KIN 692 - Comprehensive Exam Review** *Units: 4 (*only upon department approval)*

Other Graduate & Post-Baccalaureate Degree Requirements

In addition to departmental requirements, every student must also satisfy the University requirements for graduation as described throughout this catalog. These include the 70% unit residence requirement; the five-year rule on currency of subject matter; the minimum number of units in 600-level courses; the "C" minimum grade for each graduate course; the 3.00 cumulative grade point average; and the University Writing Skills Requirement.

Note: For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call (510) 885-3661.

Single Subject Matter Preparation Program

Physical Education Single Subject Matter Preparation

It has long been evident that sport and exercise phenomena have significant social, political, economic and wellness implications in contemporary life. Kinesiology is the discipline related to the scholarly study of sport, exercise and related activities from anatomical, biomechanical, developmental, physiological, psychological, sociological, philosophical and historical perspectives. Such understanding is a necessary prerequisite to the preparation for sport and exercise related careers.

Physical education teacher education is a program housed in kinesiology and although credentialed teachers in the state of California are not required in public elementary schools, they are required in all public secondary schools. However, credentialed teachers in physical education are sought after in not only public schools (elementary and secondary), but also in some charter and private schools. This program strives to prepare students to be successful candidates as they seek out credential programs in order to teach physical education in the state of California.

In order to be eligible for the Physical Education Teacher Education California Subject Examination for Teachers (CSET) waiver, you must successfully complete 18 units in the Physical Education Teacher Education area AND all the degree requirements for the Kinesiology degree. These elective classes prepare students for teaching physical education in grades K-12 in public and private schools. The curriculum is designed to meet Standard Requirements set forth by the California Commission on Teacher Credentialing. All these classes must be passed with a C or better grade.

Note: Due to policy changes from the California Commission on Teacher Credentialing and the Federal No Child Left Behind mandate, the Physical Education Teacher Education curriculum is periodically reviewed and changed to meet current state and federal standards. Regularly consult a Kinesiology Advisor for details and the most current course requirements.

Physical Education Teacher Education CSET Requirements

Take the following 18 units:

- DANC 341 - Dance for Children *Units: 3 ; G.E./G.R. Area: C4*
- KIN 372 - Teaching Fitness and Self Defense *Units: 1*
- KIN 375 - Concepts of Teaching Aquatics *Units: 1*
- KIN 379 - Games Concepts I *Units: 2*
- KIN 380 - Games Concepts II *Units: 2*
- KIN 404 - Elementary Physical Education Curriculum *Units: 3*
- KIN 405 - Theories of Teaching Secondary Physical Education Curriculum *Units: 3*
- KIN 406 - Introduction to Adapted Physical Activity *Units: 3*

Department of Management

The Department Office is located on the 4th floor of the VBT building, Room 435.

Hours Open: 9:00AM to 6:00PM Monday through Friday.

Dept. Phone: (510) 885 - 3307

Faculty

Professors Emeriti

Bijan Mashaw, Ph.D. Clemson University

Kenneth Pefkaros, Ph.D. University of Delaware

Associate Professor Emeritus

Alan P. Goldberg, Ph.D. University of Massachusetts

Professors

Jed DeVaro, Ph.D. Stanford University

Hongwei Du, Ph.D. Florida Institute of Technology

Vishwanath Hegde (Chair), Ph.D. University of Pittsburgh

Yi Karnes, Ph.D. Ohio State University

Xinjian Lu, Ph.D. University of Waterloo, Canada

H. Steven Peng, Ph.D. York University (Canada)

Zinovy Radovitsky, Ph.D. Scientific Research Institute of Labor (Moscow)

Asha Rao, Ph.D. Temple University

Glen Taylor, Ph.D. York University (Canada)

Gregory Theyel, Ph.D. Clark University

Chongqi Wu, Ph.D. University of Illinois at Urbana-Champaign

Associate Professors

Ekin Alakent, Ph.D. University of Texas at Dallas

Daniel E. Martin, Ph.D. Howard University

Surendra Sarnikar, Ph.D. University of Arizona

T.T. (Rajan) Selvarajan, Ph.D. Arizona State University

Jiming Wu, Ph.D. University of Kentucky

Assistant Professors

Ken Chung, Ph.D. Rutgers University

Izzet Darendeli, Ph.D. Temple University

Mee Sook Kim, Ph.D. Rutgers University

Kaumudi Misra, Ph.D. Michigan State University

Balaraman Rajan, Ph.D. Simon School of Business, University of Rochester

Jyotishka Ray, Ph.D. University of Texas at Dallas

Stephanie Seitz, Ph.D. State University of New York at Buffalo

Lan Wang, Ph.D. University of Florida, Gainesville

Peng Xie, Ph.D. Georgia Institute of Technology

Masahisa Yamaguchi, Ph.D. University of Hawai'i at Manoa

Department Statement

Tough global competition requires companies to be extremely responsive to the needs and expectations of customers. In addition, many companies today are in a period of rapid changes brought about by technological breakthroughs, business globalization, and extended supply chains. In such a time, the role of the manager and the management professional in facing these challenges and maintaining a competitive edge becomes even more important. Our Management options provide students with an

exciting and diverse education in various areas of management including human resource management and organizational behavior, operations and supply chain management, strategy and international business, and information technology management. Past and present employers of our Management students include almost all major firms, and numerous small and mid-size companies in the Bay Area.

Bachelor

Business Administration, B.S.: General Management Concentration (Available Online)

Business Administration, B.S. Program (120 units)

Program Description

The College of Business and Economics, which offers the Bachelor of Science in Business Administration (B.S.B.A.) program, is committed to providing life-changing, quality business education to prepare students from diverse backgrounds to become successful business professionals and leaders. The B.S.B.A. program imparts students with the knowledge and skills necessary to understand the changing global business environment and to prepare students for success in their professional careers.

The B.S.B.A. major program is structured around a set of core courses enabling students to develop general business perspective and skills. Students are required to choose an area of specialization, i.e., concentration, corresponding to their desired career path. In addition, the program allows students flexibility to customize their specialization by choosing business elective courses. These electives may be chosen to further strengthen their preparation in their chosen concentration.

The undergraduate and the graduate programs in the College of Business and Economics are accredited by the Association to Advance Collegiate Schools of Business International (AACSB).

Program Learning Outcomes

Students graduating with a Bachelor of Science in Business Administration will be able to:

- Recognize and integrate foundation knowledge across functional areas.
- Apply critical thinking skills to solve business problems.
- Understand and apply quantitative methods and tools in evaluating business problems and making effective business decisions.
- Apply technology to analyze data and provide solutions to business problems.

- Apply effective oral communication skills in a diverse and global environment.
- Apply effective written communication skills in a diverse and global environment.
- Apply effective team skills to work in a diverse and global environment.
- Identify and assess ethical issues and properly articulate ethical decisions.

Expiration of Courses

Upper division major/concentration requirement courses will expire ten years after completion of the term in which they are earned. Expired courses cannot be used to fulfill degree requirements and must be replaced by current credits. Requests for waivers of the ten-year limit for extenuating circumstances, other than mere failure to register, are made to the department chair in which the course resides and the director of undergraduate programs.

Transfer of Courses

Upper division courses will only be considered for equivalency or transfer credit if they are from AACSB accredited institutions. Exceptions will be made for programs that have current and signed agreements with the College of Business and Economics.

Degree Requirements

The B.S. degree requires a total of 120 units. In addition to General Education courses and other graduation requirements, the Business Administration major requires three sets of courses: (I) lower division core courses, (II) upper division core courses, and (III) courses to fulfill concentration requirements.

Degree Requirements Unit-Outline

- A baccalaureate of science degree requires a total of 120 units:
 - The major requirements consists of 75 units;
 - General Education (GE) & Graduation Requirements (GR) consists of 57 units;
 - Free Electives may consist of 0 units (*actual number of free elective units may depend on GE/GR units*).

Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.

Business Administration Major Requirements (75 units)

Note: Please see the Errata pages for corrections made to the major requirements effective for all concentrations.

Lower Division Core Courses

The following 18 units of lower-division coursework are required:

- ACCT 210 - Introduction to Financial Accounting *Units: 3*
- ACCT 215 - Introduction to Managerial Accounting *Units: 3*

- **ECON 200 - Principles of Microeconomics** *Units: 3 ; G.E./G.R. Area: D1-3; Social Justice*
- **ECON 205 - Principles of Macroeconomics** *Units: 3 ; G.E./G.R. Area: D1-3*
- **MATH 180 - Mathematics for Business with Calculus** *Units: 3 ; G.E./G.R. Area: B4*
- **STAT 110 - Elements of Statistics for Business and Economics** *Units: 3*

Upper Division Core Courses

The following 27 units of upper-division coursework is required:

- **BUS 310 - Organizational Behavior** *Units: 3*
- **BUS 325 - Marketing Principles** *Units: 3*
- **BUS 330 - Financial Management** *Units: 3*
- **BUS 335 - Communications in Team Building** *Units: 3*
- **BUS 360 - Operations Management** *Units: 3*
- **BUS 499 - Seminar in Strategic Business Management** *Units: 3*
- **ECON 380 - Managerial Economics and Business Strategy** *Units: 3 ; G.E./G.R. Area: B6; Sustainability*
- **MGMT 350 - Decision Science** *Units: 3 ; G.E./G.R. Area: B6*

Plus, choose one (1) course from the following:

- **BUS 385 - International Business** *Units: 3 OR*
- **ECON 385 - Global Economic Analysis** *Units: 3 Recommended for Business Economics concentration students*

Concentration Requirements

Students must select one (1) of the following concentrations for 30 units:

- Business Administration, B.S.: Accounting Concentration
- Business Administration, B.S.: Business Economics Concentration
- Business Administration, B.S.: Entrepreneurship Concentration
- Business Administration, B.S.: Finance Concentration (Available Online)
- Business Administration, B.S.: General Management Concentration (Available Online)
- Business Administration, B.S.: Human Resources Management & Organizational Behavior Concentration
- Business Administration, B.S.: Information Technology Management Concentration (Available Online)
- Business Administration, B.S.: Marketing Management Concentration
- Business Administration, B.S.: Operations and Supply Chain Management Concentration (Available Online)

General Management Concentration

The coursework in the General Management concentration allows breadth of study in business fields. Students can choose upper division courses from different concentrations offered by the College of

Business and Economics (excluding ECON 300, ECON 385, MGMT 385, MKTG 305) that meet their needs, interests, and career goals.

Required Courses

The following 12 units are required:

- **BUS 220 - Legal Environment of Business** *Units: 3 ; G.E./G.R. Area: D1-3; Social Justice*
- **BUS 320 - Business and Professional Ethics** *Units: 3*
- **BUS 340 - Information Technology Management** *Units: 3*
- **BUS 370 - Business, Government and Society** *Units: 3*

Elective Courses

Select six (6) upper-division courses for 18 units.

- Courses must be drawn from at least two different concentrations offered by the College of Business and Economics (excluding ECON 300, ECON 385, MGMT 385, MKTG 305).
- No more than 12 units may be taken from any one concentration.
Note: No more than 3 units used to fulfill other requirements (e.g., for general education, minors, or other BSBA concentrations) can be counted toward the requirements for the General Management concentration. The BUS prefix is not for any one concentration. Concentrations offered by the College of Business and Economics are as follows:
- Accounting (ACCT prefix)
- Business Economics (ECON prefix)
- Entrepreneurship
- Finance (FIN prefix)
- Human Resources Management and Organizational Behavior (MGMT prefix but only those courses listed under Human Resources Management and Organizational Behavior)
- Information Technology Management (ITM prefix)
- Marketing Management (MKTG prefix)
- Operations and Supply Chain Management (MGMT prefix but only those courses listed under Operations and Supply Chain Management)

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

Business Administration, B.S.: Human Resources Management & Organizational Behavior Concentration

Business Administration, B.S. Program (120 units)

Program Description

The College of Business and Economics, which offers the Bachelor of Science in Business Administration (B.S.B.A.) program, is committed to providing life-changing, quality business education to prepare students from diverse backgrounds to become successful business professionals and leaders. The B.S.B.A. program imparts students with the knowledge and skills necessary to understand the changing global business environment and to prepare students for success in their professional careers.

The B.S.B.A. major program is structured around a set of core courses enabling students to develop general business perspective and skills. Students are required to choose an area of specialization, i.e., concentration, corresponding to their desired career path. In addition, the program allows students flexibility to customize their specialization by choosing business elective courses. These electives may be chosen to further strengthen their preparation in their chosen concentration.

The undergraduate and the graduate programs in the College of Business and Economics are accredited by the Association to Advance Collegiate Schools of Business International (AACSB).

Program Learning Outcomes

Students graduating with a Bachelor of Science in Business Administration will be able to:

- Recognize and integrate foundation knowledge across functional areas.
- Apply critical thinking skills to solve business problems.
- Understand and apply quantitative methods and tools in evaluating business problems and making effective business decisions.
- Apply technology to analyze data and provide solutions to business problems.
- Apply effective oral communication skills in a diverse and global environment.
- Apply effective written communication skills in a diverse and global environment.
- Apply effective team skills to work in a diverse and global environment.
- Identify and assess ethical issues and properly articulate ethical decisions.

Expiration of Courses

Upper division major/concentration requirement courses will expire ten years after completion of the term in which they are earned. Expired courses cannot be used to fulfill degree requirements and must be replaced by current credits. Requests for waivers of the ten-year limit for extenuating circumstances, other than mere failure to register, are made to the department chair in which the course resides and the director of undergraduate programs.

Transfer of Courses

Upper division courses will only be considered for equivalency or transfer credit if they are from AACSB accredited institutions. Exceptions will be made for programs that have current and signed agreements with the College of Business and Economics.

Degree Requirements

The B.S. degree requires a total of 120 units. In addition to General Education courses and other graduation requirements, the Business Administration major requires three sets of courses: (I) lower division core courses, (II) upper division core courses, and (III) courses to fulfill concentration requirements.

Degree Requirements Unit-Outline

- A baccalaureate of science degree requires a total of 120 units:
 - The major requirements consists of 75 units;
 - General Education (GE) & Graduation Requirements (GR) consists of 57 units;
 - Free Electives may consist of 0 units (*actual number of free elective units may depend on GE/GR units*).

Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.

Business Administration Major Requirements (75 units)

Note: Please see the Errata pages for corrections made to the major requirements effective for all concentrations.

Lower Division Core Courses

The following 18 units of lower-division coursework are required:

- ACCT 210 - Introduction to Financial Accounting Units: 3
- ACCT 215 - Introduction to Managerial Accounting Units: 3
- ECON 200 - Principles of Microeconomics Units: 3 ; G.E./G.R. Area: D1-3; Social Justice
- ECON 205 - Principles of Macroeconomics Units: 3 ; G.E./G.R. Area: D1-3
- MATH 180 - Mathematics for Business with Calculus Units: 3 ; G.E./G.R. Area: B4
- STAT 110 - Elements of Statistics for Business and Economics Units: 3

Upper Division Core Courses

The following 27 units of upper-division coursework is required:

- BUS 310 - Organizational Behavior *Units: 3*
- BUS 325 - Marketing Principles *Units: 3*
- BUS 330 - Financial Management *Units: 3*
- BUS 335 - Communications in Team Building *Units: 3*
- BUS 360 - Operations Management *Units: 3*
- BUS 499 - Seminar in Strategic Business Management *Units: 3*
- ECON 380 - Managerial Economics and Business Strategy *Units: 3 ; G.E./G.R. Area: B6; Sustainability*
- MGMT 350 - Decision Science *Units: 3 ; G.E./G.R. Area: B6*

Plus, choose one (1) course from the following:

- BUS 385 - International Business *Units: 3 OR*
- ECON 385 - Global Economic Analysis *Units: 3 Recommended for Business Economics concentration students*

Concentration Requirements

Students must select one (1) of the following concentrations for 30 units:

- Business Administration, B.S.: Accounting Concentration
- Business Administration, B.S.: Business Economics Concentration
- Business Administration, B.S.: Entrepreneurship Concentration
- Business Administration, B.S.: Finance Concentration (Available Online)
- Business Administration, B.S.: General Management Concentration (Available Online)
- Business Administration, B.S.: Human Resources Management & Organizational Behavior Concentration
- Business Administration, B.S.: Information Technology Management Concentration (Available Online)
- Business Administration, B.S.: Marketing Management Concentration
- Business Administration, B.S.: Operations and Supply Chain Management Concentration (Available Online)

Human Resources Management & Organizational Behavior Concentration

The coursework in the Human Resources Management/Organizational Behavior (HRM/OB) concentration centers on how firms can best utilize their most critical resource, their employees, to create a work environment that promotes excellence. It prepares students for careers in HRM and also general management by providing a depth of knowledge in HRM functions, and also a breadth in the soft skills necessary for effective leadership, in a variety of organizations. Coursework is concerned with recruiting and selecting the best employees, determining fair compensation, learning how to comply with employment laws, performance management, people analytics, negotiations, leadership, creativity and managing diverse teams.

Required Course

The following 15 units course is required:

- BUS 220 - Legal Environment of Business *Units: 3 ; G.E./G.R. Area: D1-3; Social Justice*
- BUS 320 - Business and Professional Ethics *Units: 3*
- BUS 340 - Information Technology Management *Units: 3*
- BUS 370 - Business, Government and Society *Units: 3*
- MGMT 312 - Human Resources Management *Units: 3*

Elective Courses

Select five (5) courses for 15 units from the following list:

- MGMT 311 - Managing Diversity in the 21st Century Workplace *Units: 3*
- MGMT 314 - Leadership and Management *Units: 3*
- MGMT 316 - Training and Development *Units: 3*
- MGMT 318 - Employee Relations and Employment Law *Units: 3*
- MGMT 320 - Negotiation and Conflict Management *Units: 3*
- MGMT 400 - Seminar on Special Topics in Human Resource Management and Organizational Behavior *Units: 3*
- MGMT 402 - Managing the Global Workplace *Units: 3*
- MGMT 404 - Staffing and Talent Management *Units: 3*
- MGMT 406 - Compensation and Reward Systems *Units: 3*
- MGMT 408 - HR Analytics *Units: 3*

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

Business Administration, B.S.: Information Technology Management Concentration (Available Online)

Business Administration, B.S. Program (120 units)

Program Description

The College of Business and Economics, which offers the Bachelor of Science in Business Administration (B.S.B.A.) program, is committed to providing life-changing, quality business education to prepare students from diverse backgrounds to become successful business professionals and leaders. The B.S.B.A. program imparts students with the knowledge and skills necessary to understand the changing global business environment and to prepare students for success in their professional careers.

The B.S.B.A. major program is structured around a set of core courses enabling students to develop general business perspective and skills. Students are required to choose an area of specialization, i.e., concentration, corresponding to their desired career path. In addition, the program allows students flexibility to customize their specialization by choosing business elective courses. These electives may be chosen to further strengthen their preparation in their chosen concentration.

The undergraduate and the graduate programs in the College of Business and Economics are accredited by the Association to Advance Collegiate Schools of Business International (AACSB).

Program Learning Outcomes

Students graduating with a Bachelor of Science in Business Administration will be able to:

- Recognize and integrate foundation knowledge across functional areas.
- Apply critical thinking skills to solve business problems.
- Understand and apply quantitative methods and tools in evaluating business problems and making effective business decisions.
- Apply technology to analyze data and provide solutions to business problems.
- Apply effective oral communication skills in a diverse and global environment.
- Apply effective written communication skills in a diverse and global environment.
- Apply effective team skills to work in a diverse and global environment.
- Identify and assess ethical issues and properly articulate ethical decisions.

Expiration of Courses

Upper division major/concentration requirement courses will expire ten years after completion of the term in which they are earned. Expired courses cannot be used to fulfill degree requirements and must be replaced by current credits. Requests for waivers of the ten-year limit for extenuating circumstances, other than mere failure to register, are made to the department chair in which the course resides and the director of undergraduate programs.

Transfer of Courses

Upper division courses will only be considered for equivalency or transfer credit if they are from AACSB accredited institutions. Exceptions will be made for programs that have current and signed agreements with the College of Business and Economics.

Degree Requirements

The B.S. degree requires a total of 120 units. In addition to General Education courses and other graduation requirements, the Business Administration major requires three sets of courses: (I) lower division core courses, (II) upper division core courses, and (III) courses to fulfill concentration requirements.

Degree Requirements Unit-Outline

- A baccalaureate of science degree requires a total of 120 units:
 - The major requirements consists of 75 units;
 - General Education (GE) & Graduation Requirements (GR) consists of 57 units;
 - Free Electives may consist of 0 units (*actual number of free elective units may depend on GE/GR units*).

Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.

Business Administration Major Requirements (75 units)

Note: Please see the Errata pages for corrections made to the major requirements effective for all concentrations.

Lower Division Core Courses

The following 18 units of lower-division coursework are required:

- ACCT 210 - Introduction to Financial Accounting Units: 3
- ACCT 215 - Introduction to Managerial Accounting Units: 3
- ECON 200 - Principles of Microeconomics Units: 3 ; G.E./G.R. Area: D1-3; Social Justice
- ECON 205 - Principles of Macroeconomics Units: 3 ; G.E./G.R. Area: D1-3
- MATH 180 - Mathematics for Business with Calculus Units: 3 ; G.E./G.R. Area: B4
- STAT 110 - Elements of Statistics for Business and Economics Units: 3

Upper Division Core Courses

The following 27 units of upper-division coursework is required:

- BUS 310 - Organizational Behavior Units: 3
- BUS 325 - Marketing Principles Units: 3

- BUS 330 - Financial Management *Units: 3*
 - BUS 335 - Communications in Team Building *Units: 3*
 - BUS 360 - Operations Management *Units: 3*
 - BUS 499 - Seminar in Strategic Business Management *Units: 3*
 - ECON 380 - Managerial Economics and Business Strategy *Units: 3 ; G.E./G.R.*
- Area: B6; Sustainability*
- MGMT 350 - Decision Science *Units: 3 ; G.E./G.R. Area: B6*

Plus, choose one (1) course from the following:

- BUS 385 - International Business *Units: 3 OR*
- ECON 385 - Global Economic Analysis *Units: 3 Recommended for Business Economics concentration students*

Concentration Requirements

Students must select one (1) of the following concentrations for 30 units:

- Business Administration, B.S.: Accounting Concentration
- Business Administration, B.S.: Business Economics Concentration
- Business Administration, B.S.: Entrepreneurship Concentration
- Business Administration, B.S.: Finance Concentration (Available Online)
- Business Administration, B.S.: General Management Concentration (Available Online)
- Business Administration, B.S.: Human Resources Management & Organizational Behavior Concentration
- Business Administration, B.S.: Information Technology Management Concentration (Available Online)
- Business Administration, B.S.: Marketing Management Concentration
- Business Administration, B.S.: Operations and Supply Chain Management Concentration (Available Online)

Information Technology Management Concentration

The coursework in the Information Technology Management concentration prepares graduates for careers in managing information technology in various industries and organizations. The ITM curriculum provides students with the technical and managerial knowledge and skills needed to effectively integrate people, information and communication technologies with business and management processes. Graduates of this concentration will have a solid understanding of information technology applications in different areas of business, how these applications are embedded within their respective business processes, and add value to them.

Required Courses

The following 18 units are required:

- BUS 220 - Legal Environment of Business *Units: 3 ; G.E./G.R. Area: D1-3; Social Justice*
- BUS 320 - Business and Professional Ethics *Units: 3*

- BUS 340 - Information Technology Management *Units: 3*
- BUS 370 - Business, Government and Society *Units: 3*
- ITM 330 - Business Applications Programming *Units: 3*
- ITM 331 - Database Management Systems *Units: 3*

Elective Courses

Select four (4) courses for 12 units from the following list:

- ITM 332 - Business Data Communications *Units: 3*
- ITM 336 - Information Systems Development and Management *Units: 3*
- ITM 338 - E-Business Technology and Management *Units: 3*
- ITM 440 - Business Intelligence Systems *Units: 3*
- ITM 442 - Healthcare Information Systems *Units: 3*
- ITM 446 - Information Security *Units: 3*
- ITM 448 - Information Systems Analytics *Units: 3*
- ITM 449 - Advanced Topics in Information Technology *Units: 3*

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

Plus, choose one (1) course from the following:

- **BUS 385 - International Business** *Units: 3 OR*
- **ECON 385 - Global Economic Analysis** *Units: 3 Recommended for Business Economics concentration students*

Concentration Requirements

Students must select one (1) of the following concentrations for 30 units:

- Business Administration, B.S.: Accounting Concentration
- Business Administration, B.S.: Business Economics Concentration
- Business Administration, B.S.: Entrepreneurship Concentration
- Business Administration, B.S.: Finance Concentration (Available Online)
- Business Administration, B.S.: General Management Concentration (Available Online)
- Business Administration, B.S.: Human Resources Management & Organizational Behavior Concentration
- Business Administration, B.S.: Information Technology Management Concentration (Available Online)
- Business Administration, B.S.: Marketing Management Concentration
- Business Administration, B.S.: Operations and Supply Chain Management Concentration (Available Online)

Operations and Supply Chain Management Concentration

The coursework for the Operations and Supply Chain Management concentration develops student competence in the conceptual, managerial, and analytical tools required for careers in service and manufacturing operations. Students obtain knowledge and skills necessary to manage organization's resources and processes in order to increase productivity, improve quality, reduce cost, and satisfy customer needs. The range of concentration topics includes service operations, quality and lean management, global and sustainable supply chains, enterprise planning and control, project management, emerging technologies and analytics.

Required Courses

The following 18 units are required:

- **BUS 220 - Legal Environment of Business** *Units: 3 ; G.E./G.R. Area: D1-3; Social Justice*
- **BUS 320 - Business and Professional Ethics** *Units: 3*
- **BUS 340 - Information Technology Management** *Units: 3*
- **BUS 370 - Business, Government and Society** *Units: 3*
- **MGMT 362 - Service Management** *Units: 3*
- **MGMT 364 - Global Supply Chain Management** *Units: 3*

Elective Courses

Select four (4) courses for 12 units from the following list:

- **MGMT 365 - Enterprise Resource Planning and Control** *Units: 3*

- MGMT 366 - Logistics Management *Units: 3*
- MGMT 368 - Quality and Process Improvement *Units: 3*
- MGMT 369 - Supply Management and E-Commerce *Units: 3*
- MGMT 450 - Project Management *Units: 3*
- MGMT 455 - Supply Chain Data Analytics *Units: 3*
- MGMT 460 - Healthcare Operations Management *Units: 3*
- MGMT 465 - Emerging Technologies in Operations *Units: 3*

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

Master

Business Administration, M.B.A.: Analytics for Managers Concentration

Business Administration, M.B.A. Program

Mission

CBE provides life-changing, quality business education to prepare students from diverse backgrounds to become successful business professionals and leaders.

Vision and Values

We aspire to be a leading business school known for making a difference in the lives of our students and for our impact on the world. In support of our mission, we value:

- Ethical behavior and personal integrity
- Collegiality and mutual respect
- Collaboration for learning, scholarship, and community engagement
- Social and environmental responsibility
- Inclusive learning environment for a diverse student population
- Innovative thinking and a global mindset

All CBE programs are accredited by AACSB International - The Association to Advance Collegiate Schools of Business.

The College of Business and Economics offers the following master's degrees:

Master of Business Administration

M.B.A. students must select one of the following concentrations to fulfill the degree:

Analytics for Managers • Finance • General Business • Global Innovator • Human Resources and Organizational Behavior • Marketing Management • Operations and Supply Chain Management • Strategy and Innovation

Master of Science in Business Analytics

Master of Science in Economics

Program Description

The M.B.A. program supports students' career advancement by preparing them for positions of leadership in an increasingly diverse and globally competitive economy. The program is centered on the rigorous knowledge of the basic functional areas of business, an appreciation of management challenges in a global context, and opportunities to develop students' interpersonal and executive leadership skills. It also enables students to deepen and broaden their knowledge and skills through elective courses in an area of concentration. The program offers a range of formats to cater to the needs of full and part time students and students seeking an executive style MBA.

Career Opportunities

There is a strong growth in opportunities for management careers in both the general and the functional areas represented in the program's concentrations. The MBA program prepares graduates with strong foundation in general management knowledge and skills and gives them an extra edge in concentration areas that are growing in demand. Among the strong careers for those with MBA include Financial Manager, Health Services Manager, High-End Management Consultant, Human Resources Manager, Investment Banker, Investment Fund Manager, Marketing Manager, Marketing Researcher, Sales Manager, Operations and Supply Chain Manager, and Upper Management and Executive Leadership. The growing career opportunities for Finance, Marketing, HR, Operations, and Strategy validate the strength and the value of the CSUEB MBA program.

Admission

The M.B.A. is open to students who hold a baccalaureate degree from an accredited college or university. Each applicant is evaluated on the basis of past academic performance as reflected in undergraduate grade point average and subsequent coursework; and results of the Graduate Management Admissions Test (GMAT) in verbal, quantitative, and the "Index Score" that involves the total GMAT score, $\text{Index Score} = (\text{Upper Division GPA} \times 200) + \text{Total GMAT}$. Admission to the program is selective. The average GPA and GMAT score of applicants admitted to the program varies from year to year. For last year's admitted students profile, please visit the CBE Graduate Student Success and Services Office. GRE score, if provided, is accepted in place of GMAT. GMAT may be waived for applicants with five years or more work experience.

Proficiencies

All Conditionally Classified M.B.A. students must fulfill the University Writing Skills Requirement (UWSR) to achieve "Classified Graduate" status. The Writing Skills Requirement could be met as an undergraduate or graduate student at one of the CSU system campuses, with a score of 4.5 or better on the GMAT essay, by passing the Writing Skills Test (WST) or through coursework. Information about the Writing Skills Test and the courses can be found on the Testing Office website. The Website contains information on test dates, registration procedures and fees. Further information can be obtained from the Testing Office. If students have not satisfied the UWSR before they begin their graduate work, they must either take the WST or enroll in a first tier course by the end of their first semester in the program.

The MBA program is designed to provide essential business knowledge to students without assuming prior business background. Therefore no specific prerequisite courses are required, but proficiency in math and statistics is expected.

Student Standing and Progress Toward the Degree

There are three categories of student status which reflect student progress toward the degree: "Conditionally Classified Graduate," "Classified Graduate," and "Advancement to Candidacy."

- Students achieve "Conditionally Classified Graduate" status when they have been admitted to the MBA degree program, but have not yet completed the University Writing Skills Requirement.
- Students achieve "Classified Graduate" status when they have satisfactorily completed the University Writing Skills Requirement.
- Students are Advanced to Candidacy when they have completed the 42 semester units meeting the following criteria:
 - All have a course grade of "C" or better.
 - Complete a minimum of 30 units in residence after admission to the program.
 - Have a combined 3.0 grade point average (minimum) in all units taken to satisfy the requirements of the student's degree program.
 - Have no more than 12 units for extension and/or transfer credit (any extension and/or transfer credit must be approved by the Program Director) and/or coursework taken in "Unclassified Post-baccalaureate" status.
 - All units earned within the five years immediately preceding the completion of the requirements for the degree.
 - Have completed a satisfactory program of study as determined by the College of Business and Economics and the university.
- To be eligible for the M.B.A. a student must have been Advanced to Candidacy (see Graduate Degree Information chapter of the catalog)

Note: Students who fail to maintain progress by falling below a 3.0 GPA in their graduate courses for two or more consecutive semesters will be academically disqualified from the university.

Program Learning Outcomes

Students graduating with an M.B.A. from Cal State East Bay will be able to:

- Identify global business opportunities, analyze global business challenges, and develop business strategies.
- Demonstrate leadership and teamwork skills.
- Apply advanced written communication skills.
- Apply advanced oral communication skills.
- Demonstrate cross-cultural awareness and sensitivity in their interpersonal and group communication.
- Perform quantitative analyses and apply advanced technological tools to solve complex business problems.
- Analyze and integrate knowledge across disciplines to make managerial decisions to reach solutions to complex business problems.
- Recognize and analyze ethical issues in decision making.

Business Administration Degree Requirements (42 units)

Core Courses

The following 27 core units are required for all M.B.A. students:

- BUS 601 - Leadership and Communication in Organizations *Units: 3*
- BUS 602 - Business Analytics for Managers *Units: 3*
- BUS 603 - Managing Complex Issues in Global Context *Units: 3 ; G.E./G.R. Area:*
UWSR
- BUS 604 - Financial Accounting *Units: 3*
- BUS 605 - Corporate Financial Management *Units: 3*
- BUS 606 - Managerial Economics *Units: 3*
- BUS 607 - Marketing Management *Units: 3*
- BUS 608 - Operations and Supply Chain Management *Units: 3*
- BUS 609 - Negotiation and Conflict Resolution *Units: 3*

Concentrations

Students must select one (1) of the following 12-unit concentrations:

- Business Administration, M.B.A.: Analytics for Managers Concentration
- Business Administration, M.B.A.: Finance Concentration
- Business Administration, M.B.A.: General Business Concentration
- Business Administration, M.B.A.: Global Innovators Concentration (Self Support only)
- Business Administration, M.B.A.: Human Resources Management and Organizational Behavior Concentration
- Business Administration, M.B.A.: Marketing Management Concentration

- Business Administration, M.B.A.: Operations and Supply Chain Management Concentration
- Business Administration, M.B.A.: Strategy & Innovation Concentration

Capstone Requirement

The following capstone is required for 3 units to complete the degree:

- BUS 693 - Strategic Management Capstone (Project) *Units: 3*

Analytics for Managers Concentration

Prerequisite Requirement

BUS 602 must be completed before taking any BAN required or elective course.

- BUS 602 - Business Analytics for Managers *Units: 3*

Required Courses

Select at least two (2) courses, for 6 units, from the following:

- BAN 610 - Database Management and Applications *Units: 3*
- BAN 612 - Data Analytics *Units: 3*
- BAN 620 - Data Mining *Units: 3*
- BAN 622 - Data Warehousing and Business Intelligence *Units: 3*
- BAN 630 - Optimization Methods for Analytics *Units: 3*

Plus, select at least two (2) courses, for 6 units, from the following:

- BAN 660 - Advanced Topics in Big Data *Units: 3*
- BAN 670 - Advanced Topics in Analytics *Units: 3*
- MGMT 616 - People Analytics *Units: 3*
- MGMT 654 - Enterprise Planning and Control *Units: 3*
- MGMT 658 - Project Management *Units: 3*
- MGMT 662 - Operations Analytics *Units: 3*
- MKTG 612 - Marketing Analytics *Units: 3*

Other Graduate & Post-Baccalaureate Degree Requirements

In addition to departmental requirements, every student must also satisfy the University requirements for graduation as described throughout this catalog. These include the 70% unit residence requirement; the five-year rule on currency of subject matter; the minimum number of units in 600-level courses; the "C" minimum grade for each graduate course; the 3.00 cumulative grade point average; and the University Writing Skills Requirement.

Note: For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call (510) 885-3661.

Business Administration, M.B.A. Program

Mission

CBE provides life-changing, quality business education to prepare students from diverse backgrounds to become successful business professionals and leaders.

Vision and Values

We aspire to be a leading business school known for making a difference in the lives of our students and for our impact on the world. In support of our mission, we value:

- Ethical behavior and personal integrity
- Collegiality and mutual respect
- Collaboration for learning, scholarship, and community engagement
- Social and environmental responsibility
- Inclusive learning environment for a diverse student population
- Innovative thinking and a global mindset

All CBE programs are accredited by AACSB International - The Association to Advance Collegiate Schools of Business.

The College of Business and Economics offers the following master's degrees:

Master of Business Administration

M.B.A. students must select one of the following concentrations to fulfill the degree:

Analytics for Managers • Finance • General Business • Global Innovator • Human Resources and Organizational Behavior • Marketing Management • Operations and Supply Chain Management • Strategy and Innovation

Master of Science in Business Analytics

Master of Science in Economics

Program Description

The M.B.A. program supports students' career advancement by preparing them for positions of leadership in an increasingly diverse and globally competitive economy. The program is centered on the rigorous knowledge of the basic functional areas of business, an appreciation of management challenges in a global context, and opportunities to develop students' interpersonal and executive leadership skills. It also enables students to deepen and broaden their knowledge and skills through elective courses in an area of concentration. The program offers a range of formats to cater to the needs of full and part time students and students seeking an executive style MBA.

Career Opportunities

There is a strong growth in opportunities for management careers in both the general and the functional areas represented in the program's concentrations. The MBA program prepares graduates with strong foundation in general management knowledge and skills and gives them an extra edge in concentration areas that are growing in demand. Among the strong careers for those with MBA include Financial Manager, Health Services Manager, High-End Management Consultant, Human Resources Manager, Investment Banker, Investment Fund Manager, Marketing Manager, Marketing Researcher, Sales Manager, Operations and Supply Chain Manager, and Upper Management and Executive Leadership. The growing career opportunities for Finance, Marketing, HR, Operations, and Strategy validate the strength and the value of the CSUEB MBA program.

Admission

The M.B.A. is open to students who hold a baccalaureate degree from an accredited college or university. Each applicant is evaluated on the basis of past academic performance as reflected in undergraduate grade point average and subsequent coursework; and results of the Graduate Management Admissions Test (GMAT) in verbal, quantitative, and the "Index Score" that involves the total GMAT score, $\text{Index Score} = (\text{Upper Division GPA} \times 200) + \text{Total GMAT}$. Admission to the program is selective. The average GPA and GMAT score of applicants admitted to the program varies from year to year. For last year's admitted students profile, please visit the CBE Graduate Student Success and Services Office. GRE score, if provided, is accepted in place of GMAT. GMAT may be waived for applicants with five years or more work experience.

Proficiencies

All Conditionally Classified M.B.A. students must fulfill the University Writing Skills Requirement (UWSR) to achieve "Classified Graduate" status. The Writing Skills Requirement could be met as an undergraduate or graduate student at one of the CSU system campuses, with a score of 4.5 or better on the GMAT essay, by passing the Writing Skills Test (WST) or through coursework. Information about the Writing Skills Test and the courses can be found on the Testing Office website. The Website contains

information on test dates, registration procedures and fees. Further information can be obtained from the Testing Office. If students have not satisfied the UWSR before they begin their graduate work, they must either take the WST or enroll in a first tier course by the end of their first semester in the program.

The MBA program is designed to provide essential business knowledge to students without assuming prior business background. Therefore no specific prerequisite courses are required, but proficiency in math and statistics is expected.

Student Standing and Progress Toward the Degree

There are three categories of student status which reflect student progress toward the degree: "Conditionally Classified Graduate," "Classified Graduate," and "Advancement to Candidacy."

- Students achieve "Conditionally Classified Graduate" status when they have been admitted to the MBA degree program, but have not yet completed the University Writing Skills Requirement.
 - Students achieve "Classified Graduate" status when they have satisfactorily completed the University Writing Skills Requirement.
 - Students are Advanced to Candidacy when they have completed the 42 semester units meeting the following criteria:
 - All have a course grade of "C" or better.
 - Complete a minimum of 30 units in residence after admission to the program.
 - Have a combined 3.0 grade point average (minimum) in all units taken to satisfy the requirements of the student's degree program.
 - Have no more than 12 units for extension and/or transfer credit (any extension and/or transfer credit must be approved by the Program Director) and/or coursework taken in "Unclassified Post-baccalaureate" status.
 - All units earned within the five years immediately preceding the completion of the requirements for the degree.
 - Have completed a satisfactory program of study as determined by the College of Business and Economics and the university.
 - To be eligible for the M.B.A. a student must have been Advanced to Candidacy (see Graduate Degree Information chapter of the catalog)
- Note: Students who fail to maintain progress by falling below a 3.0 GPA in their graduate courses for two or more consecutive semesters will be academically disqualified from the university.*

Program Learning Outcomes

Students graduating with an M.B.A. from Cal State East Bay will be able to:

- Identify global business opportunities, analyze global business challenges, and develop business strategies.
- Demonstrate leadership and teamwork skills.
- Apply advanced written communication skills.
- Apply advanced oral communication skills.
- Demonstrate cross-cultural awareness and sensitivity in their interpersonal and group communication.
- Perform quantitative analyses and apply advanced technological tools to solve complex business problems.
- Analyze and integrate knowledge across disciplines to make managerial decisions to reach solutions to complex business problems.
- Recognize and analyze ethical issues in decision making.

Business Administration Degree Requirements (42 units)

Core Courses

The following 27 core units are required for all M.B.A. students:

- BUS 601 - Leadership and Communication in Organizations *Units: 3*
- BUS 602 - Business Analytics for Managers *Units: 3*
- BUS 603 - Managing Complex Issues in Global Context *Units: 3 ; G.E./G.R. Area: UWSR*
- BUS 604 - Financial Accounting *Units: 3*
- BUS 605 - Corporate Financial Management *Units: 3*
- BUS 606 - Managerial Economics *Units: 3*
- BUS 607 - Marketing Management *Units: 3*
- BUS 608 - Operations and Supply Chain Management *Units: 3*
- BUS 609 - Negotiation and Conflict Resolution *Units: 3*

Concentrations

Students must select one (1) of the following 12-unit concentrations:

- Business Administration, M.B.A.: Analytics for Managers Concentration
- Business Administration, M.B.A.: Finance Concentration
- Business Administration, M.B.A.: General Business Concentration
- Business Administration, M.B.A.: Global Innovators Concentration (Self Support only)
- Business Administration, M.B.A.: Human Resources Management and Organizational Behavior Concentration
- Business Administration, M.B.A.: Marketing Management Concentration
- Business Administration, M.B.A.: Operations and Supply Chain Management Concentration
- Business Administration, M.B.A.: Strategy & Innovation Concentration

Capstone Requirement

The following capstone is required for 3 units to complete the degree:

- BUS 693 - Strategic Management Capstone (Project) *Units: 3*

General Business Concentration

See Errata for corrections to this content.

Required Courses

Students select 12 units of 600 level electives from BAN, BUS, ECON, FIN, MGMT, and MKTG **excluding** BAN 601, BAN 602, and BUS 601 through BUS 610. Courses must be drawn from at least three different subject areas (based on course prefixes).

Other Graduate & Post-Baccalaureate Degree Requirements

In addition to departmental requirements, every student must also satisfy the University requirements for graduation as described throughout this catalog. These include the 70% unit residence requirement; the five-year rule on currency of subject matter; the minimum number of units in 600-level courses; the "C" minimum grade for each graduate course; the 3.00 cumulative grade point average; and the University Writing Skills Requirement.

Note: For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call (510) 885-3661.

Business Administration, M.B.A.: Global Innovators Concentration

Please note: The Master in Business Administration, Global Innovators concentration is only available through Continuing Education.

Business Administration, M.B.A. Program

Mission

CBE provides life-changing, quality business education to prepare students from diverse backgrounds to become successful business professionals and leaders.

Vision and Values

We aspire to be a leading business school known for making a difference in the lives of our students and for our impact on the world. In support of our mission, we value:

- Ethical behavior and personal integrity
- Collegiality and mutual respect

- Collaboration for learning, scholarship, and community engagement
- Social and environmental responsibility
- Inclusive learning environment for a diverse student population
- Innovative thinking and a global mindset

All CBE programs are accredited by AACSB International - The Association to Advance Collegiate Schools of Business.

The College of Business and Economics offers the following master's degrees:

Master of Business Administration

M.B.A. students must select one of the following concentrations to fulfill the degree:

Analytics for Managers • Finance • General Business • Global Innovator • Human Resources and Organizational Behavior • Marketing Management • Operations and Supply Chain Management • Strategy and Innovation

Master of Science in Business Analytics

Master of Science in Economics

Program Description

The M.B.A. program supports students' career advancement by preparing them for positions of leadership in an increasingly diverse and globally competitive economy. The program is centered on the rigorous knowledge of the basic functional areas of business, an appreciation of management challenges in a global context, and opportunities to develop students' interpersonal and executive leadership skills. It also enables students to deepen and broaden their knowledge and skills through elective courses in an area of concentration. The program offers a range of formats to cater to the needs of full and part time students and students seeking an executive style MBA.

Career Opportunities

There is a strong growth in opportunities for management careers in both the general and the functional areas represented in the program's concentrations. The MBA program prepares graduates with strong foundation in general management knowledge and skills and gives them an extra edge in concentration areas that are growing in demand. Among the strong careers for those with MBA include Financial Manager, Health Services Manager, High-End Management Consultant, Human Resources Manager, Investment Banker, Investment Fund Manager, Marketing Manager, Marketing Researcher, Sales Manager, Operations and Supply Chain Manager, and Upper Management and Executive Leadership. The growing career opportunities for Finance, Marketing, HR, Operations, and Strategy validate the strength and the value of the CSUEB MBA program.

Admission

The M.B.A. is open to students who hold a baccalaureate degree from an accredited college or university. Each applicant is evaluated on the basis of past academic performance as reflected in undergraduate grade point average and subsequent coursework; and results of the Graduate Management Admissions Test (GMAT) in verbal, quantitative, and the "Index Score" that involves the total GMAT score, $\text{Index Score} = (\text{Upper Division GPA} \times 200) + \text{Total GMAT}$. Admission to the program is selective. The average GPA

and GMAT score of applicants admitted to the program varies from year to year. For last year's admitted students profile, please visit the CBE Graduate Student Success and Services Office. GRE score, if provided, is accepted in place of GMAT. GMAT may be waived for applicants with five years or more work experience.

Proficiencies

All Conditionally Classified M.B.A. students must fulfill the University Writing Skills Requirement (UWSR) to achieve "Classified Graduate" status. The Writing Skills Requirement could be met as an undergraduate or graduate student at one of the CSU system campuses, with a score of 4.5 or better on the GMAT essay, by passing the Writing Skills Test (WST) or through coursework. Information about the Writing Skills Test and the courses can be found on the Testing Office website. The Website contains information on test dates, registration procedures and fees. Further information can be obtained from the Testing Office. If students have not satisfied the UWSR before they begin their graduate work, they must either take the WST or enroll in a first tier course by the end of their first semester in the program.

The MBA program is designed to provide essential business knowledge to students without assuming prior business background. Therefore no specific prerequisite courses are required, but proficiency in math and statistics is expected.

Student Standing and Progress Toward the Degree

There are three categories of student status which reflect student progress toward the degree: "Conditionally Classified Graduate," "Classified Graduate," and "Advancement to Candidacy."

- Students achieve "Conditionally Classified Graduate" status when they have been admitted to the MBA degree program, but have not yet completed the University Writing Skills Requirement.
- Students achieve "Classified Graduate" status when they have satisfactorily completed the University Writing Skills Requirement.
- Students are Advanced to Candidacy when they have completed the 42 semester units meeting the following criteria:
 - All have a course grade of "C" or better.
 - Complete a minimum of 30 units in residence after admission to the program.
 - Have a combined 3.0 grade point average (minimum) in all units taken to satisfy the requirements of the student's degree program.
 - Have no more than 12 units for extension and/or transfer credit (any extension and/or transfer credit must be approved by the Program Director) and/or coursework taken in "Unclassified Post-baccalaureate" status.
 - All units earned within the five years immediately preceding the completion of the requirements for the degree.
 - Have completed a satisfactory program of study as determined by the College of Business and Economics and the university.
- To be eligible for the M.B.A. a student must have been Advanced to Candidacy (see Graduate Degree Information chapter of the catalog)

Note: Students who fail to maintain progress by falling below a 3.0 GPA in their graduate courses for two or more consecutive semesters will be academically disqualified from the university.

Program Learning Outcomes

Students graduating with an M.B.A. from Cal State East Bay will be able to:

- Identify global business opportunities, analyze global business challenges, and develop business strategies.
- Demonstrate leadership and teamwork skills.
- Apply advanced written communication skills.
- Apply advanced oral communication skills.
- Demonstrate cross-cultural awareness and sensitivity in their interpersonal and group communication.
- Perform quantitative analyses and apply advanced technological tools to solve complex business problems.
- Analyze and integrate knowledge across disciplines to make managerial decisions to reach solutions to complex business problems.
- Recognize and analyze ethical issues in decision making.

Business Administration Degree Requirements (42 units)

Core Courses

The following 27 core units are required for all M.B.A. students:

- BUS 601 - Leadership and Communication in Organizations *Units: 3*
- BUS 602 - Business Analytics for Managers *Units: 3*
- BUS 603 - Managing Complex Issues in Global Context *Units: 3 ; G.E./G.R. Area: UWSR*

Business Administration, M.B.A.: Human Resources Management and Organizational Behavior Concentration

Business Administration, M.B.A. Program

Mission

CBE provides life-changing, quality business education to prepare students from diverse backgrounds to become successful business professionals and leaders.

Vision and Values

We aspire to be a leading business school known for making a difference in the lives of our students and for our impact on the world. In support of our mission, we value:

- Ethical behavior and personal integrity
- Collegiality and mutual respect
- Collaboration for learning, scholarship, and community engagement
- Social and environmental responsibility
- Inclusive learning environment for a diverse student population
- Innovative thinking and a global mindset

All CBE programs are accredited by AACSB International - The Association to Advance Collegiate Schools of Business.

The College of Business and Economics offers the following master's degrees:

Master of Business Administration

M.B.A. students must select one of the following concentrations to fulfill the degree:

Analytics for Managers • Finance • General Business • Global Innovator • Human Resources and Organizational Behavior • Marketing Management • Operations and Supply Chain Management • Strategy and Innovation

Program Description

The M.B.A. program supports students' career advancement by preparing them for positions of leadership in an increasingly diverse and globally competitive economy. The program is centered on the rigorous knowledge of the basic functional areas of business, an appreciation of management challenges in a global context, and opportunities to develop students' interpersonal and executive leadership skills. It also enables students to deepen and broaden their knowledge and skills through elective courses in an area of concentration. The program offers a range of formats to cater to the needs of full and part time students and students seeking an executive style MBA.

Career Opportunities

There is a strong growth in opportunities for management careers in both the general and the functional areas represented in the program's concentrations. The MBA program prepares graduates with strong foundation in general management knowledge and skills and gives them an extra edge in concentration areas that are growing in demand. Among the strong careers for those with MBA include Financial Manager, Health Services Manager, High-End Management Consultant, Human Resources Manager, Investment Banker, Investment Fund Manager, Marketing Manager, Marketing Researcher, Sales Manager, Operations and Supply Chain Manager, and Upper Management and Executive Leadership. The growing career opportunities for Finance, Marketing, HR, Operations, and Strategy validate the strength and the value of the CSUEB MBA program.

Admission

The M.B.A. is open to students who hold a baccalaureate degree from an accredited college or university. Each applicant is evaluated on the basis of past academic performance as reflected in undergraduate grade point average and subsequent coursework; and results of the Graduate Management Admissions Test (GMAT) in verbal, quantitative, and the "Index Score" that involves the total GMAT score, $\text{Index Score} = (\text{Upper Division GPA} \times 200) + \text{Total GMAT}$. Admission to the program is selective. The average GPA and GMAT score of applicants admitted to the program varies from year to year. For last year's admitted students profile, please visit the CBE Graduate Student Success and Services Office. GRE score, if provided, is accepted in place of GMAT. GMAT may be waived for applicants with five years or more work experience.

Proficiencies

All Conditionally Classified M.B.A. students must fulfill the University Writing Skills Requirement (UWSR) to achieve "Classified Graduate" status. The Writing Skills Requirement could be met as an undergraduate or graduate student at one of the CSU system campuses, with a score of 4.5 or better on the GMAT essay, by passing the Writing Skills Test (WST) or through coursework. Information about the Writing Skills Test and the courses can be found on the Testing Office website. The Website contains information on test dates, registration procedures and fees. Further information can be obtained from the Testing Office. If students have not satisfied the UWSR before they begin their graduate work, they must either take the WST or enroll in a first tier course by the end of their first semester in the program.

The MBA program is designed to provide essential business knowledge to students without assuming prior business background. Therefore no specific prerequisite courses are required, but proficiency in math and statistics is expected.

Student Standing and Progress Toward the Degree

There are three categories of student status which reflect student progress toward the degree: "Conditionally Classified Graduate," "Classified Graduate," and "Advancement to Candidacy."

- Students achieve "Conditionally Classified Graduate" status when they have been admitted to the MBA degree program, but have not yet completed the University Writing Skills Requirement.
 - Students achieve "Classified Graduate" status when they have satisfactorily completed the University Writing Skills Requirement.
 - Students are Advanced to Candidacy when they have completed the 42 semester units meeting the following criteria:
 - All have a course grade of "C" or better.
 - Complete a minimum of 30 units in residence after admission to the program.
 - Have a combined 3.0 grade point average (minimum) in all units taken to satisfy the requirements of the student's degree program.
 - Have no more than 12 units for extension and/or transfer credit (any extension and/or transfer credit must be approved by the Program Director) and/or coursework taken in "Unclassified Post-baccalaureate" status.
 - All units earned within the five years immediately preceding the completion of the requirements for the degree.
 - Have completed a satisfactory program of study as determined by the College of Business and Economics and the university.
 - To be eligible for the M.B.A. a student must have been Advanced to Candidacy (see Graduate Degree Information chapter of the catalog)
- Note: Students who fail to maintain progress by falling below a 3.0 GPA in their graduate courses for two or more consecutive semesters will be academically disqualified from the university.*

Program Learning Outcomes

Students graduating with an M.B.A. from Cal State East Bay will be able to:

- Identify global business opportunities, analyze global business challenges, and develop business strategies.
- Demonstrate leadership and teamwork skills.
- Apply advanced written communication skills.
- Apply advanced oral communication skills.
- Demonstrate cross-cultural awareness and sensitivity in their interpersonal and group communication.
- Perform quantitative analyses and apply advanced technological tools to solve complex business problems.
- Analyze and integrate knowledge across disciplines to make managerial decisions to reach solutions to complex business problems.
- Recognize and analyze ethical issues in decision making.

Business Administration Degree Requirements (42 units)

Core Courses

The following 27 core units are required for all M.B.A. students:

- BUS 601 - Leadership and Communication in Organizations *Units: 3*
- BUS 602 - Business Analytics for Managers *Units: 3*
- BUS 603 - Managing Complex Issues in Global Context *Units: 3 ; G.E./G.R. Area:*
UWSR
- BUS 604 - Financial Accounting *Units: 3*
- BUS 605 - Corporate Financial Management *Units: 3*
- BUS 606 - Managerial Economics *Units: 3*
- BUS 607 - Marketing Management *Units: 3*
- BUS 608 - Operations and Supply Chain Management *Units: 3*
- BUS 609 - Negotiation and Conflict Resolution *Units: 3*

Concentrations

Students must select one (1) of the following 12-unit concentrations:

- Business Administration, M.B.A.: Analytics for Managers Concentration
- Business Administration, M.B.A.: Finance Concentration
- Business Administration, M.B.A.: General Business Concentration
- Business Administration, M.B.A.: Global Innovators Concentration (Self Support only)
- Business Administration, M.B.A.: Human Resources Management and Organizational Behavior
Concentration
- Business Administration, M.B.A.: Marketing Management Concentration
- Business Administration, M.B.A.: Operations and Supply Chain Management Concentration
- Business Administration, M.B.A.: Strategy & Innovation Concentration

Capstone Requirement

The following capstone is required for 3 units to complete the degree:

- BUS 693 - Strategic Management Capstone (Project) *Units: 3*

Human Resources Management and Organizational Behavior Concentration

Required Courses

Students select any four (4) courses, for 12 units, from the following:

- MGMT 610 - Strategic Human Resources Management *Units: 3*
- MGMT 612 - Strategic Compensation and Reward Systems *Units: 3*
- MGMT 614 - Talent Management *Units: 3*
- MGMT 616 - People Analytics *Units: 3*
- MGMT 618 - Human Resources and the Law *Units: 3*

- MGMT 620 - Leading Teams and Managing Creativity *Units: 3*
- MGMT 624 - Special Topics in Human Resource Management and Organizational Behavior *Units: 3*
- MGMT 622 - Managing the Global Workplace *Units: 3*

Other Graduate & Post-Baccalaureate Degree Requirements

In addition to departmental requirements, every student must also satisfy the University requirements for graduation as described throughout this catalog. These include the 70% unit residence requirement; the five-year rule on currency of subject matter; the minimum number of units in 600-level courses; the "C" minimum grade for each graduate course; the 3.00 cumulative grade point average; and the University Writing Skills Requirement.

Note: For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call (510) 885-3661.

Business Administration, M.B.A.: Operations and Supply Chain Management Concentration

Business Administration, M.B.A. Program

Mission

CBE provides life-changing, quality business education to prepare students from diverse backgrounds to become successful business professionals and leaders.

Vision and Values

We aspire to be a leading business school known for making a difference in the lives of our students and for our impact on the world. In support of our mission, we value:

- Ethical behavior and personal integrity
- Collegiality and mutual respect
- Collaboration for learning, scholarship, and community engagement
- Social and environmental responsibility
- Inclusive learning environment for a diverse student population
- Innovative thinking and a global mindset

All CBE programs are accredited by AACSB International - The Association to Advance Collegiate Schools of Business.

The College of Business and Economics offers the following master's degrees:

Master of Business Administration

M.B.A. students must select one of the following concentrations to fulfill the degree:

Analytics for Managers • Finance • General Business • Global Innovator • Human Resources and Organizational Behavior • Marketing Management • Operations and Supply Chain Management • Strategy and Innovation

Master of Science in Business Analytics

Master of Science in Economics

Program Description

The M.B.A. program supports students' career advancement by preparing them for positions of leadership in an increasingly diverse and globally competitive economy. The program is centered on the rigorous knowledge of the basic functional areas of business, an appreciation of management challenges in a global context, and opportunities to develop students' interpersonal and executive leadership skills. It also enables students to deepen and broaden their knowledge and skills through elective courses in an area of concentration. The program offers a range of formats to cater to the needs of full and part time students and students seeking an executive style MBA.

Career Opportunities

There is a strong growth in opportunities for management careers in both the general and the functional areas represented in the program's concentrations. The MBA program prepares graduates with strong foundation in general management knowledge and skills and gives them an extra edge in concentration areas that are growing in demand. Among the strong careers for those with MBA include Financial Manager, Health Services Manager, High-End Management Consultant, Human Resources Manager, Investment Banker, Investment Fund Manager, Marketing Manager, Marketing Researcher, Sales Manager, Operations and Supply Chain Manager, and Upper Management and Executive Leadership. The growing career opportunities for Finance, Marketing, HR, Operations, and Strategy validate the strength and the value of the CSUEB MBA program.

Admission

The M.B.A. is open to students who hold a baccalaureate degree from an accredited college or university. Each applicant is evaluated on the basis of past academic performance as reflected in undergraduate grade point average and subsequent coursework; and results of the Graduate Management Admissions Test (GMAT) in verbal, quantitative, and the "Index Score" that involves the total GMAT score, $\text{Index Score} = (\text{Upper Division GPA} \times 200) + \text{Total GMAT}$. Admission to the program is selective. The average GPA and GMAT score of applicants admitted to the program varies from year to year. For last year's admitted students profile, please visit the CBE Graduate Student Success and Services Office. GRE score, if provided, is accepted in place of GMAT. GMAT may be waived for applicants with five years or more work experience.

Proficiencies

All Conditionally Classified M.B.A. students must fulfill the University Writing Skills Requirement (UWSR) to achieve "Classified Graduate" status. The Writing Skills Requirement could be met as an undergraduate or graduate student at one of the CSU system campuses, with a score of 4.5 or better on the GMAT essay, by passing the Writing Skills Test (WST) or through coursework. Information about the Writing Skills Test and the courses can be found on the Testing Office website. The Website contains information on test dates, registration procedures and fees. Further information can be obtained from the Testing Office. If students have not satisfied the UWSR before they begin their graduate work, they must either take the WST or enroll in a first tier course by the end of their first semester in the program.

The MBA program is designed to provide essential business knowledge to students without assuming prior business background. Therefore no specific prerequisite courses are required, but proficiency in math and statistics is expected.

Student Standing and Progress Toward the Degree

There are three categories of student status which reflect student progress toward the degree: "Conditionally Classified Graduate," "Classified Graduate," and "Advancement to Candidacy."

- Students achieve "Conditionally Classified Graduate" status when they have been admitted to the MBA degree program, but have not yet completed the University Writing Skills Requirement.
- Students achieve "Classified Graduate" status when they have satisfactorily completed the University Writing Skills Requirement.
- Students are Advanced to Candidacy when they have completed the 42 semester units meeting the following criteria:
 - All have a course grade of "C" or better.
 - Complete a minimum of 30 units in residence after admission to the program.
 - Have a combined 3.0 grade point average (minimum) in all units taken to satisfy the requirements of the student's degree program.
 - Have no more than 12 units for extension and/or transfer credit (any extension and/or transfer credit must be approved by the Program Director) and/or coursework taken in "Unclassified Post-baccalaureate" status.
 - All units earned within the five years immediately preceding the completion of the requirements for the degree.
 - Have completed a satisfactory program of study as determined by the College of Business and Economics and the university.
- To be eligible for the M.B.A. a student must have been Advanced to Candidacy (see Graduate Degree Information chapter of the catalog)

Note: Students who fail to maintain progress by falling below a 3.0 GPA in their graduate courses for two or more consecutive semesters will be academically disqualified from the university.

Program Learning Outcomes

Students graduating with an M.B.A. from Cal State East Bay will be able to:

- Identify global business opportunities, analyze global business challenges, and develop business strategies.
- Demonstrate leadership and teamwork skills.
- Apply advanced written communication skills.
- Apply advanced oral communication skills.
- Demonstrate cross-cultural awareness and sensitivity in their interpersonal and group communication.
- Perform quantitative analyses and apply advanced technological tools to solve complex business problems.
- Analyze and integrate knowledge across disciplines to make managerial decisions to reach solutions to complex business problems.
- Recognize and analyze ethical issues in decision making.

Business Administration Degree Requirements (42 units)

Core Courses

The following 27 core units are required for all M.B.A. students:

- BUS 601 - Leadership and Communication in Organizations *Units: 3*

Master of Science in Business Analytics

Master of Science in Economics

Program Description

The M.B.A. program supports students' career advancement by preparing them for positions of leadership in an increasingly diverse and globally competitive economy. The program is centered on the rigorous knowledge of the basic functional areas of business, an appreciation of management challenges in a global context, and opportunities to develop students' interpersonal and executive leadership skills. It also

enables students to deepen and broaden their knowledge and skills through elective courses in an area of concentration. The program offers a range of formats to cater to the needs of full and part time students and students seeking an executive style MBA.

Career Opportunities

There is a strong growth in opportunities for management careers in both the general and the functional areas represented in the program's concentrations. The MBA program prepares graduates with strong foundation in general management knowledge and skills and gives them an extra edge in concentration areas that are growing in demand. Among the strong careers for those with MBA include Financial Manager, Health Services Manager, High-End Management Consultant, Human Resources Manager, Investment Banker, Investment Fund Manager, Marketing Manager, Marketing Researcher, Sales Manager, Operations and Supply Chain Manager, and Upper Management and Executive Leadership. The growing career opportunities for Finance, Marketing, HR, Operations, and Strategy validate the strength and the value of the CSUEB MBA program.

Admission

The M.B.A. is open to students who hold a baccalaureate degree from an accredited college or university. Each applicant is evaluated on the basis of past academic performance as reflected in undergraduate grade point average and subsequent coursework; and results of the Graduate Management Admissions Test (GMAT) in verbal, quantitative, and the "Index Score" that involves the total GMAT score, $\text{Index Score} = (\text{Upper Division GPA} \times 200) + \text{Total GMAT}$. Admission to the program is selective. The average GPA and GMAT score of applicants admitted to the program varies from year to year. For last year's admitted students profile, please visit the CBE Graduate Student Success and Services Office. GRE score, if provided, is accepted in place of GMAT. GMAT may be waived for applicants with five years or more work experience.

Proficiencies

All Conditionally Classified M.B.A. students must fulfill the University Writing Skills Requirement (UWSR) to achieve "Classified Graduate" status. The Writing Skills Requirement could be met as an undergraduate or graduate student at one of the CSU system campuses, with a score of 4.5 or better on the GMAT essay, by passing the Writing Skills Test (WST) or through coursework. Information about the Writing Skills Test and the courses can be found on the Testing Office website. The Website contains information on test dates, registration procedures and fees. Further information can be obtained from the Testing Office. If students have not satisfied the UWSR before they begin their graduate work, they must either take the WST or enroll in a first tier course by the end of their first semester in the program.

The MBA program is designed to provide essential business knowledge to students without assuming prior business background. Therefore no specific prerequisite courses are required, but proficiency in math and statistics is expected.

Student Standing and Progress Toward the Degree

There are three categories of student status which reflect student progress toward the degree: "Conditionally Classified Graduate," "Classified Graduate," and "Advancement to Candidacy."

- Students achieve "Conditionally Classified Graduate" status when they have been admitted to the MBA degree program, but have not yet completed the University Writing Skills Requirement.
 - Students achieve "Classified Graduate" status when they have satisfactorily completed the University Writing Skills Requirement.
 - Students are Advanced to Candidacy when they have completed the 42 semester units meeting the following criteria:
 - All have a course grade of "C" or better.
 - Complete a minimum of 30 units in residence after admission to the program.
 - Have a combined 3.0 grade point average (minimum) in all units taken to satisfy the requirements of the student's degree program.
 - Have no more than 12 units for extension and/or transfer credit (any extension and/or transfer credit must be approved by the Program Director) and/or coursework taken in "Unclassified Post-baccalaureate" status.
 - All units earned within the five years immediately preceding the completion of the requirements for the degree.
 - Have completed a satisfactory program of study as determined by the College of Business and Economics and the university.
 - To be eligible for the M.B.A. a student must have been Advanced to Candidacy (see Graduate Degree Information chapter of the catalog)
- Note: Students who fail to maintain progress by falling below a 3.0 GPA in their graduate courses for two or more consecutive semesters will be academically disqualified from the university.*

Program Learning Outcomes

Students graduating with an M.B.A. from Cal State East Bay will be able to:

- Identify global business opportunities, analyze global business challenges, and develop business strategies.
- Demonstrate leadership and teamwork skills.
- Apply advanced written communication skills.
- Apply advanced oral communication skills.
- Demonstrate cross-cultural awareness and sensitivity in their interpersonal and group communication.
- Perform quantitative analyses and apply advanced technological tools to solve complex business problems.
- Analyze and integrate knowledge across disciplines to make managerial decisions to reach solutions to complex business problems.
- Recognize and analyze ethical issues in decision making.

Business Administration Degree Requirements (42 units)

Core Courses

The following 27 core units are required for all M.B.A. students:

- BUS 601 - Leadership and Communication in Organizations *Units: 3*
- BUS 602 - Business Analytics for Managers *Units: 3*
- BUS 603 - Managing Complex Issues in Global Context *Units: 3 ; G.E./G.R. Area: UWSR*

- BUS 604 - Financial Accounting *Units: 3*
- BUS 605 - Corporate Financial Management *Units: 3*
- BUS 606 - Managerial Economics *Units: 3*
- BUS 607 - Marketing Management *Units: 3*
- BUS 608 - Operations and Supply Chain Management *Units: 3*
- BUS 609 - Negotiation and Conflict Resolution *Units: 3*

Concentrations

Students must select one (1) of the following 12-unit concentrations:

- Business Administration, M.B.A.: Analytics for Managers Concentration
- Business Administration, M.B.A.: Finance Concentration
- Business Administration, M.B.A.: General Business Concentration
- Business Administration, M.B.A.: Global Innovators Concentration (Self Support only)
- Business Administration, M.B.A.: Human Resources Management and Organizational Behavior Concentration
- Business Administration, M.B.A.: Marketing Management Concentration
- Business Administration, M.B.A.: Operations and Supply Chain Management Concentration
- Business Administration, M.B.A.: Strategy & Innovation Concentration

Capstone Requirement

The following capstone is required for 3 units to complete the degree:

- BUS 693 - Strategic Management Capstone (Project) *Units: 3*

Strategy & Innovation Concentration

Required Courses

Students select at least three (3) courses, for 12 units, from the following list of electives. The fourth course can be any elective course from other M.B.A. concentrations.

- MGMT 678 - Design Thinking for Leaders *Units: 3*
- MGMT 670 - Strategic Industry and Competitive Analysis *Units: 3*
- MGMT 675 - Innovation Strategy *Units: 3*
- MGMT 676 - Global Strategy *Units: 3*
- MGMT 680 - Sustainability Strategy *Units: 3*
- MGMT 685 - Non-Market Strategy *Units: 3*
- MGMT 688 - Business Opportunity Consulting Project *Units: 3*

Other Graduate & Post-Baccalaureate Degree Requirements

In addition to departmental requirements, every student must also satisfy the University requirements for graduation as described throughout this catalog. These include the 70% unit residence requirement; the five-year rule on currency of subject matter; the minimum number of units in 600-level courses; the "C"

minimum grade for each graduate course; the 3.00 cumulative grade point average; and the University Writing Skills Requirement.

Note: For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call (510) 885-3661.

Business Analytics, M.S.

Business Analytics, M.S. Program

Program Description

The Master of Science in Business Analytics (M.S.B.A.) provides students with a balanced and broad set of knowledge and skills in data analytics. This degree offers an in-depth study of advanced information technology used in business analytics. It also provides a comprehensive presentation of quantitative methods and software for business analytics, and develops students' knowledge and skills in applying analytics to solve business problems.

Career Opportunities

The M.S.B.A. program prepares students for exciting career opportunities in business analytics, business intelligence, data science, and data engineering.

Admission Requirements

The M.S. Business Analytics minimum admission requirements include:

- Baccalaureate degree with strong quantitative and computer programming background from an accredited college or university.

- Demonstrated mastery of college algebra, statistics and object-oriented programming with a grade of "C" or better in relevant coursework within 7 years of starting in the program.
 - Undergraduate degree with at least 2.5 Grade Point Average (or equivalent).
 - Acceptable percentile rankings in verbal and quantitative section of GRE or GMAT. No preference for one test over the other.
 - For International students: demonstrated proof of English proficiency, e.g., TOEFL score of 550 (paper-based), 213 (computer-based) or 79 (internet-based), or IELTS of 6.5 or above.
- Note: Admission to the program is selective. Meeting the minimum requirement does not guarantee the admission.*

Student Standing and Progress Toward the Degree

There are three categories of student status which reflect student progress toward the degree: "Conditionally Classified Graduate," "Classified Graduate," and "Advancement to Candidacy."

1. Students achieve "Conditionally Classified Graduate" status when they have been admitted to the MSBA degree program, but have not yet completed the prerequisites for "Classified Graduate" status in the M.S. in Business Analytics degree program.
2. Students achieve "Classified Graduate" status when they have satisfactorily completed the prerequisites for "Classified Graduate" status in the M.S. in Business Analytics degree program. (See "Prerequisites for "Classified Graduate Status" below.)
3. Students are Advanced to Candidacy when they have completed the 30 semester units meeting the following criteria:
 - All have a course grade of "C" or better.
 - Have a combined 3.0 grade point average (minimum) in all units taken to satisfy the requirements of the student's degree program.
 - Have no more than 6 units for extension and/or transfer credit (any extension and/or transfer credit must be approved by the Program Director) and/or coursework taken in "Unclassified Post-baccalaureate" status.
 - All units earned within the five years immediately preceding the completion of the requirements for the degree.
 - To be eligible for the MSBA, a student must have been Advanced to Candidacy (see Graduate Degree Information chapter of the catalog)
 - *Note: Students who fail to maintain progress by falling below a 3.0 GPA in their graduate courses for one or more consecutive semesters will be academically disqualified from the university.*

Prerequisites for "Classified Graduate" status

1. Students must satisfy the University Writing Skill Requirement (UWSR). The UWSR could be met as an undergraduate or graduate student at one of the CSU system campuses, with a score of 4.5 or better on the GMAT/GRE essay, by passing the Writing Skills Test (WST) or through coursework. For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call 510.885.3661.
2. Students must satisfactorily complete BAN 601 - Technology Fundamentals for Analytics with a grade of "B-" or better. Student can request to have this prerequisite waived.
3. Students must satisfactorily complete BAN 602 - Quantitative Fundamentals for Analytics with a grade of "B-" or better. Student can request to have this prerequisite waived.

Program Learning Outcomes

Students who graduate with a Master of Science in Business Analytics will be able to:

1. Demonstrate advanced knowledge and skills in using business analytics technology and applications.
2. Build expertise in quantitative methods and tools for business analytics.
3. Develop data analytics skills in making effective business decisions.
4. Develop effective written communication skills in conveying project ideas, activities, and findings.

Business Analytics Degree Requirements (30 units)

Note: Please see Errata page for corrections to this content.

Core Courses

Complete the following six (6) courses for 18 units:

- BAN 610 - Database Management and Applications *Units: 3*
- BAN 612 - Data Analytics *Units: 3*
- BAN 620 - Data Mining *Units: 3*
- BAN 622 - Data Warehousing and Business Intelligence *Units: 3*
- BAN 630 - Optimization Methods for Analytics *Units: 3*
- BAN 632 - Big Data Technology and Applications *Units: 3*

Elective Courses

Select three (3) courses from the following for 9 units:

- BAN 660 - Advanced Topics in Big Data *Units: 3*
- BAN 670 - Advanced Topics in Analytics *Units: 3*
- BAN 671 - Data Analytics with R *Units: 3*
- BAN 672 - Data Analytics with SAS *Units: 3*
- BAN 673 - Time Series Analytics *Units: 3*
- BAN 674 - Machine Learning for Business Analytics *Units: 3*
- BAN 675 - Text Mining and Social Media Analytics *Units: 3*
- BAN 676 - Deep Learning for Business Applications *Units: 3*
- MGMT 616 - People Analytics *Units: 3*
- MGMT 654 - Enterprise Planning and Control *Units: 3*
- MGMT 658 - Project Management *Units: 3*
- MGMT 662 - Operations Analytics *Units: 3*
- MKTG 612 - Marketing Analytics *Units: 3*

Capstone Requirement

The Business Analytics Capstone Project for 3 units is required for all MSBA students:

- BAN 693 - Business Analytics Capstone Project *Units: 3*

Other Graduate & Post-Baccalaureate Degree Requirements

In addition to departmental requirements, every student must also satisfy the University requirements for graduation as described throughout this catalog. These include the 70% unit residence requirement; the five-year rule on currency of subject matter; the minimum number of units in 600-level courses; the "C" minimum grade for each graduate course; the 3.00 cumulative grade point average; and the University Writing Skills Requirement.

Note: For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call (510) 885-3661.

Minor

Business Administration Minor

Minor Requirements (24 units)

The Business Administration minor provides students with a breadth of study in various areas of business and management. The emphasis is on acquiring general knowledge and skills in accounting, economics, finance, marketing, human resources, information technology and operations management. The minor program is designed to complement your primary field of study.

Note:

- Business Administration majors cannot declare this minor, but can choose the General Management concentration in the Bachelor of Science in Business Administration program.
- A course marked with the asterisk symbol (*) indicates that it has several other courses as its prerequisites which are not explicitly listed in this minor. Taking one or more courses marked with (*) may lead to a total of more than 24 units to complete the Business Administration minor.

- No more than 9 units used to fulfill other requirements (e.g., for general education, a major, concentrations, or other minors) can be counted toward the requirements for the Business Administration minor.
- Courses taken for CR/NC (credit/no credit) will not be counted toward the requirements for the Bachelor of Science in Business Administration (BSBA) program because courses for BSBA must be completed with a letter grade of "C-" or better ("C" or better for BUS 499).

Required Courses

Take the following 6 units:

- **ECON 200 - Principles of Microeconomics** *Units: 3 ; G.E./G.R. Area: D1-3; Social Justice*
- **ACCT 210 - Introduction to Financial Accounting** *Units: 3*

Elective Courses

Choose six (6) courses for 18 units from the following:

- **BUS 310 - Organizational Behavior** *Units: 3*
- **BUS 320 - Business and Professional Ethics** *Units: 3 (*)*
- **BUS 325 - Marketing Principles** *Units: 3*
- **BUS 330 - Financial Management** *Units: 3 (*)*
- **BUS 335 - Communications in Team Building** *Units: 3 (*)*
- **BUS 340 - Information Technology Management** *Units: 3*
- **BUS 360 - Operations Management** *Units: 3 (*)*
- **BUS 370 - Business, Government and Society** *Units: 3*
- **BUS 385 - International Business** *Units: 3*
- **OR ECON 385 - Global Economic Analysis** *Units: 3 (*)*
- **ECON 380 - Managerial Economics and Business Strategy** *Units: 3 ; G.E./G.R. Area: B6; Sustainability (*)*
- **MGMT 314 - Leadership and Management** *Units: 3*
- **MGMT 350 - Decision Science** *Units: 3 ; G.E./G.R. Area: B6 (*)*

Note: Of BUS 385 and ECON 385, if either course is used toward the requirements for the Business Administration minor, the other course should not be taken because it will not be counted toward the requirements for the Business Administration minor or for any other majors, concentrations, or minors offered by the College of Business and Economics.

Note: Please see Errata page for corrections to BAN course content.

Information Technology Management Minor

Minor Requirements (18-21 units)

The Information Technology Management (ITM) minor provides students with the technical and managerial knowledge and skills needed to effectively integrate people, information and communication technologies with business and management processes. The minor program is designed to complement your primary field of study.

Note:

- Business Administration majors cannot declare this minor, but can choose the Information Technology Management concentration in the Bachelor of Science in Business Administration program.
- No more than 9 units used to fulfill other requirements (e.g., for general education, a major, concentrations, or other minors) can be counted toward the requirements for the Information Technology Management minor.
- Digital Proficiency is a prerequisite for BUS 340.
- Except for ITM 330, all other elective courses require BUS 340 as a prerequisite.
- Both ITM 440 and ITM 449 require ITM 330 as an additional prerequisite.
- Courses taken for CR/NC (credit/no credit) will not be counted toward the requirements for the Bachelor of Science in Business Administration (BSBA) program because courses for BSBA must be completed with a letter grade of "C-" or better ("C" or better for BUS 499).

Digital Proficiency

Digital proficiency can be fulfilled in one of the following ways for 0-3 units:

- Pass the Digital Proficiency test administered quarterly by the College of Business and Economics. Contact CBE Undergraduate Student Success & Service Center for details.
- Receive a total scaled score of 50 or higher on the "Information Systems" test administered by College Board's College-Level Examination Program (CLEP). Visit CLEP Information Systems (<https://clep.collegeboard.org/exam/information-systems-computers>) for details. Note that the total scaled scores fall between 20 and 80. Your total scaled score must be at least 50, which does not mean 50%.
- Or complete BUS 110 or an equivalent course, with a letter grade of "C-" or better:
- **BUS 110 - Fundamentals of Information Systems and Applications** *Units: 3*

Required Course

Take the following 3 units:

- **BUS 340 - Information Technology Management** *Units: 3*

Elective Courses

Choose five (5) courses for 15 units from the following:

- **ITM 330 - Business Applications Programming** *Units: 3*
- **ITM 331 - Database Management Systems** *Units: 3*
- **ITM 332 - Business Data Communications** *Units: 3*
- **ITM 336 - Information Systems Development and Management** *Units: 3*
- **ITM 338 - E-Business Technology and Management** *Units: 3*
- **ITM 440 - Business Intelligence Systems** *Units: 3*
- **ITM 442 - Healthcare Information Systems** *Units: 3*
- **ITM 446 - Information Security** *Units: 3*
- **ITM 448 - Information Systems Analytics** *Units: 3*
- **ITM 449 - Advanced Topics in Information Technology** *Units: 3*

International Business Minor

Minor Requirements (21 units)

The International Business minor enables students to obtain knowledge and skills that can help them understand and manage businesses in a competitive global environment. The minor program is designed to complement your primary field of study.

Note:

- Business Administration majors cannot declare this minor.
- A course marked with the asterisk symbol (*) indicates that it has several other courses as its prerequisites which are not explicitly listed in this minor. Taking one or more courses marked with (*) may lead to a total of more than 21 units to complete the International Business minor.
- No more than 9 units used to fulfill other requirements (e.g., for general education, a major, concentrations, or other minors) can be counted toward the requirements for the International Business minor.
- Courses taken for CR/NC (credit/no credit) will not be counted toward the requirements for the Bachelor of Science in Business Administration (BSBA) program because courses for BSBA must be completed with a letter grade of "C-" or better ("C" or better for BUS 499).

Required Course

Choose one (1) of the two courses for 3 units:

- **BUS 385 - International Business** *Units: 3*
- **OR ECON 385 - Global Economic Analysis** *Units: 3 (*)*

Note:

- *Of BUS 385 and ECON 385, only one of the two courses is required.*
- *Of BUS 385 and ECON 385, if one of the two courses is used toward the requirements for the International Business minor, the other course should not be taken because it will not be counted toward the requirements for the International Business minor or for any other majors, concentrations, or minors offered by the College of Business and Economics.*

Elective Courses

Choose six (6) courses for 18 units from the following:

- **MGMT 311 - Managing Diversity in the 21st Century Workplace** *Units: 3*
- **MGMT 312 - Human Resources Management** *Units: 3*
- **MGMT 320 - Negotiation and Conflict Management** *Units: 3*
- **BUS 325 - Marketing Principles** *Units: 3*
- **ECON 350 - International Economics** *Units: 3 (*)*
- **MGMT 364 - Global Supply Chain Management** *Units: 3 (*)*
- **MGMT 402 - Managing the Global Workplace** *Units: 3*
- **MKTG 430 - International Marketing** *Units: 3*
- **FIN 460 - International Business Finance** *Units: 3 (*)*

Department of Marketing

The Department Office is located on the 4th floor of the VBT building, Room 442.

We are open 8:00AM - 6:00PM Monday through Friday.

Dept. Phone: (510) 885 - 3326

Faculty

Professor Emeritus

Jagdish Agrawal, Ph.D. State University of New York at Buffalo

Professors

Stevina Evuleocha, Ph.D. Ohio University

Sweety Law, Ph.D. Ohio State University

C. Joanna Lee (Chair), Ph.D. University of Texas at Austin

George S. Low, Ph.D. University of Colorado, Boulder

Cesar Maloles, Ph.D. City University of New York

Steve Ugbah, Ph.D. Ohio University

Lan Wu, Ph.D. Georgia Institute of Technology

Associate Professor

Yi He, Ph.D. University of Hawai'i

Assistant Professors

Judy Ma, Ph.D. Rensselaer Polytechnic Institute

Joon-Hee Oh, Ph.D. Georgia State University

Ya You, Ph.D. University of Central Florida

Mission Statement

Principal foundations of the Department of Marketing have been and continue to be quality instruction and scholarly activities of the faculty as well as the interaction between and among faculty, students, and the business community. The Department of Marketing fosters community connection and welcomes partnership opportunities that enhance educational experiences of our students.

About the Department

Business Administration, B.S. Program (120 units)

Program Description

The College of Business and Economics, which offers the Bachelor of Science in Business Administration (B.S.B.A.) program, is committed to providing life-changing, quality business education to prepare students from diverse backgrounds to become successful business professionals and leaders. The B.S.B.A. program imparts students with the knowledge and skills necessary to understand the changing global business environment and to prepare students for success in their professional careers.

The B.S.B.A. major program is structured around a set of core courses enabling students to develop general business perspective and skills. Students are required to choose an area of specialization, i.e., concentration, corresponding to their desired career path. In addition, the program allows students flexibility to customize their specialization by choosing business elective courses. These electives may be chosen to further strengthen their preparation in their chosen concentration.

The undergraduate and the graduate programs in the College of Business and Economics are accredited by the Association to Advance Collegiate Schools of Business International (AACSB).

Program Learning Outcomes

Students graduating with a Bachelor of Science in Business Administration will be able to:

- Recognize and integrate foundation knowledge across functional areas.
- Apply critical thinking skills to solve business problems.
- Understand and apply quantitative methods and tools in evaluating business problems and making effective business decisions.
- Apply technology to analyze data and provide solutions to business problems.

- Apply effective oral communication skills in a diverse and global environment.
- Apply effective written communication skills in a diverse and global environment.
- Apply effective team skills to work in a diverse and global environment.
- Identify and assess ethical issues and properly articulate ethical decisions.

Expiration of Courses

Upper division major/concentration requirement courses will expire ten years after completion of the term in which they are earned. Expired courses cannot be used to fulfill degree requirements and must be replaced by current credits. Requests for waivers of the ten-year limit for extenuating circumstances, other than mere failure to register, are made to the department chair in which the course resides and the director of undergraduate programs.

Transfer of Courses

Upper division courses will only be considered for equivalency or transfer credit if they are from AACSB accredited institutions. Exceptions will be made for programs that have current and signed agreements with the College of Business and Economics.

Degree Requirements

The B.S. degree requires a total of 120 units. In addition to General Education courses and other graduation requirements, the Business Administration major requires three sets of courses: (I) lower division core courses, (II) upper division core courses, and (III) courses to fulfill concentration requirements.

Degree Requirements Unit-Outline

- A baccalaureate of science degree requires a total of 120 units:
 - The major requirements consists of 75 units;
 - General Education (GE) & Graduation Requirements (GR) consists of 57 units;
 - Free Electives may consist of 0 units (*actual number of free elective units may depend on GE/GR units*).

Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.

Business Administration Major Requirements (75 units)

Note: Please see the Errata pages for corrections made to the major requirements effective for all concentrations.

Lower Division Core Courses

The following 18 units of lower-division coursework are required:

- ACCT 210 - Introduction to Financial Accounting *Units: 3*
- ACCT 215 - Introduction to Managerial Accounting *Units: 3*

- **ECON 200 - Principles of Microeconomics** *Units: 3 ; G.E./G.R. Area: D1-3; Social Justice*
- **ECON 205 - Principles of Macroeconomics** *Units: 3 ; G.E./G.R. Area: D1-3*
- **MATH 180 - Mathematics for Business with Calculus** *Units: 3 ; G.E./G.R. Area: B4*
- **STAT 110 - Elements of Statistics for Business and Economics** *Units: 3*

Upper Division Core Courses

The following 27 units of upper-division coursework is required:

- **BUS 310 - Organizational Behavior** *Units: 3*
- **BUS 325 - Marketing Principles** *Units: 3*
- **BUS 330 - Financial Management** *Units: 3*
- **BUS 335 - Communications in Team Building** *Units: 3*
- **BUS 360 - Operations Management** *Units: 3*
- **BUS 499 - Seminar in Strategic Business Management** *Units: 3*
- **ECON 380 - Managerial Economics and Business Strategy** *Units: 3 ; G.E./G.R. Area: B6; Sustainability*
- **MGMT 350 - Decision Science** *Units: 3 ; G.E./G.R. Area: B6*

Plus, choose one (1) course from the following:

- **BUS 385 - International Business** *Units: 3 OR*
- **ECON 385 - Global Economic Analysis** *Units: 3 Recommended for Business Economics concentration students*

Concentration Requirements

Students must select one (1) of the following concentrations for 30 units:

- Business Administration, B.S.: Accounting Concentration
- Business Administration, B.S.: Business Economics Concentration
- Business Administration, B.S.: Entrepreneurship Concentration
- Business Administration, B.S.: Finance Concentration (Available Online)
- Business Administration, B.S.: General Management Concentration (Available Online)
- Business Administration, B.S.: Human Resources Management & Organizational Behavior Concentration
- Business Administration, B.S.: Information Technology Management Concentration (Available Online)
- Business Administration, B.S.: Marketing Management Concentration
- Business Administration, B.S.: Operations and Supply Chain Management Concentration (Available Online)

Entrepreneurship Concentration

The Entrepreneurship concentration focuses on the management of existing small and medium size businesses, the procedures for establishing new ventures either as new firms or as subdivisions of existing firms, and the problems confronting new venture managers during the critical start-up period. The

concentration provides an excellent preparation to those who plan to have their own firm, to be employed by small or medium size business firms with high growth potential, or to work in positions within financial institutions, government agencies, management consulting firms, and marketing agencies that deal primarily with the needs and problems of small to medium sized firms.

Required Courses

The following 12 units are required:

- **BUS 220 - Legal Environment of Business** *Units: 3 ; G.E./G.R. Area: D1-3; Social Justice*
- **BUS 320 - Business and Professional Ethics** *Units: 3*
- **BUS 340 - Information Technology Management** *Units: 3*
- **BUS 370 - Business, Government and Society** *Units: 3*

Elective Courses

Select six (6) courses for 18 units from the following list:

- **ECON 431 - Economics of Innovation & Intellectual Property** *Units: 3*
- **FIN 470 - Entrepreneurial Finance** *Units: 3*
- **MGMT 320 - Negotiation and Conflict Management** *Units: 3*
- **MGMT 450 - Project Management** *Units: 3*
- **MKTG 310 - Marketing Research** *Units: 3*
- **MKTG 427 - Digital Marketing and Social Media** *Units: 3*
- **MKTG 485 - Establishing New Enterprises** *Units: 3*
- **MKTG 487 - Practicum in Small Business Management** *Units: 3*

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

- Business Administration, B.S.: Information Technology Management Concentration (Available Online)
- Business Administration, B.S.: Marketing Management Concentration
- Business Administration, B.S.: Operations and Supply Chain Management Concentration (Available Online)

Marketing Management Concentration

The task of marketing is to help an organization create and maintain satisfying relationships with its important customers. Students completing the coursework in the Marketing Management concentration acquire the knowledge and skills necessary to understand the needs of customers and the market, to design effective marketing strategies, and to successfully implement and monitor the chosen marketing program. Global competition coupled with technological advances forces both for-profit and nonprofit organizations to revitalize the marketing function for their success. The growing awareness of the importance of marketing has led to an increase in the number of marketing positions available. The concentration prepares students for careers in advertising and promotion, brand and product management, sales and sales management, retailing, non-profit, international marketing, marketing research, new product planning, marketing logistics and public relations.

Required Courses

The following 21 units are required:

- BUS 220 - Legal Environment of Business *Units: 3 ; G.E./G.R. Area: D1-3; Social Justice*
- BUS 320 - Business and Professional Ethics *Units: 3*
- BUS 340 - Information Technology Management *Units: 3*
- BUS 370 - Business, Government and Society *Units: 3*
- MKTG 310 - Marketing Research *Units: 3*
- MKTG 314 - Consumer Behavior *Units: 3*
- MKTG 440 - Marketing Strategy *Units: 3*

Elective Courses

Select three (3) courses for 9 units from the following list:

- MKTG 312 - Marketing Analytics *Units: 3*
- MKTG 415 - Corporate Communications *Units: 3*
- MKTG 420 - Product, Service, and Brand Management *Units: 3*
- MKTG 424 - Sales Management *Units: 3*
- MKTG 425 - Business-to-Business Marketing *Units: 3*
- MKTG 426 - Advertising and Promotion Management *Units: 3*

- MKTG 427 - Digital Marketing and Social Media *Units: 3*
- MKTG 430 - International Marketing *Units: 3*
- MKTG 497 - Seminar in Selected Marketing Topics *Units: 3*

Note: An introductory course in Psychology is strongly recommended. It may also satisfy lower division G.E. requirements.

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

Master

Business Administration, M.B.A.: Marketing Management Concentration

Business Administration, M.B.A. Program

Mission

CBE provides life-changing, quality business education to prepare students from diverse backgrounds to become successful business professionals and leaders.

Vision and Values

We aspire to be a leading business school known for making a difference in the lives of our students and for our impact on the world. In support of our mission, we value:

- Ethical behavior and personal integrity
- Collegiality and mutual respect
- Collaboration for learning, scholarship, and community engagement
- Social and environmental responsibility
- Inclusive learning environment for a diverse student population
- Innovative thinking and a global mindset

All CBE programs are accredited by AACSB International - The Association to Advance Collegiate Schools of Business.

The College of Business and Economics offers the following master's degrees:

Master of Business Administration

M.B.A. students must select one of the following concentrations to fulfill the degree:

Analytics for Managers • Finance • General Business • Global Innovator • Human Resources and Organizational Behavior • Marketing Management • Operations and Supply Chain Management • Strategy and Innovation

Master of Science in Business Analytics

Program Description

The M.B.A. program supports students' career advancement by preparing them for positions of leadership in an increasingly diverse and globally competitive economy. The program is centered on the rigorous knowledge of the basic functional areas of business, an appreciation of management challenges in a global context, and opportunities to develop students' interpersonal and executive leadership skills. It also enables students to deepen and broaden their knowledge and skills through elective courses in an area of concentration. The program offers a range of formats to cater to the needs of full and part time students and students seeking an executive style MBA.

Career Opportunities

There is a strong growth in opportunities for management careers in both the general and the functional areas represented in the program's concentrations. The MBA program prepares graduates with strong foundation in general management knowledge and skills and gives them an extra edge in concentration areas that are growing in demand. Among the strong careers for those with MBA include Financial Manager, Health Services Manager, High-End Management Consultant, Human Resources Manager, Investment Banker, Investment Fund Manager, Marketing Manager, Marketing Researcher, Sales Manager, Operations and Supply Chain Manager, and Upper Management and Executive Leadership. The growing career opportunities for Finance, Marketing, HR, Operations, and Strategy validate the strength and the value of the CSUEB MBA program.

Admission

The M.B.A. is open to students who hold a baccalaureate degree from an accredited college or university. Each applicant is evaluated on the basis of past academic performance as reflected in undergraduate grade point average and subsequent coursework; and results of the Graduate Management Admissions Test (GMAT) in verbal, quantitative, and the "Index Score" that involves the total GMAT score, $\text{Index Score} = (\text{Upper Division GPA} \times 200) + \text{Total GMAT}$. Admission to the program is selective. The average GPA and GMAT score of applicants admitted to the program varies from year to year. For last year's admitted students profile, please visit the CBE Graduate Student Success and Services Office. GRE score, if provided, is accepted in place of GMAT. GMAT may be waived for applicants with five years or more work experience.

Proficiencies

All Conditionally Classified M.B.A. students must fulfill the University Writing Skills Requirement (UWSR) to achieve "Classified Graduate" status. The Writing Skills Requirement could be met as an undergraduate or graduate student at one of the CSU system campuses, with a score of 4.5 or better on the GMAT essay, by passing the Writing Skills Test (WST) or through coursework. Information about the Writing Skills Test and the courses can be found on the Testing Office website. The Website contains information on test dates, registration procedures and fees. Further information can be obtained from the Testing Office. If students have not satisfied the UWSR before they begin their graduate work, they must either take the WST or enroll in a first tier course by the end of their first semester in the program.

The MBA program is designed to provide essential business knowledge to students without assuming prior business background. Therefore no specific prerequisite courses are required, but proficiency in math and statistics is expected.

Student Standing and Progress Toward the Degree

There are three categories of student status which reflect student progress toward the degree: "Conditionally Classified Graduate," "Classified Graduate," and "Advancement to Candidacy."

- Students achieve "Conditionally Classified Graduate" status when they have been admitted to the MBA degree program, but have not yet completed the University Writing Skills Requirement.
- Students achieve "Classified Graduate" status when they have satisfactorily completed the University Writing Skills Requirement.
- Students are Advanced to Candidacy when they have completed the 42 semester units meeting the following criteria:
 - All have a course grade of "C" or better.
 - Complete a minimum of 30 units in residence after admission to the program.
 - Have a combined 3.0 grade point average (minimum) in all units taken to satisfy the requirements of the student's degree program.
 - Have no more than 12 units for extension and/or transfer credit (any extension and/or transfer credit must be approved by the Program Director) and/or coursework taken in "Unclassified Post-baccalaureate" status.
 - All units earned within the five years immediately preceding the completion of the requirements for the degree.
 - Have completed a satisfactory program of study as determined by the College of Business and Economics and the university.
- To be eligible for the M.B.A. a student must have been Advanced to Candidacy (see Graduate Degree Information chapter of the catalog)

Note: Students who fail to maintain progress by falling below a 3.0 GPA in their graduate courses for two or more consecutive semesters will be academically disqualified from the university.

Program Learning Outcomes

Students graduating with an M.B.A. from Cal State East Bay will be able to:

- Identify global business opportunities, analyze global business challenges, and develop business strategies.
- Demonstrate leadership and teamwork skills.
- Apply advanced written communication skills.
- Apply advanced oral communication skills.
- Demonstrate cross-cultural awareness and sensitivity in their interpersonal and group communication.
- Perform quantitative analyses and apply advanced technological tools to solve complex business problems.
- Analyze and integrate knowledge across disciplines to make managerial decisions to reach solutions to complex business problems.
- Recognize and analyze ethical issues in decision making.

Business Administration Degree Requirements (42 units)

Core Courses

The following 27 core units are required for all M.B.A. students:

- BUS 601 - Leadership and Communication in Organizations *Units: 3*

Minor Requirements (24 units)

Required Courses

Take the following 6 units. *Note: BUS 325 is a prerequisite for all MKTG courses listed in the Advertising minor.*

- BUS 325 - Marketing Principles *Units: 3*
- MKTG 426 - Advertising and Promotion Management *Units: 3*

Elective Courses

Take the following 18 units as outlined below:

Note: COMM 453 has a prerequisite that is not explicitly listed in the Advertising minor. Taking COMM 453 will lead to a total of more than 24 units to com. COMM 357 is a prerequisite for COMM 387 and COMM 453.

Choose two (2) courses for 6 units from the following:

- MKTG 310 - Marketing Research *Units: 3*
- MKTG 314 - Consumer Behavior *Units: 3*
- MKTG 415 - Corporate Communications *Units: 3*
- MKTG 427 - Digital Marketing and Social Media *Units: 3*

Choose three (3) courses for 12 units from the following:

- COMM 326 - Social Media and Social Change Literacies *Units: 4*
- COMM 357 - Principles of Advertising *Units: 4*
- COMM 387 - Advertising Design and Production *Units: 4*
- COMM 420 - Organizational Transformation *Units: 4*

- COMM 453 - Strategic Communication Campaigns *Units: 4*

Department Courses Listed by Course Type

Communication Courses

Department of Communication

Courses

Communication

- COMM 100 - Public Speaking *Units: 3 ; G.E./G.R. Area: A1*
- COMM 104 - Interpersonal Communication *Units: 3 ; G.E./G.R. Area: A1*
- COMM 202 - Communication, Media and Culture *Units: 4*
- COMM 203 - Communication Theories *Units: 4*
- COMM 206 - New Media in the Digital Age *Units: 4*
- COMM 224 - Argumentation and Advocacy *Units: 4*
- COMM 235 - Famous Politics: Media, Celebrity and Social Life *Units: 3*
- COMM 240 - Visual Communication and Culture *Units: 4*
- COMM 255 - Queer Cultures: Knowledge and Literacy *Units: 3 ; G.E./G.R. Area: D1-3; Social Justice*
- COMM 256 - Persuasion Theory and Practice *Units: 4*
- COMM 260 - Documentary Film Studies *Units: 3 ; G.E./G.R. Area: C2*
- COMM 266 - Digital Media Production Abroad *Units: 3 ; G.E./G.R. Area: C2*
- COMM 300 - History and Criticism of Communication *Units: 4*
- COMM 304 - Quantitative Communication Research Methods *Units: 4*
- COMM 305 - Qualitative Communication Research Methods *Units: 4*
- COMM 310 - Introduction to Organizational Communication & Long Term Thinking *Units: 4*
- COMM 312 - Journalism History and Social Justice *Units: 4*
- COMM 314 - Journalism Theory and Practice *Units: 4*
- COMM 316 - Media and Government *Units: 4*
- COMM 318 - Journalism Law and Ethics *Units: 4*
- COMM 320 - Persuasion in Media *Units: 4*
- COMM 321 - Research in Persuasive Communication *Units: 4*
- COMM 323 - Communication of Difference *Units: 4*
- COMM 326 - Social Media and Social Change Literacies *Units: 4*
- COMM 328 - Multimedia Reporting & Writing I *Units: 4*
- COMM 330 - Critical/Cultural Studies *Units: 4*
- COMM 333 - Photojournalism *Units: 2*
- COMM 335 - Visual and Multimedia Storytelling I *Units: 2*
- COMM 357 - Principles of Advertising *Units: 4*
- COMM 358 - Principles of Public Relations *Units: 4*
- COMM 361 - Professional Speaking in Strategic Communication *Units: 4*
- COMM 362 - User Experience Research and Design *Units: 4*
- COMM 369 - Documentary History and Theory Abroad *Units: 4 ; G.E./G.R. Area: C4*
- COMM 387 - Advertising Design and Production *Units: 4*

- • COMM 388 - Public Relations Practice *Units: 4*
- • COMM 398 - Internship *Units: 1-4*
- • COMM 400 - Film, Communication and Culture *Units: 4*
- • COMM 410 - Organizing Cultures of Innovation and Empathy *Units: 4*
- • COMM 416 - Communication, Technology, and Social Change *Units: 4*
- • COMM 417 - Game Studies *Units: 4*
- • COMM 418 - Organizational Change, Creativity, and Innovation *Units: 4*
- • COMM 420 - Organizational Transformation *Units: 4*
- • COMM 425 - Digital Cultures *Units: 4*
- • COMM 428 - Multimedia Reporting and Writing II *Units: 4*
- • COMM 430 - Media Studies *Units: 4*
- • COMM 433 - Discourses of Difference *Units: 4*
- • COMM 435 - Visual and Multimedia Storytelling II *Units: 2*
- • COMM 453 - Strategic Communication Campaigns *Units: 4*
- • COMM 455 - Communication, Media, and Society *Units: 4*
- • COMM 461 - Popular Culture *Units: 4*
- • COMM 465 - Identity and Difference in Media *Units: 4*
- • COMM 470 - Communication Campaigns *Units: 4*
- • COMM 471 - Strategic Communication and Difference *Units: 4*
- • COMM 475 - Digital Organizational Communication *Units: 4*
- • COMM 480 - Moral Economies of Digital Media *Units: 4*
- • COMM 485 - Future of Media and Society *Units: 4*
- • COMM 488 - Conflict Management *Units: 4*
- • COMM 490 - Independent Study *Units: 1-4*
- • COMM 493 - Capstone: Social Justice Project *Units: 2*
- • COMM 495 - Journalism Practicum *Units: 2*
- • COMM 496 - Topics in Communication *Units: 4*
- • COMM 497 - Issues in Communication *Units: 4*

Communication: Graduate

- • COMM 600 - Introduction to Graduate Study *Units: 1*
- • COMM 601 - Theories in Communication *Units: 4*
- • COMM 602 - Critical Cultural Methods *Units: 4*
- • COMM 603 - Advanced Quantitative Research Methods *Units: 4*
- • COMM 604 - Advanced Qualitative Research Methods *Units: 4*
- • COMM 605 - Contemporary Rhetoric *Units: 4*
- • COMM 620 - Internship in Communication *Units: 1-4*
- • COMM 625 - Teaching Communication *Units: 4*
- • COMM 630 - Media Studies *Units: 4*
- • COMM 640 - Advanced Rhetorical Studies *Units: 4*
- • COMM 645 - Media and Globalization *Units: 4*
- • COMM 655 - Communication, Media, and Society *Units: 4*
- • COMM 665 - Identity and Difference in Media *Units: 4*
- • COMM 670 - Communication Campaigns *Units: 4*
- • COMM 675 - Digital Organizational Communication *Units: 4*
- • COMM 680 - Moral Economies of Digital Media *Units: 4*
- • COMM 685 - Future of Media and Society *Units: 4*
- • COMM 690 - Independent Study *Units: 1-4*
- • COMM 691 - University Thesis *Units: 1-6*
- • COMM 692 - Comprehensive Exams *Units: 2*
- • COMM 693 - Project *Units: 1-6*

- • COMM 696 - Topics in Communication *Units: 4*
- • COMM 697 - Issues In Communication *Units: 4*
- • COMM 698 - Internship *Units: 1-3*

- • MKTG 698 - Internship *Units: 1-3*

Marketing Minor

Minor Requirements (24 units)

The Marketing minor is designed to provide professional understanding and technical skills needed for entry into specialized business functions related to marketing such as product management and branding, advertising and promotion, marketing research, sales, customer service, and marketing management. The minor program is designed to complement your primary field of study.

Note:

- *Business Administration majors cannot declare this minor, but can choose the Marketing Management concentration in the Bachelor of Science in Business Administration program.*
- *No more than 9 units used to fulfill other requirements (e.g., for general education, a major, concentrations, or other minors) can be counted toward the requirements for the Marketing minor.*
- *Courses taken for CR/NC (credit/no credit) will not be counted toward the requirements for the Bachelor of Science in Business Administration (BSBA) program because courses for BSBA must be completed with a letter grade of "C-" or better ("C" or better for BUS 499).*

Required Courses

The following 9 units are required. *Please Note: BUS 325 is a prerequisite for MKTG courses listed in the Marketing minor.*

- BUS 310 - Organizational Behavior *Units: 3*
- BUS 325 - Marketing Principles *Units: 3*
- ECON 200 - Principles of Microeconomics *Units: 3 ; G.E./G.R. Area: D1-3; Social Justice*

Elective Courses

Select five (5) courses for 15 units from the following list:

- MKTG 310 - Marketing Research *Units: 3*
- MKTG 312 - Marketing Analytics *Units: 3*
- MKTG 314 - Consumer Behavior *Units: 3*
- MKTG 415 - Corporate Communications *Units: 3*
- MKTG 420 - Product, Service, and Brand Management *Units: 3*
- MKTG 424 - Sales Management *Units: 3*
- MKTG 425 - Business-to-Business Marketing *Units: 3*
- MKTG 426 - Advertising and Promotion Management *Units: 3*
- MKTG 427 - Digital Marketing and Social Media *Units: 3*
- MKTG 430 - International Marketing *Units: 3*
- MKTG 440 - Marketing Strategy *Units: 3*

- MKTG 497 - Seminar in Selected Marketing Topics *Units: 3*

Department of Mathematics

The Department Office is located on the 5th Floor of the Student-Faculty (SF) building, Room 570.

Hours Open: 8:00 a.m. to 5:00 p.m., Monday through Friday.

Dept. Phone: (510) 885-3434

Faculty

Professor Emeritus

Donald L. Wolitzer, Ph.D. Northeastern University

Associate Professor Emerita

Chung-Hsing OuYang, Ph.D. University of California, Berkeley

Professors

Kevin E. Callahan, Ph.D. University of California, San Diego

Julie S. Glass (Chair), Ph.D. University of California, Santa Cruz

Kathleen Hann, Ph.D. University of California, Davis

Massoud Malek, Ph.D. University of Houston

Julia Olkin, Ph.D. Rice University

Shirley Yap, Ph.D. University of Pennsylvania

Assistant Professors

Ehsan Kamalinejad, Ph.D. University of Toronto (Canada)

Jesus Oliver, Ph.D. University of California, San Diego

Andrea Arauza Rivera, Ph.D. University of California, Riverside

Graduate Coordinator: Julia Olkin

Department Statement

Mathematics is an intriguing, interesting and beautiful subject. It is also challenging and rigorous. Students are drawn to mathematics because of its clarity and the joy of discovering solutions to difficult problems. The Department of Mathematics offers strong Bachelor of Science and Master of Science

degrees that include a variety of courses intended to prepare students for a career in any mathematics related field or other areas that value quantitative and problem-solving skills. The program allows flexibility in breadth and depth where students can choose among courses with applied and pure emphases. The faculty are committed to creating a welcoming environment and providing opportunities for all students to explore mathematics within and beyond the classroom.

Bachelor

Mathematics, B.S.

Mathematics, B.S. Program (120 units)

Program Description

An undergraduate major in mathematics is one of the best preparations not only for studying advanced Mathematics, but also for graduate work in Computer Science, Statistics, Operations Research, Actuarial Science, and the Natural Sciences. Math majors are encouraged to pursue a minor or double major in another discipline that supports their goals or interests.

Mathematics is an intriguing, interesting and beautiful subject. It is also challenging and rigorous. Students are drawn to mathematics because of its clarity and the joy of discovering solutions to difficult problems. The Department of Mathematics offers a strong Bachelor of Science degree that includes a variety of courses intended to prepare students for a career in any mathematics related field or other areas that value quantitative and problem-solving skills. The program allows flexibility in breadth and depth where students can choose among courses with applied and pure emphases. The faculty are committed to creating a welcoming environment and providing opportunities for undergraduates to explore mathematics within and beyond the classroom. There are scholarships available for math majors to support their studies while at CSU East Bay.

Information for those considering a career as a high school teacher:

Making specific choices within the Math B.S. leads to a certification for students applying for a credential program to teach high school mathematics. This single subject certification is approved by the State Board of Education and offers a great opportunity for Math Majors at CSU East Bay. The certification allows a student to waive taking the three required math California Subject Examinations for Teachers (CSETs). The mathematics teaching pathway in the major is indicated throughout by asterisks (*) for

each required course. Upon reaching upper division status, interested students should speak with the Single Subject Advisor.

Career Opportunities

Mathematics opens the doors to many promising careers. Mathematician is consistently listed among the top ranked jobs in *Jobs Rated Almanac* from CareerCast and many of the highest earning careers require strong mathematical skills. Many positions such as engineer, doctor, nurse, computer scientist, actuarial scientist, etc. require knowledge of mathematics. The analytical and problem-solving skills students learn in mathematics can apply to many other disciplines as well. In particular, math majors score among the highest on the LSAT and GMAT for entry into law school or for advanced study in business. The math major prepares students for careers in academia, education, actuarial science, business, computing, engineering, law, medicine, physical and life sciences and public service. Profiles of successful math majors can be found on the Mathematical Association of America's Career Profiles webpage.

Program Learning Outcomes

1. Apply the definitions, techniques and theorems of mathematics.
2. Use mathematics to understand, explain and/or solve problems beyond a particular course.
3. Creatively conjecture and rigorously write, analyze and critique proofs.
4. Communicate mathematics effectively.

Degree Requirements Unit-Outline

- A baccalaureate of arts degree requires a total of 120 units:
 - The math major requirements consist of 49 units;
 - General Education (GE) & Graduation Requirements (GR) consists of 57 units;
 - Free Electives may consist of 14 units (*actual number of free elective units may depend on GE/GR units*).

Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.

Mathematics Major Requirements (49 units)

Lower Division Core

Take the following four (4) lower-division courses for 13 units:

- MATH 130 - Calculus I *Units: 4 ; G.E./G.R. Area: B4*
- MATH 131 - Calculus II *Units: 3*
- MATH 230 - Calculus III *Units: 3*
- MATH 210 - Linear Algebra with Differential Equations *Units: 3*

Upper Division Core

Take the following six (6) upper-division courses for 18 units:

- MATH 300 - Introduction to Mathematical Proof *Units: 3*
- MATH 305 - Mathematical Software *Units: 3*
- MATH 310 - Linear Algebra Theory *Units: 3*
- MATH 320 - Abstract Algebra I *Units: 3*
- MATH 330 - Analysis I *Units: 3*
- MATH 493 - Senior Seminar *Units: 3*

Applied Mathematics Coursework

Choose two (2) courses from the following for 6 units:

- MATH 370 - Numerical Analysis I *Units: 3*
- MATH 375 - Differential Equations I *Units: 3 (*)*
- MATH 380 - Linear Programming *Units: 3*

Theoretical Mathematics Coursework

Choose two (2) courses from the following for 6 units:

- MATH 321 - Abstract Algebra II *Units: 3 (*)*
- MATH 331 - Analysis II *Units: 3*
- MATH 340 - Modern Geometry *Units: 3 (*)*

Elective Courses

Choose two (2) elective courses from the following for 6 units:

- MATH 360 - Number Theory *Units: 3 (*)*
- MATH 440 - Topics in Geometry *Units: 3*
- MATH 450 - Combinatorics *Units: 3*
- MATH 470 - Numerical Analysis II *Units: 3*
- MATH 475 - Differential Equations II *Units: 3*
- MATH 497 - Topics in Advanced Mathematics *Units: 3*
- Or any upper-division mathematics course(s) NOT used to fulfill other major requirements, except MATH 318, 319, 402, 403, or 406.
- Or any graduate level Math course.
- Or STAT 316 - Statistics and Probability for Science and Engineering *Units: 3 (*)*

Mathematics Teaching Pathway

Making specific course choices within the Math B.S. leads to a certification for students applying for a credential program to teach high school mathematics. The certification, *when accompanied by 45 hours of specific service requirements* (which also fulfills a state requirement for admission into a teacher credential program), allows a student to waive taking the three required math California Subject Examinations for

Teachers (CSETs). This major pathway is indicated throughout by asterisks (*) for each required course. Students should see the Single Subject Math Advisor when ready to plan for upper division courses.

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

- MATH 692 - Graduate Mathematics Comprehensive Exam Capstone *Units: 2*

Master

Mathematics, M.S.

Mathematics, M.S. Program

Program Description

The Mathematics Department offers graduate study leading to the degree of Master of Science in Mathematics. The department prides itself on providing excellent instruction in advanced mathematics and maintaining a supportive learning environment for graduate students. Students in the program will be exposed to the fundamental areas of pure and applied mathematics and have the opportunity to explore specialized areas in depth. The completed program prepares students for careers in community college teaching, positions in industry that require knowledge of mathematics beyond the undergraduate level, as well as for advanced study toward a Ph.D. degree in mathematics or a related field.

The M.S. program features small classes that allow for close contact between students and faculty. Students interested in the M.S. degree program in Mathematics should speak with the Mathematics Graduate Coordinator.

Career Opportunities

A graduate degree in mathematics provides preparation for a broad range of careers including in academia and teaching, engineering, business, computing and management. An excellent resource can be found at the Mathematical Association of America Career Profiles web page. Many graduates of Cal State East Bay's M.S. program hold positions as community college mathematics professors. Some graduates have continued their studies at doctoral granting institutions by working towards a Ph.D. degree in mathematics or a related field such as operations research, statistics, physics, or economics. Still others have used their skills in careers in the local tech industry.

Admission Requirements

To enter the program with "Classified Graduate" status, a student must have completed undergraduate classes equivalent to the following CSU East Bay courses:

- CS 101 or Math 305 (Introduction to Computer Programming)
- Math 210 (Linear Algebra and Differential Equations)
- Math 300 (Introduction to Advanced Mathematics)
- Math 310 (Linear Algebra Theory and Applications)
- Math 320 (Algebra 1)
- Math 330 (Analysis 1)

with a grade point average of 3.0 ("B") or higher.

A student may enter the program with "Conditionally Classified Graduate" status while making up course or grade point deficiencies. Units taken to meet course deficiencies may not be applied toward the master's degree.

Student Standing and Progress Toward the Degree

A "Conditionally Classified Graduate" student who has no course deficiencies and has satisfied the University Writing Skills Requirement, should petition the department Graduate Coordinator for a change to "Classified Graduate" status.

A student with "Classified Graduate" status may apply for Advancement to Candidacy after completing at least 16 semester units towards the master's degree with a 3.0 ("B") or higher average.

Program Learning Outcomes

Students graduating with an M.S. in Mathematics from Cal State East Bay will be able to:

1. Evaluate and create proofs in graduate-level mathematics using the fundamental definitions and theorems.
2. Create solutions to problems using techniques in graduate-level mathematics.
3. Communicate graduate-level mathematics effectively.

Mathematics Degree Requirements (30 units)

Required Courses

Twenty (20) units are required from the following:

The following three (3) courses are required:

- MATH 620 - Algebra with Linear Algebra *Units: 4*
- MATH 630 - Real Analysis *Units: 4*
- MATH 670 - Numerical Analysis *Units: 4*

Plus take two (2) courses chosen from the following:

- MATH 640 - Complex Analysis *Units: 4*
- MATH 660 - Topology *Units: 4*
- MATH 675 - Differential Equations *Units: 4*
- MATH 680 - Optimization *Units: 4*

Elective Courses

A maximum of 8 units of coursework from the following electives may be counted toward the master's degree:

- Any graduate course in Mathematics
- Graduate level courses with advanced mathematical content with the approval of the Mathematics Graduate Committee.
- STAT 620 - Probability and Statistical Theory *Units: 4*
- STAT 630 - Statistical Methods *Units: 4*
- STAT 640 - Advanced Statistical Theory *Units: 4*

Capstone Requirement

The following capstone for 2 units is required to complete the program requirements:

- MATH 692 - Graduate Mathematics Comprehensive Exam Capstone *Units: 2*

Other Graduate & Post-Baccalaureate Degree Requirements

In addition to departmental requirements, every student must also satisfy the University requirements for graduation as described throughout this catalog. These include the 70% unit residence requirement; the five-year rule on currency of subject matter; the minimum number of units in 600-level courses; the "C" minimum grade for each graduate course; the 3.00 cumulative grade point average; and the University Writing Skills Requirement.

Note: For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call (510) 885-3661.

Single Subject Matter Preparation Certificate Programs

Foundational Mathematics, Single Subject Certificate Program

Program Description

The CSUEB Foundational Mathematics Single Subject Matter Certificate Program includes a variety of courses intended to prepare students for a career as a middle school mathematics teacher. CSUEB's Foundational Mathematics Single Subject Matter program yields a State Board of Education approved certification. This certification allows a student to waive taking the two required math California Subject Examinations for Teachers (CSETs). If a student subsequently wishes to complete a California Secondary Teaching Credential in Foundational Mathematics, in addition to the required mathematics courses, a year of education courses and practice teaching is required.

Thirty three (33) semester units are required in the Foundational Mathematics Single Subject Certificate Program.

Core Coursework

The following twenty (20) units are required:

- MATH 120 - Precalculus *Units: 3 ; G.E./G.R. Area: B4*
- MATH 340 - Modern Geometry *Units: 3*
- MATH 402 - Mathematics for K-8 Educators I *Units: 4*
- MATH 403 - Mathematics for K-8 Educators II *Units: 4*
- MATH 406 - Advanced Study for School Mathematics *Units: 3*
- STAT 100 - Elements of Statistics and Probability *Units: 3 ; G.E./G.R. Area: B4*

Extended Study

The following thirteen (13) units of extended study are required:

- MATH 130 - Calculus I *Units: 4 ; G.E./G.R. Area: B4*
- MATH 131 - Calculus II *Units: 3*
- MATH 210 - Linear Algebra with Differential Equations *Units: 3*
- MATH 300 - Introduction to Mathematical Proof *Units: 3*

Mathematics, Single Subject Matter Certificate Program

Program Discription

The CSUEB Mathematics Single Subject Matter Certificate Program includes a variety of courses intended to prepare students for a career as a high school mathematics teacher. CSUEB's Mathematics Single Subject Matter Program yields a State Board of Education approved certification. The certification allows a student to waive taking the three required math California Subject Examinations for Teachers (CSETs). A student need not be a mathematics major to complete this program; however, students who complete the mathematics major and select the courses designated for future teachers will have completed all of the required mathematics coursework for the Mathematics Single Subject Matter Program. In addition to the required mathematics courses, a year of education courses and practice teaching is required before the California Secondary Teaching Credential in Mathematics can be granted.

A minimum of forty-six (46) semester units are required in the Mathematics Single Subject Matter Certificate Program.

Core Coursework

The following 31 units of core coursework are required:

- MATH 120 - Precalculus *Units: 3 ; G.E./G.R. Area: B4*
- MATH 130 - Calculus I *Units: 4 ; G.E./G.R. Area: B4*
- MATH 131 - Calculus II *Units: 3*
- MATH 210 - Linear Algebra with Differential Equations *Units: 3*
- MATH 230 - Calculus III *Units: 3*
- MATH 320 - Abstract Algebra I *Units: 3*
- MATH 330 - Analysis I *Units: 3*

- MATH 340 - Modern Geometry *Units: 3*
- MATH 360 - Number Theory *Units: 3*
- STAT 316 - Statistics and Probability for Science and Engineering *Units: 3*

Extended Study

Fifteen (15) units of extended study coursework are required:

- MATH 300 - Introduction to Mathematical Proof *Units: 3*
- MATH 310 - Linear Algebra Theory *Units: 3*
- MATH 321 - Abstract Algebra II *Units: 3*
- MATH 375 - Differential Equations I *Units: 3*
- MATH 493 - Senior Seminar *Units: 3*

Field Experience

At least 45 hours of classroom experience in an instructional capacity is required.

- TED 301 - Introduction to Education *Units: 3* and/or other field experience approved by the Mathematics Subject Matter Preparation Adviser.

Single Subject Matter Preparation Program

Foundational-Level Mathematics, Single Subject Matter Preparation

Program Description

The CSUEB Single Subject Matter Program in Foundational Mathematics includes a variety of courses intended to prepare students for a career as a middle school mathematics teacher. CSUEB's Single Subject Matter Preparation Program in Foundational Mathematics yields a State Board of Education approved certification. The certification allows a student to waive taking the two required math California Subject Examinations for Teachers (CSETs). If a student subsequently wishes to complete a California Secondary Teaching Credential in Foundational-level Mathematics, in addition to the required mathematics courses, a year of education courses and practice teaching is required.

Thirty three (33) semester units are required in the Single Subject Matter Preparation Program in Foundational Mathematics.

Core Coursework

The following 20 units of core coursework are required:

- MATH 120 - Precalculus *Units: 3 ; G.E./G.R. Area: B4*
- MATH 340 - Modern Geometry *Units: 3*
- MATH 402 - Mathematics for K-8 Educators I *Units: 4*
- MATH 403 - Mathematics for K-8 Educators II *Units: 4*
- MATH 406 - Advanced Study for School Mathematics *Units: 3*
- STAT 100 - Elements of Statistics and Probability *Units: 3 ; G.E./G.R. Area: B4*

Extended Study

The following 13 units of extended study coursework are required:

- MATH 130 - Calculus I *Units: 4 ; G.E./G.R. Area: B4*
- MATH 131 - Calculus II *Units: 3*
- MATH 210 - Linear Algebra with Differential Equations *Units: 3*

Mathematics, Single Subject Matter Preparation

Program Description

The CSUEB Single Subject Matter Program in Mathematics includes a variety of courses intended to prepare students for a career as a high school mathematics teacher. CSUEB's Single Subject Matter Preparation Program yields a State Board of Education approved certification. The certification allows a student to waive taking the three required math California Subject Examinations for Teachers (CSETs).

A student need not be a mathematics major to complete this program; however, students who complete the mathematics major and select the courses designated for future teachers will have completed all of the required mathematics coursework for the Single Subject Matter Preparation Program. If a student subsequently wishes to complete a California Secondary Teaching Credential in Mathematics, in addition to the required mathematics courses, a year of education courses and practice teaching is required.

A minimum of forty six (46) semester units are required in the Single Subject Matter Preparation Program in Mathematics.

Core Coursework

The following 31 units of core coursework are required:

- MATH 120 - Precalculus *Units: 3 ; G.E./G.R. Area: B4*
- MATH 130 - Calculus I *Units: 4 ; G.E./G.R. Area: B4*
- MATH 131 - Calculus II *Units: 3*
- MATH 210 - Linear Algebra with Differential Equations *Units: 3*
- MATH 230 - Calculus III *Units: 3*
- MATH 320 - Abstract Algebra I *Units: 3*
- MATH 330 - Analysis I *Units: 3*
- MATH 340 - Modern Geometry *Units: 3*
- MATH 360 - Number Theory *Units: 3*
- STAT 316 - Statistics and Probability for Science and Engineering *Units: 3*

Extended Study

Fifteen (15) units of extended study coursework are required:

- MATH 300 - Introduction to Mathematical Proof *Units: 3*
- MATH 310 - Linear Algebra Theory *Units: 3*
- MATH 321 - Abstract Algebra II *Units: 3*
- MATH 375 - Differential Equations I *Units: 3*
- MATH 493 - Senior Seminar *Units: 3*

Field Experience

At least 45 hours of classroom experience in an instructional capacity is required.

- **TED 301 - Introduction to Education** *Units: 3* and/or other field experience approved by the Mathematics Subject Matter Preparation Adviser.

Courses

Mathematics

- MATH 15 - College Algebra Workshop *Units: 1*
- MATH 18 - Mathematics for the Arts and Humanities Workshop *Units: 1*
- MATH 115 - College Algebra *Units: 3 ; G.E./G.R. Area: B4*
- MATH 118 - Mathematics for the Arts and Humanities *Units: 3 ; G.E./G.R. Area: B4*
- MATH 120 - Precalculus *Units: 3 ; G.E./G.R. Area: B4*
- MATH 121 - Precalculus Fundamentals *Units: 2*
- MATH 125 - Precalculus with Algebra *Units: 5 ; G.E./G.R. Area: B4*
- MATH 130 - Calculus I *Units: 4 ; G.E./G.R. Area: B4*
- MATH 131 - Calculus II *Units: 3*
- MATH 180 - Mathematics for Business with Calculus *Units: 3 ; G.E./G.R. Area: B4*
- MATH 210 - Linear Algebra with Differential Equations *Units: 3*
- MATH 211 - Discrete Structures *Units: 3*
- MATH 225 - Numerical Algorithms and Linear Algebra for Computer Science *Units: 3*
- MATH 230 - Calculus III *Units: 3*
- MATH 300 - Introduction to Mathematical Proof *Units: 3*
- MATH 305 - Mathematical Software *Units: 3*
- MATH 310 - Linear Algebra Theory *Units: 3*
- MATH 318 - Mathematical Contributions to Modern Society *Units: 3 ; G.E./G.R. Area: B6*
- MATH 319 - Mathematics in Art and Architecture *Units: 3 ; G.E./G.R. Area: B6*
- MATH 320 - Abstract Algebra I *Units: 3*
- MATH 321 - Abstract Algebra II *Units: 3*
- MATH 330 - Analysis I *Units: 3*
- MATH 331 - Analysis II *Units: 3*
- MATH 340 - Modern Geometry *Units: 3*
- MATH 360 - Number Theory *Units: 3*
- MATH 370 - Numerical Analysis I *Units: 3*
- MATH 375 - Differential Equations I *Units: 3*
- MATH 380 - Linear Programming *Units: 3*
- MATH 398 - Internship *Units: 1-3*
- MATH 402 - Mathematics for K-8 Educators I *Units: 4*
- MATH 403 - Mathematics for K-8 Educators II *Units: 4*
- MATH 406 - Advanced Study for School Mathematics *Units: 3*
- MATH 440 - Topics in Geometry *Units: 3*

- MATH 450 - Combinatorics *Units: 3*
- MATH 470 - Numerical Analysis II *Units: 3*
- MATH 475 - Differential Equations II *Units: 3*
- MATH 490 - Independent Study *Units: 1-4*
- MATH 493 - Senior Seminar *Units: 3*
- MATH 497 - Topics in Advanced Mathematics *Units: 3*

Mathematics: Graduate

- MATH 605 - Teaching Mathematics at the University Level *Units: 1*
- MATH 610 - Mathematical Modeling *Units: 4*
- MATH 620 - Algebra with Linear Algebra *Units: 4*
- MATH 640 - Complex Analysis *Units: 4*
- MATH 650 - Combinatorics *Units: 4*
- MATH 663 - Topics in Geometry *Units: 4*
- MATH 665 - Differential Geometry *Units: 4*
- MATH 667 - Machine Learning *Units: 4*
- MATH 670 - Numerical Analysis *Units: 4*
- MATH 671 - Topics in Numerical Analysis *Units: 4*
- MATH 675 - Differential Equations *Units: 4*
- MATH 676 - Topics in Differential Equations *Units: 4*
- MATH 680 - Optimization *Units: 4*
- MATH 681 - Topics in Optimization *Units: 4*
- MATH 685 - Topics in Graduate Mathematics *Units: 4*
- MATH 690 - Independent Study *Units: 1-4*
- MATH 692 - Graduate Mathematics Comprehensive Exam Capstone *Units: 2*

Department of Modern Languages and Literatures

The Department Office is located in the Student & Faculty Support (SF) building, Room 442

Office Hours: 8:00 a.m. - 5:00 p.m., Monday through Friday

Dept. Phone: (510) 885-3211

Faculty

Professor Emerita

L. Iliana Holbrook, Ph.D. University of California, Davis

Professors

Amy June Rowley, Ph.D. University of Wisconsin- Milwaukee

Meiling Wu (Chair), Ph.D. State University of New York at Binghamton

Associate Professors

Marcelo Paz, Ph.D. University of Cincinnati

Jesús Díaz-Caballero, Ph.D. University of Pittsburgh

Monique Manopoulos, Ph.D. University of Iowa

Lecturers

Juergen Hahn, Ph.D. Duke University

Shiori Hoke-Greller, M.A. San Francisco State University

David Fair, MDiv. Gateway Seminary

Huitzu Lu, Ph.D. University of Arizona

Gaelle Corvaisier, Ph.D. University La Sorbonne, Paris-France

Rie Hannon, M.A. Texas Tech University

Nancy Shuguli, M.A. Sonoma State University

Maria Del Mar Thomas, M.A. New Mexico State University

American Sign Language Coordinator: Amy June Rowley

Chinese & Japanese Coordinator: Meiling Wu

French Coordinator: Monique Manopoulos

Spanish Coordinator: Marcelo Paz

Department Statement

The Department of Modern Languages and Literatures (MLL) offers diverse courses in language, literature, cinema, culture. The rich array of courses are in American Sign Language, Chinese, French, Japanese, Spanish, and in English. The study leads to a Bachelor of Arts degree with majors in French and Spanish; Academic minors are available in American Sign Language, Chinese Language and Cultural Studies, French, Japanese, and Spanish. Students may utilize all languages and literatures courses offered in the department as part of a special major in various areas of study. The department faculty come from a wide variety of national and academic backgrounds and have traveled extensively in the countries whose languages they are teaching. Professors have lectured and published extensively in the United States, Asia, Europe and Latin America.

Language Laboratory

Currently, the Department of Modern Languages and Literatures does not have a language laboratory; however, the University Library has audio and video tape collections of instructional programs in the languages currently taught, including American Sign Language. This temporary facility is located at Media, Resources and Reserves in the library.

Bachelor

French, B.A.

French, B.A. Program (120 units)

Program Description

The B.A. in French Offers students the ability to learn speaking writing, and analytical skills in French. It also introduces them to the various cultures of France, and the Francophone world. Students acquire an understanding of those countries' historical background and contemporary issues while developing their proficiency in French. The program fosters critical approaches to Francophone Literatures and Cultures. The program prepares students for an ever-changing world and offers career opportunities in International government, business, travel, communications, and other fields where the knowledge of more than one language is essential.

Career Opportunities

Students with a French Major can have careers in the following areas:

- Education: In addition to traditional elementary and High schools, there are many French-American schools in the Bay Area, and around the country
- Editing/publishing: Skills acquired allow students to be tuned to syntax and spelling in both French and English.
- Government agencies such as the CIA, the FBI, the United Nations and Consular Services
Bilingual Call Center Representative • Bilingual Technical Support Specialist • College Admissions Officer/Counselor • Communications • Community College/University Professor • Computer coding • ESL Teacher/Assistant abroad • Film/Video/Book editor • Intern for Major French Banks • International Business • International Trade Specialist • Interpretation • Librarian • Peace Corps • Research Assistant/Associate • Sales Coordinator for International Hotel Company • Tour Guide/Consultant • Translation • University Grant Writer

Program Learning Outcomes

- Oral Communication:

Students will be able to express themselves with sufficient accuracy and clarity to carry on conversations with native speakers and to give oral presentations appropriate to the undergraduate level. Students will be able to appreciate the various components of diverse cultures. Through in-class discussions and group work, students will also learn how to work collaboratively in an open-minded and respectful way. This will prepare them for their future workplace.

- **Written Communication:**

Students will be able to express themselves with a fair amount of sophistication, integrating research information while giving adequate credit to the sources used. They will also have the ability to convey critical ideas in both academic and social contexts in a respectful way.

- **Critical Thinking:**

Students will be familiar with major creative texts, and other cultural productions such as art, music, cinema, and history. They will also learn critical thinking, critical and analytical methods that are reinforced by their language skills. They should be able to relate a variety of cultural productions to the socio-cultural contexts in which they developed.

- **Multicultural Diversity:**

Students will demonstrate that they have acquired the knowledge of ethnic cultural diversity, and other forms of diversity such as gender, while developing an appreciation of contributions to the body of diverse cultural productions, such as art, music, cinema, and history.

- **Social Justice and Sustainability:**

Students will be able to act responsibly and recognize the historical and individual perspectives vs. the global. Students will demonstrate knowledge of global barriers to equality and social justice, identify and critically assess social, cultural, historical, political, national and/or global inequalities while acquiring the knowledge of multicultural diversity in more than one area. Students will be able to use multiple forms (essay, research, creative expression) and mediums of communication (on the ground, social media, television, radio) to investigate, participate in, and/or critique social justice movements in an open-minded and respectful manner.

Requirements

In addition to major requirements, every student must also complete the University requirements for graduation which are described in the Undergraduate Admission and Degree Information & FAQ chapter of this catalog.

Degree Requirements Unit-Outline

- A baccalaureate of arts degree requires a total of 120 units:
 - The major requirements consists of 40 units
 - General Education & Graduation Requirements consists of 57 units ;
 - Free Electives may consist of 23 units (actual number of free elective units may depend on GE/GR units).

Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.

French Major Requirements (24-37 units)*

** (See the Errata chapter for unit information)*

Lower Division Coursework

Note: Students may be exempt from lower division courses. Students may challenge elementary and intermediate courses by exam.

Students who are not exempt must take all of the following four (4) courses for 16 units:

- MLL 121 - Elementary French I Units: 4 ; G.E./G.R. Area: C2
- MLL 122 - Elementary French II Units: 4 ; G.E./G.R. Area: C1
- MLL 221 - Intermediate French I Units: 4 ; G.E./G.R. Area: C2
- MLL 222 - Intermediate French II Units: 4

Upper Division Coursework

**Students must complete 21 units as outlined below. (*See Errata chapter for important information):*

All students must take the following course for 3 units:

- MLL 311 - Studies in Modern Languages and Literatures in English Units: 3 ; G.E./G.R. Area: D4

Students must take six (6) courses from the following for 18 units:

- MLL 321 - Cinema for French Conversation Units: 3 ; G.E./G.R. Area: C4
- MLL 322 - Cinema for French Composition Units: 3 ; G.E./G.R. Area: C4
- MLL 323 - Francophone Culture and Civilization through Cinema Units: 3 ; G.E./G.R. Area: C4
- MLL 324 - French/Francophone Literature in Translation Units: 3 ; G.E./G.R. Area: C4
- MLL 325 - Themes in French/Francophone Literature Units: 3 ; G.E./G.R. Area: C4
- MLL 326 - Sexuality and Feminism in Francophone Literature and Cinema Units: 3 ; G.E./G.R. Area: C4
- MLL 421 - French-English Translation Units: 3
- MLL 422 - LGBTQ Francophone Cinema Units: 3 ; G.E./G.R. Area: C4; Social Justice
- MLL 424 - Marginality in Francophone Literature Units: 3 ; G.E./G.R. Area: C4
- MLL 425 - Postcolonial Francophone Rap/Hip-Hop Units: 3 ; G.E./G.R. Area: C4; Social Justice
- MLL 428 - French for the Professions Units: 4
- MLL 429 - French for Reading Knowledge Units: 4

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

Courses

Modern Languages and Literatures

- MLL 211 - Multicultural Cinema *Units: 3 ; G.E./G.R. Area: C1*
- MLL 212 - Multiculturalism and Social Justice *Units: 3*
- MLL 311 - Studies in Modern Languages and Literatures in English *Units: 3 ; G.E./G.R. Area: D4*
- MLL 398 - Internship *Units: 1-3*
- MLL 490 - Independent Study *Units: 1-4*
- MLL 497 - Issues in Modern World Languages and Literatures *Units: 3*

Modern Languages and Literatures: American Sign Language

- MLL 131 - Elementary American Sign Language I *Units: 4 ; G.E./G.R. Area: C2*
- MLL 132 - Elementary American Sign Language II *Units: 4 ; G.E./G.R. Area: C1*
- MLL 231 - Intermediate American Sign Language I *Units: 4 ; G.E./G.R. Area: C2*
- MLL 232 - Intermediate American Sign Language II *Units: 4 ; G.E./G.R. Area: D1-3*
- MLL 331 - Advanced American Sign Language I *Units: 4*
- MLL 332 - Advanced American Sign Language II *Units: 4*
- MLL 333 - American Deaf Culture *Units: 3 ; G.E./G.R. Area: C4*
- MLL 335 - Classifiers in American Sign Language *Units: 3*
- MLL 431 - Linguistics in American Sign Language *Units: 3*
- MLL 435 - Fieldwork in American Sign Language Studies *Units: 3*

Modern Languages and Literatures: Chinese

- MLL 161 - Elementary Mandarin Chinese I *Units: 4 ; G.E./G.R. Area: C2*
- MLL 162 - Elementary Mandarin Chinese II *Units: 4 ; G.E./G.R. Area: C1*
- MLL 163 - Intensive Elementary Mandarin Chinese *Units: 4 ; G.E./G.R. Area: C1*
- MLL 261 - Intermediate Mandarin Chinese I *Units: 4 ; G.E./G.R. Area: C2*
- MLL 262 - Intermediate Mandarin Chinese II *Units: 4*
- MLL 361 - China Headline News: A Chinese-English Bilingual Study *Units: 4 ; G.E./G.R. Area: D4*
- MLL 362 - Chinese Folktales and Culture (Bilingual) *Units: 4 ; G.E./G.R. Area: C4*
- MLL 366 - New Chinese Cinema in English Translation *Units: 3 ; G.E./G.R. Area: D4; Social Justice*
- MLL 462 - Modern Chinese Short Stories in English Translation *Units: 3 ; G.E./G.R. Area: C4*
- MLL 465 - Chinese Wisdom and Ink-wash Animation in English Translation *Units: 3 ; G.E./G.R. Area: C4*

Modern Languages and Literatures: French

- MLL 121 - Elementary French I *Units: 4 ; G.E./G.R. Area: C2*
- MLL 122 - Elementary French II *Units: 4 ; G.E./G.R. Area: C1*
- MLL 221 - Intermediate French I *Units: 4 ; G.E./G.R. Area: C2*
- MLL 222 - Intermediate French II *Units: 4*
- MLL 321 - Cinema for French Conversation *Units: 3 ; G.E./G.R. Area: C4*
- MLL 322 - Cinema for French Composition *Units: 3 ; G.E./G.R. Area: C4*
- MLL 323 - Francophone Culture and Civilization through Cinema *Units: 3 ; G.E./G.R. Area: C4*
- MLL 324 - French/Francophone Literature in Translation *Units: 3 ; G.E./G.R. Area: C4*
- MLL 325 - Themes in French/Francophone Literature *Units: 3 ; G.E./G.R. Area: C4*
- MLL 326 - Sexuality and Feminism in Francophone Literature and Cinema *Units: 3 ; G.E./G.R.*

Area: C4

- MLL 421 - French-English Translation *Units: 3*
- MLL 422 - LGBTQ Francophone Cinema *Units: 3 ; G.E./G.R. Area: C4; Social Justice*
- MLL 423 - Survey of Francophone Literature and Cinema *Units: 3*
- MLL 424 - Marginality in Francophone Literature *Units: 3 ; G.E./G.R. Area: C4*
- MLL 425 - Postcolonial Francophone Rap/Hip-Hop *Units: 3 ; G.E./G.R. Area: C4; Social Justice*
- MLL 428 - French for the Professions *Units: 4*
- MLL 429 - French for Reading Knowledge *Units: 4*

Modern Languages and Literatures: Japanese

- MLL 151 - Elementary Japanese I *Units: 4 ; G.E./G.R. Area: C2*
- MLL 152 - Elementary Japanese II *Units: 4 ; G.E./G.R. Area: C1*
- MLL 153 - Intensive Elementary Japanese *Units: 4 ; G.E./G.R. Area: C1*
- MLL 251 - Intermediate Japanese I *Units: 4 ; G.E./G.R. Area: C2*
- MLL 252 - Intermediate Japanese II *Units: 4*
- MLL 351 - Japan Headline News: A Japanese-English Bilingual Study *Units: 4 ; G.E./G.R. Area:*

D4

- MLL 352 - Japanese Folktales and Culture (Bilingual) *Units: 4 ; G.E./G.R. Area: C4*
- MLL 358 - Experiencing Japanese Culture in English Translation *Units: 3 ; G.E./G.R. Area: D4;*

Social Justice

- MLL 452 - Modern Japanese Short Stories in English Translation *Units: 3 ; G.E./G.R. Area: C4*
- MLL 455 - Japanese Manga and Anime Masterpieces in English Translation *Units: 3 ; G.E./G.R.*

Modern Languages and Literatures: Spanish

- MLL 141 - Elementary Spanish I *Units: 4 ; G.E./G.R. Area: C2*
- MLL 142 - Elementary Spanish II *Units: 4 ; G.E./G.R. Area: C1*
- MLL 146 - Beginning Spanish for Healthcare Professionals *Units: 4*
- MLL 241 - Intermediate Spanish I *Units: 4 ; G.E./G.R. Area: C2*
- MLL 242 - Intermediate Spanish II *Units: 4*
- MLL 246 - Intermediate Spanish for Healthcare Professionals *Units: 4*
- MLL 341 - Spanish Conversation *Units: 4*
- MLL 342 - Spanish Conversation for Community Engagement *Units: 4*
- MLL 343 - Spanish Composition and Syntax *Units: 4*
- MLL 344 - Spanish Linguistics and Phonetics *Units: 4*
- MLL 345 - Spanish Textual Analysis in a Multicultural Context *Units: 4 ; G.E./G.R. Area: D4*
- MLL 447 - Latin American Global and Cultural Studies *Units: 3 ; G.E./G.R. Area: C4*
- MLL 448 - Spanish Global and Cultural Studies *Units: 3*
- MLL 449 - Selected Topics in Hispanic Studies *Units: 3*

Modern Languages and Literatures: Spanish-American Literature and Culture

- MLL 441 - Introduction to Spanish American Literature: 1492 to 1900 *Units: 3*

- MLL 442 - Introduction to Spanish American Literature: 1900 to the Present *Units: 3 ; G.E./G.R. Area: C4*
 - MLL 445 - Cultures of Spanish America *Units: 3 ; G.E./G.R. Area: C4*
- Modern Languages and Literatures: Spanish Peninsular Literature and Culture**
- MLL 443 - Survey Spanish Literature I: Medieval and Golden Age *Units: 3 ; G.E./G.R. Area: C4*
 - MLL 444 - Survey Spanish Literature II: 18th Century to Present *Units: 3*
 - MLL 446 - Cultures of Spain *Units: 3 ; G.E./G.R. Area: C4*

Spanish, B.A.

Spanish, B.A. Program (120 units)

Program Description

The program offers students the ability to learn speaking, writing, and analytical skills in Spanish and has been designed to provide students with the cultural understanding and the academic knowledge necessary for future pursuits in various careers, especially in teaching Spanish and Spanish American literature and culture at multiple educational levels.

Recently CSUEB was declared a Hispanic Serving Institution due to the demographic impact of the Latino/Hispanic population in California, particularly in the East Bay area. With the growing involvement of the United States in international business and the increasingly multicultural character of American society itself within the exponential growth of its Latino, Hispanic population, the importance of Spanish in nearly every kind of occupation is considerable. A major in Spanish, therefore, may lead to teaching careers and represent direct, practical assets in other fields such as business, industry and commerce, civil service, law, library science, media, science, health services, social work, travel, and tourism.

Program Learning Outcomes

Students graduating with a Spanish, B.A. from Cal State East Bay will be able to:

- **Oral Communication:** Express themselves in Spanish with sufficient accuracy and clarity to carry on conversations with native speakers and to give oral presentations appropriate to the undergraduate level. Students will be able to appreciate the various components of diverse cultures. Through in-class discussions and group work, students will also learn how to work collaboratively an open-minded and respectful way. This will prepare them for their future workplace.
- **Written Communication:** Express themselves in Spanish with a fair amount of sophistication, integrating research information while giving adequate credit to the sources used. They will also have the ability to convey critical ideas in both academic and social contexts in a respectful way.
- **Critical Thinking:** Be familiar with major creative texts, and other cultural productions such as art, music, cinema, and history. They will also learn critical thinking, critical and analytical methods that are reinforced by their language skills. They should be able to relate a variety of cultural productions to the socio-cultural contexts in which they developed.
- **Multicultural Diversity:** Demonstrate that they have acquired the knowledge of ethnic cultural diversity, and other forms of diversity such as gender, while developing an appreciation of contributions to the body of diverse cultural productions, such as art, music, cinema, and history.
- **Social Justice and Sustainability:** Act responsibly and recognize the historical and individual perspectives vs. the global. Students will demonstrate knowledge of global barriers to equality and social

justice, identify and critically assess social, cultural, historical, political, national and/or global inequalities while acquiring the knowledge of multicultural diversity in more than one area.

- Use multiple forms (essay, research, creative expression) and mediums of communication (on the ground, social media, television, radio) to investigate, participate in, and/or critique social justice movements in an open-minded and respectful manner.

Degree Requirements Unit-Outline

A baccalaureate of arts degree requires a total of 120 units:

- The major requirements consists of 47 units;
- General Education (GE) & Graduation Requirements (GR) consists of 57 units;
- Free Electives may consists of 16 units (actual number of free elective units may depend on GE/GR units).

Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.

Spanish Major Requirements (24-41 units)

NOTE: Spanish majors should take all courses for a letter grade.

Lower Division Core

Students may be exempt from lower-division courses. Students may challenge elementary and intermediate courses by exam.

Students who are not exempt must take all four (4) of the following courses for 16 units:

- MLL 141 - Elementary Spanish I *Units: 4 ; G.E./G.R. Area: C2*
- MLL 142 - Elementary Spanish II *Units: 4 ; G.E./G.R. Area: C1*
- MLL 241 - Intermediate Spanish I *Units: 4 ; G.E./G.R. Area: C2*
- MLL 242 - Intermediate Spanish II *Units: 4*

Upper Division Core

Students must take three (3) upper division courses for 12 units from the following list:

- MLL 341 - Spanish Conversation *Units: 4*
- MLL 343 - Spanish Composition and Syntax *Units: 4*
- MLL 344 - Spanish Linguistics and Phonetics *Units: 4*
- MLL 345 - Spanish Textual Analysis in a Multicultural Context *Units: 4 ; G.E./G.R. Area: D4*

Upper Division Electives

Students must take four (4) courses from the following list for 12-13 units:

- MLL 342 - Spanish Conversation for Community Engagement *Units: 4*
- MLL 441 - Introduction to Spanish American Literature: 1492 to 1900 *Units: 3*
- MLL 442 - Introduction to Spanish American Literature: 1900 to the Present *Units: 3 ; G.E./G.R. Area: C4*
- MLL 443 - Survey Spanish Literature I: Medieval and Golden Age *Units: 3 ; G.E./G.R. Area: C4*
- MLL 444 - Survey Spanish Literature II: 18th Century to Present *Units: 3*
- MLL 445 - Cultures of Spanish America *Units: 3 ; G.E./G.R. Area: C4*
- MLL 446 - Cultures of Spain *Units: 3 ; G.E./G.R. Area: C4*
- MLL 447 - Latin American Global and Cultural Studies *Units: 3 ; G.E./G.R. Area: C4*
- MLL 448 - Spanish Global and Cultural Studies *Units: 3*
- MLL 497 - Issues in Modern World Languages and Literatures *Units: 3*

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

Minor

American Sign Language Minor

Minor Requirements (15-27 units)

Students may be exempt from lower division courses and may challenge elementary and intermediate courses by exam. Students who test out of all of the lower division courses will be required to take additional upper division elective courses to meet the 15 unit minimum for the minor.

Lower Division Core

The lower-division core consists of 0-16 units. Students who are not exempt must take four (4) of the following courses for 16 units:

- MLL 131 - Elementary American Sign Language I *Units: 4 ; G.E./G.R. Area: C2*
- MLL 132 - Elementary American Sign Language II *Units: 4 ; G.E./G.R. Area: C1*
- MLL 231 - Intermediate American Sign Language I *Units: 4 ; G.E./G.R. Area: C2*
- MLL 232 - Intermediate American Sign Language II *Units: 4 ; G.E./G.R. Area: D1-3*

Upper Division Core

All ASL minor students must take the two (2) advanced language courses for 8 units:

- MLL 331 - Advanced American Sign Language I *Units: 4*
- MLL 332 - Advanced American Sign Language II *Units: 4*

Upper Division Elective(s)

All ASL minor students must choose at least one (1) course for 3 units. Students who test out of all the lower division courses are required to take a total of three (3) elective courses for 9 units.

- MLL 333 - American Deaf Culture *Units: 3 ; G.E./G.R. Area: C4*
- MLL 335 - Classifiers in American Sign Language *Units: 3*
- MLL 431 - Linguistics in American Sign Language *Units: 3*
- MLL 435 - Fieldwork in American Sign Language Studies *Units: 3*

Spanish Minor

Minor Requirements (15-28 units)

Students may be exempt from lower division courses. Students may challenge elementary and intermediate courses by exam. Students who test out of the lower division courses will be required to take a fourth upper division course to meet the 15 unit minimum for the minor.

NOTE: Spanish minor students should take all courses for a letter grade.

Lower Division Core

Students who are not exempt must take four (4) of the following courses for 16 units:

- MLL 141 - Elementary Spanish I *Units: 4 ; G.E./G.R. Area: C2*
- MLL 142 - Elementary Spanish II *Units: 4 ; G.E./G.R. Area: C1*
- OR MLL 146 - Beginning Spanish for Healthcare Professionals *Units: 4*
- MLL 241 - Intermediate Spanish I *Units: 4 ; G.E./G.R. Area: C2*
- MLL 242 - Intermediate Spanish II *Units: 4*
- OR MLL 246 - Intermediate Spanish for Healthcare Professionals *Units: 4*

Upper Division Electives

Students who test out of the lower division courses will be required to take a fourth upper division course to meet the 15 unit minimum.

Students must take three (3) courses from the following list for 12 units:

- MLL 341 - Spanish Conversation *Units: 4*
- MLL 343 - Spanish Composition and Syntax *Units: 4*
- MLL 344 - Spanish Linguistics and Phonetics *Units: 4*
- MLL 345 - Spanish Textual Analysis in a Multicultural Context *Units: 4 ; G.E./G.R. Area: D4*

Department of Music

Department Office location in the Music and Business building, Room 2571

Open Hours: 8:00 a.m. - 5:00 p.m., Monday through Friday

Dept Phone: (510) 885-3135

Faculty

Professors

Rafael Hernandez, D.M. Indiana University

Buddy O. James (Chair), D.M.A. University of Southern California

Kathleen Rountree, D.M. The Florida State University

Associate Professors

John Eros, Ph.D. The University of Michigan, Ann Arbor

Peter K. Marsh, Ph.D. Indiana University

Assistant Professors

Danielle Gaudry, D.M.A. University of Cincinnati

Omri Shimron, D.M.A. Eastman School of Music

Ines Thiebaut, Ph.D. City University of New York, Graduate Center

Graduate Coordinator: Peter K. Marsh

Mission Statement

The mission of the Department of Music is to offer all students outstanding musical and educational experiences within a nurturing and collegial environment. These experiences provide opportunities for personal and professional enrichment by developing a greater appreciation for and understanding of the art of music. Through performance, creative activity, research, scholarship and teaching, students are prepared for careers as performers, composers, teachers and independent scholars, and for advanced study.

Bachelor

Music, B.A.

Music, B.A. Program (120 units)

Program Description

The Music Department at CSUEB integrates rigorous academic training with a driving passion for the making of great music: the classics from the European-American tradition, great jazz, the new 'classics' of our own time, world music, experimental music and more. With a rich variety of opportunities for performing and composing and a deep commitment to teacher education, the Music Department offers something for all students seriously committed to pursuing a life in music.

Student performance groups are open to all qualified students and one need not be a music major to participate. There are more than twenty active ensembles including Wind Symphony, Jazz Orchestra, East Bay Singers, Orchestra, Vocal Repertory Ensemble, Singing Society, Percussion Ensemble, Jazz Singers, and many small vocal and instrumental ensembles.

The Department of Music offers Bachelor of Arts degree and Master of Arts degree majors which are fully accredited by the National Association of Schools of Music. All music majors have the advantage of continuous applied lessons with instrumental, vocal, or composition teachers on the faculty. A music minor is also offered.

The Music Department occupies a large, fully-equipped, modern facility with a number of special resources: a Media Center for Music Technology; Music Resource Center, with thousands of scores and recordings; Choral Music Education Student Resource Center, with thousands of choral octavos and conducting resources; large musical equipment collection for student use; Recital Hall with custom acoustical design; and professional recording facilities.

The Music curriculum is designed to serve the needs of students who have career goals in performance, composition, music technology, jazz, public school or private teaching, or graduate study, as well as those who are pursuing other fields of study and choose music as an elective.

Program Learning Outcomes

Students graduating with a B.A. in Music from Cal State East Bay will be able to:

- Aurally identify common rhythmic, melodic, and harmonic patterns; demonstrate pitch and rhythmic accuracy through singing and rhythm vocalization.
- Demonstrate stylistically appropriate sound quality, technical skills, and expression within their primary performance area
- Apply critical and creative thinking and analytical reasoning to address complex challenges in the theory, history, and performance of music of many cultures.
- Create, perform, and respond to musical works and ideas, and relate them to societal, cultural and historical contexts
- Demonstrate the ability to work collaboratively and respectfully with others in classroom and performance settings
- Demonstrate an ability to integrate musical ideas, methods, theories, and practices, and communicate them to others clearly and persuasively.

Career Opportunities

Arranger • Choral Director • Composer • Concert Artist • Conductor • DJ • Film/Video
 Composer • Freelance Performer • Jazz Musician • Music Professor/Teacher • Musical Theater
 Director • Symphony Member

Scholarships

The Music Department annually awards a number of scholarships to entering and returning music majors. For more information, contact the Music Department office at (510) 885-3135.

Preparation

For Advanced Placement course equivalencies, see Registration chapter.

Admission

Students wanting to select music as a major are expected to have had a variety of pre-college cognitive and affective experiences, such as high school performance, high school theory programs, individual private instruction with music professionals, or music professional experiences. Admission to the major in music is determined by audition. Students must complete this audition and be accepted to the department prior to being accepted in the major.

Transfer students will be placed at the appropriate applied lesson level determined by their successful audition. Transfer students will also be subject to a proficiency examination as described below under "Special Requirements of the Department of Music, Section IV. Proficiency Examinations."

Standards and Guidelines for Auditions

May be found on the Department of Music website.

Applied Lessons:

Each Music major will declare an applied music discipline (keyboard, voice, wind, brass, percussion, strings, jazz, guitar, harp, composition) with the department.

Majors wishing to choose composition as their applied music discipline are required to complete first year study in an instrumental or vocal discipline or demonstrate equivalent experience and submit a portfolio of written works for review. Students whose portfolios are accepted, will begin applied lessons in composition.

To receive applied lessons, an undergraduate student must be enrolled for a minimum of five (5) units, two of which must be in any music course other than major performance activities and applied music.

Registration for applied lessons requires concurrent enrollment in a major performance activity (MUS 351 - 355). Students who do not meet this requirement by the end of the add/drop period will not be eligible for applied lessons that semester. Ensembles that may be used to meet this requirement are listed in the Handbook for Music Majors.

All students enrolled in applied lessons must demonstrate their progress through periodic performances before a faculty jury as outlined in the Handbook for Undergraduate Music Majors.

Students are limited to a total of eight semesters of study in applied instruction (assuming a passing grade for each semester of instruction was given).

Recitals:

Music majors are to appear each year in regularly scheduled student recitals as determined by the department.

Specific recital performance requirements are outlined in the Handbook for Music Majors.

Music majors are required to attend ten DEPARTMENTAL recitals or concerts each semester on which they are not a required performer or participant. Recital attendance is recorded on a recital attendance card that may be obtained from the Music Department office.

Major Performance Activities and Chamber Ensembles:

Each music major is required to play his or her principal instrument (as determined by applied lesson enrollment) in one major music performance activity (MUS 351 - 355) each semester in which he or she is registered for applied lessons. Students may choose to perform on a secondary instrument or voice to fulfill the requirement if performance opportunities on the principal instrument do not exist.

The 2 units of chamber ensemble required for the Music major must be taken in 2 different semesters.

Proficiency Examinations:

Proficiency examinations may be required in any or all aspects of music performance skills, theory, and history and literature as a basis for determining placement in sequence courses.

An upper division transfer student who has completed most of his or her music major may be required to take remediation in certain courses in theory, history and literature, and performance based on the results of the proficiency examinations.

All new music majors (except keyboard majors) are required to take a piano proficiency exam. If the exam is not passed, the student must enroll in the appropriate level of class piano instruction until the proficiency exam or MUS 218b is passed. Freshmen music majors, including keyboard majors, are required to take for credit a minimum of MUS 118a and MUS 118b. They may challenge the course for credit if they believe their keyboard skills meet the demands of MUS 118a and MUS 118b.

Sample Program

A Sample Program for this degree can be found at the Department website.

Degree Requirements Unit-Outline

- A baccalaureate of arts degree requires a total of 120 units:
 - The major requirements consists of 54 units;
 - General Education (GE) & Graduation Requirements (GR) consists of 57 units;
 - Free Electives may consist of 9 units (*actual number of free elective units may depend on GE/GR units*).

Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.

Music Major Requirements (54 units)

Lower Division Core Courses

Students must complete 24* units of lower-division core coursework as outlined below:

Complete the following 20 units of required courses:

- **MUS 111 - Music Theory I** Units: 3 ; G.E./G.R. Area: C1 (* see Errata page for course change)
- **MUS 112 - Music Theory II** Units: 3
- **MUS 115 - Aural Skills I** Units: 1
- **MUS 116 - Aural Skills II** Units: 1
- **MUS 118A - Basic Keyboard I** Units: 1
- **MUS 118B - Basic Keyboard II** Units: 1
- **MUS 211 - Music Theory III** Units: 3
- **MUS 212 - Music Theory IV** Units: 3
- **MUS 215 - Aural Skills III** Units: 1
- **MUS 216 - Aural Skills IV** Units: 1
- **MUS 218A - Intermediate Keyboard I** Units: 1
- **MUS 218B - Intermediate Keyboard II** Units: 1
- An additional 4 units of lower-division Applied Study (MUS 261-269) are required. Placement in the Applied Study courses are determined by audition. Use this [About Courses & Course Filter](#) link to see all the Applied Study courses.

Upper Division Core Courses

Students must complete 30 units of upper-division core coursework as outlined below:

Complete the following 16 units of required courses:

- **MUS 304 - Introduction to World Music & Culture** Units: 3 ; G.E./G.R. Area: C4

- MUS 312 - Form and Analysis *Units: 3*
- MUS 321 - Western Music History I *Units: 4*
- MUS 322 - Western Music History II *Units: 4*
- MUS 380 - Recital Class - Junior *Units: 1*
- MUS 480 - Recital Class - Senior *Units: 1*

Upper Division Applied Study Coursework

- An additional 4 units of upper-division Applied Study (MUS 461-469) are required. Placement in the Applied Study courses are determined by audition. Use this Course Type Music link to see all the Applied Study courses.

Major Performing Ensembles Coursework

- An additional 8 units of Major Performing Ensembles (MUS 351-355) are required. Placement in the Major Performing Ensembles courses are determined by audition. Use this Course Type Music link to see all the Major Performing Ensembles courses.

Chamber Ensembles Coursework

- An additional 2 units of Chamber Ensembles (MUS 361-370) are required. Placement in the Chamber Ensembles courses are determined by audition. Use this Course Type Music link to see all the Chamber Ensembles courses.

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

Master

Music, M.A.

Music, M.A. Program

Program Description

The Master of Arts degree in Music is a two-year program that provides advanced study for students with highly developed interests and accomplishments in music. Students are given the opportunity to increase their musicianship, critical skills, and professional insights in preparation for careers in performing, teaching, composing and arranging, administration, and research. It also offers opportunities for current school and college music teachers to increase their professional effectiveness and provides prospective doctoral aspirants with a sound foundation for advanced graduate study.

Students take core courses in graduate-level music theory, history, education, and research, and choose elective courses in an area of emphasis that support their artistic, creative and professional goals. Areas of emphasis include: choral studies, composition, jazz studies, music education, music history, music theory, and performance. All emphases require a culminating recital, creative project, or master's thesis.

Students in our program have opportunities to study with leading performers, composers, and scholars, and to partake in the musical and cultural richness of the San Francisco Bay Area. Emphasis is placed upon maintaining small class sizes and close student-to-teacher interactions. The program also provides flexibility for students to explore further study in areas relevant to their career goals and aspirations.

Beyond the classroom, the Department of Music boasts a thriving music program that includes three choirs, an opera workshop, orchestra, wind orchestra, jazz ensemble, new music ensemble, West African drumming ensemble, and numerous classical and jazz chamber ensembles.

Upon making application to the program, a candidate may be admitted for graduate study in the Department of Music as a "Conditionally Classified Graduate" student if: (1) the general requirements for graduate standing have been met, and (2) the candidate holds a baccalaureate degree with a major in music and an upper division grade point average of at least 3.0 ("B") in music.

Candidates wishing to enroll in the graduate program who do not have a major in music must first complete an equivalency of the Cal State East Bay B.A. degree major in Music. When the equivalency has been completed, the candidate will then be eligible for entrance into the graduate program, subject to the entrance requirements stated below.

Admissions Requirements: All Areas

To apply for admission to the Master of Arts program in Music, students must complete the online university application at CALSTATE Apply. In addition, all graduate candidates must submit the following directly to the Music Department:

- a Statement of Purpose of three to four pages in length (typed, double-spaced) that should describe the candidate's background and musical training, goals for his or her time in the program, and his or her professional goals and aspirations,
- two letters of recommendation, on letterhead, from individuals familiar with his or her work or performance abilities.

Choral Music

Those wishing to pursue an emphasis in Choral Music must submit a video recording (online link) of at least 15 minutes of a rehearsal with a choral ensemble. Candidates may optionally include a video of a concert performance in addition to the rehearsal video. Finalists will be invited to campus to audition with one of the Cal State East Bay choral ensembles. Preference will be given to candidates who apply to the Music Department by March 1.

Composition

Those wishing to pursue an emphasis in composition must submit a portfolio that includes at least two samples of their work written for different media, preferably with an accompanying audio or video recording (online link).

Jazz Studies

Those wishing to pursue an emphasis in jazz studies must complete an in-person audition or submit an audition video recording (online link), preferably of a recent performance or recital.

Music Education

Those wishing to pursue an emphasis in music education must submit a copy of their California Teaching Credential and evidence of a minimum of two years full-time teaching at the K-12th grade levels. In addition to the statement of purpose, they must also submit a video recording (online link) of at least 20 minutes of a class or rehearsal in a K-12 school.

Music History

Those wishing to pursue an emphasis in music history must submit a sample of their academic writing, preferably a thesis, term paper, or published article on a subject in music history or world music that demonstrate their research and writing skills and their abilities to think critically;

Music Theory

Those wishing to pursue an emphasis in music theory must submit a sample of their academic writing, preferably a thesis, term paper, or published article on a subject in music theory that demonstrate their analytical, research and writing skills and their abilities to think critically;

Performance

Those wishing to pursue an emphasis in performance must complete an in-person audition or submit an audition video recording (online link), preferably of a recent performance or recital.

Graduate Music Advisory Examinations

The Graduate Music Advisory Examinations, given by the Department of Music, must be taken prior to the beginning of the student's first semester in residence. Areas of examination include dictation, music history, piano proficiency, and music theory. Contact the department for the date of these examinations.

Classification in the Program

A student may be a "Classified Graduate" student if (s)he:

- Has completed all undergraduate deficiencies;
- Has completed at least 21 semester units in residence, with a minimum of 15 at the 600-level applicable toward the master's degree, including Music 600, with a minimum grade point average of 3.0;
- Has passed the Graduate Advisory Examinations in dictation, music history, piano proficiency, and music theory. The Graduate Advisory Examinations must be passed by the time the student has completed 20 units applicable to the degree or the student will be dropped from the program;
- As a graduate student pursuing the music history and music theory areas of emphasis, has demonstrated reading ability in French, German, or Italian; other languages may be substituted by approval of the department;
- Has fulfilled the University Writing Skills Requirement. For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing.

Advancement to Candidacy

A student who holds "Classified Graduate" standing may be considered for Advancement to Candidacy when (s)he:

- Has filed a study program for the completion of the degree which has been approved by the departmental Graduate Studies Committee;
- If electing the performance emphasis, has successfully demonstrated a graduate standard of excellence before an auditions committee.

Degree Requirements

To be eligible for the Master of Arts degree a student must:

- Be Advanced to Candidacy;
- Complete 30 units of approved courses of which:
 - 21 must be completed in residence;
 - A minimum of 15 must be at the 600 level;
 - A minimum of 6 units must be in one (1) of the seven possible areas of emphasis:
 - choral music,
 - composition,
 - theory,
 - jazz studies,
 - music education,

- music history, or
 - performance;
 - Not more than 8 units of applied music will be counted in the performance area of emphasis and electives;
 - Up to, but no more than 2 units of applied music, when approved by the graduate coordinator and department chair, may be applied toward degree requirements by candidates outside the performance area of emphasis;
 - Up to, but no more than 6 units of study outside of music may be counted toward the degree (these units must be approved by a graduate coordinator and must be at the 300-level or above);
 - Performance emphasis candidates must complete 3 units of performance activities (large and/or chamber ensembles)
 - Present a capstone project in one (1) of the following forms:
 - In music history, music theory, and music education, a standard research thesis (University Thesis, MUS 691);
 - In composition, a project consisting of an original composition and analysis of that composition (Project, MUS 693);
 - In choral music, jazz studies and performance, a final graduate recital plus program notes on the repertoire performed (Project, MUS 693);
 - Pass the departmental exit examination (both written and oral) upon completion of all coursework.
- The candidate must observe the specific departmental requirements stated here and in the Handbook for Music Majors.

Program Learning Outcomes

Students graduating with an M.A. in Music from Cal State East Bay will be able to:

- Demonstrate mastery of core skills within their primary area of emphasis, i.e. performance, composition, research, analysis, conducting, or teaching;
- Apply critical and creative thinking and analytical reasoning to address complex challenges in music creation, performance, and research;
- Work collaboratively and respectfully with other musicians in a performance context; and
- Integrate musical ideas, methods, theory, and practice, and communicate them to others clearly and persuasively, in classroom and performance settings.

Music Degree Requirements (30 units)

Core Courses

All the following core courses for 15 units are required:

- MUS 600 - Seminar in Research Methodology *Units: 3 ; G.E./G.R. Area: UWSR*
- MUS 601A - Analysis of Musical Styles I *Units: 3*
- MUS 615 - Seminar in Music of the Twentieth & Twenty-First Centuries
Units: 3
- MUS 622 - Seminar in Asian Music and Culture *Units: 3*
- MUS 631 - Teaching Music in Higher Education *Units: 3*

Area of Emphasis

A minimum of 6 units of coursework in one (1) of the following areas of emphasis is required:

- Choral Music
- Composition
- Jazz Studies
- Music Education
- Music History
- Music Theory
- Performance

Elective Courses

Select 6 units in Music courses not taken in areas above. Up to 6 units outside of Music may be taken with approval. Please meet with your graduate advisor to select the appropriate electives for your area of emphasis and capstone experience.

Capstone Requirement

All M.A. Music students must pass a written and oral examination in order to graduate. In addition, students must complete either a university thesis or project for a minimum of 3 units:

- Students in Choral Music, Jazz Studies, and Performance must complete a project consisting of a graduate recital with performance notes (MUS 693).
- Students in Composition must complete a project consisting of an original composition and analysis of that composition (MUS 693).
- Students in Music Education, Music History or Music Theory must complete a university thesis (MUS 691).
See details in program description section above.
- MUS 691 - University Thesis *Units: 1-4*
- MUS 693 - Project *Units: 1-3*

Other Graduate & Post-Baccalaureate Degree Requirements

In addition to departmental requirements, every student must also satisfy the University requirements for graduation as described throughout this catalog. These include the 70% unit residence requirement; the five-year rule on currency of subject matter; the minimum number of units in 600-level courses; the "C" minimum grade for each graduate course; the 3.00 cumulative grade point average; and the University Writing Skills Requirement.

Note: For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call (510) 885-3661.

Minor

Music Minor

Minor Requirements (21 units)

Note: To be admitted to the minor program, the student must demonstrate vocal or instrumental performing ability. Applied instruction will be limited to two semesters of study.

Required Courses

Take the following 8 units:

- MUS 111 - Music Theory I *Units: 3 ; G.E./G.R. Area: C1*
- MUS 112 - Music Theory II *Units: 3*
- MUS 115 - Aural Skills I *Units: 1*
- MUS 116 - Aural Skills II *Units: 1*

Basic Keyboard

Placement determined by instructor. Take 2 units from the following:

- MUS 118A - Basic Keyboard I *Units: 1*
- MUS 118B - Basic Keyboard II *Units: 1*
- MUS 218A - Intermediate Keyboard I *Units: 1*

- MUS 218B - Intermediate Keyboard II *Units: 1*

Major Performing Ensembles

Audition Required. Take 3 units from the following:

- MUS 351B - East Bay Singers *Units: 1*
- MUS 351A - Singing Society *Units: 1*
- MUS 353 - East Bay Wind Symphony *Units: 1*
- MUS 354 - East Bay Orchestra *Units: 1*
- MUS 355 - East Bay Jazz Orchestra *Units: 1*

Applied Music Study

Audition required for acceptance into Applied Music Study. Applied Study is limited to 2 semesters. Take 2 units from the following:

- MUS 261A - Applied Study: Piano *Units: 1*
- MUS 261C - Applied Study: Organ *Units: 1*
- MUS 262 - Applied Study: Voice *Units: 1*
- MUS 263A - Applied Study: Violin *Units: 1*
- MUS 263B - Applied Study: Viola *Units: 1*
- MUS 263C - Applied Study: Cello *Units: 1*
- MUS 263D - Applied Study: Double Bass *Units: 1*
- MUS 263E - Applied Study: Classic'l Guitar *Units: 1*
- MUS 263F - Applied Study: Harp *Units: 1*
- MUS 264A - Applied Study: Flute *Units: 1*
- MUS 264B - Applied Study: Clarinet *Units: 1*
- MUS 264C - Applied Study: Saxophone *Units: 1*
- MUS 264D - Applied Study: Oboe *Units: 1*
- MUS 264E - Applied Study: Bassoon *Units: 1*
- MUS 265A - Applied Study: Trumpet *Units: 1*
- MUS 265B - Applied Study: French Horn *Units: 1*
- MUS 265C - Applied Study: Trombone *Units: 1*
- MUS 265D - Applied Study: Euphonium *Units: 1*
- MUS 265E - Applied Study: Tuba *Units: 1*
- MUS 266 - Applied Study: Percussion *Units: 1*
- MUS 269A - Applied Study: Jazz Trumpet *Units: 1*
- MUS 269B - Applied Study: Jazz Trombone *Units: 1*
- MUS 269C - Applied Study: Jazz Saxophone *Units: 1*
- MUS 269D - Applied Study: Jazz Guitar *Units: 1*
- MUS 269E - Applied Study: Jazz Bass *Units: 1*
- MUS 269F - Applied Study: Jazz Drums and Percussion *Units: 1*
- MUS 261B - Applied Study: Harpsichord *Units: 1*

- MUS 267A - Applied Study: Composition *Units: 1*

Upper Division Electives

Take 6 units from the following in consultation with departmental advisor. *Note: MUS 351-MUS 355 are repeatable courses up to 8 total units. MUS 364 is repeatable up to 4 units.*

- MUS 302 - What to Listen for in Music *Units: 3 ; G.E./G.R. Area: C4*
- MUS 304 - Introduction to World Music & Culture *Units: 3 ; G.E./G.R. Area: C4*
- MUS 351B - East Bay Singers *Units: 1*
- MUS 351A - Singing Society *Units: 1*
- MUS 353 - East Bay Wind Symphony *Units: 1*
- MUS 354 - East Bay Orchestra *Units: 1*
- MUS 355 - East Bay Jazz Orchestra *Units: 1*
- MUS 364 - African Drumming Ensemble *Units: 1*

- • MUS 631 - Teaching Music in Higher Education
- • MUS 690 - Independent Study
- • MUS 691 - University Thesis
- • MUS 693 - Project
- • MUS 697 - Issues in Music

Music: Graduate: Applied

- • MUS 660A - Graduate Vocal Coaching
- • MUS 660B - Graduate Instrumental Coaching
- • MUS 661A - Graduate Applied Study: Piano
- • MUS 661B - Graduate Applied Study: Organ
- • MUS 661C - Graduate Applied Study: Harpsichord
- • MUS 661D - Graduate Applied Study: Jazz Piano and Keyboard
- • MUS 662 - Graduate Applied Study: Voice
- • MUS 663A - Graduate Applied Study: Violin
- • MUS 663B - Graduate Applied Study: Viola
- • MUS 663C - Graduate Applied Study: Cello
- • MUS 663D - Graduate Applied Study: Bass
- • MUS 663E - Graduate Applied Study: Harp
- • MUS 663F - Graduate Applied Study: Guitar
- • MUS 664A - Graduate Applied Study: Flute
- • MUS 664B - Graduate Applied Study: Clarinet
- • MUS 664C - Graduate Applied Study: Bassoon
- • MUS 664D - Graduate Applied Study: Saxophone
- • MUS 664E - Graduate Applied Study: Oboe
- • MUS 665A - Graduate Applied Study: Trumpet
- • MUS 665B - Graduate Applied Study: French Horn
- • MUS 665C - Graduate Applied Study: Trombone
- • MUS 665D - Graduate Applied Study: Baritone
- • MUS 665E - Graduate Applied Study: Tuba
- • MUS 666 - Graduate Applied Study: Percussion
- • MUS 667A - Graduate Applied Study: Composition
- • MUS 667B - Graduate Applied Study: Jazz Composition
- • MUS 667C - Graduate Applied Study: Interactive and Media Composition
- • MUS 668 - Graduate Applied Study: Conducting
- • MUS 669A - Graduate Applied Study: Jazz Guitar
- • MUS 669B - Graduate Applied Study: Jazz Bass
- • MUS 669C - Graduate Applied Study: Jazz Drums and Percussion
- • MUS 669D - Graduate Applied Study: Jazz Saxophone
- • MUS 669E - Graduate Applied Study: Jazz Trumpet
- • MUS 669F - Graduate Applied Study: Jazz Trombone

Music: Graduate: History and Literature

- • MUS 601A - Analysis of Musical Styles I
- • MUS 601B - Analysis of Musical Styles II
- • MUS 611 - Seminar in Music of the Medieval & Renaissance Periods
- • MUS 612 - Seminar in Music of the Baroque Period

- • MUS 613 - Seminar in Music of the Classical Period
- • MUS 614 - Seminar in Music of the Nineteenth Century
- • MUS 615 - Seminar in Music of the Twentieth & Twenty-First Centuries
- • MUS 622 - Seminar in Asian Music and Culture

Music: History and Literature

- • MUS 121 - Music Through the Ages
- • MUS 321 - Western Music History I
- • MUS 322 - Western Music History II
- • MUS 323 - Western Music History Topics
- • MUS 421 - Orchestral Literature
- • MUS 423 - Wind Ensemble Literature

Music: Major Performing Ensembles

- • MUS 351A - Singing Society
- • MUS 351B - East Bay Singers
- • MUS 353 - East Bay Wind Symphony
- • MUS 354 - East Bay Orchestra
- • MUS 355 - East Bay Jazz Orchestra

Music: Performance Activities

- • MUS 118A - Basic Keyboard I
- • MUS 118B - Basic Keyboard II
- • MUS 218A - Intermediate Keyboard I
- • MUS 218B - Intermediate Keyboard II
- • MUS 380 - Recital Class - Junior

Music: Theory

- • MUS 111 - Music Theory I
- • MUS 112 - Music Theory II
- • MUS 115 - Aural Skills I
- • MUS 116 - Aural Skills II
- • MUS 211 - Music Theory III
- • MUS 212 - Music Theory IV
- • MUS 215 - Aural Skills III
- • MUS 216 - Aural Skills IV
- • MUS 311 - Analysis of Contemporary Music
- • MUS 312 - Form and Analysis
- • MUS 316 - Jazz Theory and Composition
- • MUS 317A - Improvisation Techniques I
- • MUS 317B - Improvisation Techniques II
- • MUS 411 - 16th Century Counterpoint
- • MUS 412 - 18th Century Counterpoint
- • MUS 413 - Instrumentation
- • MUS 414 - Orchestration I
- • MUS 415 - Orchestration II
- • MUS 416 - Jazz Arranging for Large Ensemble

Single Subject Matter Preparation Certificate Programs

Music Single Subject Matter Preparation Certificate

The 31-unit Single Subject Matter Preparation Program in Music is a sequence of courses designed to prepare music students to become successful music teachers in K-12 school settings. Students receive education in a variety of musical disciplines and pedagogical approaches, including choral, instrumental, general, and world music. The program is approved by the California Commission on Teacher Credentialing. All music students may take the Subject Matter Preparation Program courses although, in order for students to obtain documentation of completing the program, they must take every course within the program.

Secondary Techniques

Six (6) units in performance and pedagogy of standard orchestral instruments, voice, and guitar are required:

- MUS 231 - Teaching String Instruments *Units: 1*
- MUS 232 - Teaching Woodwind Instruments *Units: 1*
- MUS 233 - Teaching Brass Instruments *Units: 1*
- MUS 234 - Teaching Percussion *Units: 1*
- MUS 235 - Basic Guitar Techniques *Units: 1*
- MUS 236 - Basic Vocal Techniques *Units: 1*

Conducting

Six (6) units of developmental basic skills in conducting, as well as more specific skills for choral and instrumental settings are required:

- MUS 341 - Basic Conducting *Units: 3*
- MUS 441 - Intermediate Conducting *Units: 3*

Music Education Core Courses

The following ten (10) units are required of all music education students:

- MUS 335 - Technology for Music Educators *Units: 3*
- MUS 304 - Introduction to World Music & Culture *Units: 3 ; G.E./G.R. Area: C4*
- MUS 331 - Foundations of Music Education *Units: 3*
- MUS 495 - Music Education Practicum *Units: 1*

Music Teaching and Learning

These required nine (9) units focus on specific disciplines within music teaching and learning. They are designed to prepare future music educators to teach in a variety of K-12 areas, including instrumental, choral, and elementary music teaching settings.

- MUS 431 - Elementary Music Teaching Methods *Units: 3*
- MUS 432 - Instrumental Music Teaching Methods *Units: 3*
- MUS 433 - Choral Music Teaching Methods *Units: 3*

Department of Nursing

The Department Office is located on the 5th Floor of the Student and Faculty Support (SF) building, Room 502.

Open 8:00 a.m. - 5:00 p.m., Monday - Friday.

Dept. Phone: (510) 885-3481

Faculty

Professors

Roberta F. Durham, Ph.D. University of California, San Francisco

Kimberly H. Kim, Ph.D. University of Wisconsin

Lindsay McCrea, Ph.D. University of California, San Francisco

Lynn A. Van Hofwegen (Chair), D.N.P. Case Western Reserve University

Associate Professors

Maria Cho, Ph.D. University of California, San Francisco

Denise Li, Ph.D. University of California, San Francisco

Assistant Professors

Daniel Doolan, Ph.D. University of California, San Francisco

Monika Britt Eckfield, Ph.D. University of California, San Francisco

Renee M. Granados, Ed.D. University of San Francisco

Sahar Nouredini, Ph.D. University of California, San Francisco

Claire Valderama-Wallace, MS University of California, San Francisco

Jennifer Winters, Ph.D. Walden University

Mission Statement

The mission of the baccalaureate nursing program at CSUEB is to prepare professional nurse generalists who are committed to the practice of nursing and responsive to the ever changing needs of the communities we serve. The program therefore seeks to provide an inclusive community of learning focused primarily on undergraduate nursing education and the development of lifelong learners.

The nursing program supports and reflects the University mission of quality education for a diverse society. We value a diverse workforce, a diverse nursing student body, and culturally inclusive

practitioners of nursing who are equipped to provide high quality care and have a transformative influence on nursing practice, healthcare environments, and the health of our community.

Bachelor

Nursing, B.S.: Post-Licensure Concentration

Nursing, B.S. Program (120 units)

Program Description

The Department of Nursing offers an undergraduate program that leads to the Bachelor of Science degree with a major in Nursing. The program is designed to prepare a nurse generalist. Graduates of the program are prepared to work as professional nurses and/or pursue graduate education in nursing. There are two concentrations within the major: the Pre-Licensure concentration and the Post-Licensure concentration.

Program Learning Outcomes

Students graduating with a B.S. in Nursing will be able to:

- Synthesize knowledge from the natural sciences, behavioral sciences and the humanities with current nursing knowledge and theory to deliver nursing care;
- Provide safe, compassionate nursing care to diverse populations;
- Use critical thinking and communication skills to develop partnerships with clients and other healthcare professionals;
- Demonstrate responsibility and accountability for design, delivery, and evaluation of client care;
- Demonstrate professional behaviors in interactions with individuals, families, colleagues, and the community.

Career Opportunities

Graduates of the Nursing Pre-Licensure concentration will be qualified to take the National Council Licensure Examination - Registered Nurse (NCLEX-RN) and to apply for the California Public Health Nursing Certificate. Upon completion of the RN licensure process, the graduate will be able to work as a

Registered Nurse with career opportunities in a wide range of settings including in hospitals, extended care facilities, public health organizations, schools and in other community settings. Graduates of the Post-Licensure concentration are also eligible to apply for the California Public Health Nursing Certificate and have career opportunities as a Bachelor's prepared RN as listed above.

Major Advising

Because requirements are subject to change, consult an adviser in your major department for clarification and interpretation of your major requirements. Additionally, students are encouraged to consult a G.E. advisor in the College of Science for clarification of general education and other University graduation requirements.

Pre-Licensure Concentration

The B.S. in Nursing degree requires a total of 120 units. The Nursing major with a Pre-Licensure concentration is comprised of nursing prerequisites, 14 units of core courses and electives, and 57 units in the concentration. The remainder of the units in the degree consist of general education and graduation requirements. Students complete two years of prerequisite courses before admission to the Pre-Licensure concentration, which consists of five semesters of nursing courses. Nursing courses have concurrent laboratories on campus and clinical practicum courses in local hospitals and community settings. Expenses for clinical courses include the purchase of uniforms, stethoscopes, malpractice insurance, personal health insurance, and other necessary personal supplies.

The Pre-Licensure concentration program is approved by the State of California Board of Registered Nursing (Tel: 916 322-3350) and both the Pre-Licensure and the Post-Licensure Concentration are accredited by the Commission on Collegiate Nursing Education, One Dupont Circle NW, Suite 530, Washington DC 20036 (Tel: 202 887-6791).

Preparation

Students must take eight specific prerequisite courses to be eligible for admission to the Pre-Licensure concentration. The prerequisite courses may be completed at California State University, East Bay or by taking equivalent courses at another college or university. Students who will complete prerequisite courses by the end of Fall semester are eligible to apply for the nursing program with an admission the following Fall semester. Students who will complete prerequisite courses by the end of Spring semester are eligible to apply to the nursing program with an admission the following Spring semester. Students who plan to use transfer courses to satisfy prerequisite requirements must have equivalencies determined by an admissions counselor in the Department of Nursing.

Admission

The Board of Trustees has designated Nursing as an impacted program; therefore a special admission procedure has been instituted to assure that all students have an opportunity to be considered for admission to the Nursing major for Fall semester or Spring semester. General information on the program, admission criteria and application procedures may be obtained from the Department of Nursing. To be considered for admission to the nursing program, students must complete two application forms:

- The "CSU Application for Admission" and
- The "Nursing Supplemental Application"

Both applications must be filed in November for admission in the Fall semester of the following academic year and in August for admission in the Spring semester of the following academic year. Students must also take the "Test of Essential Academic Skills." To be eligible for admission, the student must have a minimum 3.00 GPA and a C or above (C- is not acceptable) in the eight prerequisite courses. The four science prerequisite courses calculated separately must also have a minimum of 3.00 GPA or above. Prerequisite courses are listed below.

Note: Licensed Vocational Nurses, Medical Corps members, other healthcare personnel, and others who have completed prior nursing coursework must seek advisement from the Department of Nursing prior to applying to the program.

Post-Licensure Concentration

The Post-Licensure concentration is open only to students who hold a California license as a Registered Nurse. This program builds on the previous education of the Associate Degree in Nursing to provide students with the theoretical perspectives, concepts and skills required for a Bachelor's Degree in Nursing.

The B.S. in Nursing degree with a Post-Licensure concentration requires 120 semester units, many of which are transferable from the student's Associate Degree nursing program. Units may also be earned through credit by examination, which is given for successful completion of the NCLEX-RN. The Nursing major with a Post-Licensure concentration includes nursing prerequisites, 14 units of core courses and electives, and an additional 23 semester units in the concentration, and can be completed in one year, (2 semesters and summer session).

Eligibility

To be eligible for the Post-Licensure concentration, a student must:

- Have an unencumbered, unrestricted California RN License by time of entry into the program.
- Be a graduate of an ADN program or Diploma Nursing program (within the last twelve months); or have six months or equivalent full-time nursing practice within the United States in the past two years.
- Meet all university admission requirements and nursing program deadlines.
- Meet minimum prerequisite GPA requirements. See website for details.

Admissions

General information on the program, admission criteria and application procedures may be obtained from the Department of Nursing. To be considered for admission, students must complete two application forms:

- The "CSU Application for Admission" and
- The "Nursing Supplemental Application"

Both applications must be filed approximately one year ahead of time. See Nursing website for details.

Concentration Plan of Study

A concentration plan of study for this degree can be found at the department website.

LVN to BSN Information

Students who have completed an LVN program and are licensed as an LVN in California are eligible to apply to the Pre-Licensure B.S. in Nursing Program. LVNs interested in the Pre-Licensure B.S. in Nursing should seek advisement from the Department of Nursing. Information for LVNs can be found on the department website.

Nursing Course Progression Policy

For information on the Nursing Course Progression Policy, please see the online Nursing Student Handbook on the Department of Nursing website. Enrolled Nursing Students are required to review the Nursing Student Handbook including the Nursing Course Progression Policy.

Degree Requirements Unit-Outline

- A baccalaureate of science degree requires a total of 120 units;
- The major requirements and pre-licensure concentration consists of 99* units;
- The major requirements and post-licensure concentration consists of 66* units;
- General Education (GE) & Graduation Requirements (GR) consists of 57 units;
- Free Electives consists of 0 units (*actual number of free elective units may depend on GE/GR units.*)

**Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.*

Nursing Major Requirements (66-99 units)

Prerequisite Courses

The following lower-division courses, or their equivalents, are prerequisites (28 units) that are included in major totals for both the Pre-Licensure and Post-Licensure Nursing Concentrations.

Note: To be eligible for admission, students must separately submit a Nursing application by strict deadlines, only available on the Nursing program website. Students must have a minimum 3.00 GPA and a C or above (C- is not acceptable) in the eight required prerequisite courses. The four science prerequisite courses, calculated separately, must also have a minimum of 3.00 GPA or above.

- BIOL 230 - Introduction to Clinical Microbiology Units: 4 ; G.E./G.R. Area: B2, B3
- BIOL 270 - Human Anatomy & Physiology I Units: 4 ; G.E./G.R. Area: B2, B3
- BIOL 271 - Human Anatomy & Physiology II Units: 4
- CHEM 161 - Basic Chemistry for the Health Sciences Units: 4 ; G.E./G.R. Area: B1, B3
- COMM 100 - Public Speaking Units: 3 ; G.E./G.R. Area: A1
- OR COMM 104 - Interpersonal Communication Units: 3 ; G.E./G.R. Area: A1
- ENGL 102 - Accelerated College Writing Units: 3 ; G.E./G.R. Area: A2 OR another GE Area A2 course.
- PHIL 100 - Workshop in Critical Thinking Units: 3 ; G.E./G.R. Area: A3 OR other course in Critical Thinking.
- STAT 100 - Elements of Statistics and Probability Units: 3 ; G.E./G.R. Area: B4

Core Requirements

The following interdisciplinary core courses for 12 units are required for both Pre-Licensure and Post-Licensure concentrations. These courses may also satisfy certain University requirements for graduation. In addition to the B.S. Nursing major requirements, every student must complete the University requirements for graduation which can be found online and elsewhere in this catalog. Students are advised to consult with their general education and major advisors to confirm they have met all of the University and major requirements for graduation.

- HDEV 380 - Lifespan Human Development *Units: 3 ; G.E./G.R. Area: D4*
- HIST 477 - History and Trends in Nursing *Units: 3 ; G.E./G.R. Area: C4*
- PSYC 100 - General Psychology *Units: 3 ; G.E./G.R. Area: D1-3*

And one course from the list below:

- ANTH 100 - Introduction to Anthropology *Units: 3 ; G.E./G.R. Area: D1-3*
- ANTH 130 - Introduction to Cultural Anthropology *Units: 3 ; G.E./G.R. Area: D1-3*
- SOC 100 - Introduction to Sociology *Units: 3 ; G.E./G.R. Area: D1-3*

Elective Courses

Additionally a minimum of 2 units of NURS electives chosen from the following are required:

- NURS 301 - Nutrition and Medical Nutrition Therapy *Units: 3*
- NURS 302 - Success in Nursing *Units: 1*
- NURS 492 - Global Health Nursing *Units: 1*
- NURS 493 - Nursing Research in Global Health *Units: 1*
- NURS 494 - Essentials of Critical Care Nursing *Units: 2*
- NURS 495 - Palliative Care in the Community *Units: 2*
- NURS 496 - Introduction to Healthcare Informatics *Units: 1*
- NURS 497 - Current Issues in Professional Nursing *Units: 1*
- NURS 490 - Independent Study *Units: 1-4*

Concentrations

B.S. Nursing students may only apply to one (1) concentration to complete the major. *Note: Students who have an LVN license must take the Pre-Licensure concentration. Students seeking course credit for previous education or experience should contact an advisor in the Nursing Department Office.*

- Nursing, B.S.: Pre-Licensure Concentration (57 units)
- Nursing, B.S.: Post-Licensure Concentration (24 units)

Post-Licensure Concentration

The following 20 units of upper-division NURS prefix coursework are required to complete the Nursing, B.S. Post-Licensure concentration. The coursework is sequential and must be taken as scheduled in each semester. See the Nursing Roadmap on the department website for further information:

- NURS 316 - Clinical Pathophysiology *Units: 3*
- NURS 360 - Transition to Professional Nurse Role *Units: 4*
- NURS 361 - Health Promotion for Diverse Populations *Units: 3*
- NURS 363 - Health Assessment for Registered Nurses *Units: 1*
- NURS 415 - Transitions of Care *Units: 1*
- NURS 422 - Evidence-Based Practice and Nursing Research *Units: 2*
- NURS 423 - Leadership in Nursing *Units: 2*
- NURS 450 - Community Health Nursing *Units: 2 ; G.E./G.R. Area: Social Justice*
- NURS 451 - Community Health Nursing Practice *Units: 2*

Capstone Requirements

The following capstone project for 4 units is required. See the Nursing Roadmap on the department website for further information:

- NURS 499 - RN Capstone Project *Units: 4*

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

- • NURS 693 - Master's Synthesis Project *Units: 3*

Nursing, B.S.: Pre-Licensure Concentration

Nursing, B.S. Program (120 units)

Program Description

The Department of Nursing offers an undergraduate program that leads to the Bachelor of Science degree with a major in Nursing. The program is designed to prepare a nurse generalist. Graduates of the program are prepared to work as professional nurses and/or pursue graduate education in nursing. There are two concentrations within the major: the Pre-Licensure concentration and the Post-Licensure concentration.

Program Learning Outcomes

Students graduating with a B.S. in Nursing will be able to:

- Synthesize knowledge from the natural sciences, behavioral sciences and the humanities with current nursing knowledge and theory to deliver nursing care;
- Provide safe, compassionate nursing care to diverse populations;
- Use critical thinking and communication skills to develop partnerships with clients and other healthcare professionals;
- Demonstrate responsibility and accountability for design, delivery, and evaluation of client care;
- Demonstrate professional behaviors in interactions with individuals, families, colleagues, and the community.

Career Opportunities

Graduates of the Nursing Pre-Licensure concentration will be qualified to take the National Council Licensure Examination - Registered Nurse (NCLEX-RN) and to apply for the California Public Health Nursing Certificate. Upon completion of the RN licensure process, the graduate will be able to work as a Registered Nurse with career opportunities in a wide range of settings including in hospitals, extended care facilities, public health organizations, schools and in other community settings. Graduates of the Post-Licensure concentration are also eligible to apply for the California Public Health Nursing Certificate and have career opportunities as a Bachelor's prepared RN as listed above.

Major Advising

Because requirements are subject to change, consult an adviser in your major department for clarification and interpretation of your major requirements. Additionally, students are encouraged to consult a G.E. advisor in the College of Science for clarification of general education and other University graduation requirements.

Pre-Licensure Concentration

The B.S. in Nursing degree requires a total of 120 units. The Nursing major with a Pre-Licensure concentration is comprised of nursing prerequisites, 14 units of core courses and electives, and 57 units in the concentration. The remainder of the units in the degree consist of general education and graduation requirements. Students complete two years of prerequisite courses before admission to the Pre-Licensure concentration, which consists of five semesters of nursing courses. Nursing courses have concurrent laboratories on campus and clinical practicum courses in local hospitals and community settings. Expenses for clinical courses include the purchase of uniforms, stethoscopes, malpractice insurance, personal health insurance, and other necessary personal supplies.

The Pre-Licensure concentration program is approved by the State of California Board of Registered Nursing (Tel: 916 322-3350) and both the Pre-Licensure and the Post-Licensure Concentration are accredited by the Commission on Collegiate Nursing Education, One Dupont Circle NW, Suite 530, Washington DC 20036 (Tel: 202 887-6791).

Preparation

Students must take eight specific prerequisite courses to be eligible for admission to the Pre-Licensure concentration. The prerequisite courses may be completed at California State University, East Bay or by taking equivalent courses at another college or university. Students who will complete prerequisite courses by the end of Fall semester are eligible to apply for the nursing program with an admission the following Fall semester. Students who will complete prerequisite courses by the end of Spring semester are eligible to apply to the nursing program with an admission the following Spring semester. Students who plan to use transfer courses to satisfy prerequisite requirements must have equivalencies determined by an admissions counselor in the Department of Nursing.

Admission

The Board of Trustees has designated Nursing as an impacted program; therefore a special admission procedure has been instituted to assure that all students have an opportunity to be considered for admission to the Nursing major for Fall semester or Spring semester. General information on the program, admission criteria and application procedures may be obtained from the Department of Nursing. To be considered for admission to the nursing program, students must complete two application forms:

- The "CSU Application for Admission" and
- The "Nursing Supplemental Application"

Both applications must be filed in November for admission in the Fall semester of the following academic year and in August for admission in the Spring semester of the following academic year. Students must also take the "Test of Essential Academic Skills." To be eligible for admission, the student must have a minimum 3.00 GPA and a C or above (C- is not acceptable) in the eight prerequisite courses. The four science prerequisite courses calculated separately must also have a minimum of 3.00 GPA or above. Prerequisite courses are listed below.

Note: Licensed Vocational Nurses, Medical Corps members, other healthcare personnel, and others who have completed prior nursing coursework must seek advisement from the Department of Nursing prior to applying to the program.

Post-Licensure Concentration

The Post-Licensure concentration is open only to students who hold a California license as a Registered Nurse. This program builds on the previous education of the Associate Degree in Nursing to provide students with the theoretical perspectives, concepts and skills required for a Bachelor's Degree in Nursing.

The B.S. in Nursing degree with a Post-Licensure concentration requires 120 semester units, many of which are transferable from the student's Associate Degree nursing program. Units may also be earned through credit by examination, which is given for successful completion of the NCLEX-RN. The Nursing major with a Post-Licensure concentration includes nursing prerequisites, 14 units of core courses and electives, and an additional 23 semester units in the concentration, and can be completed in one year, (2 semesters and summer session).

Eligibility

To be eligible for the Post-Licensure concentration, a student must:

- Have an unencumbered, unrestricted California RN License by time of entry into the program.
- Be a graduate of an ADN program or Diploma Nursing program (within the last twelve months); or have six months or equivalent full-time nursing practice within the United States in the past two years.
- Meet all university admission requirements and nursing program deadlines.
- Meet minimum prerequisite GPA requirements. See website for details.

Admissions

General information on the program, admission criteria and application procedures may be obtained from the Department of Nursing. To be considered for admission, students must complete two application forms:

- The "CSU Application for Admission" and
- The "Nursing Supplemental Application"

Both applications must be filed approximately one year ahead of time. See Nursing website for details.

Concentration Plan of Study

A concentration plan of study for this degree can be found at the department website.

LVN to BSN Information

Students who have completed an LVN program and are licensed as an LVN in California are eligible to apply to the Pre-Licensure B.S. in Nursing Program. LVNs interested in the Pre-Licensure B.S. in Nursing should seek advisement from the Department of Nursing. Information for LVNs can be found on the department website.

Nursing Course Progression Policy

For information on the Nursing Course Progression Policy, please see the online Nursing Student Handbook on the Department of Nursing website. Enrolled Nursing Students are required to review the Nursing Student Handbook including the Nursing Course Progression Policy.

Degree Requirements Unit-Outline

- A baccalaureate of science degree requires a total of 120 units:
- The major requirements and pre-licensure concentration consists of 99* units;
- The major requirements and post-licensure concentration consists of 66* units;

- General Education (GE) & Graduation Requirements (GR) consists of 57 units;
- Free Electives consists of 0 units (*actual number of free elective units may depend on GE/GR units.*)

**Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACCE advisors for information.*

Nursing Major Requirements (66-99 units)

Prerequisite Courses

The following lower-division courses, or their equivalents, are prerequisites (28 units) that are included in major totals for both the Pre-Licensure and Post-Licensure Nursing Concentrations.

Note: To be eligible for admission, students must separately submit a Nursing application by strict deadlines, only available on the Nursing program website. Students must have a minimum 3.00 GPA and a C or above (C- is not acceptable) in the eight required prerequisite courses. The four science prerequisite courses, calculated separately, must also have a minimum of 3.00 GPA or above.

- BIOL 230 - Introduction to Clinical Microbiology Units: 4 ; G.E./G.R. Area: B2, B3
- BIOL 270 - Human Anatomy & Physiology I Units: 4 ; G.E./G.R. Area: B2, B3
- BIOL 271 - Human Anatomy & Physiology II Units: 4
- CHEM 161 - Basic Chemistry for the Health Sciences Units: 4 ; G.E./G.R. Area: B1, B3
- COMM 100 - Public Speaking Units: 3 ; G.E./G.R. Area: A1
- OR COMM 104 - Interpersonal Communication Units: 3 ; G.E./G.R. Area: A1
- ENGL 102 - Accelerated College Writing Units: 3 ; G.E./G.R. Area: A2 OR another GE Area A2 course.
- PHIL 100 - Workshop in Critical Thinking Units: 3 ; G.E./G.R. Area: A3 OR other course in Critical Thinking.
- STAT 100 - Elements of Statistics and Probability Units: 3 ; G.E./G.R. Area: B4

Core Requirements

The following interdisciplinary core courses for 12 units are required for both Pre-Licensure and Post-Licensure concentrations. These courses may also satisfy certain University requirements for graduation. In addition to the B.S. Nursing major requirements, every student must complete the University requirements for graduation which can be found online and elsewhere in this catalog. Students are advised to consult with their general education and major advisors to confirm they have met all of the University and major requirements for graduation.

- HDEV 380 - Lifespan Human Development Units: 3 ; G.E./G.R. Area: D4
- HIST 477 - History and Trends in Nursing Units: 3 ; G.E./G.R. Area: C4
- PSYC 100 - General Psychology Units: 3 ; G.E./G.R. Area: D1-3

And one course from the list below:

- ANTH 100 - Introduction to Anthropology Units: 3 ; G.E./G.R. Area: D1-3
- ANTH 130 - Introduction to Cultural Anthropology Units: 3 ; G.E./G.R. Area: D1-3

- SOC 100 - Introduction to Sociology *Units: 3 ; G.E./G.R. Area: D1-3*

Elective Courses

Additionally a minimum of 2 units of NURS electives chosen from the following are required:

- NURS 301 - Nutrition and Medical Nutrition Therapy *Units: 3*
- NURS 302 - Success in Nursing *Units: 1*
- NURS 492 - Global Health Nursing *Units: 1*
- NURS 493 - Nursing Research in Global Health *Units: 1*
- NURS 494 - Essentials of Critical Care Nursing *Units: 2*
- NURS 495 - Palliative Care in the Community *Units: 2*
- NURS 496 - Introduction to Healthcare Informatics *Units: 1*
- NURS 497 - Current Issues in Professional Nursing *Units: 1*
- NURS 490 - Independent Study *Units: 1-4*

Concentrations

B.S. Nursing students may only apply to one (1) concentration to complete the major. *Note: Students who have an LVN license must take the Pre-Licensure concentration. Students seeking course credit for previous education or experience should contact an advisor in the Nursing Department Office.*

- Nursing, B.S.: Pre-Licensure Concentration (57 units)
- Nursing, B.S.: Post-Licensure Concentration (24 units)

Pre-Licensure Concentration

The following 57 units of upper division NURS prefix coursework is required to complete the Nursing, B.S. Pre-Licensure concentration. The coursework is sequential and must be taken as scheduled in each semester. See the Nursing Roadmap on the department website for further information.

- NURS 310 - Foundations of Professional Nursing *Units: 2*
- NURS 311 - Nursing Interventions I *Units: 1*
- NURS 312 - Health Assessment *Units: 2*
- NURS 313 - Health Assessment Lab *Units: 1*
- NURS 314 - Mental Health and Psychiatric Nursing *Units: 2*
- NURS 315 - Mental Health and Psychiatric Nursing Practice *Units: 2*
- NURS 316 - Clinical Pathophysiology *Units: 3*
- NURS 317 - Community Engagement I *Units: 1*
- NURS 320 - Nursing Care of Adults I *Units: 2*
- NURS 321 - Nursing Interventions II *Units: 1*
- NURS 322 - Aging in Health and Illness *Units: 2*
- NURS 323 - Nursing Care of Adults I Practice *Units: 4*
- NURS 326 - Pharmacology for Nursing Practice *Units: 2*
- NURS 327 - Community Engagement II *Units: 1*

- NURS 410 - Maternity Nursing *Units: 2*
- NURS 411 - Maternal Newborn Nursing Practice *Units: 2*
- NURS 412 - Pediatric Nursing *Units: 2*
- NURS 413 - Pediatric Nursing Practice *Units: 2*
- NURS 414 - Legal Issues in Nursing Practice *Units: 1*
- NURS 415 - Transitions of Care *Units: 1*
- NURS 417 - Community Engagement III *Units: 1*
- NURS 420 - Nursing Care of Adults II *Units: 2*
- NURS 421 - Nursing Care of Adults II Practice *Units: 4*
- NURS 422 - Evidence-Based Practice and Nursing Research *Units: 2*
- NURS 423 - Leadership in Nursing *Units: 2*
- NURS 427 - Community Engagement IV *Units: 1*
- NURS 450 - Community Health Nursing *Units: 2 ; G.E./G.R. Area: Social Justice*
- NURS 451 - Community Health Nursing Practice *Units: 2*
- NURS 452 - Preceptorship Synthesis *Units: 1*
- NURS 453 - Preceptorship Practicum *Units: 4*

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

Master

Nursing, M.S.: Nursing Education Concentration

Nursing, M.S. Program

Program Description

The CSUEB Master of Science in Nursing Program (MSN) seeks to prepare nurses from our diverse, multicultural community to be effective nurse educators, leaders and administrators in clinical, organizational, or academic settings. The curriculum builds and expands upon baccalaureate nursing practice and seeks to prepare nurses with broad knowledge and advanced skills needed for a higher level of nursing practice and leadership. The program allows for a seamless pathway to a practice or research doctoral education for those interested in a doctoral degree. The program provides graduate nursing education in an accessible and flexible delivery approach of online, hybrid and on-ground courses. The program is designed to be completed in 4 semesters.

The MSN Program provides two practice concentrations:

- Nursing Education
- Nursing Leadership and Administration.

Program Learning Outcomes:

Upon completion of the Master of Science in Nursing program, graduates will be able to:

- Integrate theoretical and scientific knowledge of ethical/legal principles, advanced nursing practice and clinical excellence in professional practice as well as role development in clinical, organizational and academic settings.
- Lead change to improve quality outcomes and demonstrate effective leadership in advanced practice roles in nursing our diverse, multicultural community.
- Critically analyze evidence in the advanced practice of nursing and in the planning, delivery and evaluation of quality care in clinical, organizational and academic settings.
- Integrate healthcare technologies to facilitate interprofessional collaboration that improves clinical practice, education and organizational management.
- Design culturally inclusive, ethical, and innovative nursing care practices and systems in clinical prevention and population care for individuals, families, and communities across the healthcare system.
- Develop and cultivate interprofessional partnerships that foster a culture of lifelong learning and professional development to advance excellence in nursing practice.

Career Opportunities

Graduates of the M.S. in Nursing program will be prepared to work in clinical, organizational, and academic work settings. Graduates of the Nursing Education concentration will be well equipped to work as clinical education leaders in practice settings or as educators in academic nursing programs. Graduates of the Leadership and Management concentration will be prepared for mid-level administration and leadership positions in clinical practice settings.

The workforce demands and employment opportunities are projected to be exceptionally strong for nurse educators and nurse administrators nationally as well as in California. As the workforce demands for Registered Nurses increases, the need for nurse educators with MSN degrees to serve as faculty and clinical instructors will increase. Expansion of the Registered Nurse workforce needs will require an increase in nurse administrators and leaders for supervision in the workplace. Labor reports predict a "much faster than average" growth rate for both nurse educators and healthcare manager positions.

Admission Criteria

The M.S. in Nursing degree program is open to applicants who have a baccalaureate degree in Nursing from an accredited institution and are licensed or eligible for licensure as a Registered Nurse in California. Admission will be granted based upon the Admission Committee's overall assessment of the student's qualifications and academic/career potential, using the following criteria:

- Cumulative undergraduate GPA of at least 3.0
- At least 1 year of RN experience preferred.
- Two letters recommendation (on letterhead), 1 academic and 1 professional indicating the applicant's potential for success in graduate education and a nursing leadership role.
- Goal Statement - A two page essay should be submitted to the Nursing Department indicating the applicant's career interests and goals, their purpose for seeking this advanced degree, and why they will be successful in this program.
- Interview - To be arranged following receipt of the application.
- All undergraduate/graduate transcripts must be sent to University Admissions.
- STAT 100 Elements of Statistics and Probability, or its equivalent, must be completed as a foundation course with a grade of "B" or better prior to enrolling in the MS of Nursing program.

All applicants must submit an online graduate admission application for the Master of Science Degree in Nursing Program at <http://www.calstate.edu/apply> along with a non-refundable application fee. In addition, applicants must also submit a resume, two letters of reference and the application essay directly to the Department of Nursing, Master of Science of Nursing Program, 25800 Carlos Bee Blvd., SF 502, Hayward, CA 94542-3040.

Please review the detailed application instructions on the Department's website at <http://www.csueastbay.edu/csci/departments/nursing/>

Major Requirements

The M.S. in Nursing program requires completion of 33 semester units consisting of required core courses, concentration specific courses, a practicum experience and the Masters Synthesis Project. Generally, all units must be taken at CSUEB. Transfer credits are rarely accepted in the MS in Nursing Program.

Students will complete a Masters Synthesis Project in their selected area of interest. This culminating project will address a significant nursing practice/education issue to make change and improve practice

demonstrating advanced professional practice, and comprehensive knowledge integration and mastery in Nursing Education or Nursing Leadership.

A cumulative grade point average of 3.0 must be maintained in all 33 semester units taken to satisfy the degree requirements. Students who fail to maintain progress by falling below a 3.0 GPA in their graduate courses for two consecutive semesters will be academically disqualified from the university. The program mandates that the degree must be completed within four years.

Students accumulating more than six units of work graded "I" may not register for courses applicable to the degree until the "I" grades are removed.

Cause for Dismissal from Program

Students may be dismissed from the program at any time "for cause." "For cause" includes, but is not limited to, poor academic or fieldwork performance or academic dishonesty, as well as behavior that is destructive to students or faculty, and/or interferes with the educational environment, and/or represents a threat to potential clients. "For cause" also includes student behaviors that are inconsistent with the legal, ethical, and/or personal responsibilities of professional social workers.

Nursing Degree Requirements (32-33 units)

Core Requirements

The following 18 units of core coursework is required:

- NURS 601 - Theoretical Perspectives of Advanced Nursing Practice *Units: 3*
- NURS 602 - Scientific Inquiry, Methods and Scholarship *Units: 3*
- NURS 603 - Health Care Informatics *Units: 3*
- NURS 604 - Epidemiology of Population Health and Social Disparities *Units: 3*
- NURS 605 - Contemporary Issues in Healthcare Economic and Social Policy *Units: 3*
- NURS 693 - Master's Synthesis Project *Units: 3*

Concentrations

Students must choose one (1) of the following concentrations to complete their major degree:

- Nursing, M.S.: Nursing Education Concentration
- Nursing, M.S.: Nursing Leadership and Administration Concentration

Nursing, M.S.: Nursing Education Concentration

The Nursing Education concentration is designed to prepare graduates as nursing educators for academic faculty or clinical educator roles. The curriculum includes five core courses in advanced nursing knowledge, knowledge synthesis, population health, health informatics, and healthcare policy. In addition to the core curriculum, the nursing education concentration includes five courses in theories of teaching learning, curriculum design and development, instructional teaching methodologies and technologies, and education needs assessment and evaluation. As nursing educators must be proficient in

nursing practice, the nursing education concentration builds on baccalaureate knowledge with graduate level course work in health assessment, physiology/pathophysiology, and pharmacology to enhance the nurse educator's expertise in nursing knowledge and skills. Masters students enrolled in the Nursing Education concentration will have the opportunity to build expertise in a practice area and integrate this knowledge of nursing into practice in the required teaching practicum course.

Students will complete a Masters Synthesis Project in their selected area of interest. This culminating project will address a significant nursing practice/education issue to make change and improve practice demonstrating advanced professional practice, and comprehensive knowledge integration and mastery in the concentration of Nursing Education.

Requirements

The following 14 units of Nursing coursework is required for the concentration:

- NURS 611 - Learner-Centered Theory and Methods in Nursing Education *Units: 2*
- NURS 612 - Advanced Pathophysiology, Pharmacology & Health Assessment *Units: 4*
- NURS 613 - Curriculum Design and Outcomes in Nursing *Units: 3*
- NURS 614 - Instructional Strategies and Educational Technology in Nursing *Units: 3*
- NURS 615 - Instructional Practicum: Teaching and Clinical Specialty Practices *Units: 3*

Other Graduate & Post-Baccalaureate Degree Requirements

In addition to departmental requirements, every student must also satisfy the University requirements for graduation as described throughout this catalog. These include the 70% unit residence requirement; the five-year rule on currency of subject matter; the minimum number of units in 600-level courses; the "C" minimum grade for each graduate course; the 3.00 cumulative grade point average; and the University Writing Skills Requirement.

Note: For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call (510) 885-3661.

Nursing, M.S.: Nursing Leadership and Administration Concentration

Nursing, M.S. Program

Program Description

The CSUEB Master of Science in Nursing Program (MSN) seeks to prepare nurses from our diverse, multicultural community to be effective nurse educators, leaders and administrators in clinical, organizational, or academic settings. The curriculum builds and expands upon baccalaureate nursing practice and seeks to prepare nurses with broad knowledge and advanced skills needed for a higher level of nursing practice and leadership. The program allows for a seamless pathway to a practice or research doctoral education for those interested in a doctoral degree. The program provides graduate nursing education in an accessible and flexible delivery approach of online, hybrid and on-ground courses. The program is designed to be completed in 4 semesters.

The MSN Program provides two practice concentrations:

- Nursing Education
- Nursing Leadership and Administration.

Program Learning Outcomes:

Upon completion of the Master of Science in Nursing program, graduates will be able to:

- Integrate theoretical and scientific knowledge of ethical/legal principles, advanced nursing practice and clinical excellence in professional practice as well as role development in clinical, organizational and academic settings.
- Lead change to improve quality outcomes and demonstrate effective leadership in advanced practice roles in nursing our diverse, multicultural community.
- Critically analyze evidence in the advanced practice of nursing and in the planning, delivery and evaluation of quality care in clinical, organizational and academic settings.
- Integrate healthcare technologies to facilitate interprofessional collaboration that improves clinical practice, education and organizational management.

- Design culturally inclusive, ethical, and innovative nursing care practices and systems in clinical prevention and population care for individuals, families, and communities across the healthcare system.
- Develop and cultivate interprofessional partnerships that foster a culture of lifelong learning and professional development to advance excellence in nursing practice.

Career Opportunities

Graduates of the M.S. in Nursing program will be prepared to work in clinical, organizational, and academic work settings. Graduates of the Nursing Education concentration will be well equipped to work as clinical education leaders in practice settings or as educators in academic nursing programs. Graduates of the Leadership and Management concentration will be prepared for mid-level administration and leadership positions in clinical practice settings.

The workforce demands and employment opportunities are projected to be exceptionally strong for nurse educators and nurse administrators nationally as well as in California. As the workforce demands for Registered Nurses increases, the need for nurse educators with MSN degrees to serve as faculty and clinical instructors will increase. Expansion of the Registered Nurse workforce needs will require an increase in nurse administrators and leaders for supervision in the workplace. Labor reports predict a "much faster than average" growth rate for both nurse educators and healthcare manager positions.

Admission Criteria

The M.S. in Nursing degree program is open to applicants who have a baccalaureate degree in Nursing from an accredited institution and are licensed or eligible for licensure as a Registered Nurse in California. Admission will be granted based upon the Admission Committee's overall assessment of the student's qualifications and academic/career potential, using the following criteria:

- Cumulative undergraduate GPA of at least 3.0
- At least 1 year of RN experience preferred.
- Two letters recommendation (on letterhead), 1 academic and 1 professional indicating the applicant's potential for success in graduate education and a nursing leadership role.
- Goal Statement - A two page essay should be submitted to the Nursing Department indicating the applicant's career interests and goals, their purpose for seeking this advanced degree, and why they will be successful in this program.
- Interview - To be arranged following receipt of the application.
- All undergraduate/graduate transcripts must be sent to University Admissions.
- STAT 100 Elements of Statistics and Probability, or its equivalent, must be completed as a foundation course with a grade of "B" or better prior to enrolling in the MS of Nursing program.

All applicants must submit an online graduate admission application for the Master of Science Degree in Nursing Program at <http://www.calstate.edu/apply> along with a non-refundable application fee. In addition, applicants must also submit a resume, two letters of reference and the application essay directly to the Department of Nursing, Master of Science of Nursing Program, 25800 Carlos Bee Blvd., SF 502, Hayward, CA 94542-3040.

Please review the detailed application instructions on the Department's website at <http://www.csueastbay.edu/csci/departments/nursing/>

Major Requirements

The M.S. in Nursing program requires completion of 33 semester units consisting of required core courses, concentration specific courses, a practicum experience and the Masters Synthesis Project. Generally, all units must be taken at CSUEB. Transfer credits are rarely accepted in the MS in Nursing Program.

Students will complete a Masters Synthesis Project in their selected area of interest. This culminating project will address a significant nursing practice/education issue to make change and improve practice demonstrating advanced professional practice, and comprehensive knowledge integration and mastery in Nursing Education or Nursing Leadership.

A cumulative grade point average of 3.0 must be maintained in all 33 semester units taken to satisfy the degree requirements. Students who fail to maintain progress by falling below a 3.0 GPA in their graduate courses for two consecutive semesters will be academically disqualified from the university. The program mandates that the degree must be completed within four years.

Students accumulating more than six units of work graded "I" may not register for courses applicable to the degree until the "I" grades are removed.

Cause for Dismissal from Program

Students may be dismissed from the program at any time "for cause." "For cause" includes, but is not limited to, poor academic or fieldwork performance or academic dishonesty, as well as behavior that is destructive to students or faculty, and/or interferes with the educational environment, and/or represents a threat to potential clients. "For cause" also includes student behaviors that are inconsistent with the legal, ethical, and/or personal responsibilities of professional social workers.

Nursing Degree Requirements (32-33 units)

Core Requirements

The following 18 units of core coursework is required:

- NURS 601 - Theoretical Perspectives of Advanced Nursing Practice *Units: 3*
- NURS 602 - Scientific Inquiry, Methods and Scholarship *Units: 3*
- NURS 603 - Health Care Informatics *Units: 3*
- NURS 604 - Epidemiology of Population Health and Social Disparities *Units: 3*
- NURS 605 - Contemporary Issues in Healthcare Economic and Social Policy *Units: 3*
- NURS 693 - Master's Synthesis Project *Units: 3*

Concentrations

Students must choose one (1) of the following concentrations to complete their major degree:

- Nursing, M.S.: Nursing Education Concentration
- Nursing, M.S.: Nursing Leadership and Administration Concentration

Nursing Leadership and Administration Concentration

The Nursing Leadership and Administration concentration is designed to prepare aspiring nurse leaders for advancement to leadership and management roles in clinical practice and healthcare organizational settings. The curriculum includes five core courses in advanced nursing knowledge, knowledge synthesis, population health, health informatics, and healthcare policy. In addition to the core curriculum, the nursing leadership and administration concentration includes five courses with coursework including content such as organizational systems, financial management, human resource management, leadership role development, change management, and quality improvement for healthcare outcomes. Masters students enrolled in the Nursing Leadership and Administration concentration will have opportunity to integrate this knowledge of nursing leadership and administration into practice in the required Leadership Practicum in a nurse administrative role in an organizational setting.

Requirements

The following 15 units of Nursing coursework is required for the concentration:

- NURS 621 - Principles and Practices of Quality Patient Care *Units: 3*
- NURS 622 - Leadership Influence and Change *Units: 3*
- NURS 623 - Organizational Systems and Finance Management in Health Care *Units: 3*
- NURS 624 - Human Resources Management for Health Care *Units: 3*
- NURS 625 - Leadership Practicum: Nurse Administrative Role in Organization Setting *Units: 3*

Other Graduate & Post-Baccalaureate Degree Requirements

In addition to departmental requirements, every student must also satisfy the University requirements for graduation as described throughout this catalog. These include the 70% unit residence requirement; the five-year rule on currency of subject matter; the minimum number of units in 600-level courses; the "C" minimum grade for each graduate course; the 3.00 cumulative grade point average; and the University Writing Skills Requirement.

Note: For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call (510) 885-3661.

Assistant Professor

Craig Derksen, Ph.D. University of Maryland

Department Statement

The Philosophy and Religious Studies Department at California State University, East Bay seeks to promote the exploration of enduring human concerns - concerns, for example, about the nature of knowledge, ethics, truth, and God. In addition to emphasizing classical philosophy, the department encourages students to think critically about contemporary debates, particularly in the areas of law, human rights and social justice; science, technology, and values; and religion. We strive to instill in our students lifelong habits of questioning, of exploring views contrary to their own, and of engaging in reasoned and honest dialogue. By our focus on analysis, comprehension and communication, we aim to develop qualities that are essential to personal fulfillment, civic responsibility, and career success.

Bachelor

Philosophy, B.A.: Philosophy Concentration

Philosophy, B.A. Program (120 units)

Program Description

The Department of Philosophy at Cal State East Bay seeks to promote the exploration of enduring human concerns - concerns, for example, about the nature of knowledge, ethics, truth, and God. In addition to emphasizing classical philosophy, the department encourages students to think critically about contemporary debates, particularly in the areas of law, human rights, and social justice; science, technology, and values; and religion. The department's faculty strive to instill in students lifelong habits of questioning, of exploring views contrary to their own, and of engaging in reasoned and honest dialogue. By their focus on analysis, comprehension and communication, they aim to develop qualities that are essential to personal fulfillment, civic responsibility, and career success.

Many different kinds of students choose the major in philosophy. Some intend to do graduate work in philosophy, often with the intention of becoming philosophy professors who research and teach in philosophy. Others take philosophy as a preparation for another professional area. Traditionally, for example, philosophy has been one of the chief roads to professional law schools. Philosophy also serves as a good general liberal arts education, since many of the long-established university disciplines are founded on philosophical principles: political science, sociology, education, aesthetics, physics, and other subjects. Finally, many students major in philosophy in order to prepare for careers that require clarity of thought, analytical ability, good writing skills, and the ability to present a reasoned argument.

Program Learning Outcomes

Students graduating with a B.A. in Philosophy from Cal State East Bay will able to:

- write clear, academically rigorous, argumentative essays.
- read complex texts, create original arguments, analyze the arguments of others, and express these criticisms orally and in writing.
- demonstrate knowledge of philosophical and/or religious traditions, their relevant concepts, theories, methods, and historical contexts.

- develop their capacities for ethical decision making, Socratic humility, openness to the ideas of others, reflective self-awareness, and a life-long curiosity about big questions.
- cultivate an appreciation for a diversity of ideas and values across time and for human difference in areas such as: religion, culture, ethnicity, race, class, sexuality, and gender.

Career Opportunities

Analyst • Business Executive • Clergy • Consultant • Critic • Editor • Foreign Service Officer • Journalist • Lawyer • Philosopher • Policy Analyst • Primary/Secondary School Teacher • Professor • Public Administrator • Theologian • Writer

Degree Requirements Unit-Outline

- A baccalaureate of arts degree requires a total of 120 units;
 - The major requirements consists of 45 units;
 - General Education (GE) & Graduation Requirements (GR) consists of 57 units;
 - Free Electives may consist of 18 units (*actual number of free elective units may depend on GE/GR units*).
- Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.*

Philosophy Major Requirements (45 units)

Core Coursework

Students must take the following six (6) courses for 18 units:

- PHIL 300 - Reasoning and Writing for Philosophy Majors *Units: 3*
- PHIL 310 - Ethics *Units: 3 ; G.E./G.R. Area: C4; Social Justice*
- PHIL 330 - Epistemology: Knowing and Not Knowing *Units: 3 ; G.E./G.R. Area: C4*
- PHIL 331 - Metaphysics: Being and Not Being *Units: 3 ; G.E./G.R. Area: C4*
- PHIL 361 - Ancient and Medieval Philosophy *Units: 3 ; G.E./G.R. Area: C4*
- PHIL 362 - Modern Philosophy *Units: 3 ; G.E./G.R. Area: C4*

In addition, students must choose one (1) course for 3 units from the following:

- PHIL 340 - Philosophy of Religion *Units: 3 ; G.E./G.R. Area: C4*
- PHIL 341 - Abrahamic Religions *Units: 3 ; G.E./G.R. Area: C4*
- PHIL 342 - Religions of Asia *Units: 3 ; G.E./G.R. Area: C4*

Concentrations

Students must choose one (1) concentration for 21 units below as part of the major requirements:

- Philosophy, B.A.: Philosophy Concentration
- Philosophy, B.A.: Religious Studies Concentration

Capstone Requirement

Students must complete the following capstone experience for 3 units to complete the major:

- PHIL 499 - Senior Seminar *Units: 3*

Philosophy Concentration

Students must take one (1) of the following courses for 3 units:

- PHIL 353 - Human Rights in the U.S. *Units: 3 ; G.E./G.R. Area: C4; Diversity*
- PHIL 354 - Global Human Rights and Social Justice *Units: 3 ; G.E./G.R. Area: C4; Social Justice*
- PHIL 355 - Race and Justice *Units: 3 ; G.E./G.R. Area: C4; Diversity*
- PHIL 373 - African-American Philosophical Perspectives *Units: 3 ; G.E./G.R. Area: C4; Diversity*
- PHIL 375 - Feminist Philosophy *Units: 3 ; G.E./G.R. Area: C4; Social Justice*

• Plus, students must choose an additional 18 units of any other PHIL courses to meet the major requirements. No more than 3 units of lower-division may be applied towards the major.

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

- • PHIL 361 - Ancient and Medieval Philosophy *Units: 3 ; G.E./G.R. Area: C4*
- • PHIL 362 - Modern Philosophy *Units: 3 ; G.E./G.R. Area: C4*
- • PHIL 365 - Existentialism *Units: 3 ; G.E./G.R. Area: C4*
- • PHIL 371 - Philosophy of Education *Units: 3 ; G.E./G.R. Area: C4*
- • PHIL 373 - African-American Philosophical Perspectives *Units: 3 ; G.E./G.R. Area: C4; Diversity*
- • PHIL 375 - Feminist Philosophy *Units: 3 ; G.E./G.R. Area: C4; Social Justice*
- • PHIL 377 - Philosophy of Law *Units: 3 ; G.E./G.R. Area: C4; Social Justice*
- • PHIL 378 - Evil *Units: 3 ; G.E./G.R. Area: C4*
- • PHIL 381 - Shamanism *Units: 3 ; G.E./G.R. Area: C4*
- • PHIL 490 - Independent Study *Units: 3*
- • PHIL 497 - Issues in Philosophy or Religion *Units: 3*
- • PHIL 499 - Senior Seminar *Units: 3*

Philosophy, B.A.: Religious Studies Concentration

Philosophy, B.A. Program (120 units)

Program Description

The Department of Philosophy at Cal State East Bay seeks to promote the exploration of enduring human concerns - concerns, for example, about the nature of knowledge, ethics, truth, and God. In addition to emphasizing classical philosophy, the department encourages students to think critically about contemporary debates, particularly in the areas of law, human rights, and social justice; science, technology, and values; and religion. The department's faculty strive to instill in students lifelong habits of questioning, of exploring views contrary to their own, and of engaging in reasoned and honest dialogue. By their focus on analysis, comprehension and communication, they aim to develop qualities that are essential to personal fulfillment, civic responsibility, and career success.

Many different kinds of students choose the major in philosophy. Some intend to do graduate work in philosophy, often with the intention of becoming philosophy professors who research and teach in philosophy. Others take philosophy as a preparation for another professional area. Traditionally, for example, philosophy has been one of the chief roads to professional law schools. Philosophy also serves as a good general liberal arts education, since many of the long-established university disciplines are founded on philosophical principles: political science, sociology, education, aesthetics, physics, and other subjects. Finally, many students major in philosophy in order to prepare for careers that require clarity of thought, analytical ability, good writing skills, and the ability to present a reasoned argument.

Program Learning Outcomes

Students graduating with a B.A. in Philosophy from Cal State East Bay will be able to:

- write clear, academically rigorous, argumentative essays.
- read complex texts, create original arguments, analyze the arguments of others, and express these criticisms orally and in writing.
- demonstrate knowledge of philosophical and/or religious traditions, their relevant concepts, theories, methods, and historical contexts.
- develop their capacities for ethical decision making, Socratic humility, openness to the ideas of others, reflective self-awareness, and a life-long curiosity about big questions.
- cultivate an appreciation for a diversity of ideas and values across time and for human difference in areas such as: religion, culture, ethnicity, race, class, sexuality, and gender.

Career Opportunities

Analyst • Business Executive • Clergy • Consultant • Critic • Editor • Foreign Service Officer • Journalist • Lawyer • Philosopher • Policy Analyst • Primary/Secondary School Teacher • Professor • Public Administrator • Theologian • Writer

Degree Requirements Unit-Outline

- A baccalaureate of arts degree requires a total of 120 units;
- The major requirements consists of 45 units;
- General Education (GE) & Graduation Requirements (GR) consists of 57 units;
- Free Electives may consist of 18 units (*actual number of free elective units may depend on GE/GR units*).

Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.

Philosophy Major Requirements (45 units)

Core Coursework

Students must take the following six (6) courses for 18 units:

- PHIL 300 - Reasoning and Writing for Philosophy Majors *Units: 3*
- PHIL 310 - Ethics *Units: 3 ; G.E./G.R. Area: C4; Social Justice*
- PHIL 330 - Epistemology: Knowing and Not Knowing *Units: 3 ; G.E./G.R. Area: C4*
- PHIL 331 - Metaphysics: Being and Not Being *Units: 3 ; G.E./G.R. Area: C4*
- PHIL 361 - Ancient and Medieval Philosophy *Units: 3 ; G.E./G.R. Area: C4*
- PHIL 362 - Modern Philosophy *Units: 3 ; G.E./G.R. Area: C4*

In addition, students must choose one (1) course for 3 units from the following:

- PHIL 340 - Philosophy of Religion *Units: 3 ; G.E./G.R. Area: C4*
- PHIL 341 - Abrahamic Religions *Units: 3 ; G.E./G.R. Area: C4*
- PHIL 342 - Religions of Asia *Units: 3 ; G.E./G.R. Area: C4*

Concentrations

Students must choose one (1) concentration for 21 units below as part of the major requirements:

- Philosophy, B.A.: Philosophy Concentration
- Philosophy, B.A.: Religious Studies Concentration

Capstone Requirement

Students must complete the following capstone experience for 3 units to complete the major:

- PHIL 499 - Senior Seminar *Units: 3*

Religious Studies Concentration

The Religious Studies concentration is 21 units.

*Note: *Only a maximum of 3 units of lower-division can be counted towards fulfillment of the requirements for the major.*

Students must take two (2) of the following courses for 6 units:

- * PHIL 241 - Introduction to Judaism, Christianity, and Islam *Units: 3 ; G.E./G.R. Area: C2*
- * PHIL 242 - Introduction to Asian Religion *Units: 3 ; G.E./G.R. Area: C2*
- PHIL 340 - Philosophy of Religion *Units: 3 ; G.E./G.R. Area: C4*
- PHIL 341 - Abrahamic Religions *Units: 3 ; G.E./G.R. Area: C4*
- PHIL 342 - Religions of Asia *Units: 3 ; G.E./G.R. Area: C4*

Students must take a minimum of 15 units of electives from the list below. Only two (2) courses may be taken from outside of the department:

- ANTH 331 - Folklore *Units: 3 ; G.E./G.R. Area: D4*
- ENGL 430 - Bible as Literature *Units: 4*
- ES 307 - God is Red: American Indian Worldview *Units: 3 ; G.E./G.R. Area: C4; Sustainability*
- HIST 335 - Rome and Christianity *Units: 3 ; G.E./G.R. Area: C4*
- HIST 361 - Traditional India *Units: 3*
- HIST 363 - The Middle East and the Rise of Islamic Societies *Units: 3 ; G.E./G.R. Area: C4*
- HIST 375 - Religion and Diversity in America *Units: 3 ; G.E./G.R. Area: C4*
- PHIL 337 - Science and Religion *Units: 3 ; G.E./G.R. Area: C4*
- PHIL 338 - Atheism, Agnosticism, and Theism *Units: 3 ; G.E./G.R. Area: C4*
- PHIL 343 - Contemporary Religious Thinkers *Units: 3 ; G.E./G.R. Area: C4*
- PHIL 344 - Mysticism *Units: 3 ; G.E./G.R. Area: C4*
- PHIL 345 - Comparative Religion *Units: 3 ; G.E./G.R. Area: C4*
- PHIL 346 - Cults and New Religious Movements *Units: 3 ; G.E./G.R. Area: C4; Diversity*
- PHIL 347 - Religion, Monsters, and Horror *Units: 3 ; G.E./G.R. Area: C4*
- PHIL 348 - Views of the Afterlife *Units: 3 ; G.E./G.R. Area: C4*
- PHIL 349 - Africana Philosophy and Religions *Units: 3 ; G.E./G.R. Area: C4*
- PHIL 365 - Existentialism *Units: 3 ; G.E./G.R. Area: C4*
- PHIL 490 - Independent Study *Units: 3*
- PHIL 497 - Issues in Philosophy or Religion *Units: 3*

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

Courses

Philosophy

- • PHIL 100 - Workshop in Critical Thinking *Units: 3 ; G.E./G.R. Area: A3*
- • PHIL 110 - Freshman Topics in Philosophy and the Arts *Units: 3 ; G.E./G.R. Area: C1*

- • PHIL 120 - Freshman Topics in Philosophy *Units: 3 ; G.E./G.R. Area: C2*
- • PHIL 130 - Freshman Topics in Philosophy, Religion, and Social Science *Units: 3 ; G.E./G.R. Area: D1-3*
- • PHIL 201 - Introduction to Philosophy *Units: 3 ; G.E./G.R. Area: C2*
- • PHIL 211 - Introduction to Ethics *Units: 3 ; G.E./G.R. Area: C2*
- • PHIL 241 - Introduction to Judaism, Christianity, and Islam *Units: 3 ; G.E./G.R. Area: C2*
- • PHIL 242 - Introduction to Asian Religion *Units: 3 ; G.E./G.R. Area: C2*
- • PHIL 300 - Reasoning and Writing for Philosophy Majors *Units: 3*
- • PHIL 301 - Modern Logic *Units: 3 ; G.E./G.R. Area: C4*
- • PHIL 310 - Ethics *Units: 3 ; G.E./G.R. Area: C4; Social Justice*
- • PHIL 311 - Environmental Ethics *Units: 3 ; G.E./G.R. Area: C4; Sustainability*
- • PHIL 312 - Bioethics *Units: 3 ; G.E./G.R. Area: C4; Social Justice*
- • PHIL 313 - Philosophy of Business and Professional Ethics *Units: 3 ; G.E./G.R. Area: C4*
- • PHIL 320 - Philosophy of Art *Units: 3 ; G.E./G.R. Area: C4; Diversity*
- • PHIL 321 - Philosophy and Science Fiction *Units: 3 ; G.E./G.R. Area: C4; Social Justice*
- • PHIL 324 - Philosophy and Sex *Units: 3 ; G.E./G.R. Area: C4; Diversity*
- • PHIL 330 - Epistemology: Knowing and Not Knowing *Units: 3 ; G.E./G.R. Area: C4*
- • PHIL 331 - Metaphysics: Being and Not Being *Units: 3 ; G.E./G.R. Area: C4*
- • PHIL 332 - Philosophy of Social Science *Units: 3 ; G.E./G.R. Area: C4*
- • PHIL 333 - Philosophy of Language *Units: 3 ; G.E./G.R. Area: C4*
- • PHIL 335 - Philosophy of Science *Units: 3 ; G.E./G.R. Area: C4*
- • PHIL 336 - Philosophy of Cognition and Artificial Intelligence *Units: 3 ; G.E./G.R. Area: C4*
- • PHIL 337 - Science and Religion *Units: 3 ; G.E./G.R. Area: C4*
- • PHIL 338 - Atheism, Agnosticism, and Theism *Units: 3 ; G.E./G.R. Area: C4*
- • PHIL 340 - Philosophy of Religion *Units: 3 ; G.E./G.R. Area: C4*
- • PHIL 341 - Abrahamic Religions *Units: 3 ; G.E./G.R. Area: C4*
- • PHIL 342 - Religions of Asia *Units: 3 ; G.E./G.R. Area: C4*
- • PHIL 343 - Contemporary Religious Thinkers *Units: 3 ; G.E./G.R. Area: C4*
- • PHIL 344 - Mysticism *Units: 3 ; G.E./G.R. Area: C4*
- • PHIL 345 - Comparative Religion *Units: 3 ; G.E./G.R. Area: C4*
- • PHIL 346 - Cults and New Religious Movements *Units: 3 ; G.E./G.R. Area: C4; Diversity*
- • PHIL 347 - Religion, Monsters, and Horror *Units: 3 ; G.E./G.R. Area: C4*
- • PHIL 348 - Views of the Afterlife *Units: 3 ; G.E./G.R. Area: C4*
- • PHIL 349 - Africana Philosophy and Religions *Units: 3 ; G.E./G.R. Area: C4*
- • PHIL 351 - Social and Political Philosophy *Units: 3 ; G.E./G.R. Area: C4; Social Justice*
- • PHIL 353 - Human Rights in the U.S. *Units: 3 ; G.E./G.R. Area: C4; Diversity*
- • PHIL 354 - Global Human Rights and Social Justice *Units: 3 ; G.E./G.R. Area: C4; Social Justice*
- • PHIL 355 - Race and Justice *Units: 3 ; G.E./G.R. Area: C4; Diversity*
- • PHIL 361 - Ancient and Medieval Philosophy *Units: 3 ; G.E./G.R. Area: C4*
- • PHIL 362 - Modern Philosophy *Units: 3 ; G.E./G.R. Area: C4*
- • PHIL 365 - Existentialism *Units: 3 ; G.E./G.R. Area: C4*
- • PHIL 371 - Philosophy of Education *Units: 3 ; G.E./G.R. Area: C4*
- • PHIL 373 - African-American Philosophical Perspectives *Units: 3 ; G.E./G.R. Area: C4; Diversity*
- • PHIL 375 - Feminist Philosophy *Units: 3 ; G.E./G.R. Area: C4; Social Justice*
- • PHIL 377 - Philosophy of Law *Units: 3 ; G.E./G.R. Area: C4; Social Justice*
- • PHIL 378 - Evil *Units: 3 ; G.E./G.R. Area: C4*
- • PHIL 381 - Shamanism *Units: 3 ; G.E./G.R. Area: C4*
- • PHIL 490 - Independent Study *Units: 3*

- • PHIL 497 - Issues in Philosophy or Religion *Units: 3*
- • PHIL 499 - Senior Seminar *Units: 3*

Minor

Philosophy Minor

The minor in Philosophy is 21 units.

Core Requirements

Students must take six (6) units from the following:

- PHIL 310 - Ethics *Units: 3 ; G.E./G.R. Area: C4; Social Justice*
- PHIL 362 - Modern Philosophy *Units: 3 ; G.E./G.R. Area: C4*
- PHIL 330 - Epistemology: Knowing and Not Knowing *Units: 3 ; G.E./G.R. Area: C4*
- PHIL 331 - Metaphysics: Being and Not Being *Units: 3 ; G.E./G.R. Area: C4*
- PHIL 361 - Ancient and Medieval Philosophy *Units: 3 ; G.E./G.R. Area: C4*

Elective Requirements

Students must take five (5) additional courses from any Philosophy coursework for 15 units.

Department of Physics

The Department Office is located on the 2nd Floor of the North Science (SC-N) building, Room 231

Open 8:00 a.m. - 4:30 p.m., Monday - Friday.

Faculty

Professors

Derek Kimball, Ph.D. University of California, Berkeley

Jason Singley, Ph.D. University of California, San Diego

Associate Professor

Erik Helgren (Chair), Ph.D. University of California, Los Angeles

Assistant Professors

Amy Furniss, Ph.D. University of California, Santa Cruz

Kathryn Grimm, Ph.D. State University of New York, Stony Brook

Ryan Smith, Ph.D. University of Colorado, Boulder

Department Statement

Physics is crucial to understanding the world around us, the world inside us, and the world beyond us. It is the most basic and fundamental science. Physics challenges our imaginations with concepts like relativity and string theory, and it leads to great discoveries, like computers and lasers, that change our lives. In Physics, one attempts to discover, formulate, explain, and apply the basic laws of nature. Topics of study in Physics are as diverse as astrophysics, relativity, properties of materials, or the standard model of fundamental particles and interactions. Principles of Physics provide the foundation for other sciences as well as engineering.

At CSUEB students can choose between a Physics, B.S. degree and a Physics, B.A. degree.

The B.S. degree offers a comprehensive curriculum with a hands-on philosophy to learning that includes numerous laboratory courses and a strong emphasis on undergraduate research with faculty. The Physics, B.S. degree major program is designed to give students an in-depth and focused understanding of the fundamentals of physics including concepts of classical mechanics, wave motion and sound, electromagnetism and optics, heat and thermodynamics, relativity, quantum mechanics, and elementary particles and their interactions. The program prepares students for graduate school in Physics and is also an excellent foundation for other professional schools. The Physics B.S. program also prepares students for careers in basic research, defense industry, clean energy, science education, and all technology-related sectors.

The B.A. degree also provides hands-on learning with lab-based coursework but requires fewer courses, and as such the B.A. program can be finished in an accelerated timeframe. The B.A. program still provides enough experience and breadth of study so that students are well prepared for careers in basic research, defense industry, clean energy, science education, and all technology-related sectors.

Physics Major Learning Objectives

Students graduating with a Physics, B.S. or Physics, B.A. degree will be able to:

- Understand the fundamental principles of physics and be able to apply these core ideas to analyze physical processes;
- Apply quantitative reasoning and critical thinking to solve complex problems, both theoretical and experimental in nature;
- Independently learn new technical subjects and skills;
- Design, construct, assess, and troubleshoot experiments, quantitatively analyze the results using appropriate statistical procedures and tests of systematic errors, and draw meaningful conclusions;
- Effectively communicate scientific ideas, both theoretical and experimental, to diverse audiences through written and oral presentations, both formal and informal;
- Work professionally, effectively, and inclusively as a member of diverse collaborations to solve problems.

The Physics department also offers a minor in Physics and, new as of Fall 2018, a minor in Astronomy!

Bachelor

Physics, B.A.

Physics, B.A. Program (120 units)

Program Description

In Physics, one attempts to discover, formulate, explain, and apply the basic laws of nature. Physicists work in areas as diverse as astrophysics, relativity, properties of materials, or the standard model of fundamental particles and interactions. The Principles of Physics provide the foundation for other sciences as well as engineering. Some of the examples of modern technological development from the application of physical principles include radio and television, computers, laser scanners, and communication by fiber optics. In addition, physicists explore problems in astronomy and theories for the origin and evolution of the universe.

At Cal State East Bay students can choose between a Bachelor of Science (B.S) degree and a Bachelor of Arts (B.A.) degree with a major in Physics. The B.S. degree major program is designed to give students an understanding of the fundamentals of physics including concepts of atomic and nuclear physics,

classical mechanics, wave motion and sound, electromagnetism and optics, heat and thermodynamics, relativity, quantum mechanics, and elementary particles and their interactions.

Whereas the B.S. degree provides more focus, the B.A. degree major program is designed to satisfy the needs of students who require greater breadth of study across the sciences than the B.S. program can provide. Students who might be more interested in the B.A. degree, for example, would be prospective secondary-school teachers, or students who wish to pursue interdisciplinary study (e.g., in biophysics), or graduate study in professional programs (e.g., in the health sciences), business, or law in technical fields. For those students interested in becoming secondary-school teachers, an option in Physics Education is available which has a larger breadth of science courses required for teaching in California.

Career Opportunities

Astronomer • Biochemical Engineer • Device Engineer • Electrical Engineer • Electric Power
Administrator • Geophysicists • Laboratory Assistant • Laser Technician • Mechanical
Engineer • Pharmacologist • Physics Teacher • Pollution Control Technician • Professor • Renewable
Energy Manager • Research Scientist • Satellite Engineer • Security Researcher • Software
Engineer • Technical writer

Features

With relatively small classes and teaching as a major emphasis of faculty members, the Physics major involves a considerable amount of individualized instruction. In addition, every faculty member runs a research program and students are encouraged to participate in undergraduate research.

Hands-on experience is a central theme of the programs. Upper division students use modern equipment to conduct experiments in such areas as fiber optics, atomic and molecular spectroscopy, nuclear magnetic resonance, and solar cell construction and characterization.

Physics majors have an opportunity to be inducted into the national Physics honors society, Sigma Pi Sigma. Additionally, students may join the Society of Physics Students (SPS).

Program Learning Outcomes

Students graduating with a degree in Physics will be able to:

- Describe the fundamental principles of physics and be able to apply these core ideas to analyze physical processes;
- Use quantitative reasoning and critical thinking to solve problems, both theoretical and experimental in nature;
- Learn new technical subjects and skills;
- Construct, assess and troubleshoot experiments, quantitatively analyze the results using appropriate statistical procedures and tests of systematic errors, and draw meaningful conclusions;
- Effectively explain scientific ideas, both theoretical and experimental, to diverse audiences through written and oral presentations, both formal and informal;
- Work professionally, effectively, and inclusively as a member of diverse collaborations to solve problems.

Degree Requirements Unit-Outline

- The baccalaureate of arts degree requires a total of 120 units;
- The major requirements consists of 45-49 units;
- General Education (GE) & Graduation Requirements (GR) consists of 57 units;
- Free Electives may consist of 14-18 units (*actual number of free elective units may depend on GE/GR units*).

Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.

Physics (B.A.) Major Requirements (45-49 units)

Lower Division Coursework

The following 21-25 units of interdisciplinary coursework is required:

- MATH 130 - Calculus I *Units: 4 ; G.E./G.R. Area: B4*
- MATH 131 - Calculus II *Units: 3*
- MATH 210 - Linear Algebra with Differential Equations *Units: 3*
- PHYS 230 - Physical Reasoning *Units: 3 ; G.E./G.R. Area: Writing II*

And either:

- PHYS 125 - Principles of Physics I *Units: 4 ; G.E./G.R. Area: B1, B3*
- PHYS 126 - Principles of Physics II *Units: 4 ; G.E./G.R. Area: B1, B3*

OR

- PHYS 135 - Physics for Scientists and Engineers I *Units: 4 ; G.E./G.R. Area: B1, B3*
- PHYS 136 - Physics for Scientists and Engineers II *Units: 4*
- PHYS 137 - Physics for Scientists and Engineers III *Units: 4*

Upper Division Core

Take the following upper-division Physics courses for 18 units:

- PHYS 330 - Analytic Mechanics *Units: 3*
- PHYS 340 - Statistical Mechanics and Thermodynamics *Units: 3*
- PHYS 350 - Quantum Mechanics I *Units: 3*
- PHYS 380 - Advanced Laboratory I: Electronics *Units: 3*
- PHYS 381 - Advanced Laboratory II: Experimental Methods *Units: 3*
- PHYS 450 - Electromagnetism I *Units: 3*

Elective Courses

Choose a minimum of 6 units from the following:

- CHEM 100 - Introduction to College Chemistry *Units: 3 ; G.E./G.R. Area: B1, B3*
- CHEM 110 - General Chemistry for Engineering *Units: 3 ; G.E./G.R. Area: B1, B3*
- CHEM 111 - General Chemistry I *Units: 5 ; G.E./G.R. Area: B1, B3*
- CHEM 112 - General Chemistry II *Units: 5*
- CS 100 - Programming for Everyone *Units: 3*

- CS 101 - Computer Science I *Units: 4*
- PHYS 104 - Musical Acoustics *Units: 4 ; G.E./G.R. Area: B1, B3*
- PHYS 105 - How Things Work *Units: 3 ; G.E./G.R. Area: B1*
- PHYS 106 - Physics for Future Leaders *Units: 3 ; G.E./G.R. Area: B1; Sustainability*
- PHYS 107 - Science of Energy *Units: 3 ; G.E./G.R. Area: B1; Sustainability*
- PHYS 108 - Astronomy of Ancient Cultures *Units: 3 ; G.E./G.R. Area: B1; Diversity*
- PHYS 115 - Elementary Physics *Units: 3 ; G.E./G.R. Area: B1, B3*
- PHYS 138 - Descriptive Astronomy *Units: 3 ; G.E./G.R. Area: B1*
- PHYS 139 - Astronomy Laboratory *Units: 1 ; G.E./G.R. Area: B3*
- PHYS 303 - Biophysics *Units: 3 ; G.E./G.R. Area: B6*
- PHYS 337 - Extrasolar Planets *Units: 3 ; G.E./G.R. Area: B6*
- PHYS 338 - The Cosmos *Units: 3 ; G.E./G.R. Area: B6*
- PHYS 339 - Stars and Galaxies *Units: 3 ; G.E./G.R. Area: B6*
- PHYS 351 - Quantum Mechanics II *Units: 3*
- PHYS 360 - Selected Topics *Units: 1*
- PHYS 451 - Electromagnetism II *Units: 3*
- PHYS 460 - Astrophysics *Units: 3*
- PHYS 461 - Atomic Physics *Units: 3*
- PHYS 462 - Solid State Physics *Units: 3*
- PHYS 463 - Particle Physics *Units: 3*
- PHYS 480 - Advanced Laboratory III: Modeling, Design, and Analysis *Units: 3*
- PHYS 481 - Advanced Laboratory IV: Projects *Units: 3*
- PHYS 497 - Issues in Physics *Units: 3*
- SCI 308 - Hands-On Science Teaching *Units: 1*

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

- • PHYS 451 - Electromagnetism II *Units: 3*
- • PHYS 460 - Astrophysics *Units: 3*
- • PHYS 461 - Atomic Physics *Units: 3*
- • PHYS 462 - Solid State Physics *Units: 3*
- • PHYS 463 - Particle Physics *Units: 3*
- • PHYS 480 - Advanced Laboratory III: Modeling, Design, and Analysis *Units: 3*
- • PHYS 481 - Advanced Laboratory IV: Projects *Units: 3*
- • PHYS 490 - Independent Study *Units: 1-4*
- • PHYS 495 - Physics Practicum *Units: 1*
- • PHYS 497 - Issues in Physics *Units: 3*

Physics, B.S.

Physics, B.S. Program (120 units)

Program Description

In Physics, one attempts to discover, formulate, explain, and apply the basic laws of nature. Physicists work in areas as diverse as astrophysics, relativity, properties of materials, or the standard model of fundamental particles and interactions. The Principles of Physics provide the foundation for other sciences as well as engineering. Some of the examples of modern technological development from the application of physical principles include radio and television, computers, laser scanners, and communication by fiber optics. In addition, physicists explore problems in astronomy and theories for the origin and evolution of the universe.

At Cal State East Bay students can choose between a Bachelor of Science (B.S) degree and a Bachelor of Arts (B.A.) degree with a major in Physics. The B.S. degree major program is designed to give students an understanding of the fundamentals of physics including concepts of atomic and nuclear physics, classical mechanics, wave motion and sound, electromagnetism and optics, heat and thermodynamics, relativity, quantum mechanics, and elementary particles and their interactions.

Whereas the B.S. degree provides more focus, the B.A. degree major program is designed to satisfy the needs of students who require greater breadth of study across the sciences than the B.S. program can provide. Students who might be more interested in the B.A. degree, for example, would be prospective secondary-school teachers, or students who wish to pursue interdisciplinary study (e.g., in biophysics), or graduate study in professional programs (e.g., in the health sciences), business, or law in technical fields. For those students interested in becoming secondary-school teachers, an option in Physics Education is available which has a larger breadth of science courses required for teaching in California.

Career Opportunities

Astronomer • Biochemical Engineer • Device Engineer • Electrical Engineer • Electric Power
Administrator • Geophysicists • Laboratory Assistant • Laser Technician • Mechanical
Engineer • Pharmacologist • Physics Teacher • Pollution Control Technician • Professor • Renewable
Energy Manager • Research Scientist • Satellite Engineer • Security Researcher • Software
Engineer • Technical writer

Features

With relatively small classes and teaching as a major emphasis of faculty members, the Physics major involves a considerable amount of individualized instruction. In addition, every faculty member runs a research program and students are encouraged to participate in undergraduate research.

Hands-on experience is a central theme of the programs. Upper division students use modern equipment to conduct experiments in such areas as fiber optics, atomic and molecular spectroscopy, nuclear magnetic resonance, and solar cell construction and characterization.

Physics majors have an opportunity to be inducted into the national Physics honors society, Sigma Pi Sigma. Additionally, students may join the Society of Physics Students (SPS).

Program Learning Outcomes

- Explain the fundamental principles of physics and be able to apply these core ideas to analyze physical processes;
- Apply quantitative reasoning and critical thinking to solve complex problems, both theoretical and experimental in nature;
- Independently learn new technical subjects and skills;
- Design, construct, assess and troubleshoot experiments, quantitatively analyze the results using appropriate statistical procedures and tests of systematic errors, and draw meaningful conclusions;
- Effectively discuss scientific ideas, both theoretical and experimental, to diverse audiences through written and oral presentations, both formal and informal;
- Work professionally, effectively, and inclusively as a member of diverse collaborations to solve problems.

Degree Requirements Unit-Outline

- The baccalaureate of arts degree requires a total of 120 units;
- The major requirements consists of 67 units;
- General Education (GE) & Graduation Requirements (GR) consists of 57 units;
- Free Electives may consist of 0 units (*actual number of free elective units may depend on GE/GR units*).

Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE Advisors for information.

Physics (B.S.) Major Requirements (67 units)

Lower Division Core

The following 31 units of interdisciplinary coursework is required:

- CHEM 110 - General Chemistry for Engineering *Units: 3 ; G.E./G.R. Area: B1, B3*
- MATH 130 - Calculus I *Units: 4 ; G.E./G.R. Area: B4*
- MATH 131 - Calculus II *Units: 3*
- MATH 210 - Linear Algebra with Differential Equations *Units: 3*
- MATH 230 - Calculus III *Units: 3*
- PHYS 135 - Physics for Scientists and Engineers I *Units: 4 ; G.E./G.R. Area: B1, B3*
- PHYS 136 - Physics for Scientists and Engineers II *Units: 4*
- PHYS 137 - Physics for Scientists and Engineers III *Units: 4*
- PHYS 230 - Physical Reasoning *Units: 3 ; G.E./G.R. Area: Writing II*

Upper Division Core

Take the following upper-division Physics courses for 30 units:

- PHYS 330 - Analytic Mechanics *Units: 3*
- PHYS 340 - Statistical Mechanics and Thermodynamics *Units: 3*
- PHYS 350 - Quantum Mechanics I *Units: 3*
- PHYS 351 - Quantum Mechanics II *Units: 3*
- PHYS 380 - Advanced Laboratory I: Electronics *Units: 3*

- PHYS 381 - Advanced Laboratory II: Experimental Methods *Units: 3*
- PHYS 450 - Electromagnetism I *Units: 3*
- PHYS 451 - Electromagnetism II *Units: 3*
- PHYS 480 - Advanced Laboratory III: Modeling, Design, and Analysis *Units: 3*
- PHYS 481 - Advanced Laboratory IV: Projects *Units: 3*

Elective Courses

Choose a minimum of 6 units from the following:

- PHYS 460 - Astrophysics *Units: 3*
- PHYS 461 - Atomic Physics *Units: 3*
- PHYS 462 - Solid State Physics *Units: 3*
- PHYS 463 - Particle Physics *Units: 3*

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

- • PHYS 451 - Electromagnetism II *Units: 3*
- • PHYS 460 - Astrophysics *Units: 3*
- • PHYS 461 - Atomic Physics *Units: 3*
- • PHYS 462 - Solid State Physics *Units: 3*
- • PHYS 463 - Particle Physics *Units: 3*
- • PHYS 480 - Advanced Laboratory III: Modeling, Design, and Analysis *Units: 3*
- • PHYS 481 - Advanced Laboratory IV: Projects *Units: 3*
- • PHYS 490 - Independent Study *Units: 1-4*
- • PHYS 495 - Physics Practicum *Units: 1*
- • PHYS 497 - Issues in Physics *Units: 3*

Minor

Astronomy Minor

Minor Requirements (21-25 units)

Physics Fundamental Coursework

Take the following 11-15 units as outline below:

Take the following 3 units:

- PHYS 230 - Physical Reasoning *Units: 3 ; G.E./G.R. Area: Writing II*

And, choose one (1) group of coursework for 8-12 units:

- PHYS 125 - Principles of Physics I *Units: 4 ; G.E./G.R. Area: B1, B3*
- PHYS 126 - Principles of Physics II *Units: 4 ; G.E./G.R. Area: B1, B3*

OR

- PHYS 135 - Physics for Scientists and Engineers I *Units: 4 ; G.E./G.R. Area: B1, B3*
- PHYS 136 - Physics for Scientists and Engineers II *Units: 4*
- PHYS 137 - Physics for Scientists and Engineers III *Units: 4*

Astronomy Fundamental Coursework

Take the following 7 units as outlined:

Take the following 4 units:

- PHYS 139 - Astronomy Laboratory *Units: 1 ; G.E./G.R. Area: B3*
- PHYS 338 - The Cosmos *Units: 3 ; G.E./G.R. Area: B6*

Plus, choose one (1) course for 3 units from the following:

- PHYS 108 - Astronomy of Ancient Cultures *Units: 3 ; G.E./G.R. Area: B1; Diversity*
- PHYS 138 - Descriptive Astronomy *Units: 3 ; G.E./G.R. Area: B1*

Elective Course

Choose one (1) course for 3 units from the following:

- PHYS 337 - Extrasolar Planets *Units: 3 ; G.E./G.R. Area: B6*
- PHYS 339 - Stars and Galaxies *Units: 3 ; G.E./G.R. Area: B6*
- PHYS 460 - Astrophysics *Units: 3*

- • PHYS 497 - Issues in Physics *Units: 3*

Physics Minor

Minor Requirements (24 units)

Required Courses

Take the following 11-15 units as outlined:

Take the following 3 units:

- **PHYS 230 - Physical Reasoning** *Units: 3 ; G.E./G.R. Area: Writing II*

And, choose one (1) group of coursework for 8-12 units:

- **PHYS 125 - Principles of Physics I** *Units: 4 ; G.E./G.R. Area: B1, B3*
- **PHYS 126 - Principles of Physics II** *Units: 4 ; G.E./G.R. Area: B1, B3*

OR

- **PHYS 135 - Physics for Scientists and Engineers I** *Units: 4 ; G.E./G.R. Area: B1, B3*
- **PHYS 136 - Physics for Scientists and Engineers II** *Units: 4*
- **PHYS 137 - Physics for Scientists and Engineers III** *Units: 4*

Elective Courses

Choose a minimum of 9-13 units of coursework to complete the 24 unit requirement from the following:

- **PHYS 104 - Musical Acoustics** *Units: 4 ; G.E./G.R. Area: B1, B3*
- **PHYS 106 - Physics for Future Leaders** *Units: 3 ; G.E./G.R. Area: B1; Sustainability*
- **PHYS 107 - Science of Energy** *Units: 3 ; G.E./G.R. Area: B1; Sustainability*
- **PHYS 108 - Astronomy of Ancient Cultures** *Units: 3 ; G.E./G.R. Area: B1; Diversity*
- **PHYS 115 - Elementary Physics** *Units: 3 ; G.E./G.R. Area: B1, B3*
- **PHYS 307 - Social Impact Through Sustainable Solar Design** *Units: 3 ; G.E./G.R. Area: B6; Sustainability*
- **PHYS 330 - Analytic Mechanics** *Units: 3*
- **PHYS 340 - Statistical Mechanics and Thermodynamics** *Units: 3*
- **PHYS 350 - Quantum Mechanics I** *Units: 3*
- **PHYS 351 - Quantum Mechanics II** *Units: 3*
- **PHYS 380 - Advanced Laboratory I: Electronics** *Units: 3*
- **PHYS 381 - Advanced Laboratory II: Experimental Methods** *Units: 3*
- **PHYS 450 - Electromagnetism I** *Units: 3*
- **PHYS 451 - Electromagnetism II** *Units: 3*
- **PHYS 460 - Astrophysics** *Units: 3*
- **PHYS 461 - Atomic Physics** *Units: 3*
- **PHYS 462 - Solid State Physics** *Units: 3*
- **PHYS 463 - Particle Physics** *Units: 3*
- **PHYS 480 - Advanced Laboratory III: Modeling, Design, and Analysis** *Units: 3*
- **PHYS 481 - Advanced Laboratory IV: Projects** *Units: 3*
- **SCI 308 - Hands-On Science Teaching** *Units: 1*

Department of Political Science

The Department Office is located on 4th Floor of the Student & Faculty Support building, Room 402

Office Hours: 8:00 a.m. - 5:00 p.m., Monday through Friday

Dept Phone: (510) 885-3221

Faculty

Professor Emeritus

David Sadofsky Baggins, Ph.D. Syracuse University

Professor

Kim Geron, Ph.D. University of California, Riverside

Associate Professors

Elizabeth Bergman (Chair), Ph.D. Claremont Graduate University

Maria C. Ortuoste, Ph.D. Arizona State University

Assistant Professors

Amy Below, Ph.D. University of Southern California

Jeremiah Garretson, Ph.D. Vanderbilt University

Danvy Le, Ph.D. University of California, Irvine

Department Statement

The Department of Political Science offers a B.A. degree that gives both a strong background in social science and excellent professional preparation. The major offers three distinct paths to completion, the traditional major and options in pre-law and public affairs and administration. The two options offer interdisciplinary pre-professional curricula. The department is strong in every aspect of American government (national, state, and local institutions, public policy, public law, and public administration), as well as Comparative Politics in international relations. Political Science majors learn to be strong writers, public speakers, and researchers. Opportunities are also offered to learn advanced social science methodology and practical political skills, as well as to participate in faculty research. Students receive assistance in finding - and credit for completing - local, state, and national internships.

Graduating seniors report very high levels of satisfaction with the major, and the number of Political Science majors continues to grow.

Bachelor

Political Science, B.A.: Pre-Law Concentration

Political Science, B.A. Program (120 units)

Program Description

The political science curriculum helps students to acquire an organized body of knowledge about government and to think analytically about public policy, law, and politics. The political science degree prepares graduates to enter careers in government, public service, public administration, public policy analysis, legislative advocacy, business, international relations, and teaching. Many Cal State East Bay political science graduates continue their academic careers in law school, or in the pursuit of graduate degrees in political science or public policy analysis.

Program Learning Outcomes

Students graduating with a B.A. in Political Science will be able to:

- develop and articulate an understanding of democratic theory and practice and gain practical experience in politics, public policy, and civic engagement.
- demonstrate through oral and written competency, an understanding of the theories, concepts, empirical content, and research agendas of the fields of political science with advanced understanding in the selected option.
- demonstrate an understanding of political culture in the U.S. and around the world including the economic, ideological, ethnic and cultural groups and movements that engage the political process.
- articulate career goals, demonstrate knowledge of how to achieve those goals, and produce evidence of working to achieve the goals.
- demonstrate the ability to apply knowledge through collaborative learning and teamwork.

Career Opportunities

Administrative Assistant • Attorney • Campaign Aide/Manager • Diplomat • FBI/CIA Agent • Foreign Service Officer • International Relations Specialist • Journalist • Labor Organizer/Union Representative • Law Clerk • Legislative Advocate/Lobbyist • Legislative Aide • Paralegal • Legal Assistant • Police Officer • Politician • Polling Specialist • Private Investigator • Public Administrator • Public Information Officer • Research Specialist • Secret Service Agent • Teacher

Features

The political science major offers a Pre-Law option for students planning a career in law. The Political Science department offers a major and a minor. Special features of the Political Science major include: the Intercollegiate Model United Nations Club; field trips to Sacramento and to State and Federal courts; guest political speakers; pre-law advising; local, Sacramento, Washington, and political campaign internships; and the Political Science Club.

Preparation

For Advanced Placement course equivalencies, see Registration.

Degree Requirements Unit-Outline

- A baccalaureate of arts degree requires a total of 120 units;
- The major requirements consists of 39 units
- General Education & Graduation Requirements consists of 57 units;
- Free Electives may consist of 24 units (*actual number of free elective units may depend on GE/GR units*).

Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.

Political Science Major Requirements (39 units)

Core Coursework

Please consult an advisor in your major department for clarification and interpretation of your major requirements. In addition to the Core Requirements, students must choose one (1) of three concentrations for 12-units to complete the major.

The Core Requirement consists of 27 units as outlined below:

The following 9 units are required:

- POSC 101 - American Political Institutions Units: 3 ; G.E./G.R. Area: D1-3; US-1, US-2
- POSC 102 - Public Policy/California Politics Units: 3 ; G.E./G.R. Area: D1-3; US-1, US-3
- POSC 300 - The Study of Political Science Units: 3

Complete two (2) upper-division courses for 6 units from either the *American Government and Politics* area or the *Public Policy and Administration* area:

American Government and Politics

- POSC 311 - The American Presidency *Units: 3*
- POSC 312 - United States Congress *Units: 3*
- POSC 314 - State and Local Politics and Government *Units: 3*
- POSC 315 - Urban Politics *Units: 3*
- POSC 316 - Politics of California *Units: 3*
- POSC 330 - Voting and Public Opinion *Units: 3*
- POSC 331 - Political Parties and Campaigning *Units: 3*
- POSC 333 - Practical Politics *Units: 3*
- POSC 334 - Interest Groups, Lobbying, and Political Reform *Units: 3*
- POSC 335 - Women and Politics *Units: 3*
- POSC 336 - Ethnic and Minority Politics *Units: 3*
- POSC 337 - African American Politics *Units: 3*
- POSC 338 - Asian American Politics *Units: 3*
- POSC 495 - Political Internship *Units: 1-3*

Public Policy and Administration

- POSC 380 - Public Policy Analysis *Units: 3*
- POSC 383 - Labor Policy and Law *Units: 3*
- POSC 410 - Politics of Budgeting *Units: 3*
- POSC 411 - Public Policy and the Environment *Units: 3*
- POSC 412 - Bureaucratic Politics and Administrative Law *Units: 3*

Complete one (1) course in EACH of the three areas below for 9 units. Students may also substitute an advisor-approved lower-division course for these areas:

Comparative Government and Politics

- POSC 321 - Political Systems of Western Europe *Units: 3 ; G.E./G.R. Area: D4*
- POSC 323 - Political Systems of Asia *Units: 3 ; G.E./G.R. Area: D4*
- POSC 324 - Government and Politics in the Middle East *Units: 3*
- POSC 326 - Government and Politics of Africa South of the Sahara *Units: 3 ; G.E./G.R. Area: D4*
- POSC 327 - Political Systems of Latin America *Units: 3 ; G.E./G.R. Area: D4*
- POSC 347 - Comparative Law *Units: 3*

International Relations

- POSC 350 - World Problems and Global Response *Units: 3 ; G.E./G.R. Area: D4*
- POSC 351 - International Relations *Units: 3 ; G.E./G.R. Area: D4*
- POSC 352 - International Security in the 21st Century *Units: 3 ; G.E./G.R. Area: D4*
- POSC 353 - Politics of the Global Economy *Units: 3*
- POSC 354 - American Foreign Policy *Units: 3 ; G.E./G.R. Area: D4*
- POSC 355 - The United Nations and World Community *Units: 3 ; G.E./G.R. Area: D4*

Political Theory

- POSC 371 - Greek, Roman and Medieval Political Thought *Units: 3*
- POSC 373 - Contemporary Political Thought *Units: 3*

- POSC 374 - Marxism in Theory and Practice *Units: 3*
- POSC 375 - Theories of Empire *Units: 3*

Concentrations

Students must choose one (1) concentration for 12 units below as part of the major requirements:

- Political Science, B.A.: Pre-Law Concentration
- Political Science, B.A.: Public Affairs and Administration Concentration
- Political Science, B.A.: Traditional Political Science Concentration

Capstone Requirement

Students must complete the following capstone experience for 3 units to complete the major:

- POSC 499 - Capstone *Units: 3*

Pre-Law Concentration

Students taking this concentration will focus on 12 units of coursework in legal studies.

Choose one (1) course for 3 units from the following:

- BUS 370 - Business, Government and Society *Units: 3*
- Or any additional course NOT already taken that is listed in the *American Government and Politics* or *Public Policy and Administration* groups above.

Plus complete three (3) courses that have NOT already been taken from the following (9 units):

- POSC 340 - Law and Society *Units: 3 ; G.E./G.R. Area: C4*
- POSC 341 - American Constitutional Law: Government *Units: 3*
- POSC 342 - American Constitutional Law: Rights *Units: 3*
- POSC 343 - Survey of American Law *Units: 3*
- POSC 344 - Environmental Law *Units: 3*
- POSC 345 - International Law *Units: 3 ; G.E./G.R. Area: D4*
- POSC 412 - Bureaucratic Politics and Administrative Law *Units: 3*

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

Political Science, B.A.: Traditional Political Science Concentration

Political Science, B.A. Program (120 units)

Program Description

The political science curriculum helps students to acquire an organized body of knowledge about government and to think analytically about public policy, law, and politics. The political science degree prepares graduates to enter careers in government, public service, public administration, public policy analysis, legislative advocacy, business, international relations, and teaching. Many Cal State East Bay political science graduates continue their academic careers in law school, or in the pursuit of graduate degrees in political science or public policy analysis.

Program Learning Outcomes

Students graduating with a B.A. in Political Science will be able to:

- develop and articulate an understanding of democratic theory and practice and gain practical experience in politics, public policy, and civic engagement.
- demonstrate through oral and written competency, an understanding of the theories, concepts, empirical content, and research agendas of the fields of political science with advanced understanding in the selected option.
- demonstrate an understanding of political culture in the U.S. and around the world including the economic, ideological, ethnic and cultural groups and movements that engage the political process.
- articulate career goals, demonstrate knowledge of how to achieve those goals, and produce evidence of working to achieve the goals.
- demonstrate the ability to apply knowledge through collaborative learning and teamwork.

Career Opportunities

Administrative Assistant • Attorney • Campaign Aide/Manager • Diplomat • FBI/CIA Agent • Foreign Service Officer • International Relations Specialist • Journalist • Labor Organizer/Union Representative • Law Clerk • Legislative Advocate/Lobbyist • Legislative Aide • Paralegal • Legal Assistant • Police Officer • Politician • Polling Specialist • Private Investigator • Public Administrator • Public Information Officer • Research Specialist • Secret Service Agent • Teacher

Features

The political science major offers a Pre-Law option for students planning a career in law. The Political Science department offers a major and a minor. Special features of the Political Science major include: the Intercollegiate Model United Nations Club; field trips to Sacramento and to State and Federal courts; guest political speakers; pre-law advising; local, Sacramento, Washington, and political campaign internships; and the Political Science Club.

Preparation

For Advanced Placement course equivalencies, see Registration.

Degree Requirements Unit-Outline

- A baccalaureate of arts degree requires a total of 120 units:
- The major requirements consists of 39 units
- General Education & Graduation Requirements consists of 57 units;
- Free Electives may consist of 24 units (*actual number of free elective units may depend on GE/GR units*).

Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.

Political Science Major Requirements (39 units)

Core Coursework

Please consult an advisor in your major department for clarification and interpretation of your major requirements. In addition to the Core Requirements, students must choose one (1) of three concentrations for 12-units to complete the major.

The Core Requirement consists of 27 units as outlined below:

The following 9 units are required:

- POSC 101 - American Political Institutions *Units: 3 ; G.E./G.R. Area: D1-3; US-1, US-2*
- POSC 102 - Public Policy/California Politics *Units: 3 ; G.E./G.R. Area: D1-3; US-1, US-3*
- POSC 300 - The Study of Political Science *Units: 3*

Complete two (2) upper-division courses for 6 units from either the *American Government and Politics* area or the *Public Policy and Administration* area:

American Government and Politics

- POSC 311 - The American Presidency *Units: 3*
- POSC 312 - United States Congress *Units: 3*
- POSC 314 - State and Local Politics and Government *Units: 3*
- POSC 315 - Urban Politics *Units: 3*
- POSC 316 - Politics of California *Units: 3*
- POSC 330 - Voting and Public Opinion *Units: 3*
- POSC 331 - Political Parties and Campaigning *Units: 3*
- POSC 333 - Practical Politics *Units: 3*
- POSC 334 - Interest Groups, Lobbying, and Political Reform *Units: 3*
- POSC 335 - Women and Politics *Units: 3*
- POSC 336 - Ethnic and Minority Politics *Units: 3*
- POSC 337 - African American Politics *Units: 3*
- POSC 338 - Asian American Politics *Units: 3*
- POSC 495 - Political Internship *Units: 1-3*

Public Policy and Administration

- POSC 380 - Public Policy Analysis *Units: 3*
- POSC 383 - Labor Policy and Law *Units: 3*
- POSC 410 - Politics of Budgeting *Units: 3*
- POSC 411 - Public Policy and the Environment *Units: 3*
- POSC 412 - Bureaucratic Politics and Administrative Law *Units: 3*

Complete one (1) course in EACH of the three areas below for 9 units. Students may also substitute an advisor-approved lower-division course for these areas:

Comparative Government and Politics

- POSC 321 - Political Systems of Western Europe *Units: 3 ; G.E./G.R. Area: D4*
- POSC 323 - Political Systems of Asia *Units: 3 ; G.E./G.R. Area: D4*
- POSC 324 - Government and Politics in the Middle East *Units: 3*
- POSC 326 - Government and Politics of Africa South of the Sahara *Units: 3 ; G.E./G.R. Area: D4*

- POSC 327 - Political Systems of Latin America *Units: 3 ; G.E./G.R. Area: D4*
- POSC 347 - Comparative Law *Units: 3*

International Relations

- POSC 350 - World Problems and Global Response *Units: 3 ; G.E./G.R. Area: D4*
- POSC 351 - International Relations *Units: 3 ; G.E./G.R. Area: D4*
- POSC 352 - International Security in the 21st Century *Units: 3 ; G.E./G.R. Area: D4*
- POSC 353 - Politics of the Global Economy *Units: 3*
- POSC 354 - American Foreign Policy *Units: 3 ; G.E./G.R. Area: D4*
- POSC 355 - The United Nations and World Community *Units: 3 ; G.E./G.R. Area: D4*

Political Theory

- POSC 371 - Greek, Roman and Medieval Political Thought *Units: 3*
- POSC 373 - Contemporary Political Thought *Units: 3*
- POSC 374 - Marxism in Theory and Practice *Units: 3*
- POSC 375 - Theories of Empire *Units: 3*

Concentrations

Students must choose one (1) concentration for 12 units below as part of the major requirements:

- Political Science, B.A.: Pre-Law Concentration
- Political Science, B.A.: Public Affairs and Administration Concentration
- Political Science, B.A.: Traditional Political Science Concentration

Capstone Requirement

Students must complete the following capstone experience for 3 units to complete the major:

- POSC 499 - Capstone *Units: 3*

Traditional Political Science Concentration

Public Law Coursework

Complete one (1) course that has NOT already been taken from the following (3 units):

- POSC 340 - Law and Society *Units: 3 ; G.E./G.R. Area: C4*
- POSC 341 - American Constitutional Law: Government *Units: 3*
- POSC 342 - American Constitutional Law: Rights *Units: 3*
- POSC 343 - Survey of American Law *Units: 3*
- POSC 344 - Environmental Law *Units: 3*
- POSC 345 - International Law *Units: 3 ; G.E./G.R. Area: D4*
- POSC 412 - Bureaucratic Politics and Administrative Law *Units: 3*

Elective Courses

Complete an additional 9 units from either the following upper-division courses OR any upper-division course NOT already taken from other area requirements above:

- POSC 382 - U.S. Immigration Policy and Law *Units: 3*
- POSC 490 - Independent Study *Units: 1-3*
- POSC 497 - Issues in Political Science *Units: 3*
- POSC 332 - Citizen Action *Units: 3*
- POSC 498 - Internship *Units: 1-3*

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

- • POSC 345 - International Law *Units: 3 ; G.E./G.R. Area: D4*
- • POSC 377 - Philosophy of Law *Units: 3 ; G.E./G.R. Area: C4; Social Justice*

Political Science: Public Policy and Administration

- • POSC 380 - Public Policy Analysis *Units: 3*
- • POSC 382 - U.S. Immigration Policy and Law *Units: 3*
- • POSC 383 - Labor Policy and Law *Units: 3*
- • POSC 410 - Politics of Budgeting *Units: 3*
- • POSC 411 - Public Policy and the Environment *Units: 3*
- • POSC 412 - Bureaucratic Politics and Administrative Law *Units: 3*

Minor

Political Science Minor

Minor Requirements (18 units)

The minor consists of 18 units of Political Science courses of which at least 12 units must be upper-division. The purpose of the Minor in Political Science is to provide a general background in political science to complement majors in such areas as business administration, environmental studies, science, humanities, and the other social sciences. The student must consult with a Political Science department advisor or chairperson in selecting courses.

Negin Toosi, Ph.D. Tufts University

Department Statement

Psychology is the science of behavior and mental processes. Many psychologists work with people to understand how they think, respond to stress, learn and forget, develop into unique personalities, and interact with one another. Others study the behavior and nervous systems of animals in order to find general principles that apply across species. Psychologists apply their knowledge to do therapy and counseling, to improve practices in schools, prisons, and rehabilitation centers, and to enhance performance in industry, business, and the professions. Careers in psychology are already plentiful and fulfilling, and the field is one of the fastest growing in the world.

About the Department

Bachelor

Psychology, B.A.

Psychology, B.A./B.S. Programs (120 units)

Program Description

Psychology is the science of behavior and mental processes. Many psychologists work primarily with people to understand how they think, respond to stress, learn and forget, develop into unique personalities, and interact with one another. Others study the behavior and nervous systems of animals in order to find general principles that apply across species. Psychologists apply their knowledge to do therapy and counseling, to improve practices in schools, prisons, and rehabilitation centers, and to enhance performance in industrial and business settings.

The Psychology Department offers a major in both the Bachelor of Arts (B.A.) and the Bachelor of Science (B.S.) degrees. These are basic programs; to become a "psychologist" requires graduate training.

The B.A. program is appropriate for most psychology students. It provides a basic understanding of human behavior and motivation that is valuable in many careers in business, government, and education. It also provides the background expected for entry into graduate programs in clinical psychology, counseling psychology, school psychology, health psychology, social psychology, or experimental psychology.

The B.S. programs are designed for more specialized purposes. Students in the B.S. program must select one of the two concentrations in that program: Industrial/Organizational Psychology or Ergonomics and Human Factors. The concentration in Industrial/Organizational Psychology provides preparation for careers related to business, with an emphasis on personnel management. The concentration in Ergonomics and Human Factors provides preparation for careers in the design of work environments to take account of human limitations and strengths, for example, the design of equipment (computers, aircraft, automobiles) or the design of industrial procedures.

In Psychology's minor program, students can choose courses to complement training in business, communication, health and medicine, law and criminology, statistics, biology, and many other fields. Of special interest to students in that program might be our courses in developmental psychology, personality, cognitive processes, and learning.

Program Learning Outcomes

Students graduating with a B.A. or B.S. in Psychology will be able to:

- Identify key concepts, principles, and applications of psychology's content domains.
- Apply scientific reasoning to interpret psychological phenomena and to design and conduct basic psychological research.
- Evaluate the ethics of psychological science and practice.
- Demonstrate effective communication skills.
- Describe career options within psychology.

Career Opportunities

Bachelor of Arts:

Clinical/Counseling/Child Psychologist • Community Mental Health Employee • Experimental Psychologist • Human Service Worker • Police/Probation Officer • Recreation Worker • School Counselor • Social Worker • Special Education Teacher • Substance Abuse Counselor

Bachelor of Science:

Advertising Account Executive • Business Executive • Career Counselor • Employee Counselor and Trainer • Human Resource Specialist • Personnel Representative • Program Evaluator • Public Relations Specialist

Features

The Psychology Department's facilities include a fully equipped computer lab, an animal lab, and several labs for studying human behavior. These facilities support an unusual and important characteristic of the department - its emphasis on hands-on student involvement in the study of human and animal behavior through participation in laboratory courses and faculty research, in field trips, and in community volunteer placements.

Both the Psychology Club and Psi Chi (national honor society in psychology) provide opportunities for students to get together to hear speakers and to discuss topics such as career and graduate school opportunities.

All courses required for the Psychology B.A. major are offered in the evening program, both at the Hayward and Concord campuses, over a two-year period. However, the range of choices and flexibility of scheduling is more limited in the evening program.

Advising

Psychology students are encouraged to visit a major advisor when they begin taking classes at CSUEB.

Major advising is handled by the full-time faculty in the department. Students may visit any advisor; advisors are not assigned, and students do not need to select one. Office hours and locations are available on the department website and in the department office.

Preparation

For Advanced Placement course equivalencies, see Registration.

Degree Requirements Units-Outline

- A baccalaureate of arts or science degree requires a total of 120 units;
- The Psychology (BA) major requirements consists of 52 units
- The Psychology (BS) major requirements consists of 55-64 units;
- General Education (GE) & Graduation Requirements (GR) consists of 57 units;
- Free Electives may consist of 11 units (BA) or 2-8 units (BS); (*actual number of free elective units may depend on GE/GR units*).

Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.

Psychology (BA) Major Requirements (52 units)

Core Requirement

The following 28 units of interdisciplinary core coursework are required:

- BIOL 101 - Introduction to Biology *Units: 3 ; G.E./G.R. Area: B2*
- BIOL 102 - Introduction to Biology Lab *Units: 1 ; G.E./G.R. Area: B3*
- PSYC 100 - General Psychology *Units: 3 ; G.E./G.R. Area: D1-3*
- PSYC 200 - Methods of Investigation in Psychology *Units: 3*
- PSYC 300 - Experimental Psychology *Units: 4*
- PSYC 310 - Conditioning and Learning *Units: 4*
- PSYC 320 - Physiological Psychology *Units: 4*
- STAT 100 - Elements of Statistics and Probability *Units: 3 ; G.E./G.R. Area: B4*
- STAT 310 - Statistical Methods in the Social Sciences *Units: 3*

Psychology Content Requirements

Choose one (1) from each group for 8 units:

- PSYC 330 - Cognitive Psychology *Units: 4*
- *OR* PSYC 340 - Developmental Psychology *Units: 4*
- PSYC 350 - Personality Psychology *Units: 4*
- *OR* PSYC 360 - Social Psychology *Units: 4*

Advanced Topics Requirement

Take 12 additional units of upper-division PSYC courses, not including courses beginning with PSYC 491 or PSYC 493, or those marked "Not for psychology major or minor credit" in the catalog. See all Psychology courses by Course Types below.

Advanced Lab Requirement

Take one (1) of the following lab courses for 4 units:

- PSYC 491A - Research in Conditioning and Learning *Units: 4*

- PSYC 491B - Research in Physiological Psychology *Units: 4*
- PSYC 491C - Research in Cognitive Psychology *Units: 4*
- PSYC 491D - Research in Developmental Psychology *Units: 4*
- PSYC 491E - Research in Social & Personality Psychology *Units: 4*
- PSYC 491F - Research in Clinical Psychology *Units: 4*
- PSYC 493A - Research in Organizational Psychology *Units: 4*
- PSYC 493B - Research in Industrial Psychology *Units: 4*

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

Psychology, B.S.: Ergonomics and Human Factors Concentration

Psychology, B.A./B.S. Programs (120 units)

Program Description

Psychology is the science of behavior and mental processes. Many psychologists work primarily with people to understand how they think, respond to stress, learn and forget, develop into unique personalities, and interact with one another. Others study the behavior and nervous systems of animals in order to find general principles that apply across species. Psychologists apply their knowledge to do therapy and counseling, to improve practices in schools, prisons, and rehabilitation centers, and to enhance performance in industrial and business settings.

The Psychology Department offers a major in both the Bachelor of Arts (B.A.) and the Bachelor of Science (B.S.) degrees. These are basic programs; to become a "psychologist" requires graduate training.

The B.A. program is appropriate for most psychology students. It provides a basic understanding of human behavior and motivation that is valuable in many careers in business, government, and education. It also provides the background expected for entry into graduate programs in clinical psychology, counseling psychology, school psychology, health psychology, social psychology, or experimental psychology.

The B.S. programs are designed for more specialized purposes. Students in the B.S. program must select one of the two concentrations in that program: Industrial/Organizational Psychology or Ergonomics and Human Factors. The concentration in Industrial/Organizational Psychology provides preparation for careers related to business, with an emphasis on personnel management. The concentration in Ergonomics

and Human Factors provides preparation for careers in the design of work environments to take account of human limitations and strengths, for example, the design of equipment (computers, aircraft, automobiles) or the design of industrial procedures.

In Psychology's minor program, students can choose courses to complement training in business, communication, health and medicine, law and criminology, statistics, biology, and many other fields. Of special interest to students in that program might be our courses in developmental psychology, personality, cognitive processes, and learning.

Program Learning Outcomes

Students graduating with a B.A. or B.S. in Psychology will be able to:

- Identify key concepts, principles, and applications of psychology's content domains.
- Apply scientific reasoning to interpret psychological phenomena and to design and conduct basic psychological research.
- Evaluate the ethics of psychological science and practice.
- Demonstrate effective communication skills.
- Describe career options within psychology.

Career Opportunities

Bachelor of Arts:

Clinical/Counseling/Child Psychologist • Community Mental Health Employee • Experimental Psychologist • Human Service Worker • Police/Probation Officer • Recreation Worker • School Counselor • Social Worker • Special Education Teacher • Substance Abuse Counselor

Bachelor of Science:

Advertising Account Executive • Business Executive • Career Counselor • Employee Counselor and Trainer • Human Resource Specialist • Personnel Representative • Program Evaluator • Public Relations Specialist

Features

The Psychology Department's facilities include a fully equipped computer lab, an animal lab, and several labs for studying human behavior. These facilities support an unusual and important characteristic of the department - its emphasis on hands-on student involvement in the study of human and animal behavior through participation in laboratory courses and faculty research, in field trips, and in community volunteer placements.

Both the Psychology Club and Psi Chi (national honor society in psychology) provide opportunities for students to get together to hear speakers and to discuss topics such as career and graduate school opportunities.

All courses required for the Psychology B.A. major are offered in the evening program, both at the Hayward and Concord campuses, over a two-year period. However, the range of choices and flexibility of scheduling is more limited in the evening program.

Advising

Psychology students are encouraged to visit a major advisor when they begin taking classes at CSUEB.

Major advising is handled by the full-time faculty in the department. Students may visit any advisor; advisors are not assigned, and students do not need to select one. Office hours and locations are available on the department website and in the department office.

Preparation

For Advanced Placement course equivalencies, see Registration.

Degree Requirements Units-Outline

- A baccalaureate of arts or science degree requires a total of 120 units:
- The Psychology (BA) major requirements consists of 52 units
- The Psychology (BS) major requirements consists of 55-64 units;
- General Education (GE) & Graduation Requirements (GR) consists of 57 units;
- Free Electives may consist of 11 units (BA) or 2-8 units (BS); (*actual number of free elective units may depend on GE/GR units*).

Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.

Psychology, B.S. Major Requirements (55-64 units)

Core Requirement

Complete the following 28 units:

- PSYC 100 - General Psychology Units: 3 ; G.E./G.R. Area: D1-3
- PSYC 200 - Methods of Investigation in Psychology Units: 3
- PSYC 300 - Experimental Psychology Units: 4
- PSYC 310 - Conditioning and Learning Units: 4
- PSYC 330 - Cognitive Psychology Units: 4
- PSYC 360 - Social Psychology Units: 4
- STAT 100 - Elements of Statistics and Probability Units: 3 ; G.E./G.R. Area: B4
- STAT 310 - Statistical Methods in the Social Sciences Units: 3

Advanced Lab Requirement

Plus, take one (1) of the following courses for 4 units:

- PSYC 491A - Research in Conditioning and Learning Units: 4
- PSYC 491B - Research in Physiological Psychology Units: 4
- PSYC 491C - Research in Cognitive Psychology Units: 4
- PSYC 491D - Research in Developmental Psychology Units: 4
- PSYC 491E - Research in Social & Personality Psychology Units: 4
- PSYC 491F - Research in Clinical Psychology Units: 4

- PSYC 493A - Research in Organizational Psychology *Units: 4*
- PSYC 493B - Research in Industrial Psychology *Units: 4*

Concentration Requirement

Students must select a concentration to complete the major for 23-32 units:

- Psychology, B.S.: Ergonomics and Human Factors Concentration
- Psychology, B.S.: Industrial/Organizational Psychology Concentration

Ergonomics and Human Factors Concentration

The Ergonomics and Human Factors concentration requirements completing 29-32 units.

Note: Students completing the Ergonomics and Human Factors Concentration can take STAT 330 and 331 instead of STAT 100 and 310, and may use those courses to satisfy the STAT 310 prerequisite of PSYC 300.

Lower Division Coursework

The following 11-12 units of lower-division coursework is required:

Computer Science Requirement

Take one (1) of the following courses:

- CS 100 - Programming for Everyone *Units: 3*
- CS 101 - Computer Science I *Units: 4*

Physics Requirement

Take one (1) group of the two:

- PHYS 125 - Principles of Physics I *Units: 4 ; G.E./G.R. Area: B1, B3*
- PHYS 126 - Principles of Physics II *Units: 4 ; G.E./G.R. Area: B1, B3*

OR

- PHYS 135 - Physics for Scientists and Engineers I *Units: 4 ; G.E./G.R. Area: B1, B3*
- PHYS 136 - Physics for Scientists and Engineers II *Units: 4*

Note: PHYS 125 requires MATH 120 (Precalculus), which students can test out of. PHYS 135 requires MATH 130 (Calculus).

Upper Division Coursework

The following 12 units of upper-division is required:

- INDE 390 - Human Factors and Work Methods *Units: 4 ; G.E./G.R. Area: B6*
- PSYC 320 - Physiological Psychology *Units: 4*
- PSYC 431 - Perception *Units: 4*

Elective Courses

Complete any one of the following groups for 6-8 units:

Computer Science Group

- CS 200 Advanced Programming for Everyone *Units: 3 OR*
- CS 201 Computer Science II *Units:4*
- Plus, 3-4 additional units of CS Courses

Engineering Group

- 6-8 units of INDE courses

Mathematics Group

- MATH 130 Calculus I *Units:4*
- MATH 131 Calculus II *Units:4 (see Errata chapter for notice)*

Psychology Group

- 8 additional units of upper-division PSYC courses, not including courses beginning with PSYC 491 or 493, or those marked "Not for psychology major or minor credit" in the catalog.

Statistics Group

- 6-8 units of STAT courses

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

Psychology, B.S.: Industrial/Organizational Psychology Concentration

Psychology, B.A./B.S. Programs (120 units)

Program Description

Psychology is the science of behavior and mental processes. Many psychologists work primarily with people to understand how they think, respond to stress, learn and forget, develop into unique personalities, and interact with one another. Others study the behavior and nervous systems of animals in order to find general principles that apply across species. Psychologists apply their knowledge to do therapy and counseling, to improve practices in schools, prisons, and rehabilitation centers, and to enhance performance in industrial and business settings.

The Psychology Department offers a major in both the Bachelor of Arts (B.A.) and the Bachelor of Science (B.S.) degrees. These are basic programs; to become a "psychologist" requires graduate training.

The B.A. program is appropriate for most psychology students. It provides a basic understanding of human behavior and motivation that is valuable in many careers in business, government, and education. It also provides the background expected for entry into graduate programs in clinical psychology, counseling psychology, school psychology, health psychology, social psychology, or experimental psychology.

The B.S. programs are designed for more specialized purposes. Students in the B.S. program must select one of the two concentrations in that program: Industrial/Organizational Psychology or Ergonomics and Human Factors. The concentration in Industrial/Organizational Psychology provides preparation for careers related to business, with an emphasis on personnel management. The concentration in Ergonomics and Human Factors provides preparation for careers in the design of work environments to take account of human limitations and strengths, for example, the design of equipment (computers, aircraft, automobiles) or the design of industrial procedures.

In Psychology's minor program, students can choose courses to complement training in business, communication, health and medicine, law and criminology, statistics, biology, and many other fields. Of special interest to students in that program might be our courses in developmental psychology, personality, cognitive processes, and learning.

Program Learning Outcomes

Students graduating with a B.A. or B.S. in Psychology will be able to:

- Identify key concepts, principles, and applications of psychology's content domains.
- Apply scientific reasoning to interpret psychological phenomena and to design and conduct basic psychological research.
- Evaluate the ethics of psychological science and practice.
- Demonstrate effective communication skills.
- Describe career options within psychology.

Career Opportunities

Bachelor of Arts:

Clinical/Counseling/Child Psychologist • Community Mental Health Employee • Experimental Psychologist • Human Service Worker • Police/Probation Officer • Recreation Worker • School Counselor • Social Worker • Special Education Teacher • Substance Abuse Counselor

Bachelor of Science:

Advertising Account Executive • Business Executive • Career Counselor • Employee Counselor and Trainer • Human Resource Specialist • Personnel Representative • Program Evaluator • Public Relations Specialist

Features

The Psychology Department's facilities include a fully equipped computer lab, an animal lab, and several labs for studying human behavior. These facilities support an unusual and important characteristic of the department - its emphasis on hands-on student involvement in the study of human and animal behavior

through participation in laboratory courses and faculty research, in field trips, and in community volunteer placements.

Both the Psychology Club and Psi Chi (national honor society in psychology) provide opportunities for students to get together to hear speakers and to discuss topics such as career and graduate school opportunities.

All courses required for the Psychology B.A. major are offered in the evening program, both at the Hayward and Concord campuses, over a two-year period. However, the range of choices and flexibility of scheduling is more limited in the evening program.

Advising

Psychology students are encouraged to visit a major advisor when they begin taking classes at CSUEB.

Major advising is handled by the full-time faculty in the department. Students may visit any advisor; advisors are not assigned, and students do not need to select one. Office hours and locations are available on the department website and in the department office.

Preparation

For Advanced Placement course equivalencies, see Registration.

Degree Requirements Units-Outline

- A baccalaureate of arts or science degree requires a total of 120 units;
- The Psychology (BA) major requirements consists of 52 units
- The Psychology (BS) major requirements consists of 55-64 units;
- General Education (GE) & Graduation Requirements (GR) consists of 57 units;
- Free Electives may consist of 11 units (BA) or 2-8 units (BS); (*actual number of free elective units may depend on GE/GR units*).

Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.

Psychology, B.S. Major Requirements (55-64 units)

Core Requirement

Complete the following 28 units:

- PSYC 100 - General Psychology Units: 3 ; G.E./G.R. Area: D1-3
- PSYC 200 - Methods of Investigation in Psychology Units: 3
- PSYC 300 - Experimental Psychology Units: 4
- PSYC 310 - Conditioning and Learning Units: 4
- PSYC 330 - Cognitive Psychology Units: 4
- PSYC 360 - Social Psychology Units: 4
- STAT 100 - Elements of Statistics and Probability Units: 3 ; G.E./G.R. Area: B4
- STAT 310 - Statistical Methods in the Social Sciences Units: 3

Advanced Lab Requirement

Plus, take one (1) of the following courses for 4 units:

- PSYC 491A - Research in Conditioning and Learning *Units: 4*
- PSYC 491B - Research in Physiological Psychology *Units: 4*
- PSYC 491C - Research in Cognitive Psychology *Units: 4*
- PSYC 491D - Research in Developmental Psychology *Units: 4*
- PSYC 491E - Research in Social & Personality Psychology *Units: 4*
- PSYC 491F - Research in Clinical Psychology *Units: 4*
- PSYC 493A - Research in Organizational Psychology *Units: 4*
- PSYC 493B - Research in Industrial Psychology *Units: 4*

Concentration Requirement

Students must select a concentration to complete the major for 23-32 units:

- Psychology, B.S.: Ergonomics and Human Factors Concentration
- Psychology, B.S.: Industrial/Organizational Psychology Concentration

Industrial/Organizational Psychology Concentration

The Industrial/Organization Psychology concentration requirements completing 23-24 units.

Upper Division Core Requirement

Take the required course below:

- PSYC 370 - Psychological Measurement *Units: 4*

Area Requirement

At least one course from the Area Requirements below must be either PSYC 469 or PSYC 479.

Industrial Topics

Take two (2) of the following courses for 8 units:

- PSYC 350 - Personality Psychology *Units: 4*
- PSYC 415 - Introduction to Applied Behavior Analysis *Units: 4*
- PSYC 471 - Decision Theory and Analysis *Units: 4*
- PSYC 472 - Motivation *Units: 4*
- PSYC 479 - Industrial Psychology *Units: 4*

Organizational Topics

Take two (2) of the following courses for 8 units:

- PSYC 461 - Culture and Social-Organizational Psychology *Units: 4*
- PSYC 462 - Psychology of Negotiation and Conflict Resolution *Units: 4*
- PSYC 463 - Interpersonal Processes *Units: 4*
- PSYC 469 - Group Dynamics *Units: 4*

Elective Courses

Take 4 additional units of upper-division PSYC courses, not including courses beginning with PSYC 491 or 493, or those marked "Not for psychology major or minor credit" in the catalog. Alternately, students may take one of the following courses for 3 units:

- MGMT 314 - Leadership and Management *Units: 3*
- MGMT 316 - Training and Development *Units: 3*
- MGMT 318 - Employee Relations and Employment Law *Units: 3*
- MGMT 400 - Seminar on Special Topics in Human Resource Management and Organizational Behavior *Units: 3*
- MGMT 406 - Compensation and Reward Systems *Units: 3*
- STAT 311 - Data Analysis using Statistical Packages *Units: 3*
- STAT 401 - Analysis of Variance for Psychology *Units: 3 ; G.E./G.R. Area: D4*
- STAT 473 - Introduction to Nonparametric Statistics *Units: 3*

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

- • PSYC 498 - Internship *Units: 1-4*

Minor

Psychology Minor

Minor Requirements (22 units)

The minor in Psychology is designed to provide a general background in psychology to complement training for careers in business and industry, biology, the medical professions, law or criminology, communication, and many other professions. See a psychology department advisor for help in selecting courses to complement your program. The minor consists of 22 units.

Lower Division Requirements

Take the following 6 units:

- PSYC 100 - General Psychology *Units: 3 ; G.E./G.R. Area: D1-3*
- PSYC 200 - Methods of Investigation in Psychology *Units: 3*

Upper Division Requirements

Take 16 additional units of upper-division PSYC courses, not including PSYC 300, courses beginning with PSYC 491 or 493, or those marked "Not for psychology major or minor credit" in the catalog.

Department Statement

Public Administration is a rich and challenging multi-disciplinary field drawing from sociology, anthropology, philosophy, psychology, economics, and urban and organizational studies. The master's degree program provides students with a grounding in major philosophical and social science thinking about the nature of organizations; it helps students to build the intellectual and practical tools they will need to become effective organizational leaders in the public and non-profit sectors. The M.P.A. program is designed to increase the personal and professional effectiveness of people working in public, voluntary, and private organizations. The purpose of the program is to prepare individuals for leadership positions in various organizations with a sense of commitment to social purpose, the public interest, and effective public problem-solving.

The MS-HCA program seeks to develop professionals who understand how to manage non-profit, for-profit, and voluntary health care organizations in effective and innovative ways. The program focuses on the need for health care administrators to be continuous learners, critical thinkers, and ethical practitioners by recognizing the multiply-constructed nature of human, social, and organizational realities and the complex relationships between the system of health providers and the needs of the community.

Health Care Administration, M.S. Program

Program Description

The M.S. in Health Care Administration (MS-HCA) program has been designed to prepare professionals to meet the present and emerging administration and management challenges in the rapidly changing health services delivery environment. Health services delivery is undergoing rapid growth and change in

the United States and around the world - a change that has accelerated in the 21st century. As a result, the responsibilities of health care administrators and managers are continuously being redefined. In this dynamic environment, health care administrators and managers must keep pace by gaining new knowledge, new skills, and new competencies.

The MS-HCA program exposes students to the latest theories, strategies, and technology in the field, with a focus on developing the professional skills desired by today's health care employers. Students in the MS-HCA program acquire the analytical skills needed to explore new models of culturally appropriate patient-centered service delivery systems, develop the leadership skills needed to discover and implement creative solutions to problems, and cultivate their ability to participate collaboratively in diverse work teams.

Career Opportunities

The need for health care administrators and managers is growing nationally, and even more so in California. According to the U.S. Department of Labor, health care is one of the largest industries in the U.S., and the second largest employer, with more than 11 million jobs. According to the Centers for Medicare & Medicaid Services (CMS), the average annual health spending growth (6.1%) is anticipated to outpace average annual growth in the overall economy (4.4%) for the projection period of 2009-2019. By 2019, national health spending is expected to reach \$4.5 trillion and comprise 19.3% of GDP.

While clinical care personnel are the frontline of the U.S. health care system, health care administrators and managers play a significant role. They plan, direct, coordinate, and supervise medicine and health services delivery in hospitals, clinics, managed care organizations, public health agencies, and other health care organizations. According to the Department of Labor's Occupational Outlook Handbook, employment in this field is expected to increase 17% from 2014 to 2024, faster than the average for all occupations, with a projected need of 56,300 additional positions and an estimated median annual wage of \$92,810. A master's degree in health care administration, health services management, public health or a similar degree is the standard credential for most positions in the field of health care administration and management.

Program Design

The MS-HCA program is based on the cohort model of education. In the MS-HCA program, students advance through the curriculum collectively. Students admitted at the same time will advance through the program as a group, following a MS-HCA Degree Completion Roadmap that is specific for their admission cohort. Students will enroll in two courses per semester.

The cohort model has a wide array of benefits, including:

- Mutual academic, emotional, and logistical support for program success and timely degree completion
- A clear programmatic structure; students know which courses should be completed and the semester in which the courses should be completed
- Enrollment in required courses is non-competitive
- Camaraderie and collaborative learning with colleagues
- Lasting personal ties and professional networks that aid in career development and ongoing professional growth

Unique Features

The MS-HCA degree is offered in two formats: the Hayward Campus-based format and the fully online format. The two formats are separate, meaning that a student cannot move from one format to the other. The curriculum is the same for both programs, as are the faculty.

Applicants in the Hayward Campus-based program are not required to have any professional experience in the field of health care. The fully online MS-HCA program requires applicants to have a minimum of two years of paid professional experience in the field of health care in the U.S.

Applicants who hold or are seeking international student visas are eligible for admission to the Hayward Campus-based program but they are not eligible for admission to the online MS-HCA program .

Most, but not all, of the courses offered at the Hayward Campus-based MS-HCA program are hybrid courses, meaning that some of the class sessions are in-person and some are fully online. In the online MS-HCA program, all of the courses are fully online.

Target Population

The MS-HCA program has been designed for people who:

- Have achieved an administration or management position in the health care field and are seeking to advance their careers into a higher-level leadership position
- Are working in health care field and are seeking to develop the knowledge base and skill sets needed for an administration or management position
- Lack prior health care experience but want to prepare for an administration or management position in this challenging industry (Hayward Campus-based program only)

Admission Requirements

The MS-HCA degree program is open to applicants planning a career or advancing an administration or management career in the health services delivery field who have a baccalaureate degree from an accredited institution. Admission will be granted based upon the Admission Committee's overall assessment of the applicant's qualifications and academic/career potential, using the following criteria:

- Cumulative undergraduate GPA of at least 2.50 is required and a GPA greater than 2.50 is preferred;
- Statement of Purpose in pursuing the MS-HCA degree (a 1-2 page essay double-spaced, explaining who you are, your career goals and how the MS-HCA degree will help you achieve those goals, and why you believe you will be successful in the program);
- Two letters of academic and/or professional recommendation (on professional letterhead). The letter writers should include how they know you, if they think you would be successful in the program and why they think that;
- Professional resume/vita;
- All undergraduate/graduate transcripts. (These must be sent directly to University Admissions NOT the Department.)

All applicants must submit an online Graduate Admission application declaring Health Care Administration as a degree objective at CALSTATE Apply along with a non-refundable application fee. In addition, applicants must submit a statement of purpose, 2 letters of reference and a resume directly to the Department of Public Affairs and Administration.

Please review the detailed application instructions on the Department's website at <http://www20.csueastbay.edu/class/departments/publicadmin/healthcare/index.html>

Student Standing and Progress Toward the Degree

There are three categories of student status, which reflect student progress toward the degree: "Conditionally Classified Graduate" student, "Classified Graduate" student, and "Advancement to Candidacy" student.

- Students achieve "Conditionally Classified Graduate" status when they have been admitted to the MS-HCA program, but have not yet completed the prerequisites for the "Classified Graduate" status in the MS-HCA program.
- Students achieve "Classified Graduate" status when they have successfully completed four of the required program courses with a grade of C or better, have a cumulative GPA of 3.00 or better, and have satisfied the University Writing Skills Requirement (UWSR). For information on meeting the UWSR, see the Testing Office website at www.csueastbay.edu/testing or call 510.885.3661.
- Students are "Advanced to Candidacy" when they have achieved "Classified Graduate" status, have successfully completed all of the required program courses with a grade of C or better and have a cumulative program GPA of 3.00 or better.

Program Learning Outcomes

The Health Care Leadership Alliance (HLA), a consortium of the major health care professional associations, has identified five competency domains in which all health care administrators and managers should have proficiency for workplace effectiveness: communication and relationship management, leadership, professionalism, knowledge of the health care environment, and business skills and knowledge. These competency domains serve as the basis of the MS-HCA program's six program learning outcomes.

Students graduating with a M.S. in Health Care Administration from California State University will be able to:

- Analyze and think critically about current and emerging issues in the health care system and the policy environment in which the system operates.
- Communicate effectively with internal and external organizational stakeholders, both in written and oral form.
- Form collaborative relationships and interact appropriately with diverse client groups, workplace supervisors and colleagues, and other organizational stakeholders.
- Create effective and creative approaches for fostering teamwork and encouraging others to align their priorities with organizational excellence.
- Align personal and organizational conduct with ethical, legal, and professional standards.
- Apply business principles to the health care environment, including financial management, human resource management, organizational dynamics and governance, strategic planning, information management, risk management, and quality improvement.

Health Care Administration Degree Requirements (34 units)

Required Courses

Students must complete all of the 28 units of required courses in the MS-HCA program in residence. No transfer or course substitution units will be accepted.

- HCA 611 - Evolution of the U.S. Health Care System, Health Disparities and Policy *Units: 4*
- HCA 612 - Health Care Management, Leadership and Strategic Planning *Units: 4*
- HCA 621 - Health Care Quality Improvement Tools and Methodologies *Units: 4*
- HCA 622 - Health Care Technology and Informatics *Units: 4*
- HCA 631 - Health Care Financial Management and Third-Party Reimbursement *Units: 4*
- HCA 641 - Health Care Legal, Diversity and Ethical Issues *Units: 4*
- HCA 642 - Health Care Program Development and Grant Writing *Units: 4*

Capstone Project

Students must achieve Classified Graduate status before they will be allowed to enroll in HCA 693. HCA 693 consists of two components: a field-based project and a comprehensive Program Learning Outcomes (PLOs) examination.

HCA 693 for 6 units requires two semesters of work: the semester of enrollment and the subsequent semester. In the enrollment semester, the student will receive a grade of "RP" (Report in Progress) if the student has been making adequate progress in the field-based project. Both the field-based project and the PLO examination must be successfully completed by the end of the semester immediately after the enrollment semester. If the work for HCA 693 has not been completed by the end of the second semester, the "RP" grade will convert to a grade of "F."

- HCA 693 - Capstone Project *Units: 6*

Other Graduate & Post-Baccalaureate Degree Requirements

In addition to departmental requirements, every student must also satisfy the University requirements for graduation as described throughout this catalog. These include the 70% unit residence requirement; the five-year rule on currency of subject matter; the minimum number of units in 600-level courses; the "C" minimum grade for each graduate course; the 3.00 cumulative grade point average; and the University Writing Skills Requirement.

Note: For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call (510) 885-3661.

Public Administration, M.P.A.: Health Care Administration Concentration

Public Administration, M.P.A. Program

Program Description

The Department of Public Administration offers a program of study leading to the degree of Master of Public Administration, with concentrations in public management and policy analysis (PMPA) and health care administration (HCA). The program is designed to assist full and part-time students in preparing for professional careers in positions of administrative leadership in public and quasi-public organizations, for teaching positions in the community colleges, and for advanced doctoral studies in public administration.

Graduate courses are offered Monday through Thursday evenings and some Saturdays to meet the needs of working adults.

Program Perspective

Public Administration is a rich and challenging multi-disciplinary field drawing from the disciplines of political science, sociology, anthropology, philosophy, psychology, economics, and urban and organizational studies. The Department focuses on expanding the meaning of public administration in government agencies and non-profit and community organizations. The MPA Program provides students with a grounding in major philosophical and social science thinking about the nature of organizations and helps students build the intellectual and practical policy tools needed to become effective organizational leaders in the public and non-profit sectors. The MPA Program is designed to increase students' personal and professional effectiveness as employees of public, non-profit, and private organizations. **The purpose of the Program is to prepare students for leadership positions in organizations with a commitment to social purpose, the public interest, and effective public problem solving.** Overall, emphasis is placed upon developing in its graduates sensitivities to a wide variety of human, social, and organizational realities in order to assist public organizations in formulating and achieving their goals and striving toward responsible social change.

The program builds on several assumptions:

- that many complex and far-reaching social problems require the stewardship of public agencies;
- that the citizens are the central focus of everything public administration does or ought to be;
- that public agencies should encourage democratic practices, personal education and growth, and the improvement in the quality of life within the public sector workplace;
- that public agencies should nurture and support a critical awareness on the part of public administrators, leading to an ability to challenge and change administrative practice; and
- that public administrators need to find creative and innovative ways to provide quality public services, especially in times of resource scarcity.

In sum, we believe the challenge of our changing post-industrial era is best met by humanizing public organizations, by strengthening their capacities for intelligent policy analysis and effective action on behalf of the public good, and by encouraging public administrators to embrace learning, creativity, and innovation.

Career Opportunities

The demand for the public administration degree and profession has continued to grow and much of the growth has been driven by the complex requirements for capable government employees to serve the needs of citizens. Public administrators manage nearly every aspect of public service at the federal, state and local levels offering the opportunity to help shape the future of our society. With vast numbers of citizens seeking help to access services at all levels of government and other public service organizations, the MPA program is designed to equip our graduates with skills in areas such as policy analysis, management analysis, public policy, public management, nonprofit management, eligibility assessment, and program assessment, just to name a few. In addition to meeting "demand" projections based on growth of job categories, the MPA program faculty are also interested in graduates enhancing their effectiveness for jobs they may already hold. Improving work effectiveness of seasoned professionals who seek the MPA program is another component of the opportunities we provide.

Admission Requirements

The MPA degree program is open to students planning careers in public organizations who have a baccalaureate degree from an accredited institution. Admission will be granted based upon the Admission Committee's overall assessment of the student's qualifications and academic/career potential, using the following criteria:

- Cumulative undergraduate GPA of at least 2.5;
- Students with GPA below 2.5 will not be considered for admission.
- Statement of Purpose in pursuing the MPA degree. In a 1-2 page essay double-spaced, please explain who you are, your career goals and how the MPA degree will help you achieve those goals;
- Two letters of academic and/or professional recommendation (on professional letterhead - company or educational institution stationery). The letter writers should include how they know you, if they think you would be successful in the program and why. Letters must be current, dated and signed.
- Professional resume/vita;
- All undergraduate/graduate transcripts. (These must be sent directly to University Admissions - NOT the Department.)

All applicants must submit an online Graduate Admission application declaring Public Administration as a degree objective, and transcripts, at CALSTATE Apply with a non-refundable fee. For the "Statement of Purpose" and "References" sections on the CALSTATE Apply application, applicants may put "submitted directly to the department."

In addition, applicants must also submit the above application materials (Statement of Purpose, 2 letters of reference and resume) directly to the Department of Public Affairs and Administration at the following address:

California State University East Bay
Department of Public Affairs and Administration
25800 Carlos Bee Boulevard, MI 4122
Hayward, CA 94542-3040

The Department cannot accept materials sent electronically. We prefer all documents be mailed to us but will accept faxed documents if necessary. The Department fax number is 510 885-3726.

PLEASE REMEMBER TO PUT YOUR NAME ON EACH AND EVERY PAGE OF ALL DOCUMENTS SUBMITTED TO THE DEPARTMENT!

PLEASE REMEMBER THAT BOTH YOUR ONLINE APPLICATION TO THE UNIVERSITY AND THE ABOVE MATERIALS TO BE SUBMITTED DIRECTLY TO THE DEPARTMENT MUST BE POSTMARKED OR RECEIVED BY THE APPLICATION DEADLINES.

Applicants will be notified of the Department's decision via email. Applicants will be required to confirm acceptance of admission by the deadline stated in the email or the offer may be withdrawn.

Student Standing and Progress Toward the Degree

There are three categories of student status, which reflect student progress toward the degree: "Conditionally Classified Graduate" student, "Classified Graduate" student, and "Advancement to Candidacy."

- Students achieve "Conditionally Classified Graduate" status when they have been admitted to the MPA program, but have not yet completed the prerequisites for the "Classified Graduate" status in the MPA program.
- Students achieve "Classified Graduate" status when they have successfully completed four of the required program courses with a grade of C or better, have a cumulative GPA of 3.00 or better, and have satisfied the University Writing Skills Requirement. For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call 510.885.3661.

- Students are "Advanced to Candidacy" when they have successfully completed all of the required program courses with a grade of C or better and have a cumulative GPA of 3.00 or better. Please note that a minimum of 22 units must be completed in residence after admission to the program.

Program Learning Outcomes

- MPA PLO 1: Lead and manage in public governance while demonstrating an understanding of the role of theory in humanizing public organizations and the application of these theories toward administrative inquiry
- MPA PLO 2: Participate in and contribute to the policy process
- MPA PLO 3: Analyze, synthesize, think critically, solve problems and demonstrate an understanding of interpretive and quantitative research methodologies
- MPA PLO 4: Articulate and apply a public service perspective that integrates social purpose, the public interest, and effective participative problem solving
- MPA PLO 5: Communicate and interact productively with a diverse and changing workforce and citizenry with a commitment to social equity and justice

Public Administration Degree Requirements (32 units)

Core Courses

The following 20 units of core coursework are required:

- PA 611 - Public Administration Philosophy, Theory, and Practice *Units: 4*
- PA 612 - Research Methods in Public Administration *Units: 4*
- PA 621 - Seminar in Human Organizations, Change, and Social Realities *Units: 4*
- PA 622 - Seminar in the Public Policy Process *Units: 4*

Plus complete one (1) of the following:

- PA 695 - Internship in Public Administration *Units: 4*
- PA 697 - Issues in Public Administration *Units: 4*

Concentrations

Select one (1) of the following concentrations for 8 units:

- Public Administration, M.P.A.: Health Care Administration Concentration
- Public Administration, M.P.A.: Public Management and Policy Analysis Concentration

Capstone Requirement

Complete one (1) course for 4 units from the following to complete the program:

- PA 692 - Graduate Synthesis *Units: 4*
- PA 699 - Department Thesis *Units: 4*

Health Care Administration

Complete the following 8 units that are required to fulfill the concentration:

- HCA 611 - Evolution of the U.S. Health Care System, Health Disparities and Policy *Units: 4*

Plus choose one (1) of the following:

- HCA 612 - Health Care Management, Leadership and Strategic Planning *Units: 4*
- HCA 631 - Health Care Financial Management and Third-Party Reimbursement *Units: 4*
- HCA 641 - Health Care Legal, Diversity and Ethical Issues *Units: 4*

Macheo Payne, Ed.D. San Francisco State University (MSW)

Department Statement

The Department of Social Work offers instruction at the graduate level to a diverse multicultural and multiracial student population, leading to the Master of Social Work (MSW) degree. Through teaching, advising and the field experience, MSW faculty members promote a sense of activism, social justice, commitment to change, and a vision of professional competence for students admitted to the program. The CSUEB MSW degree focuses on urban social work practice with vulnerable and/or oppressed populations. The two-year program requires 60 units of coursework. There are two concentrations of choice: Children, Youth and Families or Community Mental Health. Within the program of study, students engage in both academic classes and field experience. This melding of coursework and field experience prepares students for effective social work practice in today's increasingly diverse, complex multicultural and multiracial society.

Master

Social Work, M.S.W.: Children, Youth, and Families Concentration

Social Work, M.S.W. Program

Program Description

The Department of Social Work offers graduate study leading to the Master of Social Work (M.S.W.). This program trains social workers for leadership and direct practice positions in social work and is accredited by the Council on Social Work Education. The program has a multicultural focus, preparing graduates to work in both non-profit and public agencies and to be proficient in serving diverse populations in urban communities.

The mission of the California State University, East Bay Master of Social Work program is to graduate culturally responsive urban social workers in the areas of Children, Youth, and Families and Community Mental Health. Social work graduates are prepared to address individual, family, group, and community needs caused by inequalities of class and identity including race, ethnicity, gender, age, (dis)ability, sexual orientation, and other forms of social injustice. Advocacy and social change around these injustices form the core of the MSW program.

Our vision is to create a cadre of diverse leaders to be catalysts for social change and transform oppressive systems in partnership with the communities we serve.

Career Opportunities

Graduates of the M.S.W. program are prepared to work with individuals, families, groups, and organizations in both public and non-profit practice. The State of California is experiencing a shortage of individuals prepared for leadership roles in social work practice. The State also has a critical shortage of social workers trained at the master's level, and the demand is expected to increase. Social Workers are needed to work with a variety of populations, including individuals with serious health and behavioral health issues, children and families involved in the child welfare system, older adults, individuals with disabilities, and people living in poverty.

Admission Requirements

The M.S.W. degree program is open to students planning a career in social work who have a baccalaureate degree from an accredited institution and who have earned an overall grade point average of 2.8 (on a 4.0 scale). Students with a GPA below 2.8 may be admitted based on an evaluation of their student profile, including work experience, resume, letters of recommendation, and personal statement (see below).

In addition to the online university application at CALSTATE Apply all applicants should submit:

- A completed departmental application form;
- A personal statement (3 pages) with their application stating their reasons for pursuing the M.S.W. degree, describing their relevant work experience, and explaining their past academic performance;

- Three letters of recommendation (letters from prior instructors and/or supervisors preferred); and
- A resume. Successful experience in social work or social work-related positions will be considered in evaluating applications.

Admission to the university and admission to the M.S.W. degree program are separate steps. It is suggested that application for admission to the university be filed together with the form for entry into the degree program.

Student Standing and Progress Toward the Degree

There are three categories of student status that reflect student progress toward the degree.

- Students are in "Conditionally Classified Graduate" status when they have been admitted to the M.S.W. degree program, but have not yet completed the prerequisites for the "Classified Graduate" status in the M.S.W. degree program.
- Students achieve "Classified Graduate" status when they have satisfactorily completed all the prerequisites for the M.S.W. degree program and satisfied the University Writing Skills Requirement. (See "Prerequisites for 'Classified Graduate' Status" below.)
- Students are "Advanced to Candidacy" when they have completed the core courses with a "C" or better in all courses.

Please note that a minimum of 42 units must be completed in residence after admission to the program.

Note: If the student fails to maintain progress by falling below a 3.0 GPA in the graduate courses for two or more consecutive semesters, it will lead to academic disqualification from the university.

Program Learning Outcomes

- **Values and Ethics:** Demonstrate ethical decision making and behavior guided by the NASW Code of Ethics and other relevant codes.
- **Professional Use of Self:** Apply use of self as an autonomous professional tool of engagement and collaboration, demonstrated by self-awareness, bias-reduction, sound judgment, the ability to integrate supervisory feedback, and a commitment to ongoing learning.
- **Critical Thinking:** Critically analyze and synthesize information related to evidence-informed social work intervention, prevention, assessment, planning, policies, evaluation and research.
- **Applying Theory:** Apply theoretical material to urban social work practice, grounded in a strength-based, empowering, and ecological systems perspective.
- **Advocacy:** Advocate for sustainable well-being, build capacity and advance social justice for clients and communities, and create innovative solutions in complex social contexts.
- **Diversity:** Engage with diverse populations from positions of cultural humility and respect for identity, embracing a commitment to culturally competent and responsive services.
- **Communication:** Demonstrate effective written and oral communication across diverse client and social service systems.

Social Work Degree Requirements (60 units)

Prerequisites or Foundation Requirements

As prerequisites to "Classified Graduate" status, students must satisfy the University Writing Skills Requirement and have satisfactorily completed STAT 1000 or equivalent, and a course in human biology or anatomy and physiology with a grade of "C" or better. For information on meeting the University

Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call 510.885.3661.

Core Courses

The following 32 units of coursework are required:

- SW 600 - Human Behavior and the Social Environment *Units: 4*
- SW 601 - Race, Gender, and Inequality *Units: 4*
- SW 602 - Introduction to Social Welfare Policy *Units: 4*
- SW 603 - Introduction to Social Welfare Research *Units: 4*
- SW 611 - Generalist Practice I *Units: 4*
- SW 612 - Generalist Practice II *Units: 4*
- SW 695A - Social Work Practicum I *Units: 4*
- SW 695B - Social Work Practicum II *Units: 4*

Elective Courses

Select one (1) course for 4 units from the following:

- SW 630 - The Recovery Model in Community Mental Health *Units: 4*
- SW 631 - Advanced Psychosocial Assessment and Diagnosis *Units: 4*
- SW 632 - Family Violence Across the Lifespan *Units: 4*
- SW 633 - Assessment and Treatment of Substance Abuse in Social Work Practice *Units: 4*
- SW 634 - Legal Issues in Social Work Practice *Units: 4*
- SW 697 - Issues in Social Work *Units: 1-4*

Capstone Requirement

Students have three choices for completing a capstone experience in the MSW program. The first choice is the Integrative Seminar, SW 693. This integrative seminar provides students with the opportunity to demonstrate mastery of the core student learning outcomes of the MSW program. Students, in cooperation with faculty and agency supervisors, complete an agency-focused project or research on a topic focused on social work practice and advocacy.

The second is the Departmental Thesis, SW 699. Students may either sign up individually with a faculty advisor or meet with their advisor in a scheduled graduate course. A faculty member serves as director of the departmental thesis. An oral defense is required. Two copies of the departmental thesis are required for the department.

The third and final choice is a University Thesis, SW 691. This choice is supervised by a faculty committee and follows a university specified format.

Note: A grade of "RP" (Report in Progress) may be given for a thesis that is not completed at the end of the semester. The "RP" grade must be changed to a passing grade within five (5) years of your initial enrollment in a thesis course, or it will become an "F."

Choose one (1) capstone experience for 4 units from below:

- SW 691 - University Thesis *Units: 4*
- SW 693 - Integrative Project *Units: 4*
- SW 699 - Departmental Thesis *Units: 4*

Concentrations

Students must select one (1) concentration for 20 units listed below:

- Social Work, M.S.W.: Children, Youth, and Families Concentration
- Social Work, M.S.W.: Community Mental Health Concentration

Children, Youth, and Families Concentration

Concentration Requirements

Take the following 20 units of coursework to complete the concentration requirements:

- SW 621A - Advanced Practice I: Children, Youth, and Families: Individuals and Families *Units: 4*
- SW 621B - Advanced Practice II: Children, Youth, and Families: Groups, Organizations, and Communities *Units: 4*
- SW 689 - Community-Based Research in Social Work Practice *Units: 4*
- SW 695C - Social Work Practicum III *Units: 4*
- SW 695D - Social Work Practicum IV *Units: 4*

Other Graduate & Post-Baccalaureate Degree Requirements

In addition to departmental requirements, every student must also satisfy the University requirements for graduation as described throughout this catalog. These include the 70% unit residence requirement; the five-year rule on currency of subject matter; the minimum number of units in 600-level courses; the "C" minimum grade for each graduate course; the 3.00 cumulative grade point average; and the University Writing Skills Requirement.

Note: For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call (510) 885-3661.

Mission Statement

The mission of the B.A. program in Sociology is to provide a stimulating and nurturing learning atmosphere for a highly diverse group of students. The program seeks to have students develop and express a love of learning and a respect for a wide range of intellectual perspectives, including a variety of theories and scientific methodologies. We are dedicated to providing students with tools and opportunities to critically examine social life, including a wide range of social problems. Students learn about the workings of social institutions, patterns of group life, social change, and the social causes and consequences of human behavior.

Bachelor

Sociology, B.A.

Sociology, B.A. Program (120 units)

Program Description

The mission of the B.A. program in Sociology is to provide a stimulating and cooperative learning atmosphere for a highly diverse group of students. The program seeks to foster a lifelong love of learning about the social, cultural, political, and economic institutions humans have created and the directions they are changing. The program's goal is for students to think deeply about ways social structures and processes influence individuals' lives and opportunities, and how individuals can contribute to building more inclusive and satisfying communities and organizations. The program's faculty members are dedicated to providing students with tools that will empower and prepare them to be active citizens in their families, communities, organizations, and workplaces, and to expand their understanding of community engagement to include national and global projects aimed at addressing larger social problems. The wide range of courses and flexible program structure prepare successful students to enter master's and doctoral programs in several fields including Sociology, Social Work, Anthropology, Law, Political Science, Counseling, Education, and Public Administration.

Students will increase their appreciation of the value of all human beings and a commitment to an inclusive and just society that addresses the needs of all groups of people. In acquiring a deep understanding of the structure of groups, organizations, and societies, and human interaction within these contexts, students develop their capacity for more personally rewarding and socially responsible participation and leadership in their families, their work, their communities, and society as a whole.

The Department of Sociology offers a wide range of courses that allow students to pursue different pathways depending on their interests and future plans. Students have a great deal of flexibility to take courses that fit their needs as there are groups of interrelated courses in these areas: 1. Preparation for Social Work and Counseling; 2. Culture and Society; 3. Social Inequality; 4. Sex, Gender, Family; 5. Global and Urban; 6. Institutions and Organizations; 7. Politics, Civic Engagement, Social Control.

Additional Programs: Minor in Sociology

Program Learning Outcomes:

- Students will demonstrate an ability to evaluate "knowledge" claims of sociological analyses by critically assessing their
 - 1) analytical framework,
 - 2) data collection techniques,
 - 3) sampling techniques, and
 - 4) data analyses used in empirical research projects.
- Students will demonstrate oral and written abilities to effectively communicate and engage in educated, open-minded discussions of diverse sociocultural beliefs, perspectives, and norms.
- Students will possess knowledge of cultural differences and an understanding of how power, privilege, and culture produce social inequalities and stigmatization, and how structures of domination are effectively challenged.
- Students will work collaboratively in diverse groups, learn to value civic engagement, and, when appropriate to their educational path, successfully engage in community service.
- Students will demonstrate knowledge of local, national, and global policies and practices that contribute to environmental degradation; the unequal distribution of the consequences of environmental degradation; and strategies for developing sustainable alternatives.
- Students will demonstrate an ability to critically read, interpret and synthesize abstract sociological arguments and theories, and use sociological theories and models to develop research questions.

Career Opportunities

Social Services • Counselors • Administrative Support • Management • Human Resources • Teachers • Librarians • Sales • Marketing • Social Science Research • Public Relations • Information Technology • Various other professions and preparation for admission to graduate programs in a variety of fields including, but not limited to Law, Sociology, Social Work, Public Administration.

Degree Requirements Unit-Outline

- A baccalaureate of arts degree requires a total of 120 units;
 - The Sociology major requirements consists of 42 units;
 - General Education (GE) & Graduation Requirements (GR) consists of 57 units;
 - Free Electives may consist of 21 units (*actual number of free elective units may depend on GE/GR units*).
- Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.*

Sociology Major Requirements (42 units)

Core Courses

The following 14 units of core coursework are required:

- SOC 100 - Introduction to Sociology *Units: 3 ; G.E./G.R. Area: D1-3*
- STAT 100 - Elements of Statistics and Probability *Units: 3 ; G.E./G.R. Area: B4*
- SOC 300 - Sociological Theory *Units: 4*
- SOC 390 - Sociological Research Methods *Units: 4*

Diversity and Social Justice Coursework

Take two (2) courses for 8 units from the following list:

- SOC 320 - Social Inequalities *Units: 4 ; G.E./G.R. Area: Social Justice*
- SOC 325 - Race and Ethnic Relations *Units: 4 ; G.E./G.R. Area: Diversity*
- SOC 330 - Environmental Sociology *Units: 4*
- SOC 340 - Sociology of Gender *Units: 4 ; G.E./G.R. Area: Diversity*
- SOC 350 - Sociology of Immigration *Units: 4 ; G.E./G.R. Area: Diversity*
- SOC 355 - Global Society *Units: 4 ; G.E./G.R. Area: Sustainability*
- SOC 360 - Sociology of Sexualities *Units: 4*
- SOC 370 - Sociology of Education *Units: 4 ; G.E./G.R. Area: Diversity*
- SOC 380 - Sociology of Race, Crime and Justice *Units: 4*
- SOC 420 - Political Sociology *Units: 4 ; G.E./G.R. Area: Social Justice*
- SOC 433 - Community Engagement *Units: 4 ; G.E./G.R. Area: Social Justice*
- SOC 450 - Sociology of Food *Units: 4*
- SOC 475 - Sociology of Sport *Units: 4*
- SOC 480 - Global Brazil *Units: 4 ; G.E./G.R. Area: Social Justice*

Elective Courses

Students must complete a minimum of 16 units of upper division electives. After completing the Diversity and Social Justice coursework requirement, additional Diversity and Social Justice courses count as electives.

Note: Please see Errata for corrections to this course content.

- SOC 345 - American Society *Units: 3 ; G.E./G.R. Area: D4*
- SOC 365 - Deviance and Social Control *Units: 4*
- SOC 375 - Urban Sociology *Units: 4*
- SOC 385 - Childhood and Society *Units: 4*
- SOC 400 - Economy and Society *Units: 4 ; G.E./G.R. Area: Social Justice*
- SOC 403 - Sociology of the Family *Units: 4*
- SOC 405 - Sociology of Organizations *Units: 4*
- SOC 408 - Animals and Society *Units: 4*
- SOC 410 - Child Welfare Policy *Units: 4*

- SOC 413 - Medical Sociology *Units: 4 ; G.E./G.R. Area: Social Justice*
- SOC 415 - Popular Culture *Units: 4*
- SOC 418 - Sociology of Music *Units: 4*
- SOC 423 - Social Movements and Social Change *Units: 4*
- SOC 425 - Work and Professions *Units: 4*
- SOC 430 - Social Policy *Units: 4*
- SOC 435 - Social Psychology *Units: 4*
- SOC 440 - Alcohol and Drug Use *Units: 4*
- SOC 443 - Death and Dying *Units: 4*
- SOC 445 - Sociology of Emotions *Units: 4*
- SOC 455 - Juvenile Delinquency *Units: 4*
- SOC 460 - Marriage and Sex *Units: 4 ; G.E./G.R. Area: Diversity*
- SOC 465 - Mediation and Conflict Resolution *Units: 4*
- SOC 470 - Sociology of Travel and Tourism *Units: 4*
- SOC 485 - Policing and Society *Units: 4*
- SOC 490 - Independent Study *Units: 1-4*
- SOC 491 - Professional Development *Units: 1*
- * SOC 492 - Capstone Project Support *Units: 1*
- SOC 496 - Topics Seminar *Units: 4*
- SOC 497 - Issues in Sociology *Units: 4*

Capstone Requirement

The following capstone course for 4 units is required to complete the major requirements:

- SOC 499 - Sociology Capstone Project *Units: 4*

** Note: Students who want additional support while completing their capstone project should take SOC 492 as an elective when enrolled in SOC 499. SOC 492 is strongly recommended for students who do not earn a grade of B or higher in SOC 390.*

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

Minor

Sociology Minor

Minor Requirements (18-19 units)

Core Course

The following core course is required:

- SOC 100 - Introduction to Sociology *Units: 3 ; G.E./G.R. Area: D1-3*

Diversity Coursework

Choose one (1) of the following for 4 units:

- SOC 320 - Social Inequalities *Units: 4 ; G.E./G.R. Area: Social Justice*
- SOC 325 - Race and Ethnic Relations *Units: 4 ; G.E./G.R. Area: Diversity*
- SOC 330 - Environmental Sociology *Units: 4*
- SOC 340 - Sociology of Gender *Units: 4 ; G.E./G.R. Area: Diversity*

Electives

Take three (3) additional SOC 300 or 400 courses as electives. STAT 100 or any other statistics course may be substituted for one Sociology elective. Choose 11-12 units of elective coursework:

- SOC 300 - Sociological Theory *Units: 4*
- SOC 350 - Sociology of Immigration *Units: 4 ; G.E./G.R. Area: Diversity*
- SOC 355 - Global Society *Units: 4 ; G.E./G.R. Area: Sustainability*
- SOC 360 - Sociology of Sexualities *Units: 4*
- SOC 365 - Deviance and Social Control *Units: 4*
- SOC 370 - Sociology of Education *Units: 4 ; G.E./G.R. Area: Diversity*
- SOC 375 - Urban Sociology *Units: 4*
- SOC 380 - Sociology of Race, Crime and Justice *Units: 4*
- SOC 385 - Childhood and Society *Units: 4*
- SOC 400 - Economy and Society *Units: 4 ; G.E./G.R. Area: Social Justice*
- SOC 403 - Sociology of the Family *Units: 4*
- SOC 405 - Sociology of Organizations *Units: 4*
- SOC 408 - Animals and Society *Units: 4*

- SOC 410 - Child Welfare Policy *Units: 4*
- SOC 413 - Medical Sociology *Units: 4 ; G.E./G.R. Area: Social Justice*
- SOC 415 - Popular Culture *Units: 4*
- SOC 418 - Sociology of Music *Units: 4*
- SOC 420 - Political Sociology *Units: 4 ; G.E./G.R. Area: Social Justice*
- SOC 423 - Social Movements and Social Change *Units: 4*
- SOC 425 - Work and Professions *Units: 4*
- SOC 430 - Social Policy *Units: 4*
- SOC 433 - Community Engagement *Units: 4 ; G.E./G.R. Area: Social Justice*
- SOC 435 - Social Psychology *Units: 4*
- SOC 440 - Alcohol and Drug Use *Units: 4*
- SOC 443 - Death and Dying *Units: 4*
- SOC 445 - Sociology of Emotions *Units: 4*
- SOC 450 - Sociology of Food *Units: 4*
- SOC 455 - Juvenile Delinquency *Units: 4*
- SOC 460 - Marriage and Sex *Units: 4 ; G.E./G.R. Area: Diversity*
- SOC 465 - Mediation and Conflict Resolution *Units: 4*
- SOC 470 - Sociology of Travel and Tourism *Units: 4*
- SOC 475 - Sociology of Sport *Units: 4*
- SOC 480 - Global Brazil *Units: 4 ; G.E./G.R. Area: Social Justice*
- SOC 485 - Policing and Society *Units: 4*
- SOC 490 - Independent Study *Units: 1-4*
- SOC 491 - Professional Development *Units: 1*
- SOC 496 - Topics Seminar *Units: 4*
- SOC 497 - Issues in Sociology *Units: 4*

Please Note:

Sociology minors cannot take SOC 499, Sociology Capstone Project or the one (1) unit Capstone Project Support course, SOC 492.

Sociology minors cannot take SOC 345, American Society. (This course is for upper division Area D4 only.)

Department of Speech, Language, and Hearing Sciences

Department Office is located in the Music & Business building, Room 1099

Office Hours: 8:00 a.m. - 5:00 p.m., Monday through Friday

Dept Phone: (510) 885-3233

Faculty

Associate Professors

Elena Dukhovny, Ph.D. University of California, Berkeley/San Francisco State University

Shubha P. Kashinath (Chair), Ph.D. Florida State University

Assistant Professors

Katrina Nicholas, Ph.D. University of Arizona

Pradeep Ramanathan, Ph.D. University of Minnesota

Mission Statement

The Department of Speech, Language, and Hearing Sciences provides students pre-professional and professional training in speech-language pathology and audiology, which is founded on state and national standards, evidence-based practice, research, and science and technology, to prepare them to serve persons with communication disorders and their families in an ethical and culturally competent manner.

Bachelor

Speech Pathology and Audiology, B.S.

Speech Pathology and Audiology, B.S. Program (120 units)

Program Description

Speech pathology and audiology are clinical professions with a goal of screening, assessing and treating children and adults with disorders of speech, language, hearing, cognition and swallowing. Speech-language pathologists and audiologists have varied career interests and pursuits including working in healthcare, special education settings, in higher education, in public service, or private industry. Basic and applied research, codes of ethics, and a commitment to evidence-based and culturally competent practice form the backbone of these professions. These professions contribute to our understanding of typical and atypical communication, as well as the influence of culture on communication, and on strategies that enhance quality of life for persons affected by communication disorders and differences.

The majority of students select this degree program for professional training in speech pathology and/or audiology. Others select this major because it supports the development of a strong skill set in basic and applied science, professional conduct, and writing skills while engaging critical thinking, creativity, planning, and decision making. Coursework in the discipline draws from academic disciplines as biology, physics, psychology, statistics, linguistics, sociology, anthropology, medicine and law. The strength of the program is its rich, interdisciplinary nature that emphasizes a powerful combination of science with liberal arts, humanities, and the social sciences while providing clear depth in the major. Many of our undergraduate majors successfully pursue careers other than speech-language pathology, in fields of education, special education, health care administration, public health, social work, recreational therapy, applied behavior analysis, counseling, and case management.

Career Opportunities

Academic Coach/Tutor (for persons with disabilities) • Applied Behavior Analysis (ABA) Therapist • Audiologists • Clinical Consultant • Research Assistant • School Audiometrist • Speech-Language Pathologists (SLPs) • Speech-Language Pathology Assistant (SLPA) • Therapy Aide

Features

The department operates the Norma S. and Ray R. Rees Speech, Language and Hearing Clinic (named for Cal State East Bay President Emeritus Dr. Norma Rees), an on-campus facility that provides clinical services to persons seeking intervention for disorders and differences of speech, language, hearing, cognition, and swallowing. Undergraduate students enrolled in the program are able to observe, receive didactic and clinically relevant training, and do research in this fully-equipped facility. The program maintains a fully equipped speech and hearing sciences laboratory, an Augmentative and Alternative Communication laboratory, and an Early Social Communication Research Clinic for students who wish to pursue research interests. The award-winning Aphasia Treatment Program and the Conversation Club (for adults with autism) are special programs of our on-campus clinic.

The Bachelor of Science degree major in Speech Pathology provides students with a background in theoretical and clinical areas fundamental to the understanding and management of communicative disorders and differences, and serves as the pre-professional training necessary for admission to graduate studies in Speech-Language Pathology and/or Audiology.

Program Learning Outcomes

Students graduating with a B.S. in Speech Pathology and Audiology from California State University East Bay will be able to:

- Demonstrate the foundational knowledge for entry-level professional training in speech-language pathology and audiology
- Integrate knowledge from natural, behavioral and social sciences with contemporary theory and practice in speech-language pathology and audiology
- Demonstrate quantitative and critical thinking skills to address complex problems in Speech Pathology and Audiology
- Describe typical and atypical communicative and cognitive development and behavior across the lifespan
- Articulate the importance of cultural competence, ethics and advocacy in serving a diverse population
- Communicate ideas, contemporary perspectives and professional values clearly and persuasively in speech and writing
- Demonstrate skills in working collaboratively with peers, professionals and community partners

Degree Requirements Unit-Outline

- A baccalaureate of arts degree requires a total of 120 units:
- The major requirements consists of 54 units
- General Education (GE) & Graduation Requirements (GR) consists of 57 units;
- Free Electives may consist of 9-18 units (*actual number of free elective units may depend on how GE/GR major units might be double-counted*).

Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AAC&E advisors for information.

Speech Pathology and Audiology Major Requirements (54 units)

Core Coursework

All students must take the following courses for 54 units:

Lower-division coursework:

- BIOL 101 - Introduction to Biology *Units: 3 ; G.E./G.R. Area: B2*
- BIOL 102 - Introduction to Biology Lab *Units: 1 ; G.E./G.R. Area: B3*
- BIOL 270 - Human Anatomy & Physiology I *Units: 4 ; G.E./G.R. Area: B2, B3*
- PSYC 100 - General Psychology *Units: 3 ; G.E./G.R. Area: D1-3*
- STAT 100 - Elements of Statistics and Probability *Units: 3 ; G.E./G.R. Area: B4*

Upper-division coursework:

- PHYS 304 - Acoustics *Units: 3 ; G.E./G.R. Area: B6*
- SPPA 300 - Communicative and Cognitive Development Across the Lifespan
Units: 3
- SPPA 301 - Anatomy and Physiology of Speech and Hearing *Units: 3*
- SPPA 302 - Phonetics and Phonological Disorders *Units: 3*
- SPPA 303 - Speech and Hearing Science *Units: 3*
- SPPA 304 - Introduction to Communication Disorders *Units: 3*

- SPPA 305 - Observation of Communication Disorders-Lab *Units: 1*
- SPPA 400 - Careers in Communication Disorders *Units: 2*
- SPPA 401 - Neuroanatomy and Neurophysiology of Speech, Language and Hearing *Units: 3*
- SPPA 402 - Audiology and Audiological Assessment *Units: 3*
- SPPA 403 - Audiometry Lab *Units: 1*
- SPPA 404 - Child Language Disorders *Units: 3*
- SPPA 405 - Multicultural Issues in Communicative Sciences and Disorders *Units: 3*
- SPPA 406 - Adult Neurocognitive Disorders *Units: 3*
- SPPA 407 - Clinical Methods and Diagnostics *Units: 3*

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

- • SPPA 407 - Clinical Methods and Diagnostics *Units: 3*
- • SPPA 490 - Independent Study *Units: 1-4*

- • SPPA 497 - Issues in Speech-Language Pathology *Units: 2*
- • SPPA 508 - Lifespan Development and Child Language Disorders *Units: 4*

Speech-Language Pathology: Graduate

- • SPPA 600 - Foundations of Clinical Practicum *Units: 2*
- • SPPA 601 - Assessment and Treatment of Child Language Disorders *Units: 4*
- • SPPA 602 - Adult Neurogenic Disorders of Language and Cognition *Units: 4*
- • SPPA 603 - Advanced Seminar on Articulation and Phonological Disorders *Units: 2*
- • SPPA 604 - Speech Science and Voice Disorders *Units: 4*
- • SPPA 605 - Dysphagia in Adults and Children *Units: 4*
- • SPPA 606 - Augmentative and Alternative Communication *Units: 3*
- • SPPA 607 - Advanced Seminar on Cultural and Linguistic Diversity *Units: 2*
- • SPPA 608 - Research Methods and Evidence-based Practice *Units: 3*
- • SPPA 609 - Motor Speech Disorders in Adults and Children *Units: 3*
- • SPPA 610 - Fluency Disorders *Units: 2*
- • SPPA 611 - Aural Rehabilitation *Units: 3*
- • SPPA 612 - Counseling in Speech-Language Pathology *Units: 2*
- • SPPA 690 - Independent Study *Units: 1-4*
- • SPPA 693 - Professional Practices *Units: 2*
- • SPPA 694 - Practicum: Introduction to Treatment *Units: 2*
- • SPPA 695 - Practicum: Treatment *Units: 2*
- • SPPA 696 - Practicum: Assessment *Units: 2*
- • SPPA 697 - Issues in Speech-Language Pathology *Units: 2*
- • SPPA 698 - Internship *Units: 6*
- • SPPA 699 - Department Thesis *Units: 2*

Credential

Speech-Language Pathology Services Credential

The Speech-Language Pathology Services Credential track prepares students to apply for California's Speech-Language Pathology Services Two-year Preliminary Credential and requires the completion of the M.S. degree in Speech-Language Pathology, including at least one school-based internship.

Credential Requirements

In addition to the completion of the Speech-Language Pathology, M.S. degree requirements, students must fulfill the *California Basic Skills Requirement*, have a *Certificate of Clearance* on file with the State of California, and complete the following course for 4 units:

- SPED 500 - Educating All Learners in Diverse Classrooms *Units: 4*

- • SPPA 695 - Practicum: Treatment *Units: 2*
- • SPPA 696 - Practicum: Assessment *Units: 2*
- • SPPA 697 - Issues in Speech-Language Pathology *Units: 2*
- • SPPA 698 - Internship *Units: 6*

- • SPPA 699 - Department Thesis *Units: 2*

Master

Speech-Language Pathology, M.S.

*** Please see the Errata chapter in this catalog for information concerning total units.*

Speech-Language Pathology, M.S. Program

Program Description

The Master of Science degree in Speech-Language Pathology is offered by the Department of Speech, Language and Hearing Sciences. The objective of this degree program is the professional preparation of each student, academically and clinically, for state licensure (CA), national certification in Speech-Language Pathology by the American Speech Language Hearing Association (ASHA), and the Speech-Language-Hearing Services credential to work in public school settings in California.

Speech-language pathology and Audiology are clinical professions, with goals of making effective communication a human right for all persons, and for competently serving children and adults with disorders and differences of speech, language, hearing, cognition, and swallowing.

This program has rigorous and balanced academic and clinical training. The Master's degree program is accredited by the American Speech-Language-Hearing Association and the California Commission on Teacher Credentialing (CCTC).

Career Opportunities

Students who complete the Master of Science degree in Speech-Language Pathology are eligible for ASHA certification, California state licensure, and in most cases the Speech-Language Pathology Services Credential to work in public schools. Speech-language pathologists work in a variety of settings including hospitals, skilled nursing facilities, university-based clinics, rehabilitation centers, community speech and hearing clinics, early intervention settings, public schools, and private practice.

Features

Clinical experiences are a key component in preparing students for licensure. The department operates the Norma S. and Ray R. Rees Speech, Language and Hearing Clinic, an on-campus facility that provides clinical services to individuals with speech, language, cognitive and hearing impairments from Bay Area communities. Students who are enrolled in the Speech-Language Pathology master's program are able to observe, receive training, and do research in this fully-equipped facility. Additional clinical training is conducted in off-site placements and internships in settings that meet each student's interests and training requirements, including hospitals, rehabilitation facilities, schools, and clinics.

Program Learning Outcomes

Students graduating with a Master of Science degree in Speech-Language Pathology from California State University East Bay will be able to:

- Competently screen, assess and treat communication, cognition and swallowing across the lifespan
- Demonstrate effective verbal and written communication with clients, their families, and other professionals
- Demonstrate proficiency in working collaboratively with peers, professionals and community partners
- Evaluate, integrate and apply scientific evidence, clinical expertise and client values for optimal service delivery
- Uphold the highest ethical professional standards, including recognition of one's professional competence
- Demonstrate commitment to acquire cultural competence and to advocate for those affected by communicative, cognitive and swallowing disorders

Admission Requirements

Students with a baccalaureate degree in any subject from an accredited college or university may apply. Foundational coursework minimum requirements, which can be completed through a baccalaureate degree, post-baccalaureate coursework, or after admission, include content in:

- Anatomy and Physiology of Speech and Hearing
- Phonetics/Phonological Disorders
- Child Language Development/Disorders
- Speech and Hearing Science
- Clinical Observation (25 hours)
- Neuroanatomy/Neurophysiology and Adult Neurocognitive Disorders
- Audiology/Audiometry
- Clinical Methods/Diagnostics

Application for admission includes two parts:

- Apply to the university directly at CAL STATE APPLY,
- Apply to the department, which typically includes a department application form, a statement of purpose, a resume of applicable experience, three letters of recommendation, GRE scores, transcripts of all colleges attended, and select pages from the CAL STATE APPLY application summary. A personal interview may also be held. Links to both university and department application processes are available on the department website.

There are three categories of student status while pursuing the degree:

"Conditionally Classified" Status

Students are in "Conditionally Classified" status when they have been admitted to the M.S. in Speech-Language Pathology degree program, but have not yet completed the requirements for "Classified Graduate" status. All graduate students are admitted in "conditionally classified" status.

"Classified Graduate" Status

Students obtain "Classified Graduate" status when they:

- have completed foundational coursework in communication disorders corresponding in scope with the baccalaureate degree in speech-language pathology offered at Cal State East Bay,
- have shown evidence of meeting essential functions required for the profession,
- have completed SLHS 694 and 695 with a grade of "B" or better,
- have fulfilled the University Writing Skills Requirement.

Advancement to Candidacy

Students reach "Advancement to Candidacy" status if they:

- maintain a 3.0 grade point average in all graduate work completed,
- complete ASHA Certificate of Clinical Competence requirements in the areas of the biological sciences, physical sciences, statistics, and social/behavior sciences.

Speech-Language Pathology Degree Requirements (66 units)**

Required Core Courses

The **46 total units** of the program core includes 42 units of SLP coursework plus 4 units of required coursework for state-level credentialing with the CA CTC offered by the Educational Psychology department (SPED 500). This breadth of academic coursework covers current professional practice and curricular standards, required for the program to retain its national accreditation (CAA) and state-level accreditation (CTC).

- SPED 500 - Educating All Learners in Diverse Classrooms *Units: 4*
- SPPA 600 - Foundations of Clinical Practicum *Units: 2*
- SPPA 601 - Assessment and Treatment of Child Language Disorders *Units: 4*
- SPPA 602 - Adult Neurogenic Disorders of Language and Cognition *Units: 4*
- SPPA 603 - Advanced Seminar on Articulation and Phonological Disorders *Units: 2*
- SPPA 604 - Speech Science and Voice Disorders *Units: 4*
- SPPA 605 - Dysphagia in Adults and Children *Units: 4*
- SPPA 606 - Augmentative and Alternative Communication *Units: 3*
- SPPA 607 - Advanced Seminar on Cultural and Linguistic Diversity *Units: 2*
- SPPA 608 - Research Methods and Evidence-based Practice *Units: 3*
- SPPA 609 - Motor Speech Disorders in Adults and Children *Units: 3*
- SPPA 610 - Fluency Disorders *Units: 2*
- SPPA 611 - Aural Rehabilitation *Units: 3*
- SPPA 612 - Counseling in Speech-Language Pathology *Units: 2*
- SPPA 693 - Professional Practices *Units: 2*
- SPPA 697 - Issues in Speech-Language Pathology *Units: 2*

Required Clinical Practicum

The **20 total units** of Clinical Practicum includes 6 units of Treatment, 2 units of Assessment, and 2 off-campus clinical internships (in two different settings) for 6 units each.

- SPPA 694 - Practicum: Introduction to Treatment *Units: 2*
 - SPPA 696 - Practicum: Assessment *Units: 2*
- Students should take each of the following two courses twice to complete 16 units:
- SPPA 695 - Practicum: Treatment *Units: 2 (x2)*
 - SPPA 698 - Internship *Units: 6 (x2)*

Capstone Requirement

All candidates for the MS degree must meet the capstone requirements for 0-2 units. Students must pass the Master's Comprehensive exam OR complete an oral presentation of a finished Master's thesis or project, which demonstrates eligibility for clinical licensure and certification in Speech Language Pathology. If thesis is selected as the capstone requirement, thesis units may substitute for the elective course unit requirement in the graduate program as determined by the thesis advisor.

- SPPA 699 - Department Thesis *Units: 2*
- Comprehensive Exam

Other Graduate & Post-Baccalaureate Degree Requirements

In addition to departmental requirements, every student must also satisfy the University requirements for graduation as described throughout this catalog. These include the 70% unit residence requirement; the five-year rule on currency of subject matter; the minimum number of units in 600-level courses; the "C" minimum grade for each graduate course; the 3.00 cumulative grade point average; and the University Writing Skills Requirement.

Note: For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call (510) 885-3661.

Graduate Coordinator: Lynn Eudey

Department Statement

There are many job opportunities locally for Statisticians in many diverse areas of application, such as Actuarial Science, Biostatistics, Bioinformatics, Data Analysis, Data Science, Medical Statistics, Pharmaceutical, Biotech, Finance, Banking, Government, Education, Consulting, and many others. Students are encouraged to consider the fields of Statistics and Biostatistics as a program of study, whether graduate or undergraduate. Many of the Department's undergraduate students are double-majors. Computer Science, Math, and Psychology majors, in particular, have found double-majoring with Statistics to be valuable in getting a job or pursuing higher degrees.

Bachelor

Statistics, B.S.

Statistics, B.S. Program (120 units)

Program Description

Statistics is the science of learning from data. Majors study collecting and analyzing a variety of data, and reporting the results of the analysis. Designs of Experiments are used to plan data collection in experimental settings, such as in medical research. Surveys are used to collect opinions from samples in populations, such as in political polling. Observational data is collected commonly by business as part of standard business processes, such as in website analytics. Statistical methods are used to process data into easily read visual displays, and into summary statistics for interpretation, decision making, and reporting.

Statistics has been a rapidly growing science for many years and has many uses in other fields, such as Business Analytics, Machine Learning, Visualization, Econometrics, Biostatistics, Psychology, and many others. Statistics is widely used by businesses and government organizations to understand changes in the economy and to make forecasts about future events based on past patterns in their data. Statistics is used to model relationships between variables and to predict future values of output variables from input variables. Statistical methods draw accurate inferences about large groups on the basis of a representative sample from the group or population. Descriptive Statistics are used to summarize and visualize the collected data.

The methodology of statistics can be adapted to many types of problems. Due to the extensive development of computers and the collection of large databases, the need for statistical techniques has greatly expanded in recent years. A society like ours, which has become increasingly dependent on its data, has a growing need for statisticians.

Program Learning Outcomes

Students graduating with a B.S. in Statistics from Cal State East Bay will be able to:

- Apply basic computational skills in descriptive statistics and data visualization, hypothesis testing, confidence intervals, modeling and error analysis, including the use of large data sets.
- Analyze data using appropriate software, including cloud-based software, and to interpret results covering descriptive statistics and data visualization, hypothesis testing, confidence intervals, modeling and error analysis, including the use of large data sets.
- Communicate to others results involving descriptive statistics and data visualization, hypothesis testing, confidence intervals, modeling and error analysis using reproducible research best practices.
- Acquire data using methods of design of experiments, survey sampling, or observational data, including data scraping and data wrangling from open source data and free data sources.

Career Opportunities

Actuary • Biostatistician • Business Analyst • Census Analyst • Credit Analyst • Customer Analytics Specialist • Data Analyst • Data Manager • Data Scientist • Data Visualization Designer • Educational Researcher • Financial Modeler • Information Systems Analyst • Marketing Analytics Specialist • Quality

Control Specialist • R programmer • Research Statistician • Sales Analyst • Statistical Programmer • Sports Analyst • Statistician • Survey Designer • Systems Analyst • Teacher

Preparation

- For Advanced Placement course equivalencies, see the Registration chapter.
- The theory of statistics rests on a mathematical foundation. Even for statisticians whose primary interest is in applications, challenging mathematical problems arise continually. Calculus and computer programming are required for the major. An elementary course in linear algebra is highly recommended.
- Courses in areas to which statistics is applied will also be helpful. Examples are business, biology, chemistry, geography, social sciences, psychology, and physics.
- Community college students are advised to complete the lower division requirements for the major before transferring to Cal State East Bay.

Credit/No Credit Courses

It is the policy of the department that no course taken on a "CR/NC" basis may be applied towards any of the Upper Division Core requirements. Individual petitions for waiver of this policy will be treated according to the same procedures as petitions to waive other degree requirements.

Double Major

A knowledge of statistical methods is of increasing importance to students in many areas, especially the physical, computing, decision, environmental, biological, and social sciences and administrative studies (including business, health care, and education). A second major in statistics along with a major in one of these areas may result in better preparation for employment or graduate study. The following three factors combine to make such a double major feasible in many cases:

- The Statistics major allows for a relatively large number of unrestricted elective units. The student may elect courses required for the other major among these.
- Up to fifteen units in certain areas outside of Statistics may be applied toward the Statistics degree. (See Area of Emphasis requirement, 4.)
- Some other majors require Statistics courses that also count towards the Statistics major (e.g., STAT 310, STAT 303, STAT 320, STAT 330, etc.).
- Contact an advisor to develop a clear plan for completing the major.

Degree Requirements Unit-Outline

- A baccalaureate of arts degree requires a total of 120 units:
 - The major requirements consists of 48-49 units
 - General Education (GE) & Graduation Requirements (GR) consists of 57 units;
 - Free Electives may consist of 14-15 units (*actual number of free elective units may depend on GE/GR units*).
- Note: It may be possible to double-count units within the graduation requirements or a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.*

Statistics Major Requirements (48-49 units)

Please consult an advisor in the department for clarification and interpretation of the major requirements.

Introductory Core

Basic lower-division requirements for 9-10 units.

Take the following course:

- **CS 100 - Programming for Everyone** *Units: 3*

Select one (1) of the following (CS 200 recommended for Data Science Concentration):

- **MATH 130 - Calculus I** *Units: 4 ; G.E./G.R. Area: B4*
- **CS 200 - Advanced Programming for Everyone** *Units: 3*

Select one (1) course from the following (STAT 315 recommended for Data Science Concentration):

- **MATH 131 - Calculus II** *Units: 3*
- **STAT 303 - Statistical Methods in Biology** *Units: 3*
- **STAT 310 - Statistical Methods in the Social Sciences** *Units: 3*
- **STAT 315 - Exploring and Analyzing Data** *Units: 3*

Advanced Core

The following courses for 24 units are required as outlined below:

Take all of the following:

- **STAT 330 - Statistical Inference** *Units: 3*
- **STAT 331 - Introduction to Analysis of Variance** *Units: 3*
- **STAT 432 - Introduction to Linear Regression and Logistic Regression** *Units: 3*
- **STAT 495 - Data Analysis with SAS** *Units: 3*

Select one (1) of the following (STAT 321 recommended for Data Science Concentration):

- **STAT 320 - Introduction to Probability Theory I** *Units: 3*
- **STAT 321 - Probability Through Simulation** *Units: 3*

Select three (3) Elective Courses from the following:

- **STAT 351 - Sampling Procedures for Surveys** *Units: 3*
- **STAT 450 - Introduction to R for Data Science** *Units: 3*
- **STAT 451 - Introduction to Data Visualization** *Units: 3*
- **STAT 452 - Introduction to Statistical Learning** *Units: 3*
- **STAT 460 - Advanced Statistical Package Usage** *Units: 3*
- **STAT 473 - Introduction to Nonparametric Statistics** *Units: 3*
- **STAT 474 - Introduction to Time Series and Forecasting** *Units: 3*
- **STAT 475 - Introduction to Stochastic Processes** *Units: 3*
- **STAT 481 - Bayesian Statistics** *Units: 3*

Emphasis Coursework

Only students NOT completing the Data Science concentration are required to complete an emphasis area. Complete one (1) of the following for 15 units:

- Fifteen (15) units of approved Statistics courses in addition to those used for the requirements above. MATH 230 may be included in these 15 units and is especially recommended for students wishing to apply to the master's degree program in Statistics.

OR

- Fifteen (15) units of approved Mathematics courses in addition to those used for the requirements above. MATH 230 must be included in these 15 units.

OR

- Fifteen (15) units of approved Computer Science courses in addition to those used for the requirements above.

OR

- Fifteen (15) units of approved courses in an approved area. Areas currently approved include the following: Anthropology, Biological Sciences, Business Administration, Chemistry, Economics, Geography, Geological Sciences, Health Sciences, Physics, Psychology, Sociology. For other areas, contact the Department of Statistics and Biostatistics. To gain departmental approval, these courses must include at least one upper division course and be judged to constitute a coherent program of study. (With the approval of the department, upper division Statistics courses not counted above, except STAT 310 and STAT 303 may be applied toward these fifteen units.)

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

Statistics, B.S.: Data Science Concentration

Statistics, B.S. Program (120 units)

Program Description

Statistics is the science of learning from data. Majors study collecting and analyzing a variety of data, and reporting the results of the analysis. Designs of Experiments are used to plan data collection in experimental settings, such as in medical research. Surveys are used to collect opinions from samples in populations, such as in political polling. Observational data is collected commonly by business as part of standard business processes, such as in website analytics. Statistical methods are used to process data into easily read visual displays, and into summary statistics for interpretation, decision making, and reporting.

Statistics has been a rapidly growing science for many years and has many uses in other fields, such as Business Analytics, Machine Learning, Visualization, Econometrics, Biostatistics, Psychology, and many others. Statistics is widely used by businesses and government organizations to understand changes in the economy and to make forecasts about future events based on past patterns in their data. Statistics is used to model relationships between variables and to predict future values of output variables from input variables. Statistical methods draw accurate inferences about large groups on the basis of a representative sample from the group or population. Descriptive Statistics are used to summarize and visualize the collected data.

The methodology of statistics can be adapted to many types of problems. Due to the extensive development of computers and the collection of large databases, the need for statistical techniques has greatly expanded in recent years. A society like ours, which has become increasingly dependent on its data, has a growing need for statisticians.

Program Learning Outcomes

Students graduating with a B.S. in Statistics from Cal State East Bay will be able to:

- Apply basic computational skills in descriptive statistics and data visualization, hypothesis testing, confidence intervals, modeling and error analysis, including the use of large data sets.
- Analyze data using appropriate software, including cloud-based software, and to interpret results covering descriptive statistics and data visualization, hypothesis testing, confidence intervals, modeling and error analysis, including the use of large data sets.

- Communicate to others results involving descriptive statistics and data visualization, hypothesis testing, confidence intervals, modeling and error analysis using reproducible research best practices.
- Acquire data using methods of design of experiments, survey sampling, or observational data, including data scraping and data wrangling from open source data and free data sources.

Career Opportunities

Actuary • Biostatistician • Business Analyst • Census Analyst • Credit Analyst • Customer Analytics Specialist • Data Analyst • Data Manager • Data Scientist • Data Visualization Designer • Educational Researcher • Financial Modeler • Information Systems Analyst • Marketing Analytics Specialist • Quality Control Specialist • R programmer • Research Statistician • Sales Analyst • Statistical Programmer • Sports Analyst • Statistician • Survey Designer • Systems Analyst • Teacher

Preparation

- For Advanced Placement course equivalencies, see the Registration chapter.
- The theory of statistics rests on a mathematical foundation. Even for statisticians whose primary interest is in applications, challenging mathematical problems arise continually. Calculus and computer programming are required for the major. An elementary course in linear algebra is highly recommended.
- Courses in areas to which statistics is applied will also be helpful. Examples are business, biology, chemistry, geography, social sciences, psychology, and physics.
- Community college students are advised to complete the lower division requirements for the major before transferring to Cal State East Bay.

Credit/No Credit Courses

It is the policy of the department that no course taken on a "CR/NC" basis may be applied towards any of the Upper Division Core requirements. Individual petitions for waiver of this policy will be treated according to the same procedures as petitions to waive other degree requirements.

Double Major

A knowledge of statistical methods is of increasing importance to students in many areas, especially the physical, computing, decision, environmental, biological, and social sciences and administrative studies (including business, health care, and education). A second major in statistics along with a major in one of these areas may result in better preparation for employment or graduate study. The following three factors combine to make such a double major feasible in many cases:

- The Statistics major allows for a relatively large number of unrestricted elective units. The student may elect courses required for the other major among these.
- Up to fifteen units in certain areas outside of Statistics may be applied toward the Statistics degree. (See Area of Emphasis requirement, 4.)
- Some other majors require Statistics courses that also count towards the Statistics major (e.g., STAT 310, STAT 303, STAT 320, STAT 330, etc.).
- Contact an advisor to develop a clear plan for completing the major.

Degree Requirements Unit-Outline

- A baccalaureate of arts degree requires a total of 120 units;
- The major requirements consists of 48-49 units
- General Education (GE) & Graduation Requirements (GR) consists of 57 units;
- Free Electives may consist of 14-15 units (*actual number of free elective units may depend on GE/GR units*).

Note: It may be possible to double-count units within the graduation requirements or a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.

Statistics Major Requirements (48-49 units)

Please consult an advisor in the department for clarification and interpretation of the major requirements.

Introductory Core

Basic lower-division requirements for 9-10 units.

Take the following course:

- **CS 100 - Programming for Everyone** *Units: 3*

Select one (1) of the following (CS 200 recommended for Data Science Concentration):

- **MATH 130 - Calculus I** *Units: 4 ; G.E./G.R. Area: B4*
- **CS 200 - Advanced Programming for Everyone** *Units: 3*

Select one (1) course from the following (STAT 315 recommended for Data Science Concentration):

- **MATH 131 - Calculus II** *Units: 3*
- **STAT 303 - Statistical Methods in Biology** *Units: 3*
- **STAT 310 - Statistical Methods in the Social Sciences** *Units: 3*
- **STAT 315 - Exploring and Analyzing Data** *Units: 3*

Advanced Core

The following courses for 24 units are required as outlined below:

Take all of the following:

- **STAT 330 - Statistical Inference** *Units: 3*
- **STAT 331 - Introduction to Analysis of Variance** *Units: 3*
- **STAT 432 - Introduction to Linear Regression and Logistic Regression** *Units: 3*
- **STAT 495 - Data Analysis with SAS** *Units: 3*

Select one (1) of the following (STAT 321 recommended for Data Science Concentration):

- **STAT 320 - Introduction to Probability Theory I** *Units: 3*
- **STAT 321 - Probability Through Simulation** *Units: 3*

Select three (3) Elective Courses from the following:

- **STAT 351 - Sampling Procedures for Surveys** *Units: 3*
- **STAT 450 - Introduction to R for Data Science** *Units: 3*

- STAT 451 - Introduction to Data Visualization *Units: 3*
- STAT 452 - Introduction to Statistical Learning *Units: 3*
- STAT 460 - Advanced Statistical Package Usage *Units: 3*
- STAT 473 - Introduction to Nonparametric Statistics *Units: 3*
- STAT 474 - Introduction to Time Series and Forecasting *Units: 3*
- STAT 475 - Introduction to Stochastic Processes *Units: 3*
- STAT 481 - Bayesian Statistics *Units: 3*

Data Science Concentration

Complete fifteen (15) units of approved courses in Computer Science and/or Statistics. If not already used as part of the "3 electives" in the Advanced Core, the following courses must be used here:

- STAT 450 - Introduction to R for Data Science *Units: 3*
- STAT 451 - Introduction to Data Visualization *Units: 3*
- STAT 452 - Introduction to Statistical Learning *Units: 3*

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

Master

Biostatistics, M.S.

Biostatistics, M.S. Program

Program Description

The Department of Statistics and Biostatistics offers graduate study leading to the degree Master of Science in Biostatistics. The program is designed to serve the needs of students with varying backgrounds in Statistics, Biological Sciences, Public Health, Computer Science, Mathematics and other sciences. The program includes curriculum designed to prepare students to work in the pharmaceutical and biotech industries. All students are expected to master a wide variety of applied statistical and probabilistic techniques and the theoretical foundations on which these techniques rest. They are expected to be familiar with recent developments and to be able to use the statistical literature to learn new techniques and theories throughout their professional careers. In addition to the general requirements stated elsewhere in this catalog, a student must satisfy the departmental requirements stated in the following paragraphs.

Career Opportunities

Statistician • Biostatistician • Data Analyst • Data Scientist • Teacher.

Admission Requirements

- A baccalaureate degree or equivalent.
- Differential and Integral Calculus (MATH 130, 131).
- Departmental approval.

In addition to the above minimum requirements for admission, if students have some of the following background they will be at an advantage both as to selection for admission to the program and optimal progress toward the degree if admitted:

- interest or experience in a setting where studies or experiments are conducted for the collection of data.
- multiple integration and infinite series
- matrix algebra
- basic statistics and probability
- knowledge of a computer programming language

Student Standing and Progress Toward the Degree

Advancement to Candidacy Requirements

- Completion of at least 16 semester units of approved coursework beyond the baccalaureate, with an average of "B" (3.0) or higher.
- Fulfillment of the University Writing Skills Requirement. For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call 510.885.3661.
- Departmental approval.

Cause for Dismissal from Program

Students may be dismissed from the program at any time "for cause." "For cause" includes, but is not limited to, poor academic performance, violation of the student code of conduct, academic dishonesty, and/or interference with the educational environment.

Program Learning Outcomes

Students graduating with an M.S. in Biostatistics from Cal State East Bay will be able to:

- Apply biostatistical methodology to data to (a) produce descriptive statistics, probability models, and visual displays (b) select probability distributions to implement statistical inference (estimation and hypothesis testing), and (c) critique biostatistical models for uncertainty, likelihood, modeling and error analysis at the Master's level.
- Evaluate practical problems arising in biostatistics to select and formulate models for solutions using these methodologies.
- Select and generate biostatistical software output and evaluate the results appropriately.
- Derive basic theory, explain biostatistical concepts, and clearly communicate analytical results to others.

Biostatistics Degree Requirements (32 units)

Foundation Requirements

The M.S. in Biostatistics program consists of at least 32 semester units of approved upper division and graduate work. The university requirement for the minimum number of 600-level units applies. All work applied toward the 32 units must be at an average grade of "B" (3.0) or higher. No graduate-level required course may be at a grade below "B-."

Core Courses

The following 26 units are required:

- BSTA 661 - Categorical Data Analysis *Units: 2*
- BSTA 662 - Survival Analysis *Units: 2*
- BSTA 663 - Clinical Trials in the Pharmaceutical and Biomedical Industries *Units: 2*
- STAT 620 - Probability and Statistical Theory *Units: 4*
- STAT 630 - Statistical Methods *Units: 4*
- STAT 631 - Analysis of Variance Models *Units: 4*

- STAT 632 - Linear and Logistic Regression *Units: 4*
- STAT 640 - Advanced Statistical Theory *Units: 4*

Elective Courses

Select two (2) courses for 4 units from the following:

- BSTA 668 - Longitudinal Data Analysis *Units: 2*
- STAT 650 - Advanced R for Data Science *Units: 2*
- STAT 660 - Advanced SAS I *Units: 2*
- STAT 675 - Advanced Stochastic Processes and Simulation *Units: 2*

Capstone Requirement

The following capstone for 2 units is required to complete the program:

- STAT 692 - Comprehensive Exam Review *Units: 2*

Other Graduate & Post-Baccalaureate Degree Requirements

In addition to departmental requirements, every student must also satisfy the University requirements for graduation as described throughout this catalog. These include the 70% unit residence requirement; the five-year rule on currency of subject matter; the minimum number of units in 600-level courses; the "C" minimum grade for each graduate course; the 3.00 cumulative grade point average; and the University Writing Skills Requirement.

Note: For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call (510) 885-3661.

Statistics, M.S.

Statistics, M.S. Program

Program Description

The Department of Statistics and Biostatistics offers graduate study leading to the degree Master of Science in Statistics. The program is flexible in order to serve the needs of students with varying backgrounds (including statistics, mathematics, computer science, engineering, business, economics and other quantitative fields) and with different career objectives. The program includes concentrations in Actuarial Science, Applied Statistics, Data Science, and Mathematical Statistics. All students are expected to master a wide variety of applied statistical, computational, and probabilistic techniques and the theoretical foundations upon which these techniques are based. Students are expected to be familiar with recent developments in the field and to be able to use the statistical literature to learn new techniques and theories throughout their professional careers. In addition to the general requirements stated elsewhere in this catalog, students must satisfy the departmental requirements stated in the following paragraphs.

Students interested in pursuing an M.S. degree in Biostatistics should see the Biostatistics chapter in the university catalog.

Career Opportunities

Actuary • Biostatistician • Business Analyst • Census Analyst • Credit Analyst • Customer Analytics Specialist • Data Analyst • Data Manager • Data Scientist • Data Visualization Designer • Educational Researcher • Financial Modeler • Information Systems Analyst • Marketing Analytics Specialist • Quality Control Specialist • R programmer • Research Statistician • Sales Analyst • SAS Programmer • Statistical Programmer • Sports Analyst • Statistician • Survey Designer • Systems Analyst • Teacher

Admission Requirements

- A baccalaureate degree or equivalent.
- Differential and Integral Calculus (MATH 130, 131).
- Departmental approval.

In addition to the above minimum requirements for admission, if students have some of the following background they will be at an advantage both as to selection for admission to the program and optimal progress toward the degree if admitted:

- interest or experience in a setting where studies or experiments are conducted for the collection of data.

- multiple integration and infinite series
- matrix algebra
- basic statistics and probability
- knowledge of a computer programming language

Student Standing and Progress Toward the Degree

Advancement to Candidacy Requirements

- Completion of at least 16 semester units of approved coursework beyond the baccalaureate, with an average of "B" (3.0) or higher.
- Fulfillment of the University Writing Skills Requirement. For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call 510.885.3661.
- Departmental approval.

Cause for Dismissal from Program

Students may be dismissed from the program at any time "for cause." "For cause" includes, but is not limited to, poor academic performance, violation of the student code of conduct, academic dishonesty, and/or interference with the educational environment.

Program Learning Outcomes

Students graduating with an M.S. in Statistics from Cal State East Bay will be able to:

- Apply statistical methodologies, including a) descriptive statistics and graphical displays, b) probability models for uncertainty, stochastic processes, and distribution theory, c) hypothesis testing and confidence intervals, d) ANOVA and regression models (including linear, and multiple linear) and analysis of residuals from models and trends at the Master's level.
- Derive basic theory underlying these methodologies.
- Model practical problems for solutions using these methodologies.
- Produce relevant computer output using standard statistical software and interpret the results appropriately.
- Communicate statistical concepts and analytical results clearly and appropriately to others; and,
- Employ theory, concepts, and terminology at a level that supports lifelong learning of related methodologies.

Statistics Degree Requirements (32 units)

Foundation Requirements

The M.S. in Statistics program consists of at least 32 semester units of approved upper division and graduate work. The university requirement for the minimum number of 600-level units applies. All work applied toward the 32 units must be at an average grade of "B" (3.0) or higher. No graduate-level required course may be at a grade below "B-."

Core Courses

The following 22 units are required:

- STAT 620 - Probability and Statistical Theory *Units: 4*
- STAT 630 - Statistical Methods *Units: 4*
- STAT 631 - Analysis of Variance Models *Units: 4*
- STAT 632 - Linear and Logistic Regression *Units: 4*
- STAT 640 - Advanced Statistical Theory *Units: 4*

And, one of:

- STAT 641 - Bootstrapping Methods *Units: 2*
- STAT 675 - Advanced Stochastic Processes and Simulation *Units: 2*

Concentrations

Students may select one (1) concentration listed below for 8 units, or students may choose no concentration that requires 8 units of approved electives to complete the degree:

- Statistics, M.S. (*See "Additional Electives"*)
- Statistics, M.S.: Actuarial Science Concentration
- Statistics, M.S.: Applied Statistics Concentration
- Statistics, M.S.: Data Science Concentration
- Statistics, M.S.: Mathematical Statistics Concentration

Capstone Requirements

The following capstone for 2 units is required:

- STAT 692 - Comprehensive Exam Review *Units: 2*

Additional Electives

Students who do not select a concentration must take 8 units of electives approved by a department advisor to complete the degree.

Other Graduate & Post-Baccalaureate Degree Requirements

In addition to departmental requirements, every student must also satisfy the University requirements for graduation as described throughout this catalog. These include the 70% unit residence requirement; the five-year rule on currency of subject matter; the minimum number of units in 600-level courses; the "C" minimum grade for each graduate course; the 3.00 cumulative grade point average; and the University Writing Skills Requirement.

Note: For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call (510) 885-3661.

- Communicate statistical concepts and analytical results clearly and appropriately to others; and,
- Employ theory, concepts, and terminology at a level that supports lifelong learning of related methodologies.

Statistics Degree Requirements (32 units)

Foundation Requirements

The M.S. in Statistics program consists of at least 32 semester units of approved upper division and graduate work. The university requirement for the minimum number of 600-level units applies. All work applied toward the 32 units must be at an average grade of "B" (3.0) or higher. No graduate-level required course may be at a grade below "B-."

Core Courses

The following 22 units are required:

- STAT 620 - Probability and Statistical Theory *Units: 4*
- STAT 630 - Statistical Methods *Units: 4*
- STAT 631 - Analysis of Variance Models *Units: 4*
- STAT 632 - Linear and Logistic Regression *Units: 4*
- STAT 640 - Advanced Statistical Theory *Units: 4*

And, one of:

- STAT 641 - Bootstrapping Methods *Units: 2*
- STAT 675 - Advanced Stochastic Processes and Simulation *Units: 2*

Concentrations

Students may select one (1) concentration listed below for 8 units, or students may choose no concentration that requires 8 units of approved electives to complete the degree:

- Statistics, M.S. (*See "Additional Electives"*)
- Statistics, M.S.: Actuarial Science Concentration
- Statistics, M.S.: Applied Statistics Concentration
- Statistics, M.S.: Data Science Concentration
- Statistics, M.S.: Mathematical Statistics Concentration

Capstone Requirements

The following capstone for 2 units is required:

- STAT 692 - Comprehensive Exam Review *Units: 2*

Actuarial Science Concentration

8 units to be completed from the following:

Choose three (3) courses for 6 units from the following:

- BSTA 661 - Categorical Data Analysis *Units: 2*
- BSTA 662 - Survival Analysis *Units: 2*
- BSTA 668 - Longitudinal Data Analysis *Units: 2*
- STAT 673 - Nonparametric Statistical Methods *Units: 2*
- STAT 674 - Time Series *Units: 2*
- STAT 676 - Advanced Probability *Units: 4*

Choose a minimum of 2 units from:

- An additional course listed above
- An approved course from the College of Business and Economics
- STAT 672 - Advanced Multivariate Statistics *Units: 2*

Note: Courses not listed above require advance approval from the graduate advisor.

Other Graduate & Post-Baccalaureate Degree Requirements

In addition to departmental requirements, every student must also satisfy the University requirements for graduation as described throughout this catalog. These include the 70% unit residence requirement; the five-year rule on currency of subject matter; the minimum number of units in 600-level courses; the "C" minimum grade for each graduate course; the 3.00 cumulative grade point average; and the University Writing Skills Requirement.

Note: For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call (510) 885-3661.

Statistics, M.S.: Applied Statistics Concentration

Statistics, M.S. Program

Program Description

The Department of Statistics and Biostatistics offers graduate study leading to the degree Master of Science in Statistics. The program is flexible in order to serve the needs of students with varying backgrounds (including statistics, mathematics, computer science, engineering, business, economics and other quantitative fields) and with different career objectives. The program includes concentrations in Actuarial Science, Applied Statistics, Data Science, and Mathematical Statistics. All students are expected to master a wide variety of applied statistical, computational, and probabilistic techniques and the theoretical foundations upon which these techniques are based. Students are expected to be familiar with recent developments in the field and to be able to use the statistical literature to learn new techniques and theories throughout their professional careers. In addition to the general requirements stated elsewhere in this catalog, students must satisfy the departmental requirements stated in the following paragraphs.

Students interested in pursuing an M.S. degree in Biostatistics should see the Biostatistics chapter in the university catalog.

Career Opportunities

Actuary • Biostatistician • Business Analyst • Census Analyst • Credit Analyst • Customer Analytics Specialist • Data Analyst • Data Manager • Data Scientist • Data Visualization Designer • Educational Researcher • Financial Modeler • Information Systems Analyst • Marketing Analytics Specialist • Quality Control Specialist • R programmer • Research Statistician • Sales Analyst • SAS Programmer • Statistical Programmer • Sports Analyst • Statistician • Survey Designer • Systems Analyst • Teacher

Admission Requirements

- A baccalaureate degree or equivalent.
- Differential and Integral Calculus (MATH 130, 131).
- Departmental approval.

In addition to the above minimum requirements for admission, if students have some of the following background they will be at an advantage both as to selection for admission to the program and optimal progress toward the degree if admitted:

- interest or experience in a setting where studies or experiments are conducted for the collection of data.
- multiple integration and infinite series
- matrix algebra
- basic statistics and probability
- knowledge of a computer programming language

Student Standing and Progress Toward the Degree

Advancement to Candidacy Requirements

- Completion of at least 16 semester units of approved coursework beyond the baccalaureate, with an average of "B" (3.0) or higher.
- Fulfillment of the University Writing Skills Requirement. For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call 510.885.3661.
- Departmental approval.

Cause for Dismissal from Program

Students may be dismissed from the program at any time "for cause." "For cause" includes, but is not limited to, poor academic performance, violation of the student code of conduct, academic dishonesty, and/or interference with the educational environment.

Program Learning Outcomes

Students graduating with an M.S. in Statistics from Cal State East Bay will be able to:

- Apply statistical methodologies, including a) descriptive statistics and graphical displays, b) probability models for uncertainty, stochastic processes, and distribution theory, c) hypothesis testing and confidence intervals, d) ANOVA and regression models (including linear, and multiple linear) and analysis of residuals from models and trends at the Master's level.
- Derive basic theory underlying these methodologies.
- Model practical problems for solutions using these methodologies.
- Produce relevant computer output using standard statistical software and interpret the results appropriately.
- Communicate statistical concepts and analytical results clearly and appropriately to others; and,
- Employ theory, concepts, and terminology at a level that supports lifelong learning of related methodologies.

Statistics Degree Requirements (32 units)

Foundation Requirements

The M.S. in Statistics program consists of at least 32 semester units of approved upper division and graduate work. The university requirement for the minimum number of 600-level units applies. All work applied toward the 32 units must be at an average grade of "B" (3.0) or higher. No graduate-level required course may be at a grade below "B-."

Core Courses

The following 22 units are required:

- STAT 620 - Probability and Statistical Theory *Units: 4*
- STAT 630 - Statistical Methods *Units: 4*

- STAT 631 - Analysis of Variance Models *Units: 4*
- STAT 632 - Linear and Logistic Regression *Units: 4*
- STAT 640 - Advanced Statistical Theory *Units: 4*

And, one of:

- STAT 641 - Bootstrapping Methods *Units: 2*
- STAT 675 - Advanced Stochastic Processes and Simulation *Units: 2*

Concentrations

Students may select one (1) concentration listed below for 8 units, or students may choose no concentration that requires 8 units of approved electives to complete the degree:

- Statistics, M.S. (*See "Additional Electives"*)
- Statistics, M.S.: Actuarial Science Concentration
- Statistics, M.S.: Applied Statistics Concentration
- Statistics, M.S.: Data Science Concentration
- Statistics, M.S.: Mathematical Statistics Concentration

Capstone Requirements

The following capstone for 2 units is required:

- STAT 692 - Comprehensive Exam Review *Units: 2*

Applied Statistics Concentration

Choose four (4) courses for 8 units from the following:

- BSTA 661 - Categorical Data Analysis *Units: 2*
- BSTA 662 - Survival Analysis *Units: 2*
- BSTA 668 - Longitudinal Data Analysis *Units: 2*
- STAT 650 - Advanced R for Data Science *Units: 2*
- STAT 651 - Data Visualization *Units: 2*
- STAT 652 - Statistical Learning *Units: 2*
- STAT 653 - Statistical Natural Language Processing *Units: 2*
- STAT 660 - Advanced SAS I *Units: 2*
- STAT 672 - Advanced Multivariate Statistics *Units: 2*
- STAT 673 - Nonparametric Statistical Methods *Units: 2*
- STAT 674 - Time Series *Units: 2*

Other Graduate & Post-Baccalaureate Degree Requirements

In addition to departmental requirements, every student must also satisfy the University requirements for graduation as described throughout this catalog. These include the 70% unit residence requirement; the five-year rule on currency of subject matter; the minimum number of units in 600-level courses; the "C"

minimum grade for each graduate course; the 3.00 cumulative grade point average; and the University Writing Skills Requirement.

Note: For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call (510) 885-3661.

Advancement to Candidacy Requirements

- Completion of at least 16 semester units of approved coursework beyond the baccalaureate, with an average of "B" (3.0) or higher.
- Fulfillment of the University Writing Skills Requirement. For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call 510.885.3661.
- Departmental approval.

Cause for Dismissal from Program

Students may be dismissed from the program at any time "for cause." "For cause" includes, but is not limited to, poor academic performance, violation of the student code of conduct, academic dishonesty, and/or interference with the educational environment.

Program Learning Outcomes

Students graduating with an M.S. in Statistics from Cal State East Bay will be able to:

- Apply statistical methodologies, including a) descriptive statistics and graphical displays, b) probability models for uncertainty, stochastic processes, and distribution theory, c) hypothesis testing and confidence intervals, d) ANOVA and regression models (including linear, and multiple linear) and analysis of residuals from models and trends at the Master's level.
- Derive basic theory underlying these methodologies.
- Model practical problems for solutions using these methodologies.
- Produce relevant computer output using standard statistical software and interpret the results appropriately.
- Communicate statistical concepts and analytical results clearly and appropriately to others; and,
- Employ theory, concepts, and terminology at a level that supports lifelong learning of related methodologies.

Statistics Degree Requirements (32 units)

Foundation Requirements

The M.S. in Statistics program consists of at least 32 semester units of approved upper division and graduate work. The university requirement for the minimum number of 600-level units applies. All work applied toward the 32 units must be at an average grade of "B" (3.0) or higher. No graduate-level required course may be at a grade below "B-."

Core Courses

The following 22 units are required:

- STAT 620 - Probability and Statistical Theory *Units: 4*
- STAT 630 - Statistical Methods *Units: 4*

- STAT 631 - Analysis of Variance Models *Units: 4*
- STAT 632 - Linear and Logistic Regression *Units: 4*
- STAT 640 - Advanced Statistical Theory *Units: 4*

And, one of:

- STAT 641 - Bootstrapping Methods *Units: 2*
- STAT 675 - Advanced Stochastic Processes and Simulation *Units: 2*

Concentrations

Students may select one (1) concentration listed below for 8 units, or students may choose no concentration that requires 8 units of approved electives to complete the degree:

- Statistics, M.S. (*See "Additional Electives"*)
- Statistics, M.S.: Actuarial Science Concentration
- Statistics, M.S.: Applied Statistics Concentration
- Statistics, M.S.: Data Science Concentration
- Statistics, M.S.: Mathematical Statistics Concentration

Capstone Requirements

The following capstone for 2 units is required:

- STAT 692 - Comprehensive Exam Review *Units: 2*

Mathematical Statistics Concentration

Choose a minimum of 8 units from the following:

- MATH 310 - Linear Algebra Theory *Units: 3*
- MATH 330 - Analysis I *Units: 3*
- MATH 331 - Analysis II *Units: 3*
- STAT 650 - Advanced R for Data Science *Units: 2*
- STAT 675 - Advanced Stochastic Processes and Simulation *Units: 2*
- STAT 681 - Bayesian Statistics *Units: 2*

Other Graduate & Post-Baccalaureate Degree Requirements

In addition to departmental requirements, every student must also satisfy the University requirements for graduation as described throughout this catalog. These include the 70% unit residence requirement; the five-year rule on currency of subject matter; the minimum number of units in 600-level courses; the "C" minimum grade for each graduate course; the 3.00 cumulative grade point average; and the University Writing Skills Requirement.

Note: For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call (510) 885-3661.

Minor

Biostatistics Minor

Minor Requirements (15 units)

The minor in biostatistics is designed to provide a general background in statistics for students majoring in other areas. It is of particular value to students majoring in such disciplines as biology and health sciences. The minor in biostatistics will broaden students' understanding of statistics with applications to biological sciences and will expand employment opportunities. The minor consists of 15 units.

Required Courses

Note: Some courses have prerequisites not listed in the minor.

Choose one (1) of the following pair of courses for 6 units:

- STAT 303 - Statistical Methods in Biology *Units: 3*
- And STAT 401 - Analysis of Variance for Psychology *Units: 3 ; G.E./G.R. Area: D4*
- OR
- STAT 330 - Statistical Inference *Units: 3*
- And STAT 331 - Introduction to Analysis of Variance *Units: 3*

Then, take one (1) of the statistical package courses for 3 units:

- **STAT 311 - Data Analysis using Statistical Packages** *Units: 3*
- **OR STAT 495 - Data Analysis with SAS** *Units: 3*

Plus, take the following required course for 3 units:

- **STAT 432 - Introduction to Linear Regression and Logistic Regression** *Units: 3*

Elective Course

Choose one (1) course for 3 units from the following:

- **STAT 305 - Statistics: From Data to Decisions** *Units: 3*
- **STAT 315 - Exploring and Analyzing Data** *Units: 3*
- **STAT 351 - Sampling Procedures for Surveys** *Units: 3*
- **STAT 451 - Introduction to Data Visualization** *Units: 3*
- **STAT 473 - Introduction to Nonparametric Statistics** *Units: 3*

Statistics Minor

Minor Requirements (18 units)

Basic Statistics

Choose one (1) course for 3 units from the following:

- STAT 100 - Elements of Statistics and Probability *Units: 3 ; G.E./G.R. Area: B4*
- STAT 110 - Elements of Statistics for Business and Economics *Units: 3*
- STAT 303 - Statistical Methods in Biology *Units: 3*

Upper Division Courses

Choose five (5) course for 15 units from the following:

- STAT 305 - Statistics: From Data to Decisions *Units: 3*
- STAT 310 - Statistical Methods in the Social Sciences *Units: 3*
- STAT 311 - Data Analysis using Statistical Packages *Units: 3*
- OR STAT 495 - Data Analysis with SAS *Units: 3*
- STAT 315 - Exploring and Analyzing Data *Units: 3*
- STAT 330 - Statistical Inference *Units: 3*
- STAT 351 - Sampling Procedures for Surveys *Units: 3*
- STAT 401 - Analysis of Variance for Psychology *Units: 3 ; G.E./G.R. Area: D4*
- STAT 432 - Introduction to Linear Regression and Logistic Regression *Units: 3*
- STAT 451 - Introduction to Data Visualization *Units: 3*
- STAT 452 - Introduction to Statistical Learning *Units: 3*
- STAT 473 - Introduction to Nonparametric Statistics *Units: 3*
- STAT 474 - Introduction to Time Series and Forecasting *Units: 3*

- • STAT 697 - Issues in Statistics *Units: 3*
- • STAT 698 - Internship *Units: 1-3*

Certificate

Applied Statistics Certificate

The Certificate in Applied Statistics combines basic work in statistics, which is required for many majors and graduate degree programs, with additional coursework in applied statistics. The coursework is designed to broaden the abilities of scientists and social scientists who already have degrees, but who need more training in applying statistics to their research and employment activities.

The minimum required GPA for the awarding of the certificate is 2.0. Consult an advisor in the Department of Statistics and Biostatistics for clarification and interpretation of requirements.

The certificate consists of 15 units, not including prerequisites. At least 4 units must be at the graduate level.

Applied Statistical Methodology

A total of 6-8 units are required from the following Methodology groups:

Choose one (1) of the following courses for 3-4 units:

- STAT 303 - Statistical Methods in Biology *Units: 3*
- STAT 310 - Statistical Methods in the Social Sciences *Units: 3*
- STAT 316 - Statistics and Probability for Science and Engineering *Units: 3*
- STAT 330 - Statistical Inference *Units: 3*
- STAT 630 - Statistical Methods *Units: 4*

Choose one (1) of the following second-level courses for 3-4 units (note that STAT 631 has STAT 630 as a prerequisite):

- STAT 331 - Introduction to Analysis of Variance *Units: 3*
- STAT 401 - Analysis of Variance for Psychology *Units: 3 ; G.E./G.R. Area: D4*
- STAT 631 - Analysis of Variance Models *Units: 4*

Data Analysis with Packages

Choose one (1) course from the following for 2-3 units:

- STAT 450 - Introduction to R for Data Science *Units: 3*
- STAT 451 - Introduction to Data Visualization *Units: 3*
- STAT 495 - Data Analysis with SAS *Units: 3*
- STAT 650 - Advanced R for Data Science *Units: 2*
- STAT 651 - Data Visualization *Units: 2*
- STAT 660 - Advanced SAS I *Units: 2*
- STAT 671 - Advanced JMP *Units: 2*

Electives

Take 4-7 units from the list below to complete the minimum of 15 units for the certificate.

- STAT 351 - Sampling Procedures for Surveys *Units: 3*
- STAT 432 - Introduction to Linear Regression and Logistic Regression *Units: 3*
- STAT 452 - Introduction to Statistical Learning *Units: 3*
- STAT 473 - Introduction to Nonparametric Statistics *Units: 3*
- STAT 632 - Linear and Logistic Regression *Units: 4*
- STAT 652 - Statistical Learning *Units: 2*
- STAT 653 - Statistical Natural Language Processing *Units: 2*
- STAT 672 - Advanced Multivariate Statistics *Units: 2*
- STAT 673 - Nonparametric Statistical Methods *Units: 2*
- Or any of the statistical package courses not used above.

Mathematical Statistics Certificate

The Certificate in Mathematical Statistics is designed to enhance a student's understanding of theoretical statistics and probability in preparation for employment in the engineering, information science, and technology sectors. The certificate also prepares students for further graduate study.

The minimum required GPA for the awarding of the certificate is 3.0. Consult an advisor in the Department of Statistics and Biostatistics for clarification and interpretation of requirements. The certificate consists of 12 graduate level units, plus any necessary prerequisites.

Required Courses

- STAT 620 - Probability and Statistical Theory *Units: 4*
- STAT 640 - Advanced Statistical Theory *Units: 4*
- STAT 676 - Advanced Probability *Units: 4*

Department of Teacher Education

The Department Office is located on the 2nd Floor of the AE building, Room 250.

Open Hours: 8:30 am to 5:00 pm Monday through Friday.

Faculty

Professors Emeriti

Bijan B. Gillani, Ed.D. University of Southern California

Shira Lubliner, Ed.D. University of San Francisco

James J. Zarrillo, Ph.D. Claremont Graduate School

Professors

Shadi Roshandel, Ph.D. University of California, Santa Barbara

Lyn Scott, Ph.D. University of California, Berkeley

Mary Soto, Ed.D. University of Texas at Brownsville

Mission Statement

We prepare teachers who are dedicated to the academic achievement of all students, and who demonstrate a commitment to life-long, professional growth and school leadership. The Department of Teacher Education offers post-baccalaureate and graduate programs to prepare teachers who are committed to improving school practices for California's diverse student populations and who can model such practices in their own classrooms.

Credential

Concurrent Multiple Subject and Education Specialist Credential Program (TED/SPED)

Concurrent Multiple Subject and Education Specialist Credential Program

Program Description

The TED/SPED program is an accelerated, dual credential program designed for candidates interested in a concurrent approach to completing all requirements for the Multiple Subject Credential, the Education Specialist Credential (Mild-Moderate Disabilities OR Moderate-Severe Disabilities), and the Master's Degree in Special Education. The accelerated format reduces the time for completion to four semesters and an initial summer session compared to seven semesters and an initial summer session if completed separately. The Multiple Subject Credential is required to earn an Education Specialist Credential.

Content courses containing the latest in research, evidence-based practices and fieldwork experiences provide candidates with a wide range of practical methods for addressing the diverse general and special education student learning, language and behavioral needs, thus enhancing the lives of individuals with and without exceptional needs, their families and communities.

Supervised fieldwork experiences provide opportunities for candidates to experience the multiple roles of the Education Specialist in the delivery of services. Candidates may work with students through teaching and assessment, co-teaching, inclusion support and case management.

Credential holders are authorized to teach and deliver services to individuals in grades K-22. The Multiple Subject Credential authorizes the holder to teach all subjects in a self-contained or an elementary school classroom (grades K-6 or K-8). The Education Specialist Credential authorizes the holder to teach any level, grades K-22, and deliver postsecondary transition services, including assessment and supporting services to individuals with disabilities. The program includes authorization to teach English Learners and students with Autism Spectrum Disorders as a part of the course of study..

This dual credential preparation emphasizes collaboration among general education and special education personnel and candidates' competence with core curriculum. Candidates thus have flexibility to assume a variety of roles during their careers with general and special education.

Career Opportunities

Individuals can provide services to children, youth and their families by being authorized to teach public school students within the general education program at the K-6 or K-8 levels. They may also work as teachers for students and young adults with disabilities in public and private schools, agencies and community colleges. Options for employment include special education positions, such as intervention specialists, inclusion specialists/support providers, learning center teachers, resource specialists, special class teachers, transition specialists, co-teachers and case managers. The Master's Degree in Special Education prepares candidates for leadership roles at the school site, within the district, SELPA (Special Education Local Planning Area, county office of education and instructional positions at community colleges. It enables candidates to work as lead teachers and department chairs, district specialists, program specialists, support teachers and community college instructors.

Admission Requirements

Applicants may only enter the dual credential TED/SPED program in the summer semester.

Before applying, all applicants should attend a "Credential Information Session." Students can register for a session on the Credential Student Service Center (CSSC) website.

- Bachelor's degree from accredited university
- Department Application
- Online University Application^[1]
- Minimum of 3.0 cumulative GPA.
- Pass the Multiple Subject California Subject Examination for Teachers (CSET) OR obtain a waiver for the CSET by completing an approved subject matter preparation program at a CSU.
- Statement of Purpose
- Pass a basic educational skills test approved by the California Commission on Teacher Credentialing (CTC), such as the such as the CBEST,
- Three letters of recommendation.
- U.S. Constitution course or exam.
- Certificate of Clearance.
- TB test.

Student Standing and Progress Toward Degree

- Completion of courses with a grade of B or higher.
- Completion of the University Writing Skills Test (WST)

Concurrent Multiple Subject and Education Specialist Credential Program Requirements (74 units)

Required Courses

The following 74 units are required for the credential:

- TED 505 - Teaching English Learners in the Multiple Subject Classroom *Units: 3*
- TED 508 - Curriculum & Instruction: Reading *Units: 3*
- TED 509 - Curriculum & Instruction: Language Arts and Social Studies *Units: 4*
- TED 510 - Curriculum & Instruction: Mathematics in a Multiple Subject Classroom *Units: 3*
- TED 511 - Curriculum & Instruction: Visual & Performing Arts *Units: 2*
- TED 512 - Curriculum & Instruction: Science in the Multiple Subject Classroom *Units: 3*
- TED 513 - Curriculum & Instruction: Health and Physical Education *Units: 2*

Other Graduate & Post-Baccalaureate Degree Requirements

In addition to departmental requirements, every student must also satisfy the University requirements for graduation as described throughout this catalog. These include the 70% unit residence requirement; the five-year rule on currency of subject matter; the minimum number of units in 600-level courses; the "C" minimum grade for each graduate course; the 3.00 cumulative grade point average; and the University Writing Skills Requirement.

Note: For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call (510) 885-3661.

Courses

Education: Interdisciplinary - Graduate

- • EDUI 610 - The Web as an Interactive Educational Tool *Units: 4*
- • EDUI 620 - Theory and Design of E-Learning *Units: 4*
- • EDUI 630 - Math, Science and Technology *Units: 4*
- • EDUI 640 - Research in Educational Technology *Units: 4*
- • EDUI 650 - Mobile Application Development *Units: 4*
- • EDUI 660 - Digital Graphics *Units: 4*
- • EDUI 670 - Principles of Instructional Design *Units: 4*
- • EDUI 680 - Current Technologies *Units: 2*
- • EDUI 690 - Independent Study *Units: 1-3*
- • EDUI 691 - University Thesis *Units: 1-4*
- • EDUI 692 - Comprehensive Examination Preparation *Units: 2*
- • EDUI 693 - Master's Project *Units: 4*
- • EDUI 695 - Educational Technology Internship *Units: 4*
- • EDUI 697 - Issues in Education Interdisciplinary Studies *Units: 3*
- • EDUI 699 - Department Thesis *Units: 4*

Education: Online Teaching and Learning

- • OTL 601 - Introduction to Online Teaching and Learning *Units: 3*
- • OTL 602 - Instructional Design Models for Online Learning *Units: 3*
- • OTL 603 - Technology Tools for Online Instruction *Units: 3*
- • OTL 604 - Designing Curriculum for Online Instruction *Units: 3*
- • OTL 605 - Educational Planning and Development for Online Programs *Units: 3*
- • OTL 606 - Research in Online Teaching and Learning *Units: 3*
- • OTL 607 - History and Culture of Online Learning Communities *Units: 3*
- • OTL 672 - Content Development for Online Learning *Units: 3*

- • OTL 673 - Supervising and Evaluating Online Teaching *Units: 3*
- • OTL 674 - Current Issues in Online Learning *Units: 3*
- • OTL 680 - Building the Online Environment *Units: 3*
- • OTL 681 - Creating Digital Media for Online Instruction *Units: 3*
- • OTL 682 - Designing and Implementing User Interfaces for Online Instruction *Units: 3*
- • OTL 683 - Providing Interactivity in the Online Environment *Units: 3*
- • OTL 693 - Capstone Project *Units: 3*

Teacher Education

- • TED 301 - Introduction to Education *Units: 3*
- • TED 302 - Introduction to Teaching *Units: 3*
- • TED 398 - Internship *Units: 1-3*
- • TED 420 - Art Skills for Teachers *Units: 3*
- • TED 425 - Arts Integration for Teachers *Units: 3*
- • TED 470 - Early Childhood Education: Integrated Language & Literacy Development *Units: 3*
- • TED 471 - Early Childhood Education: Integrated Math and Science *Units: 3*
- • TED 472 - Early Childhood Education: Integrated Arts and Social Studies *Units: 3*
- • TED 473 - Early Childhood Education: Inclusive Practices *Units: 3*
- • TED 474 - Early Childhood Education: Professional Seminar and Practicum *Units: 4*
- • TED 490 - Independent Study *Units: 1-4*
- • TED 497 - Issues in Teacher Education *Units: 3*

Teacher Education: Graduate

- • TED 535 - History Social Studies III: Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 600 - Introduction to Graduate Studies *Units: 1*
- • TED 601 - Professional Research Seminar I *Units: 1*
- • TED 602 - Professional Research Seminar II *Units: 1*
- • TED 603 - Professional Research Seminar III *Units: 1*
- • TED 611 - Reading and Synthesizing Research in Education *Units: 3*

- • TED 558 - Hindi II: Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 559 - Hindi III: Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 560 - Chinese I: Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 561 - Chinese II: Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 562 - Chinese III: Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 570 - Multiple Subject Fieldwork Seminar I *Units: 1*
- • TED 571 - Multiple Subject Fieldwork Seminar II *Units: 1*
- • TED 575 - Single Subject Fieldwork Seminar I *Units: 1*
- • TED 576 - Single Subject Fieldwork Seminar II *Units: 1*
- • TED 580 - Multiple Subject Student Teaching I *Units: 4*
- • TED 581 - Multiple Subject Student Teaching II *Units: 5*
- • TED 582 - Multiple Subject Intern Teaching I *Units: 5*
- • TED 583 - Multiple Subject Intern Teaching II *Units: 5*
- • TED 585 - Single Subject Field Placement I *Units: 5*
- • TED 586 - Single Subject Field Placement II *Units: 5*
- • TED 587 - Single Subject Intern Teaching I *Units: 5*
- • TED 588 - Single Subject Intern Teaching II *Units: 5*

Multiple Subject Credential Program

Multiple Subject Credential

Credential requirements specified in this catalog are subject to changes made by the State of California.

Contact the Department of Teacher Education or the Credential Student Services Center (CSSC) for current regulations.

The Multiple Subject Credential program has been approved to be offered in a Hybrid delivery format.

Admission

Applicants may only enter the Multiple Subject, Single Subject, and TEDSPED credential programs in the summer session. Program admission is a simultaneous, two-part process. Applicants must meet both the Department and University requirements in order to begin the program. The Department file is maintained in the Credential Student Service Center (CSSC) and the steps outlined in this section are primarily related to Department admissions for post-baccalaureate applicants. The University file is processed by the University Graduate Admissions Office (referred to as "University") and can be monitored through the applicant's MyCSUEB account.

Multiple or Single Subject Credential Programs - Application Process and Admission Requirements

Before applying to the Multiple Subject or Single Subject Credential Program, all applicants should attend a "Credential Information Session." Several sessions are held every month except July and August. Individuals considering the program can also register for a session on the CSSC website.

- All applicants must submit the following documents to the CSSC in order to secure an interview:
 - A completed copy of the online University "Graduate and Post Baccalaureate Application" (see CSU Apply);
 - A completed online "Department of Teacher Education" application;
 - Statement of Purpose - 300-500 words, typed, double-spaced; see Department application for questions.
 - Pass a basic educational skills test approved by the California Commission on Teacher Credentialing (CTC).
 - Pass the relevant California Subject Examination for Teachers (CSET), or obtain a waiver for the CSET by completing an approved subject matter preparation program at a CSU OR proof of registration for all CSET subtests or proof of pending Subject Matter Waiver Letter.
- After the Interview the following must be submitted:

- One official copy of the applicant's degree-granting institutional transcript (to the University);
- Two letters of recommendation; both letters must demonstrate suitable aptitude for teaching in public schools;
- Academic letters of recommendation are not acceptable.
- Letters should be dated within 3 years.
- The letters should be written by someone who has observed the applicant teaching or working with students in the age group of the credential sought.
- Both letters must be on official letterhead, signed, and dated. If letterhead is not available, include a business card.
- Pass a U.S. Constitution course or exam
- Earn a 2.67 cumulative grade point average or 2.75 in the last 60 semester units in a baccalaureate degree.
- 45 hours of Early Field Experience:
- Documented field experience of at least 45 hours in a K-12 classroom or classroom-like setting with groups of children: multiple subject, children 5-11 years of age.
- An acceptable public school experience includes work as a substitute teacher, para-educator, instructional aide, or classroom volunteer.
- Faith-based instruction is not acceptable.
- At least 15 hours must be in a public school classroom setting within the last two years.
- The remaining 30 of the 45 hours minimum must have been satisfied within the last three years.

- These hours may be completed in public or private school settings; in community-based venues, such as the YMCA, park recreations center, or in a structured summer camp, after-school, or other formally organized educational program.
- Submit the Early Field Experience Verification form. Use as many forms as needed to verify the total hours.
- This requirement may be partially fulfilled by enrollment in TED 3001, or TED 301 and TED 302.
- CTC Certificate of Clearance.
- Submit a TB clearance dated within two years.

Admission Process

Applicants are required to attend an admission interview. Applicants are notified of status by email from the CSSC after the interview. Applicants may receive a "Conditional Acceptance" pending receipt of documents.

Credential Requirements

The Single Subject Credential is the credential that authorizes the teaching of a specific subject in a departmentalized classroom. The Multiple Subject Credential is the basic credential that authorizes the teaching of all subjects in a self-contained, elementary school classroom.

Multiple Subject Credential Requirements (42 units)

Other Graduate & Post-Baccalaureate Degree Requirements

In addition to departmental requirements, every student must also satisfy the University requirements for graduation as described throughout this catalog. These include the 70% unit residence requirement; the five-year rule on currency of subject matter; the minimum number of units in 600-level courses; the "C" minimum grade for each graduate course; the 3.00 cumulative grade point average; and the University Writing Skills Requirement.

Note: For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call (510) 885-3661.

Master

Early Childhood Education, M.S.

Early Childhood Education, M.S. Program

Program Description

The MS in Early Childhood Education prepares individuals to teach and work with all students ranging in age from infancy through eight years (i.e., grade three). It includes preparation to teach all relevant subject matter. The purpose of this master's degree is to prepare teachers to understand and deliver strong, vibrant, and relevant instruction and leadership in Early Childhood Education settings.

CSUEB faculty work with local agencies, community colleges, and county personnel to insure that students receive advanced instruction in curriculum and pedagogy for this age group, analyze and understand research and practice, and promote leadership and collaboration with families. The cohort model is used in this two-year program. In other words, students take all classes together and develop strong personal and professional relationships with one another. Students in the program come from a wide variety of educational programs, including private, public, and home school preschool programs, Head Start, TK-3rd grade private and public schools. Thus, they experience a wide range of perspectives in the field of Early Childhood Education. Students also enjoy the hybrid format of most classes, a 6:00 p.m. start time for classes, and weekend course offerings each semester.

The MS in Early Childhood Education is specifically designed for the working practitioner to gain professional knowledge about curriculum and leadership for children ages birth to eight years old. This degree emphasizes developmentally and culturally appropriate practices, "hands-on" experiences, evidenced-based instruction, working with families, and innovative ways to build leadership and professionalism. Education of the whole child, including cognitive, social, and emotional aspects are covered throughout the program's curriculum. The program is designed for preschool and T-K through third grade teachers. National, state, and local documents are evidenced in the coursework. The four-semester program includes a field-based practicum and accompanying seminar.

Career Opportunities

Students who complete this degree may secure positions as Preschool Directors, Program Supervisors, Curriculum Specialists in Early Childhood, Community College Instructors, classroom teachers,

employees for Head Start, State Preschool, Teachers on Special Assignment (TSA) and researchers for private institutions.

Admission Requirements

Students must demonstrate an appropriate background when applying for this degree. Background can be shown by successful completion of an undergraduate degree in Human Development, Psychology, or other relevant degree to the field of Early Childhood. Students possessing a Multiple Subject Credential or a degree in Elementary Education are also encouraged to apply. Students who have a Bachelor's degree, but not in the Social Sciences, and have successfully completed at least 12 units in Early Childhood and/or have worked successfully in the field for at least 5 years are also encouraged to apply.

- Candidates must hold a baccalaureate degree from an accredited institution.
- Candidates must have earned at least a 3.0 Grade Point Average (GPA) in all upper division/post baccalaureate coursework.
- If candidates have a baccalaureate degree from out of the country, they must have their transcripts evaluated by the International Graduate Student Admissions Office.
- Candidates, upon entry or graduation, must have met the University Writing Skills Requirements (UWSR). For information about meeting the USWR, see the Testing Office website at www.csueastbay/testing or call 510.885.3661.

Progress Towards the Degree

- Completed at least 30 units of approved graduate work subject to the following conditions:
- All units must have been earned within the past five (5) years immediately preceding completion of the requirements for the degree.
- No fewer than 70% (or 21 semester units) must have been completed in residence as a regularly matriculated student in the graduate program at Cal State East Bay.
- No more than nine (9) semester units of approved courses may be transferred from another institution, taken through approved extension courses (including Open University), or taken as an "Unclassified Post-Baccalaureate" student.
- At least 15 semester units must have been in courses numbered in the 600-series or the equivalent graduate level.
- Satisfied the University Writing Skills Requirement.
- Earned at least a 3.0 GPA in all units satisfying the requirements of the degree program.
- Completed TED 693 Master's Project within five (5) years of admission to the program. A project provides evidence of originality, independent thinking, and appropriate form and organization. Students must describe their project in a written abstract that addresses the project's significance, objectives, methodology, and conclusions.

Student Standing

A student must maintain an overall GPA of 3.0 or higher in all courses taken whether the courses are taken at Cal State East Bay or elsewhere. This means that a student must receive a grade of B- or better in all classes taken during the graduate program. Students may repeat a class only once and the grade received the second time will be the grade recorded on the student's record. This same rule applies to the research sequence of classes. If a student does not receive a grade of B- or better the second time the class is repeated in the research sequence and the Master's Project (TED 611, 612, 693), the student may be dismissed from the program. A student whose GPA falls below 3.0 will be placed on probationary

status, will be subject to disqualification from the program, and may be recommended for dismissal from the university. The department also requires that the Graduate Coordinator approve in advance a "CR/NC" grade in any course applied to a master's and/or certificate program.

Program Learning Outcomes

- Identify, describe and evaluate a variety of factors and contemporary issues that influence curricula in preschool through third grade.
- Demonstrate appropriate content knowledge, pedagogy and skills necessary to help all students learn from birth through third grade.
- Develop leadership skills to become an advocate and mentor for diverse families and student learning.
- Utilize a variety of bibliographic tools to write a comprehensive review of the literature for a topic of professional interest in Early Childhood Education.
- Complete an action research project investigating a topic as it relates to the field of Early Childhood Education.

Early Childhood Education Degree Requirements (30 units)

Required Courses

The following 27 units of core coursework is required:

- TED 600 - Introduction to Graduate Studies *Units: 1*
- TED 601 - Professional Research Seminar I *Units: 1*
- TED 602 - Professional Research Seminar II *Units: 1*
- TED 603 - Professional Research Seminar III *Units: 1*
- TED 611 - Reading and Synthesizing Research in Education *Units: 3*
- TED 612 - Understanding Design and Planning Research in Education *Units: 3*
- TED 630 - Advanced Language & Literacy Development in Early Childhood Education *Units: 4*
- TED 631 - Advanced Integrated Math & Science in Early Childhood Education *Units: 3*
- TED 632 - Advanced Integrated Arts & Social Studies in Early Childhood Education *Units: 3*
- TED 633 - Advanced Special Education Practices in Early Childhood Education *Units: 3*
- TED 634 - Professional Leadership in Early Childhood Education *Units: 2*
- TED 635 - Field Based Practicum in Early Childhood Education *Units: 2*

Capstone Requirement

The following capstone project is required to complete the program requirements:

- TED 693 - Master's Project *Units: 3 (See Errata chapter for additional capstone information.)*

Other Graduate & Post-Baccalaureate Degree Requirements

In addition to departmental requirements, every student must also satisfy the University requirements for graduation as described throughout this catalog. These include the 70% unit residence requirement; the five-year rule on currency of subject matter; the minimum number of units in 600-level courses; the "C" minimum grade for each graduate course; the 3.00 cumulative grade point average; and the University Writing Skills Requirement.

Note: For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call (510) 885-3661.

Educational Technology, M.S.

Educational Technology, M.S. Program

Program Description

The MS in Educational Technology is designed for educators and e-learning developers with a focus on integrating current technologies into educational curricula. The emphasis on integrating technologies in both K-16 and business settings is a strength of the program, along with the focus in each course on 21st Century skills demanded by the Common Core State Standards (CCSS) and the New Generation Science Standards (NGSS), e.g., collaboration, creativity, critical thinking, and communication. This program has been approved to be offered in a Hybrid delivery format.

The program includes instruction in the foundations of educational technology, instructional design

theories, computer applications, using technology for assessment, multimedia instruction, web-based instruction, distance education, and designing and producing educational software and materials. Students in this program gain knowledge in emerging technologies, instructional design, e-learning development, learning theories, multimedia production, and collaborative production. Students also gain a deep understanding of adapting to the demands of the ever-changing nature of technologies.

Career Opportunities

Graduates will be active in school districts, county offices of education, community colleges, the field of instructional design, and the high-tech industry. The positions that our graduates take include educational technologist, instructional designer, curriculum specialist, community college instructor, district technology director, and technology trainer. Finally, graduates will be able to teach more effectively using educational technologies in the classroom.

Admission Requirements

- Candidates must hold a baccalaureate degree from an accredited institution.
- Candidates must have earned a 3.0 Grade Point Average (GPA) in all upper division or post baccalaureate coursework.
- If a candidate has a baccalaureate degree from out of the country, he/she must have his/her transcripts evaluated by the International Graduate Student Admissions Office.
- The MS in Education Technology program requires applicants to show evidence of successful training or teaching experience.
- Candidates have met the University Writing Skills Requirement (UWSR). For information about meeting the UWSR, see the Testing Office website at www.csueastbay/testing or call 510.885.3661.

Student Standing

A student must maintain a GPA of 3.0 or higher for all courses taken in the approved program whether the courses are taken at Cal State East Bay or elsewhere. A student whose GPA falls below 3.0 will be placed on probationary status, will be subject to disqualification from the program, and may be recommended for dismissal from the University. The department also requires that the use of the "CR/NC" grade option in any course applied to a master's and/or certificate program must be approved in advance by the Graduate Coordinator.

Progress Towards Degree

Completed at least 30 units of approved graduate work subject to the following conditions:

- All units must have been earned within the past five (5) years immediately preceding completion of the requirements for the degree.
- No fewer than 70% (or 21 semester units) must have been completed in residence as a regularly matriculated student in the graduate program at Cal State East Bay.
- No more than nine (9) semester units of approved courses may be transferred from another institution, taken through approved extension courses (including Open University), or taken as an "Unclassified Post-Baccalaureate" student.
- At least 15 semester units must have been in courses numbered in the 600-series or equivalent graduate level.

- Satisfied the University Writing Skills Requirement.
- Earned at least a 3.0 GPA in all units satisfying the requirements of the degree program.
- Completed a University Thesis or a Graduate Project course within five (5) years of admission to the program.

Program Learning Outcomes

- Assess the importance and use of technology to support diverse students' learning.
- Identify and investigate educational technology theories and instructional design principles to generate new ideas, projects, and materials for diverse students.
- Create and develop effective instructional or e-learning materials by choosing and applying appropriate tools and design theories individually and collaboratively.
- Gather, use, and analyze data, bibliographic and other resources of materials extensively and critically.
- Write and present scholarly findings and projects independently.

Educational Technology Degree Requirements (30 units)

Required Courses

The following 16 units are required:

- EDUI 610 - The Web as an Interactive Educational Tool *Units: 4*
- EDUI 620 - Theory and Design of E-Learning *Units: 4*
- EDUI 630 - Math, Science and Technology *Units: 4*
- EDUI 640 - Research in Educational Technology *Units: 4*

Elective Courses

Students must choose 10 units of coursework from the following courses:

- EDUI 650 - Mobile Application Development *Units: 4*
- EDUI 660 - Digital Graphics *Units: 4*
- EDUI 670 - Principles of Instructional Design *Units: 4*
- EDUI 680 - Current Technologies *Units: 2*
- EDUI 690 - Independent Study *Units: 1-3*
- EDUI 695 - Educational Technology Internship *Units: 4*

Capstone Requirement

All students must take the following capstone for 4 units to complete the degree requirements:

- EDUI 693 - Master's Project *Units: 4*

Other Graduate & Post-Baccalaureate Degree Requirements

In addition to departmental requirements, every student must also satisfy the University requirements for graduation as described throughout this catalog. These include the 70% unit residence requirement; the five-year rule on currency of subject matter; the minimum number of units in 600-level courses; the "C" minimum grade for each graduate course; the 3.00 cumulative grade point average; and the University Writing Skills Requirement.

Note: For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call (510) 885-3661.

Reading and Literacy, M.S.

Reading and Literacy, M.S. Program

Program Description

The Department of Teacher Education at California State University, East Bay offers two levels for graduate study in the area of reading and language arts:

The Reading and Literacy Added Authorization (RLAA) is granted by the California Commission on Teacher Credentialing (CCTC) upon recommendation by Cal State East Bay. It authorizes service as a reading specialist at a school site. This program is 14 semester units.

The Master of Science in Reading and Literacy is granted by Cal State East Bay and has been approved to be offered in a Hybrid delivery format. Candidates who have earned the Reading and Literacy Added

Authorization or previously earned the Reading and Language Arts Specialist Credential, are eligible to continue their graduate studies and earn the M.S. degree. This program is 30 semester units: 14 units for the Reading and Literacy Added Authorization and 16 additional units beyond those required for the RLAA.

If you completed your credential within five years of the MS completion date (7 years with a waiver), you may complete the 30 units including the Reading Added Authorization courses (14 units) and MS courses (7 units) by bringing in 9 units of coursework from an accredited credential program. If you completed your credential over five years beyond MS completion date (7 years with a waiver), the electives TED 670, 671 and 672 may be completed to meet this remaining 9-unit requirement. The entire program, including the Reading and Literacy Added Authorization and the MS degree can be completed in one calendar year with the inclusion of 9 approved credential program units.

Upon successful completion of coursework and three or more years of classroom teaching, candidates will be recommended for the state-issued Reading Literacy Added Authorization. Candidates with less than three years of teaching experience are welcome to complete the program and apply for the Reading and Literacy Added Authorization once they have the required classroom teaching experience. Candidates complete three more graduate courses to receive a MS in Reading and Literacy.

Career Opportunities

Graduates may become specialists in Elementary and Secondary Literacy Development. They may also work in interventionist positions, such as Reading Intervention Teacher, Literacy Coach, District Literacy Specialist, Grade Level Chair, and/or Department Chair.

Admission Requirements

- Baccalaureate degree from an accredited university.
- GPA of 3.0 in upper division undergraduate courses and post-baccalaureate courses.
- A valid Multiple Subject or Single Subject Teaching Credential.
- Demonstrated potential to become a leader in reading and language arts curriculum and instruction.

Admission Process

Submit the following to the Department of Teacher Education:

- University graduate and post-baccalaureate application (online CSU application)
- Graduate application fee
- Statement of residency if a first-time Cal State East Bay student
- One official copy of all transcripts from all colleges and universities attended
- An application form for the Teacher Education Department.
- Personal Data Summary Form
- Basic Skills Requirement, such as CBEST scores
- Copy of either a valid Multiple Subject or Single Subject Teaching Credential.
- Three letters of recommendation, two of which address the candidate's ability to teach and work with K-12 students

Candidates who meet admission requirements will be notified by email and must then successfully complete an admission interview with the Program Coordinator.

Admission

No more than 9 units taken in nonresident status can be applied toward a master's degree. This includes approved credit-bearing extension courses, transfer courses, and residence courses taken before admission to the master's degree program. Lower division, non-credit Extension, 700 level, and Credit/No Credit (Pass/Fail) courses are not applicable to the degree except courses offered only for Credit/No Credit (Pass/Fail). Filing for a substitution for this last item is up to the student. Nine units of coursework from a basic credential program (Multiple or Single Subject) may be applied toward a master's degree.

A student with minor deficiencies in the requirements below may be admitted to a program as a "Conditionally Classified Graduate" student.

To be awarded "Classified Graduate" standing, a student must:

- Have a GPA of 3.0 or better in all upper division work in the major and in all post-baccalaureate work;
- Hold a valid teaching credential and/or show evidence of successful classroom teaching experience as determined by the department;
- Have met the University Writing Skills Requirement. (For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call 510.885.3661.)

Advancement to Candidacy

To be Advanced to Candidacy for the degree, a student must:

- Have met the University Writing Skills Requirement. For more information see the Testing Office website at www.csueastbay.edu/testing or call 510.885.3661.)
- Be a "Classified Graduate" student in good standing;
- Have completed at least 30 semester units considered by the Department to be applicable toward the degree requirements with a GPA of 3.0 or better;
- Have an approved program of study for the degree (on a Major Check Form) signed by the advisor;
- Have completed or be currently enrolled in TED 688, Research in Education;
- Have been approved for Advancement to Candidacy by the department on the recommendation of faculty teaching in the student's area of study. This approval is initiated by filing the form, Petition to Establish Thesis/Project Committee, with a thesis or project abstract attached, or by obtaining permission to register for the Graduate Synthesis course.

GPA Requirement

A student must maintain a GPA of 3.0 or higher in all courses taken in the approved program signed by the advisor, whether the courses are taken at Cal State East Bay or elsewhere. A student whose GPA falls below 3.0 will be placed on probationary status, will be subject to disqualification from the program, and may be recommended for dismissal from the university. (The department also requires that the use of the "CR/NC" grade option in any course applied to a master's and/or certificate program must be approved in advance by the Graduate Coordinator.)

Degree Requirements (30 units)

To receive the M.S. in Reading and Literacy, a student must have:

- Been Advanced to Candidacy;
- Completed 30 semester units of approved graduate work, subject to the following conditions:
- All units must have been earned within the past five (5) years immediately preceding completion of the requirements for the degree;
- No fewer than twenty-one (21) semester units may have been completed in residence (i.e., after admission to the program as a regularly matriculated student) in the graduate program at Cal State East Bay;
- No fewer than two (2) nor more than four (4) semester units may have been assigned to a University Thesis, nor more than four (4) to a Department Thesis or Project, nor fewer than three (3) in the Graduate Synthesis course;
- No more than nine (9) semester units of approved courses may be transferred from another institution, taken through approved extension courses (including Open University), or taken as an "Unclassified Post-Baccalaureate" student;
- At least fifteen (15) semester units must have been in courses in the 600-series or equivalent graduate level;
- Satisfied the University Writing Skills Requirement; for more information see the Testing Office website at www.csueastbay.edu/testing or call 510.885.3661.
- Earned at least a 3.0 GPA in all post-baccalaureate work and in all graduate work at Cal State East Bay and in all units satisfying the requirements of the degree program;
- Completed a Project acceptable to the department faculty.
- Met, within five (5) years of admission to the program, the specific requirements of that program.

Graduation

A student must apply to graduate and request a degree check during the first two (2) weeks of the semester prior to the semester in which completion of the program is expected. Students must apply online and pay the required fee.

Other Degree Requirements

In addition to departmental requirements, every student must also satisfy the University requirements for graduation described in the Graduate Degree Information chapter in this catalog. These include the 21-unit residence requirement, the five-year rule on currency of subject matter, the minimum number of units of 600-level courses, the 3.00 grade point average, and the University Writing Skills requirement.

Program Learning Outcomes

- Demonstrate a thorough understanding of theory and research on an effective culture of literacy for diverse prekindergarten through high school students, their families, and communities;
- Demonstrate knowledge of research-based instructional practices in each component of literacy and the ability to assess, instruct, and provide intervention for each component of literacy instruction, including phonemic awareness, phonics, fluency, oral language development, reading and listening comprehension, and vocabulary development, and writing;
- Successfully plan and implement a balanced literacy environment, including the selection and use instructional materials, technology, routines, and strategies that are appropriately aligned with students' assessed language and literacy needs; and
- Complete an action research project in the field of literacy, including a review of the research literature, planning and implementing an instructional unit, and an analysis of student learning and research results.

Reading and Literacy Degree Requirements (30 units)

Reading and Literacy Added Authorization (RLAA)

These six (6) courses for 14 units are required for both the Reading and Literacy Added Authorization and the M.S. in Reading and Literacy:

- TED 660 - Literacy Research and Methods *Units: 3*
- TED 661 - Reading Comprehension Research and Methods *Units: 2*
- TED 662 - Culture of Literacy: Focus on Diversity *Units: 2*
- TED 663 - Literacy Assessment *Units: 3*
- TED 664 - Literacy Intervention *Units: 3*
- TED 695 - Practicum *Units: 1*

Additional M.S. Coursework

In addition to the courses for the RLAA, the following additional five (5) courses for 13 units are required for the M.S. in Reading and Literacy. TED 670, 671, and 672 are required for students who do not carry units over from a credential program:

- TED 670 - The Science of Reading Foundations *Units: 3*
- TED 671 - Early Literacy Foundations *Units: 3*
- TED 672 - Secondary Literacy Foundations *Units: 3*
- TED 687 - Reading Research & Evaluation *Units: 3*
- TED 688 - Research in Education *Units: 1*

M.S. Capstone

The following Master's Project for 3 units is required to complete the M.S. Reading and Literacy degree requirements:

- TED 693 - Master's Project *Units: 3*

Other Graduate & Post-Baccalaureate Degree Requirements

In addition to departmental requirements, every student must also satisfy the University requirements for graduation as described throughout this catalog. These include the 70% unit residence requirement; the five-year rule on currency of subject matter; the minimum number of units in 600-level courses; the "C" minimum grade for each graduate course; the 3.00 cumulative grade point average; and the University Writing Skills Requirement.

Note: For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call (510) 885-3661.

Courses

Education: Interdisciplinary - Graduate

- • EDUI 610 - The Web as an Interactive Educational Tool *Units: 4*
- • EDUI 620 - Theory and Design of E-Learning *Units: 4*
- • EDUI 630 - Math, Science and Technology *Units: 4*
- • EDUI 640 - Research in Educational Technology *Units: 4*
- • EDUI 650 - Mobile Application Development *Units: 4*
- • EDUI 660 - Digital Graphics *Units: 4*
- • EDUI 670 - Principles of Instructional Design *Units: 4*
- • EDUI 680 - Current Technologies *Units: 2*
- • EDUI 690 - Independent Study *Units: 1-3*
- • EDUI 691 - University Thesis *Units: 1-4*
- • EDUI 692 - Comprehensive Examination Preparation *Units: 2*
- • EDUI 693 - Master's Project *Units: 4*
- • EDUI 695 - Educational Technology Internship *Units: 4*
- • EDUI 697 - Issues in Education Interdisciplinary Studies *Units: 3*
- • EDUI 699 - Department Thesis *Units: 4*

Education: Online Teaching and Learning

- • OTL 601 - Introduction to Online Teaching and Learning *Units: 3*
- • OTL 602 - Instructional Design Models for Online Learning *Units: 3*
- • OTL 603 - Technology Tools for Online Instruction *Units: 3*
- • OTL 604 - Designing Curriculum for Online Instruction *Units: 3*
- • OTL 605 - Educational Planning and Development for Online Programs *Units: 3*
- • OTL 606 - Research in Online Teaching and Learning *Units: 3*
- • OTL 607 - History and Culture of Online Learning Communities *Units: 3*
- • OTL 672 - Content Development for Online Learning *Units: 3*
- • OTL 673 - Supervising and Evaluating Online Teaching *Units: 3*
- • OTL 674 - Current Issues in Online Learning *Units: 3*
- • OTL 680 - Building the Online Environment *Units: 3*
- • OTL 681 - Creating Digital Media for Online Instruction *Units: 3*
- • OTL 682 - Designing and Implementing User Interfaces for Online Instruction *Units: 3*
- • OTL 683 - Providing Interactivity in the Online Environment *Units: 3*
- • OTL 693 - Capstone Project *Units: 3*

Teacher Education

- • TED 301 - Introduction to Education *Units: 3*
- • TED 302 - Introduction to Teaching *Units: 3*
- • TED 398 - Internship *Units: 1-3*
- • TED 420 - Art Skills for Teachers *Units: 3*
- • TED 425 - Arts Integration for Teachers *Units: 3*
- • TED 470 - Early Childhood Education: Integrated Language & Literacy Development *Units: 3*
- • TED 471 - Early Childhood Education: Integrated Math and Science *Units: 3*

- • TED 472 - Early Childhood Education: Integrated Arts and Social Studies *Units: 3*
- • TED 473 - Early Childhood Education: Inclusive Practices *Units: 3*
- • TED 474 - Early Childhood Education: Professional Seminar and Practicum *Units: 4*
- • TED 490 - Independent Study *Units: 1-4*
- • TED 497 - Issues in Teacher Education *Units: 3*

Teacher Education: Graduate

- • TED 535 - History Social Studies III: Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 600 - Introduction to Graduate Studies *Units: 1*
- • TED 601 - Professional Research Seminar I *Units: 1*
- • TED 602 - Professional Research Seminar II *Units: 1*
- • TED 603 - Professional Research Seminar III *Units: 1*
- • TED 611 - Reading and Synthesizing Research in Education *Units: 3*
- • TED 612 - Understanding Design and Planning Research in Education *Units: 3*
- • TED 613 - Implementing and Analyzing Research in P-12 *Units: 3*
- • TED 620 - Advanced Studies in Mathematics Education *Units: 3*
- • TED 621 - Advanced Studies in Science Education *Units: 3*
- • TED 622 - Advanced Studies in Expository Reading and Writing *Units: 3*
- • TED 623 - Advanced Studies in Methods for English Language Learners *Units: 3*
- • TED 624 - Advanced Integrated Arts for All Teachers *Units: 3*

- • TED 562 - Chinese III: Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 570 - Multiple Subject Fieldwork Seminar I *Units: 1*
- • TED 571 - Multiple Subject Fieldwork Seminar II *Units: 1*
- • TED 575 - Single Subject Fieldwork Seminar I *Units: 1*
- • TED 576 - Single Subject Fieldwork Seminar II *Units: 1*
- • TED 580 - Multiple Subject Student Teaching I *Units: 4*
- • TED 581 - Multiple Subject Student Teaching II *Units: 5*
- • TED 582 - Multiple Subject Intern Teaching I *Units: 5*
- • TED 583 - Multiple Subject Intern Teaching II *Units: 5*
- • TED 585 - Single Subject Field Placement I *Units: 5*
- • TED 586 - Single Subject Field Placement II *Units: 5*
- • TED 587 - Single Subject Intern Teaching I *Units: 5*
- • TED 588 - Single Subject Intern Teaching II *Units: 5*

Master Online Degree Programs

Education, M.S.: Online Teaching and Learning Concentration (Online Only Program)

Please note: This program is only available through Continuing Education.

Education, M.S.: Online Teaching and Learning Concentration

General Information

One of the most comprehensive online teaching and learning training programs offered in the world, the M.S. Education, Online Teaching and Learning Concentration (MSEd-OTL) program has been empowering educators, instructors, trainers, and support staff to effectively design and implement online courses since 1999. Our students develop their own online courses or programs using best practices in online teaching and learning. Student-created courses will be designed for their areas of expertise, the needs of their learners, and their institutional settings. Our program is not cohort-based, with all students taking the same courses each semester. Rather, students can complete the degree by choosing either the Fast Track or Flex Track option. However, each course has weekly assignments and due dates so it is not self-paced.

Career Opportunities

The training and skills acquired in the MSEd-OTL program can transfer into almost any educational or training fields, including: university, community college, K-12, corporate, military, educational administration, curriculum design, technical support, and other fields requiring design, development, implementation, and teaching services.

Admission Requirements

To be admitted to the Online Teaching and Learning Concentration in the M.S. Education, students must meet Cal State East Bay requirements for admission to a graduate program in Education. Students from schools where English is not the primary language of instruction are required to achieve a TOEFL score of at least 213 (550 on the former grading scale) for admission to the program. To earn a Master of Science in Education with a concentration in Online Teaching and Learning (MSEd-OTL), students must complete 10 courses (30 units) as outlined. All courses are 3-semester units.

For admission into the M.S. Education, Online Teaching and Learning Concentration degree program, applicants must do the following:

- Hold a bachelor's degree from an accredited institution
- Have earned a GPA of 3.0 in the last 90 semester units (or semester equivalent) of upper-division, post-baccalaureate or graduate-level course-work.
- Have teaching or training experience.
- Submit all graduate application materials to the Office of Admissions by the deadline date.
- Request official transcripts from all colleges and universities attended to be sent to Cal State East Bay. Final official transcripts, showing degree completion, must be received prior to enrollment in classes.
- Submit a letter of intent to the OTL Program Coordinator.

For detailed information on how to apply to the program, go to the Admissions Information page.

Program Learning Outcomes

- demonstrate knowledge of learning theory and instructional design
- apply understanding of recent online teaching technologies
- incorporate recommendations of recent research in online teaching and learning
- apply knowledge of learning differences and disabilities
- describe a rationale for design features of an effective online course
- cite specific supporting research and best practices from the literature related to online teaching and learning in their discipline

Education Degree Requirements (30 units)

Required Courses

The following 21 units are required coursework for the M.S. Education, Online Teaching & Learning Concentration degree:

- OTL 601 - Introduction to Online Teaching and Learning *Units: 3 (*see Errata Chapter for course modification)*
- OTL 602 - Instructional Design Models for Online Learning *Units: 3 (*see Errata Chapter for course modification)*
- OTL 603 - Technology Tools for Online Instruction *Units: 3*
- OTL 604 - Designing Curriculum for Online Instruction *Units: 3*
- OTL 605 - Educational Planning and Development for Online Programs *Units: 3*

- OTL 606 - Research in Online Teaching and Learning *Units: 3*
- OTL 607 - History and Culture of Online Learning Communities *Units: 3*

Elective Courses

Students must choose two (2) of the following elective courses for 6 units as part of the degree requirements:

Theoretical Electives: Choose one (1).

- OTL 672 - Content Development for Online Learning *Units: 3*
- OTL 673 - Supervising and Evaluating Online Teaching *Units: 3*
- OTL 674 - Current Issues in Online Learning *Units: 3*

Methodological Electives: Choose one (1).

- OTL 680 - Building the Online Environment *Units: 3*
- OTL 681 - Creating Digital Media for Online Instruction *Units: 3*
- OTL 682 - Designing and Implementing User Interfaces for Online Instruction *Units: 3*
- OTL 683 - Providing Interactivity in the Online Environment *Units: 3*

Capstone Experience

The capstone is required for all students to complete the degree:

- OTL 693 - Capstone Project *Units: 3* (*see Errata Chapter for course modification)

Teacher Education: Post-Baccalaureate

- • TED 500 - Foundations of Multiple Subject Education *Units: 4*
- • TED 501 - Introduction to Teaching Emergent Bilinguals *Units: 1*
- • TED 502 - Inclusive Teaching Practices in a Multiple Subject Classroom *Units: 3*
- • TED 503 - Equitable Teaching Practices in a Multiple Subject Classroom *Units: 3*
- • TED 504 - Introduction to Teaching Special Populations *Units: 1*
- • TED 505 - Teaching English Learners in the Multiple Subject Classroom *Units: 3*
- • TED 507 - Technology in the Multiple Subject Classroom *Units: 2*
- • TED 508 - Curriculum & Instruction: Reading *Units: 3*
- • TED 509 - Curriculum & Instruction: Language Arts and Social Studies *Units: 4*
- • TED 510 - Curriculum & Instruction: Mathematics in a Multiple Subject Classroom *Units: 3*
- • TED 511 - Curriculum & Instruction: Visual & Performing Arts *Units: 2*
- • TED 512 - Curriculum & Instruction: Science in the Multiple Subject Classroom *Units: 3*
- • TED 513 - Curriculum & Instruction: Health and Physical Education *Units: 2*
- • TED 520 - Foundations of Single Subject Education *Units: 4*

- • TED 521 - Content Literacy for All Learners *Units: 4*
- • TED 522 - Introduction to Teaching Emergent Bilinguals *Units: 1*
- • TED 523 - Inclusive Teaching Practices in a Single Subject Classroom A *Units: 3*
- • TED 524 - Inclusive Teaching Practices in a Single Subject Classroom B *Units: 3*
- • TED 525 - Teaching Special Education Students in a Single Subject Classroom *Units: 1*
- • TED 528 - Technology in the Single Subject Classroom *Units: 2*
- • TED 529 - Professional Responsibilities in Education *Units: 3*
- • TED 530 - English I: Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 531 - English II: Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 532 - English III: Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 533 - Historical Social Studies I: Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 534 - History Social Studies II: Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 536 - Science I: Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 537 - Science II: Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 538 - Science III: Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 539 - Mathematics I: Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 540 - Mathematics II: Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 541 - Mathematics III: Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 542 - Visual Arts I: Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 543 - Visual Arts II: Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 544 - Visual Arts III: Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 545 - Music I: Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 546 - Music II: Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 547 - Music III: Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 548 - Physical Education I- Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 549 - Physical Education II- Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 550 - Physical Education III - Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 551 - Spanish I- Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 552 - Spanish II: Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 553 - Spanish III - Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 554 - French I - Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 555 - French II - Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 556 - French III - Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 557 - Hindi I: Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 558 - Hindi II: Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 559 - Hindi III: Instructional Methods in a Single Subject Classroom *Units: 3*

Minor

Early Childhood Education Minor

Minor Requirements

Students will take the following 16 units to complete the Early Childhood Education Minor:

- TED 470 - Early Childhood Education: Integrated Language & Literacy Development *Units: 3*
- TED 471 - Early Childhood Education: Integrated Math and Science *Units: 3*
- TED 472 - Early Childhood Education: Integrated Arts and Social Studies *Units: 3*
- TED 473 - Early Childhood Education: Inclusive Practices *Units: 3*
- TED 474 - Early Childhood Education: Professional Seminar and Practicum *Units: 4*

Courses

Education: Interdisciplinary - Graduate

- • EDUI 610 - The Web as an Interactive Educational Tool *Units: 4*
- • EDUI 620 - Theory and Design of E-Learning *Units: 4*
- • EDUI 630 - Math, Science and Technology *Units: 4*
- • EDUI 640 - Research in Educational Technology *Units: 4*
- • EDUI 650 - Mobile Application Development *Units: 4*
- • EDUI 660 - Digital Graphics *Units: 4*
- • EDUI 670 - Principles of Instructional Design *Units: 4*
- • EDUI 680 - Current Technologies *Units: 2*
- • EDUI 690 - Independent Study *Units: 1-3*
- • EDUI 691 - University Thesis *Units: 1-4*
- • EDUI 692 - Comprehensive Examination Preparation *Units: 2*
- • EDUI 693 - Master's Project *Units: 4*
- • EDUI 695 - Educational Technology Internship *Units: 4*
- • EDUI 697 - Issues in Education Interdisciplinary Studies *Units: 3*

- • EDUI 699 - Department Thesis *Units: 4*

Education: Online Teaching and Learning

- • OTL 601 - Introduction to Online Teaching and Learning *Units: 3*
- • OTL 602 - Instructional Design Models for Online Learning *Units: 3*
- • OTL 603 - Technology Tools for Online Instruction *Units: 3*
- • OTL 604 - Designing Curriculum for Online Instruction *Units: 3*
- • OTL 605 - Educational Planning and Development for Online Programs *Units: 3*
- • OTL 606 - Research in Online Teaching and Learning *Units: 3*
- • OTL 607 - History and Culture of Online Learning Communities *Units: 3*
- • OTL 672 - Content Development for Online Learning *Units: 3*
- • OTL 673 - Supervising and Evaluating Online Teaching *Units: 3*
- • OTL 674 - Current Issues in Online Learning *Units: 3*
- • OTL 680 - Building the Online Environment *Units: 3*
- • OTL 681 - Creating Digital Media for Online Instruction *Units: 3*
- • OTL 682 - Designing and Implementing User Interfaces for Online Instruction *Units: 3*
- • OTL 683 - Providing Interactivity in the Online Environment *Units: 3*
- • OTL 693 - Capstone Project *Units: 3*

Teacher Education

- • TED 301 - Introduction to Education *Units: 3*
- • TED 302 - Introduction to Teaching *Units: 3*
- • TED 398 - Internship *Units: 1-3*
- • TED 420 - Art Skills for Teachers *Units: 3*
- • TED 425 - Arts Integration for Teachers *Units: 3*
- • TED 470 - Early Childhood Education: Integrated Language & Literacy Development *Units: 3*
- • TED 471 - Early Childhood Education: Integrated Math and Science *Units: 3*
- • TED 472 - Early Childhood Education: Integrated Arts and Social Studies *Units: 3*
- • TED 473 - Early Childhood Education: Inclusive Practices *Units: 3*
- • TED 474 - Early Childhood Education: Professional Seminar and Practicum *Units: 4*
- • TED 490 - Independent Study *Units: 1-4*
- • TED 497 - Issues in Teacher Education *Units: 3*

Teacher Education: Graduate

- • TED 535 - History Social Studies III: Instructional Methods in a Single Subject Classroom *Units: 3*
- • TED 600 - Introduction to Graduate Studies *Units: 1*
- • TED 601 - Professional Research Seminar I *Units: 1*
- • TED 602 - Professional Research Seminar II *Units: 1*
- • TED 603 - Professional Research Seminar III *Units: 1*
- • TED 611 - Reading and Synthesizing Research in Education *Units: 3*
- • TED 612 - Understanding Design and Planning Research in Education *Units: 3*
- • TED 613 - Implementing and Analyzing Research in P-12 *Units: 3*
- • TED 620 - Advanced Studies in Mathematics Education *Units: 3*
- • TED 621 - Advanced Studies in Science Education *Units: 3*
- • TED 622 - Advanced Studies in Expository Reading and Writing *Units: 3*
- • TED 623 - Advanced Studies in Methods for English Language Learners *Units: 3*
- • TED 624 - Advanced Integrated Arts for All Teachers *Units: 3*
- • TED 625 - Teachers as Agents of Change *Units: 3*
- • TED 626 - Advanced Studies in Curriculum and Instruction *Units: 3*

- • TED 627 - Advanced Educational Psychology *Units: 3*
- • TED 630 - Advanced Language & Literacy Development in Early Childhood Education *Units: 4*
- • TED 631 - Advanced Integrated Math & Science in Early Childhood Education *Units: 3*
- • TED 632 - Advanced Integrated Arts & Social Studies in Early Childhood Education *Units: 3*
- • TED 633 - Advanced Special Education Practices in Early Childhood Education *Units: 3*
- • TED 634 - Professional Leadership in Early Childhood Education *Units: 2*
- • TED 635 - Field Based Practicum in Early Childhood Education *Units: 2*
- • TED 660 - Literacy Research and Methods *Units: 3*
- • TED 661 - Reading Comprehension Research and Methods *Units: 2*
- • TED 662 - Culture of Literacy: Focus on Diversity *Units: 2*
- • TED 663 - Literacy Assessment *Units: 3*
- • TED 664 - Literacy Intervention *Units: 3*
- • TED 670 - The Science of Reading Foundations *Units: 3*
- • TED 671 - Early Literacy Foundations *Units: 3*
- • TED 672 - Secondary Literacy Foundations *Units: 3*
- • TED 687 - Reading Research & Evaluation *Units: 3*
- • TED 688 - Research in Education *Units: 1*
- • TED 690 - Independent Study *Units: 1-3*
- • TED 691 - University Thesis *Units: 1-4*
- • TED 692 - Comprehensive Examination Preparation *Units: 2*

- • TED 587 - Single Subject Intern Teaching I *Units: 5*
- • TED 588 - Single Subject Intern Teaching II *Units: 5*

Certificate

Educational Technology Certificate

Certificate Requirements (10-12 units)

The Graduate Certificate in Educational Technology is designed for educators, e-learning developers, and industry technologists. The program combines instructional design theories with a knowledge of emerging technologies. The program advocates lifelong learning that allows students to nurture their personal and professional growth. The arenas in which Educational Technology Certificate graduates will be active include school districts, county offices of education, community colleges, the high tech industry as an e-learning developer, and the field of instructional design.

Our students earn a graduate certificate to gain or enhance employment as an educational technologist, instructional designers, a curriculum specialist, community college instructors, school district technology director and technology trainer. Certificate holders also teach more effectively using educational technologies in the classroom. Finally, a certificate allows the transfer of 9 units to the Master's in Educational Technology.

Admissions Requirements

- Students must demonstrate knowledge and application of various programming languages, or they must have experience with Web-based instruction. Basic knowledge of digital technologies and HTML is required.
- Advanced proficiency in one platform (e.g., Macintosh, Windows, UNIX) is also required. Students must maintain competency in technology as long as they are graduate students in the program.
- Candidates must hold a baccalaureate degree from an accredited institution.
- Candidates must have earned a 3.0 Grade Point Average (GPA) in all upper division or post baccalaureate coursework.
- If a candidate has a baccalaureate degree from out of the country, he/she must have his/her transcripts evaluated by the International Graduate Student Admissions Office.
- Candidates must have met the University Writing Skills Requirement (UWSR). For information about meeting the UWSR, see the Testing Office website at www.csueastbay/testing or call 510.885.3661.
- The "CR/NC" grade option in any course applied to a certificate program must be approved in advance by the Graduate Coordinator.

Required Courses

The following 8 units are required:

- EDUI 610 - The Web as an Interactive Educational Tool *Units: 4*
- EDUI 620 - Theory and Design of E-Learning *Units: 4*

Elective Courses

Choose one (1) of the following courses for 2-4 units:

- EDUI 630 - Math, Science and Technology *Units: 4*
- EDUI 650 - Mobile Application Development *Units: 4*
- EDUI 660 - Digital Graphics *Units: 4*

- EDUI 670 - Principles of Instructional Design *Units: 4*
- EDUI 680 - Current Technologies *Units: 2*

Department of Theatre and Dance

Department Office located in the 2nd Floor of the Robinson Hall building, Room 220

Open hours 8:00 a.m. - 5:00 p.m., Monday through Friday

Dept. Phone: (510) 885-3118

Faculty

Professor Emeritus

Thomas C. Hird, M.F.A. University of California, Los Angeles

Professors

Darryl V. Jones (Chair), M.F.A. The Boston University School of Theatre Arts

Ann Fajilan, M.F.A. University of California, Davis

Nina O. Haft, M.F.A. University of Wisconsin

Rhoda Helfman Kaufman, Ph.D. University of California, Berkeley

Marc Jacobs, M.F.A. California State University, Long Beach

Eric Kupers, M.F.A. University of California, Davis

Assistant Professor

Richard Olmsted, M.F.A. Carnegie Mellon University

Lecturers

Ulises Alcala, M.F.A. University of Massachusetts, Amherst

Laura Ellis, M.F.A. Mills College

Kimiko Guthrie, M.F.A. Mills College

Mission Statement

Theatre and Dance, as performing arts, provide a spark that transforms a person into a lifelong student. Across the campus we offer opportunities for participation both in production and in critical examination that help students to discover, accept, and express themselves as active, enlightened persons, and to know and appreciate the work and values of others. To succeed in their performances, students master world history as well as the theories of art and esthetics by use of the everyday practices of the liberal arts, including research, writing, figuring, reasoning, and experimentation. They learn practical, usable skills. Students experience the problems of making choices while on stage and off. They learn to recognize the connection between art and life, as well as to discover their own capacities to make choices as citizens, as creators of art, and as directors of their lives.

Bachelor

Theatre Arts, B.A.: Dance and Inclusive Performance Concentration

Theatre Arts, B.A. Program (120 units)

Program Description

Through inclusive and rigorous creative inquiry, the Department of Theatre and Dance provides comprehensive training for performance, creativity, reflection, diversity, collaboration, mentorship, community engagement, and social justice.

Through a combination of core classes with a concentration, the program provides comprehensive pre-professional training in the areas of performance (Acting, Dance, Inclusive Performance (Applied Social Justice), and Musical Theatre) and production (Stage Technology and Design). Our primary goal is to develop artists whose performance skills and creativity are supported by a firm background in history, literature, and aesthetics. In an environment designed to encourage creativity and self-expression, students perform regularly in a variety of theatre and dance productions. The culmination requirement offers an opportunity to direct, choreograph, perform, write, intern, or design.

Theatre Arts program encourages majors to acquire a range of skills to expand their career options. Many have entered advanced studies in nationally recognized universities and conservatories. Some have chosen careers in teaching, while others have gone directly into theatre or dance performance. Alumni perform on professional stages around the world, including Broadway and Hollywood, where they have won Tony and Emmy Awards, as well as other professional recognitions. Employers in business and public service professions desire Theatre Arts graduates for their team skills, their imaginative approach to problems, and their ability to communicate creatively.

Program Learning Outcomes

Students graduating with a B.A. in Theatre Arts from Cal State East Bay will be able to:

- ...Perform for audiences, on stage or in other arenas and careers.
- ...Create performance that presents human issues in inclusive, exciting, original ways.
- ...Reflect on historical and contemporary works of theatre and dance from diverse cultures.
- ...Engage individuals and build community through meaningful theatre and dance experiences.

Career Opportunities

Actor/Actress • Box Office Manager • Business Agent • Choreographer • College Student Services Manager • Comedian • Corporate Officer • Costume Designer • Costume/Wardrobe Technician • Dancer • Director • Drama or Dance Teacher/Professor • Dramaturg • House Manager • Lighting Technician • Make-Up Artist/Specialist • Non-profit Manager • Playwright • Producer • Recreation Supervisor • Sales/Marketing Specialist • Set Decorator • Set Designer • Sound Technician • Stage Manager • Theatre Critic • Theatre Technician • Theatre Manager

Features

The Department of Theatre and Dance produces approximately 5-8 plays and dance concerts during the year. The selection of plays exposes students to acting, dance, design, directing, singing, stage management, and technical theatre suitable to a wide variety of styles, periods, and genres from Shakespeare to American Realism and from Greek Tragedy to Modern Drama.

The department features ensemble groups in the areas of Acting, Dance, Inclusive Performance, Musical Theatre, and Stage Technology/Design, providing access to a varied and challenging performance schedule. Sixteen department productions have toured to four European countries. Annually our tours travel in-state and across the country.

The department is fortunate to have excellent facilities including the 450 seat University Theatre; a scene shop equipped for traditional carpentry and MIG welding, including a full paint frame; a costume shop with ten sewing stations; a sixteen-station design/drafting studio with a separate digital lab; two theatre studio classrooms; green room; make-up room; dressing rooms with lockers and showers; and, a spacious Dance Studio.

Degree Requirements Unit-Outline

- A baccalaureate of arts degree requires a total of 120 units:
 - The major requirements consists of 50-53 units
 - General Education (GE) & Graduation Requirements (GR) consists of 57 units;
 - Free Electives may consist of 10-13 units (*actual number of free elective units may depend on GE/GR units*).
- Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.*

Theatre Arts Major Requirements (50-53 units)

Core Coursework

Students must take all of the following courses for 17 units:

- DANC 362 - Inclusive Interdisciplinary Ensemble *Units: 2*
- THEA 100 - Theatre: A Spotlight on Life *Units: 3 ; G.E./G.R. Area: C2*
- THEA 151 - Fundamentals of Acting *Units: 3*
- THEA 461 - Scenery, Lighting and Sound Design *Units: 3*
- THEA 462 - Costume and Makeup Design *Units: 3*
- THEA 432 - Exploration of Dramatic Literature Themes *Units: 3 ; G.E./G.R. Area: C4*

Core Performance Coursework

Students must complete a minimum of 8 units from the following performance courses:

- DANC 360 - Inclusive Interdisciplinary Ensemble Performance *Units: 2*
- DANC 370 - Dance Ensemble Performance *Units: 2*
- THEA 350 - Theatre Performance *Units: 2*
- THEA 370 - Musical Theater Performance *Units: 2*
- THEA 381 - Production Support: Stage, Lights and Sound Shop or Crew *Units: 2*
- THEA 382 - Production Support: Costume and Makeup Shop or Crew *Units: 2*

Concentrations

Theatre Arts majors are required to choose a concentration to fulfill their major requirements. Choose one (1) of the following:

- Theatre Arts, B.A.: Dance and Inclusive Performance Concentration
- Theatre Arts, B.A.: Stage Technology and Design Concentration
- Theatre Arts, B.A.: Theatre Performance: Acting and Musical Theatre Concentration

Capstone Requirement

Students must take one of the following CAPSTONE courses for 3 units to complete the major.

- DANC 493 - Dance Projects Capstone *Units: 3*
- THEA 493 - Theatre Projects Capstone *Units: 3*

Dance and Inclusive Performance Concentration

The Dance and Inclusive Performance concentration is 23-24 units. In addition to the concentration core coursework, students must choose either the Dance Track or Inclusive Performance Track to complete the concentration requirements.

Concentration Core

All of the following 13 units are required as outlined:

Students must take the following STAGE TECHNIQUE courses:

- THEA 111 - Costume Techniques *Units: 1*
- THEA 113 - Stage Lighting Techniques *Units: 1*

Complete two (2) from the following FIRST OR SECOND LEVEL dance courses:

- DANC 110 - Contemporary Ballet I *Units: 1 ; G.E./G.R. Area: E*
- DANC 113 - Jazz Dance I *Units: 1 ; G.E./G.R. Area: E*
- DANC 115 - Modern Dance I *Units: 1 ; G.E./G.R. Area: E*
- DANC 210 - Contemporary Ballet II *Units: 1 ; G.E./G.R. Area: E*
- DANC 211 - Hip Hop Dance II *Units: 1 ; G.E./G.R. Area: E*
- DANC 212 - African Dance *Units: 1 ; G.E./G.R. Area: E*
- DANC 213 - Jazz Dance II *Units: 1 ; G.E./G.R. Area: E*
- DANC 214 - Modern Jazz Dance II *Units: 1 ; G.E./G.R. Area: E*
- DANC 215 - Modern Dance II *Units: 1 ; G.E./G.R. Area: E*
- DANC 216 - Dance Partnering II *Units: 1 ; G.E./G.R. Area: E*
- DANC 217 - Musical Theater Dance *Units: 1 ; G.E./G.R. Area: E*

Students must take one (1) from the following DANCE HISTORY courses:

- DANC 233 - Street to Stage: History of Hip Hop Dance *Units: 3 ; G.E./G.R. Area: C2; Diversity*
- DANC 234 - Tap and Musical Theatre Dance on Stage and Film *Units: 3 ; G.E./G.R. Area: C1; Diversity*

Students must take all the following ENSEMBLE courses:

- DANC 362 - Inclusive Interdisciplinary Ensemble *Units: 2*
- DANC 371 - Dance Stage and Screen Ensemble *Units: 2*
- DANC 372 - Dance Creative Process Ensemble *Units: 2*

Dance Track

Students choosing the Dance Track will take 10 units as outlined to complete the concentration requirements:

Students must take two (2) SECOND-LEVEL dance technique courses:

- DANC 210 - Contemporary Ballet II *Units: 1 ; G.E./G.R. Area: E*
- DANC 211 - Hip Hop Dance II *Units: 1 ; G.E./G.R. Area: E*
- DANC 212 - African Dance *Units: 1 ; G.E./G.R. Area: E*
- DANC 213 - Jazz Dance II *Units: 1 ; G.E./G.R. Area: E*
- DANC 214 - Modern Jazz Dance II *Units: 1 ; G.E./G.R. Area: E*
- DANC 215 - Modern Dance II *Units: 1 ; G.E./G.R. Area: E*
- DANC 216 - Dance Partnering II *Units: 1 ; G.E./G.R. Area: E*
- DANC 217 - Musical Theater Dance *Units: 1 ; G.E./G.R. Area: E*

Students must take two (2) THIRD-LEVEL dance technique courses:

- DANC 311 - Hip Hop Dance III *Units: 1*
- DANC 314 - Modern Jazz Dance III *Units: 1*
- DANC 315 - Modern Dance III *Units: 1*
- DANC 316 - Advanced Dance Partnering *Units: 1*

Students must take one (1) DANCE HISTORY course:

- DANC 331 - Sex, Race, and Body Politics in Dance *Units: 3 ; G.E./G.R. Area: C4; Diversity*
- DANC 332 - World Dance and Cultures *Units: 3 ; G.E./G.R. Area: C4*

And students must take the following MOVEMENT course:

- DANC 401 - Movement Analysis *Units: 3 ; G.E./G.R. Area: C4*

Inclusive Performance Track

Students choosing the Inclusive Performance Track will take 10-11 units as outlined to complete the concentration requirements:

Students must take the following two (2) beginning STAGE TECHNIQUE courses:

- THEA 112 - Makeup Techniques *Units: 1*
- THEA 114 - Sound Production Techniques *Units: 1*

Students choose one (1) PERFORMANCE ANALYSIS course:

- DANC 345 - How to Watch Dance *Units: 3 ; G.E./G.R. Area: C4*
- THEA 345 - How to Watch Plays and Film *Units: 3 ; G.E./G.R. Area: C4*

Students must take a minimum of 5-6 units of METHODS and SUPPORT coursework:

- **DANC 331 - Sex, Race, and Body Politics in Dance** *Units: 3 ; G.E./G.R. Area: C4; Diversity*
- **THEA 150 - Improvisation for Life, Stage and Wellbeing** *Units: 2 ; G.E./G.R. Area: C1*
- **THEA 231 - Creating Theatre from Personal Experience** *Units: 3 ; G.E./G.R. Area: C1*
- **THEA 234 - Social Justice Theatre Ensemble** *Units: 2 ; G.E./G.R. Area: C2; Social Justice*
- **THEA 252 - Voice and Movement for Actors** *Units: 2*
- **THEA 254 - Acting and Diversity** *Units: 3 ; G.E./G.R. Area: C2; Diversity*
- **THEA 261 - Stage Management** *Units: 1*
- **THEA 331 - Solo and Devised Theatre Ensemble** *Units: 2*
- **THEA 361 - Scene Painting** *Units: 2*

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

Actor/Actress • Box Office Manager • Business Agent • Choreographer • College Student Services Manager • Comedian • Corporate Officer • Costume Designer • Costume/Wardrobe Technician • Dancer • Director • Drama or Dance Teacher/Professor • Dramaturg • House Manager • Lighting Technician • Make-Up Artist/Specialist • Non-profit Manager • Playwright • Producer • Recreation Supervisor • Sales/Marketing Specialist • Set Decorator • Set Designer • Sound Technician • Stage Manager • Theatre Critic • Theatre Technician • Theatre Manager

Features

The Department of Theatre and Dance produces approximately 5-8 plays and dance concerts during the year. The selection of plays exposes students to acting, dance, design, directing, singing, stage management, and technical theatre suitable to a wide variety of styles, periods, and genres from Shakespeare to American Realism and from Greek Tragedy to Modern Drama.

The department features ensemble groups in the areas of Acting, Dance, Inclusive Performance, Musical Theatre, and Stage Technology/Design, providing access to a varied and challenging performance schedule. Sixteen department productions have toured to four European countries. Annually our tours travel in-state and across the country.

The department is fortunate to have excellent facilities including the 450 seat University Theatre; a scene shop equipped for traditional carpentry and MIG welding, including a full paint frame; a costume shop with ten sewing stations; a sixteen-station design/drafting studio with a separate digital lab; two theatre studio classrooms; green room; make-up room; dressing rooms with lockers and showers; and, a spacious Dance Studio.

Degree Requirements Unit-Outline

- A baccalaureate of arts degree requires a total of 120 units:
 - The major requirements consists of 50-53 units
 - General Education (GE) & Graduation Requirements (GR) consists of 57 units;
 - Free Electives may consist of 10-13 units (*actual number of free elective units may depend on GE/GR units*).
- Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.*

Theatre Arts Major Requirements (50-53 units)

Core Coursework

Students must take all of the following courses for 17 units:

- DANC 362 - Inclusive Interdisciplinary Ensemble *Units: 2*
- THEA 100 - Theatre: A Spotlight on Life *Units: 3 ; G.E./G.R. Area: C2*
- THEA 151 - Fundamentals of Acting *Units: 3*
- THEA 461 - Scenery, Lighting and Sound Design *Units: 3*
- THEA 462 - Costume and Makeup Design *Units: 3*
- THEA 432 - Exploration of Dramatic Literature Themes *Units: 3 ; G.E./G.R. Area: C4*

Core Performance Coursework

Students must complete a minimum of 8 units from the following performance courses:

- DANC 360 - Inclusive Interdisciplinary Ensemble Performance *Units: 2*
- DANC 370 - Dance Ensemble Performance *Units: 2*
- THEA 350 - Theatre Performance *Units: 2*
- THEA 370 - Musical Theater Performance *Units: 2*
- THEA 381 - Production Support: Stage, Lights and Sound Shop or Crew *Units: 2*
- THEA 382 - Production Support: Costume and Makeup Shop or Crew *Units: 2*

Concentrations

Theatre Arts majors are required to choose a concentration to fulfill their major requirements. Choose one (1) of the following:

- Theatre Arts, B.A.: Dance and Inclusive Performance Concentration
- Theatre Arts, B.A.: Stage Technology and Design Concentration
- Theatre Arts, B.A.: Theatre Performance: Acting and Musical Theatre Concentration

Capstone Requirement

Students must take one of the following CAPSTONE courses for 3 units to complete the major.

- DANC 493 - Dance Projects Capstone *Units: 3*
- THEA 493 - Theatre Projects Capstone *Units: 3*

Stage Technology and Design Concentration

The Stage Technology and Design concentration is 22 units as outlined below:

Students must take all of the following 8 courses:

- THEA 111 - Costume Techniques *Units: 1*
- THEA 112 - Makeup Techniques *Units: 1*
- THEA 113 - Stage Lighting Techniques *Units: 1*
- THEA 114 - Sound Production Techniques *Units: 1*
- THEA 260 - Architecture and Costume History *Units: 3 ; G.E./G.R. Area: C2*
- THEA 261 - Stage Management *Units: 1*
- THEA 262 - Pencil and Color Sketching *Units: 1*
- THEA 431 - Exploration of Dramatic Literature Characters *Units: 3 ; G.E./G.R. Area: C4*

Students must take the following course four (4) times:

- THEA 360 - Technology and Design Studio *Units: 1*

Students must choose a minimum of 6 units from the following FOCUS courses:

- THEA 263 - Wood and Metal Construction *Units: 2*
- THEA 264 - Non-Western Costume *Units: 3 ; G.E./G.R. Area: C1*
- THEA 265 - Fashion History and Design *Units: 3 ; G.E./G.R. Area: C2*
- THEA 361 - Scene Painting *Units: 2*
- THEA 362 - Computer Aided Design and Model Making *Units: 2*
- THEA 363 - Advanced Costume Construction *Units: 2*
- THEA 365 - Masks and Specialized Makeup *Units: 2*

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

- • THEA 497 - Issues in Dramatic Literature *Units: 3*

Theatre Arts, B.A.: Theatre Performance: Acting and Musical Theatre Concentration

Theatre Arts, B.A. Program (120 units)

Program Description

Through inclusive and rigorous creative inquiry, the Department of Theatre and Dance provides comprehensive training for performance, creativity, reflection, diversity, collaboration, mentorship, community engagement, and social justice.

Through a combination of core classes with a concentration, the program provides comprehensive pre-professional training in the areas of performance (Acting, Dance, Inclusive Performance (Applied Social Justice), and Musical Theatre) and production (Stage Technology and Design). Our primary goal is to develop artists whose performance skills and creativity are supported by a firm background in history, literature, and aesthetics. In an environment designed to encourage creativity and self-expression, students perform regularly in a variety of theatre and dance productions. The culmination requirement offers an opportunity to direct, choreograph, perform, write, intern, or design.

Theatre Arts program encourages majors to acquire a range of skills to expand their career options. Many have entered advanced studies in nationally recognized universities and conservatories. Some have chosen careers in teaching, while others have gone directly into theatre or dance performance. Alumni perform on professional stages around the world, including Broadway and Hollywood, where they have

won Tony and Emmy Awards, as well as other professional recognitions. Employers in business and public service professions desire Theatre Arts graduates for their team skills, their imaginative approach to problems, and their ability to communicate creatively.

Program Learning Outcomes

Students graduating with a B.A. in Theatre Arts from Cal State East Bay will be able to:

- ...Perform for audiences, on stage or in other arenas and careers.
- ...Create performance that presents human issues in inclusive, exciting, original ways.
- ...Reflect on historical and contemporary works of theatre and dance from diverse cultures.
- ...Engage individuals and build community through meaningful theatre and dance experiences.

Career Opportunities

Actor/Actress • Box Office Manager • Business Agent • Choreographer • College Student Services Manager • Comedian • Corporate Officer • Costume Designer • Costume/Wardrobe Technician • Dancer • Director • Drama or Dance Teacher/Professor • Dramaturg • House Manager • Lighting Technician • Make-Up Artist/Specialist • Non-profit Manager • Playwright • Producer • Recreation Supervisor • Sales/Marketing Specialist • Set Decorator • Set Designer • Sound Technician • Stage Manager • Theatre Critic • Theatre Technician • Theatre Manager

Features

The Department of Theatre and Dance produces approximately 5-8 plays and dance concerts during the year. The selection of plays exposes students to acting, dance, design, directing, singing, stage management, and technical theatre suitable to a wide variety of styles, periods, and genres from Shakespeare to American Realism and from Greek Tragedy to Modern Drama.

The department features ensemble groups in the areas of Acting, Dance, Inclusive Performance, Musical Theatre, and Stage Technology/Design, providing access to a varied and challenging performance schedule. Sixteen department productions have toured to four European countries. Annually our tours travel in-state and across the country.

The department is fortunate to have excellent facilities including the 450 seat University Theatre; a scene shop equipped for traditional carpentry and MIG welding, including a full paint frame; a costume shop with ten sewing stations; a sixteen-station design/drafting studio with a separate digital lab; two theatre studio classrooms; green room; make-up room; dressing rooms with lockers and showers; and, a spacious Dance Studio.

Degree Requirements Unit-Outline

- A baccalaureate of arts degree requires a total of 120 units:
- The major requirements consists of 50-53 units
- General Education (GE) & Graduation Requirements (GR) consists of 57 units;
- Free Electives may consist of 10-13 units (*actual number of free elective units may depend on GE/GR units*).

Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.

Theatre Arts Major Requirements (50-53 units)

Core Coursework

Students must take all of the following courses for 17 units:

- DANC 362 - Inclusive Interdisciplinary Ensemble *Units: 2*
- THEA 100 - Theatre: A Spotlight on Life *Units: 3 ; G.E./G.R. Area: C2*
- THEA 151 - Fundamentals of Acting *Units: 3*
- THEA 461 - Scenery, Lighting and Sound Design *Units: 3*
- THEA 462 - Costume and Makeup Design *Units: 3*
- THEA 432 - Exploration of Dramatic Literature Themes *Units: 3 ; G.E./G.R. Area: C4*

Core Performance Coursework

Students must complete a minimum of 8 units from the following performance courses:

- DANC 360 - Inclusive Interdisciplinary Ensemble Performance *Units: 2*
- DANC 370 - Dance Ensemble Performance *Units: 2*
- THEA 350 - Theatre Performance *Units: 2*
- THEA 370 - Musical Theater Performance *Units: 2*
- THEA 381 - Production Support: Stage, Lights and Sound Shop or Crew *Units: 2*
- THEA 382 - Production Support: Costume and Makeup Shop or Crew *Units: 2*

Concentrations

Theatre Arts majors are required to choose a concentration to fulfill their major requirements. Choose one (1) of the following:

- Theatre Arts, B.A.: Dance and Inclusive Performance Concentration
- Theatre Arts, B.A.: Stage Technology and Design Concentration
- Theatre Arts, B.A.: Theatre Performance: Acting and Musical Theatre Concentration

Capstone Requirement

Students must take one of the following CAPSTONE courses for 3 units to complete the major.

- DANC 493 - Dance Projects Capstone *Units: 3*
- THEA 493 - Theatre Projects Capstone *Units: 3*

Theatre Performance: Acting and Musical Theatre Concentration

The Theatre Performance: Acting and Musical Theatre concentration consists of 24-25 units as outlined below:

Students must take 4 units of DANCE from the following courses:

- DANC 110 - Contemporary Ballet I *Units: 1 ; G.E./G.R. Area: E*
- DANC 113 - Jazz Dance I *Units: 1 ; G.E./G.R. Area: E*
- DANC 117 - Rhythm Tap Dance *Units: 1 ; G.E./G.R. Area: E*
- DANC 217 - Musical Theater Dance *Units: 1 ; G.E./G.R. Area: E*
- DANC 234 - Tap and Musical Theatre Dance on Stage and Film *Units: 3 ; G.E./G.R. Area: C1; Diversity*

Students must take all of the following 6 courses:

- THEA 112 - Makeup Techniques *Units: 1*
- THEA 114 - Sound Production Techniques *Units: 1*
- THEA 251 - Stage Voice and Classical Repertoire *Units: 2*
- THEA 252 - Voice and Movement for Actors *Units: 2*
- THEA 351 - Intermediate Acting *Units: 3*
- THEA 431 - Exploration of Dramatic Literature Characters *Units: 3 ; G.E./G.R. Area: C4*

Students must take one (1) course from the following:

- THEA 231 - Creating Theatre from Personal Experience *Units: 3 ; G.E./G.R. Area: C1*
- THEA 234 - Social Justice Theatre Ensemble *Units: 2 ; G.E./G.R. Area: C2; Social Justice*
- THEA 331 - Solo and Devise Theatre Ensemble *Units: 2*

Students choose two (2) courses from the following:

- THEA 254 - Acting and Diversity *Units: 3 ; G.E./G.R. Area: C2; Diversity*
- THEA 322 - History of Musical Theatre *Units: 3 ; G.E./G.R. Area: C4*
- THEA 352 - Acting and Classical Repertoire *Units: 3*
- THEA 371 - Musical Theatre Techniques *Units: 3*

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

- • THEA 497 - Issues in Dramatic Literature *Units: 3*

Minor

Dance Minor

Students must complete 19 units from the following requirements to complete the minor:

Dance Requirements

Students must complete the required units in each area:

Technique Competencies

Students must take two (2) first-level technique courses from the following for 2 units:

- DANC 110 - Contemporary Ballet I *Units: 1 ; G.E./G.R. Area: E*
- DANC 111 - Hip Hop Dance I *Units: 1 ; G.E./G.R. Area: E*
- DANC 113 - Jazz Dance I *Units: 1 ; G.E./G.R. Area: E*
- DANC 114 - Modern Jazz Dance I *Units: 1 ; G.E./G.R. Area: E*
- DANC 115 - Modern Dance I *Units: 1 ; G.E./G.R. Area: E*
- DANC 116 - Dance Partnering I *Units: 1 ; G.E./G.R. Area: E*
- DANC 117 - Rhythm Tap Dance *Units: 1 ; G.E./G.R. Area: E*

Students must take one (1) second-level technique course from the following for 1 unit:

- DANC 211 - Hip Hop Dance II *Units: 1 ; G.E./G.R. Area: E*
- DANC 212 - African Dance *Units: 1 ; G.E./G.R. Area: E*
- DANC 213 - Jazz Dance II *Units: 1 ; G.E./G.R. Area: E*
- DANC 214 - Modern Jazz Dance II *Units: 1 ; G.E./G.R. Area: E*
- DANC 215 - Modern Dance II *Units: 1 ; G.E./G.R. Area: E*
- DANC 216 - Dance Partnering II *Units: 1 ; G.E./G.R. Area: E*
- DANC 217 - Musical Theater Dance *Units: 1 ; G.E./G.R. Area: E*

Learning Community

Students must take one (1) learning community course from the following for 3 units:

- DANC 101 - Dance for All Bodies and Abilities *Units: 3 ; G.E./G.R. Area: C1*
- DANC 102 - World Dance: Tradition and Change *Units: 3 ; G.E./G.R. Area: C1*
- DANC 345 - How to Watch Dance *Units: 3 ; G.E./G.R. Area: C4*

Dance History

Students must take one (1) dance history course from the following for 3 units:

- DANC 233 - Street to Stage: History of Hip Hop Dance *Units: 3 ; G.E./G.R. Area: C2; Diversity*
- DANC 234 - Tap and Musical Theatre Dance on Stage and Film *Units: 3 ; G.E./G.R. Area: C1; Diversity*
- DANC 331 - Sex, Race, and Body Politics in Dance *Units: 3 ; G.E./G.R. Area: C4; Diversity*
- DANC 332 - World Dance and Cultures *Units: 3 ; G.E./G.R. Area: C4*

Choreography and Performance or Pedagogy

Students must take six (6) units from either the Choreography and Performance group or from the Pedagogy group:

Choreography and Performance

- DANC 273 - Dance on Camera *Units: 3 ; G.E./G.R. Area: C2*
- DANC 371 - Dance Stage and Screen Ensemble *Units: 2*
- DANC 372 - Dance Creative Process Ensemble *Units: 2*
- DANC 402 - Dance Projects *Units: 2*

Pedagogy

- DANC 341 - Dance for Children *Units: 3 ; G.E./G.R. Area: C4*
- DANC 342 - The Dance Experience *Units: 3*
- DANC 401 - Movement Analysis *Units: 3 ; G.E./G.R. Area: C4*

Performance

Complete one (1) performance course from the following for 2 units:

- DANC 360 - Inclusive Interdisciplinary Ensemble Performance *Units: 2*
- DANC 370 - Dance Ensemble Performance *Units: 2*
- DANC 402 - Dance Projects *Units: 2*

Production Support

Complete one (1) production support course from the following for 2 units:

- THEA 381 - Production Support: Stage, Lights and Sound Shop or Crew *Units: 2*

- THEA 382 - Production Support: Costume and Makeup Shop or Crew *Units: 2*

Inclusive and Social Justice Performance Minor

The minor in Inclusive and Social Justice Performance is 23-24 units.

Required Coursework

Students are required to take all of the following four (4) courses for 4 units:

- THEA 111 - Costume Techniques *Units: 1*
- THEA 112 - Makeup Techniques *Units: 1*
- THEA 113 - Stage Lighting Techniques *Units: 1*
- THEA 114 - Sound Production Techniques *Units: 1*

Dance Technique Coursework

Students choose two (2) courses from the following for 2 units:

- DANC 110 - Contemporary Ballet I *Units: 1 ; G.E./G.R. Area: E*
- DANC 111 - Hip Hop Dance I *Units: 1 ; G.E./G.R. Area: E*
- DANC 115 - Modern Dance I *Units: 1 ; G.E./G.R. Area: E*
- DANC 116 - Dance Partnering I *Units: 1 ; G.E./G.R. Area: E*
- DANC 117 - Rhythm Tap Dance *Units: 1 ; G.E./G.R. Area: E*

History, Theory, and Analysis Coursework

Students must take two (2) courses for 6 units from the following lists:

Choose one (1) from the following 100 & 200-level DANC or THEA courses:

- DANC 101 - Dance for All Bodies and Abilities *Units: 3 ; G.E./G.R. Area: C1*
- DANC 102 - World Dance: Tradition and Change *Units: 3 ; G.E./G.R. Area: C1*
- DANC 233 - Street to Stage: History of Hip Hop Dance *Units: 3 ; G.E./G.R. Area: C2; Diversity*
- DANC 234 - Tap and Musical Theatre Dance on Stage and Film *Units: 3 ; G.E./G.R. Area: C1; Diversity*
- THEA 100 - Theatre: A Spotlight on Life *Units: 3 ; G.E./G.R. Area: C2*
- THEA 101 - Doing The Right Thing: Social Justice Theatre *Units: 3 ; G.E./G.R. Area: C1; Social Justice*
- THEA 102 - Asian American Theatre *Units: 3 ; G.E./G.R. Area: C2*
- THEA 241 - America on Stage *Units: 3 ; G.E./G.R. Area: C1*
- THEA 243 - What's so Funny? Comedic Genius Since the Sixties *Units: 3 ; G.E./G.R. Area: C1*
- THEA 260 - Architecture and Costume History *Units: 3 ; G.E./G.R. Area: C2*

Choose one (1) from the following 300-level DANC or THEA courses:

- DANC 345 - How to Watch Dance *Units: 3 ; G.E./G.R. Area: C4*
- THEA 345 - How to Watch Plays and Film *Units: 3 ; G.E./G.R. Area: C4*

Ensemble Participation

Students are required to take three (3) courses from the following for 6 units:

- DANC 362 - Inclusive Interdisciplinary Ensemble *Units: 2*
- DANC 371 - Dance Stage and Screen Ensemble *Units: 2*
- THEA 231 - Creating Theatre from Personal Experience *Units: 3 ; G.E./G.R. Area: C1*
- THEA 233 - Pilipinx Culture: Theatre Ensemble *Units: 2 ; G.E./G.R. Area: C2; Diversity*
- THEA 234 - Social Justice Theatre Ensemble *Units: 2 ; G.E./G.R. Area: C2; Social Justice*
- THEA 331 - Solo and Devise Theatre Ensemble *Units: 2*

Performer Methods and Support Coursework

Students must take two (2) courses from the following for a minimum of 5 units:

- DANC 331 - Sex, Race, and Body Politics in Dance *Units: 3 ; G.E./G.R. Area: C4; Diversity*
- THEA 150 - Improvisation for Life, Stage and Wellbeing *Units: 2 ; G.E./G.R. Area: C1*
- THEA 252 - Voice and Movement for Actors *Units: 2*
- THEA 254 - Acting and Diversity *Units: 3 ; G.E./G.R. Area: C2; Diversity*
- THEA 461 - Scenery, Lighting and Sound Design *Units: 3*
- THEA 462 - Costume and Makeup Design *Units: 3*

Theatre Minor

Minor Requirements (20-22 units)

The Theatre Minor offers recognition for students who seek to add theatre performance, technical, or literary skills to their resume. Where presentation, production, or humane analysis will benefit a career, this minor will supply the introduction to and practice of teamwork, creative problem solving, and cultural understanding.

Required Courses (4 units)

- THEA 231 - Creating Theatre from Personal Experience *Units: 3 ; G.E./G.R. Area: C1*

Basic Technique Elective

Choose one (1) Basic Technique course listed below for 1 units:

- THEA 111 - Costume Techniques *Units: 1*
- THEA 112 - Makeup Techniques *Units: 1*
- THEA 113 - Stage Lighting Techniques *Units: 1*
- THEA 114 - Sound Production Techniques *Units: 1*

Electives (16-18 units)

At least nine (9) units must be from upper division.

Focus Electives

Complete four (4) courses from the following, at least two (2) 300-level or above for 10-12 units:

- THEA 100 - Theatre: A Spotlight on Life *Units: 3 ; G.E./G.R. Area: C2*
- THEA 101 - Doing The Right Thing: Social Justice Theatre *Units: 3 ; G.E./G.R. Area: C1; Social Justice*
- THEA 102 - Asian American Theatre *Units: 3 ; G.E./G.R. Area: C2*
- THEA 103 - Ancient Theatre *Units: 3 ; G.E./G.R. Area: C1*
- THEA 151 - Fundamentals of Acting *Units: 3*
- THEA 241 - America on Stage *Units: 3 ; G.E./G.R. Area: C1*
- THEA 246 - Women in Performance *Units: 3 ; G.E./G.R. Area: C1*
- THEA 251 - Stage Voice and Classical Repertoire *Units: 2*
- THEA 252 - Voice and Movement for Actors *Units: 2*
- THEA 254 - Acting and Diversity *Units: 3 ; G.E./G.R. Area: C2; Diversity*
- THEA 255 - Acting on Camera *Units: 3 ; G.E./G.R. Area: C1*
- THEA 260 - Architecture and Costume History *Units: 3 ; G.E./G.R. Area: C2*
- THEA 323 - Shakespeare on Film *Units: 3 ; G.E./G.R. Area: C4*

- THEA 351 - Intermediate Acting *Units: 3*
- THEA 352 - Acting and Classical Repertoire *Units: 3*
- THEA 371 - Musical Theatre Techniques *Units: 3*
- THEA 431 - Exploration of Dramatic Literature Characters *Units: 3 ; G.E./G.R. Area: C4*
- THEA 432 - Exploration of Dramatic Literature Themes *Units: 3 ; G.E./G.R. Area: C4*
- THEA 461 - Scenery, Lighting and Sound Design *Units: 3*
- THEA 462 - Costume and Makeup Design *Units: 3*

Complete at least one (1) of the following courses (2 units):

- THEA 350 - Theatre Performance *Units: 2*
- THEA 370 - Musical Theater Performance *Units: 2*

Complete two (2) courses from the following (4 units):

- THEA 233 - Pilipinx Culture: Theatre Ensemble *Units: 2 ; G.E./G.R. Area: C2; Diversity*
- THEA 234 - Social Justice Theatre Ensemble *Units: 2 ; G.E./G.R. Area: C2; Social Justice*
- THEA 331 - Solo and Devised Theatre Ensemble *Units: 2*
- THEA 381 - Production Support: Stage, Lights and Sound Shop or Crew *Units: 2*
- THEA 382 - Production Support: Costume and Makeup Shop or Crew *Units: 2*

Interdisciplinary Studies and Special Certificates

Academic Programs & Services

Student Services and Administration (SA) building, 4th Floor, Ste 4500

Phone: (510) 885-3716

Students interested in pursuing the Interdisciplinary Studies B.A. or B.S. or a Special Certificate should contact Dr. Mitch Watnik, Interim Associate Dean of Undergraduate Studies.

The purpose of the Interdisciplinary Studies Major and the Special Certificate programs is to allow students, with the advice and approval of knowledgeable faculty and administrators, to design their own academic programs tailored to their unique needs and interests.

At least two separate degree-granting programs must be involved. An undergraduate Interdisciplinary Studies Major must be approved no later than the time when the student has 45 semester units of work remaining to complete for the degree, including at least 30 semester units in the Interdisciplinary Studies Major. This ensures that a significant portion of the program is planned in advance by the student and his/her faculty advisors. The diploma will read Interdisciplinary Studies Major In (program title).

The Interdisciplinary Studies Major program should not be seen as a device to avoid certain requirements of a regular major, nor as a means to gain admission to an impacted program. Likewise, an Interdisciplinary Studies Major cannot be developed in areas such as architecture, agriculture, and home economics where the campus currently lacks the necessary faculty expertise and physical facilities.

Finally, an Interdisciplinary Studies Major is not a self-study, independent study, or external degree program.

Bachelor

Interdisciplinary Studies, B.A.

*** Please see the Errata chapter in this catalog for information concerning total units.*

Interdisciplinary Studies, B.A./B.S. (52-54 units)**

Note: The programs are currently undergoing review. Students interested in pursuing the Interdisciplinary Studies B.A. or B.S. or a Special Certificate should contact the Dean of Academic Programs and Services for forms and information.

Major Requirements

The University offers both the B.A. and B.S. degrees with an Interdisciplinary Studies Major. There are no clearly defined differences between the two degrees, although B.S. degrees tend to be applied programs, while the B.A. is usually considered a liberal arts and social sciences degree. Normally, the type of degree awarded for an Interdisciplinary Studies Major reflects the degrees offered by the involved departments.

To be eligible for an Interdisciplinary Studies Major, a student must have a cumulative GPA of at least 2.50. An Interdisciplinary Studies Major must be a coherent program organized around a sound academic theme. The title of an Interdisciplinary Studies Major should be short (three to five words) and should describe the central academic theme of the program, not the student's career objectives unless the two coincide.

An Interdisciplinary Studies Major must be fully approved before the student has fewer than 27 semester units to complete the major and 40 for the degree. An Interdisciplinary Studies Major must contain at least 35 semester units for the B.A. or 36 semester units for the B.S. degree. The maximum number of semester units for the Interdisciplinary Studies Major is 62 units for either the B.A. or the B.S., of which at least 24 are upper division (junior/senior level). Coursework in at least two different disciplines is required. The B.A. and B.S. degrees with an Interdisciplinary Studies Major require a total of at least 120 units.

The Interdisciplinary Studies Major requires more depth in the disciplines than the Liberal Studies Major. Accordingly, Interdisciplinary Studies Majors are expected to progress beyond general education courses in their fields.

To be eligible for an undergraduate Interdisciplinary Studies Major, the student must:

- Have an overall (all-college) and CSUEB grade point average of at least 2.50.
- Develop a one-page prospectus of at least 200 words describing the theme/focus of the academic program, giving it a title, listing the departments involved (at least two), discussing the reasons the objective cannot be met through a regular program, providing their academic and experiential background relevant to the program, stating their occupational goals, giving their time frame for completion of the program, and including their name, address, daytime phone, horizon e-mail address, and Net ID.

- After securing their consent, nominate three regular full-time faculty members to comprise the Interdisciplinary Studies Major Committee and serve as the academic advisors. The three committee members (one of whom would be the chair) must come from at least two different Cal State East Bay departments. All three members must come from departments from which the courses are chosen (e.g., an English instructor cannot be on the committee if no English courses are in the Interdisciplinary Studies Major proposal).
- Have at least 40 more semester units to complete for the degree, including at least 27 more semester units to complete for the major. Ideally, a student contemplating an Interdisciplinary Studies Major should undertake the implementation process no later than the first semester of their junior status so approval can be obtained before the completion of 80 semester units.

Procedure

Students who meet the criteria above and are interested in declaring the Interdisciplinary Studies Major must:

- E-mail the Interdisciplinary Studies Coordinator's assistant at aps@csueastbay.edu to obtain the information and instructions handout and a sample prospectus.
- Submit a prospectus (see criterion 2 above), which includes the names of the three faculty committee advisors, to the Interdisciplinary Studies Major Coordinator's assistant (aps@csueastbay.edu) before having 40 semester units left to complete the degree, including 27 semester units left to complete the major.
- The Dean of Academic Programs and Services (or their designee) reviews the prospectus and, if it is academically sound and logistically feasible, the Interdisciplinary Studies Major Coordinator forwards it (along with this description of the Interdisciplinary Studies Major policies and procedures, copies of your transcripts, and a Proposal Form) to the three faculty advisers who comprise the student's Interdisciplinary Studies Major committee.
- The three-person committee meets with the student to design the program and agree upon 3-4 learning outcomes. To avoid possible course planning problems, it is the student's responsibility to verify with the appropriate department chair(s) when the chosen major courses will be next offered and if there will be any problems with enrolling in them. One faculty member, designated as the committee chair, completes the Proposal Form, obtains the approvals of the student and all committee members, and submits the form to the Interdisciplinary Studies Major Coordinator.
- The Dean of Academic Programs and Services or their designee reviews the proposed major and learning outcomes and, if they satisfy University requirements, the Coordinator forwards a copy along with the College (Associate) Dean's Approval Form to the (associate) dean of the college in which the most units are taken and which will be the sponsoring college. That (associate) dean must approve the program and learning outcomes if they are to be implemented. A copy of the Proposal Form, proposed learning outcomes, and a college (Associate) Dean's Approval Form are also forwarded to the (associate) dean of any other college in which there are program courses.
- Each college associate dean reviews the proposed program and learning outcomes and has 2 weeks (10 class days) to respond to the Coordinator.
- If an objection is received from any college (associate) dean by the Coordinator, the proposal will be held pending resolution by that (associate) dean, the faculty committee, and the student. If the (associate) dean of the college from the sponsoring college approves the proposal and learning outcomes and if no objection is received from the other (associate) dean(s), the Dean of Academic Programs and Services will act on the proposal. If an objection is successfully overcome, the Dean of Academic Programs and Services will act on the proposal. If there are no objections or the objections are resolved, the proposal and learning outcomes will normally be approved by the Dean of Academic Programs and Services.

- When a proposal has been approved, the final document will be sent to the General Studies Department Office and the Approval Sheet signed by the Coordinator and the student.
- When the proposal is fully approved, the student will complete a Change of Major form. Copies of the program will be held by Academic Programs and Services and may be accessed at any time by the committee members, the associate dean of the sponsoring college, the Registrar's Office, and/or Coordinator.
- If changes to the program become necessary, the student shall e-mail the Interdisciplinary Studies Major Assistant at aps@csueastbay.edu and they will initiate a Petition for Change in Interdisciplinary Studies Major Requirements form for approval by the faculty committee chair, college (associate) dean, and the Coordinator. Upon approval, the program will be changed and notifications will be sent to the committee members and the student.
- When filing for graduation, the student shall inform the Coordinator. The graduation check for the Interdisciplinary Studies Major will be handled by the Coordinator and delivered to the Registrar's Office.

Interdisciplinary Studies, B.S.

**** Please see the Errata chapter in this catalog for information concerning total units.**

Interdisciplinary Studies, B.A./B.S. (52-54 units)**

Note: The programs are currently undergoing review. Students interested in pursuing the Interdisciplinary Studies B.A. or B.S. or a Special Certificate should contact the Dean of Academic Programs and Services for forms and information.

Major Requirements

The University offers both the B.A. and B.S. degrees with an Interdisciplinary Studies Major. There are no clearly defined differences between the two degrees, although B.S. degrees tend to be applied programs, while the B.A. is usually considered a liberal arts and social sciences degree. Normally, the type of degree awarded for an Interdisciplinary Studies Major reflects the degrees offered by the involved departments.

To be eligible for an Interdisciplinary Studies Major, a student must have a cumulative GPA of at least 2.50. An Interdisciplinary Studies Major must be a coherent program organized around a sound academic theme. The title of an Interdisciplinary Studies Major should be short (three to five words) and should describe the central academic theme of the program, not the student's career objectives unless the two coincide.

An Interdisciplinary Studies Major must be fully approved before the student has fewer than 27 semester units to complete the major and 40 for the degree. An Interdisciplinary Studies Major must contain at least 35 semester units for the B.A. or 36 semester units for the B.S. degree. The maximum number of semester units for the Interdisciplinary Studies Major is 62 units for either the B.A. or the B.S., of which at least 24 are upper division (junior/senior level). Coursework in at least two different disciplines is required. The B.A. and B.S. degrees with an Interdisciplinary Studies Major require a total of at least 120 units.

The Interdisciplinary Studies Major requires more depth in the disciplines than the Liberal Studies Major. Accordingly, Interdisciplinary Studies Majors are expected to progress beyond general education courses in their fields.

To be eligible for an undergraduate Interdisciplinary Studies Major, the student must:

- Have an overall (all-college) and CSUEB grade point average of at least 2.50.
- Develop a one-page prospectus of at least 200 words describing the theme/focus of the academic program, giving it a title, listing the departments involved (at least two), discussing the reasons the objective cannot be met through a regular program, providing their academic and experiential background relevant to the program, stating their occupational goals, giving their time frame for completion of the program, and including their name, address, daytime phone, horizon e-mail address, and Net ID.
- After securing their consent, nominate three regular full-time faculty members to comprise the Interdisciplinary Studies Major Committee and serve as the academic advisors. The three committee members (one of whom would be the chair) must come from at least two different Cal State East Bay departments. All three members must come from departments from which the courses are chosen (e.g., an English instructor cannot be on the committee if no English courses are in the Interdisciplinary Studies Major proposal).
- Have at least 40 more semester units to complete for the degree, including at least 27 more semester units to complete for the major. Ideally, a student contemplating an Interdisciplinary Studies Major should undertake the implementation process no later than the first semester of their junior status so approval can be obtained before the completion of 80 semester units.

Procedure

Students who meet the criteria above and are interested in declaring the Interdisciplinary Studies Major must:

- E-mail the Interdisciplinary Studies Coordinator's assistant at aps@csueastbay.edu to obtain the information and instructions handout and a sample prospectus.
- Submit a prospectus (see criterion 2 above), which includes the names of the three faculty committee advisors, to the Interdisciplinary Studies Major Coordinator's assistant (aps@csueastbay.edu) before having 40 semester units left to complete the degree, including 27 semester units left to complete the major.
- The Dean of Academic Programs and Services (or their designee) reviews the prospectus and, if it is academically sound and logistically feasible, the Interdisciplinary Studies Major Coordinator forwards it (along with this description of the Interdisciplinary Studies Major policies and procedures, copies of your transcripts, and a Proposal Form) to the three faculty advisers who comprise the student's Interdisciplinary Studies Major committee.
- The three-person committee meets with the student to design the program and agree upon 3-4 learning outcomes. To avoid possible course planning problems, it is the student's responsibility to verify with the appropriate department chair(s) when the chosen major courses will be next offered and if there will be any problems with enrolling in them. One faculty member, designated as the committee chair, completes the Proposal Form, obtains the approvals of the student and all committee members, and submits the form to the Interdisciplinary Studies Major Coordinator.
- The Dean of Academic Programs and Services or their designee reviews the proposed major and learning outcomes and, if they satisfy University requirements, the Coordinator forwards a copy along with the College (Associate) Dean's Approval Form to the (associate) dean of the college in which the most units are taken and which will be the sponsoring college. That (associate) dean must approve the program and learning outcomes if they are to be implemented. A copy of the Proposal Form, proposed learning outcomes, and a college (Associate) Dean's Approval Form are also forwarded to the (associate) dean of any other college in which there are program courses.
- Each college associate dean reviews the proposed program and learning outcomes and has 2 weeks (10 class days) to respond to the Coordinator.

- If an objection is received from any college (associate) dean by the Coordinator, the proposal will be held pending resolution by that (associate) dean, the faculty committee, and the student. If the (associate) dean of the college from the sponsoring college approves the proposal and learning outcomes and if no objection is received from the other (associate) dean(s), the Dean of Academic Programs and Services will act on the proposal. If an objection is successfully overcome, the Dean of Academic Programs and Services will act on the proposal. If there are no objections or the objections are resolved, the proposal and learning outcomes will normally be approved by the Dean of Academic Programs and Services.
- When a proposal has been approved, the final document will be sent to the General Studies Department Office and the Approval Sheet signed by the Coordinator and the student.
- When the proposal is fully approved, the student will complete a Change of Major form. Copies of the program will be held by Academic Programs and Services and may be accessed at any time by the committee members, the associate dean of the sponsoring college, the Registrar's Office, and/or Coordinator.
- If changes to the program become necessary, the student shall e-mail the Interdisciplinary Studies Major Assistant at aps@csueastbay.edu and they will initiate a Petition for Change in Interdisciplinary Studies Major Requirements form for approval by the faculty committee chair, college (associate) dean, and the Coordinator. Upon approval, the program will be changed and notifications will be sent to the committee members and the student.
- When filing for graduation, the student shall inform the Coordinator. The graduation check for the Interdisciplinary Studies Major will be handled by the Coordinator and delivered to the Registrar's Office.

Director: Andrew Wong

Program Statement

The International Studies major consists of an integrated group of courses reflecting international aspects of various disciplines. It is designed to provide the student with a broad base of understanding of the interrelationship of the world community, while at the same time providing the opportunity to specialize in an area of interest. A minor in International Studies is also offered.

The International Studies major consists of a lower division requirement of eighteen to nineteen (18-19) units in International Studies, Culture and Society, Geography, Economics, Political Science, and Humanities, plus a foreign language requirement. The upper division requirements include a methods course, a twentieth century History course, and two INTS courses (a senior seminar and an international field experience). The student will complete the major with twelve to sixteen (12-16) units of international coursework with a particular emphasis.

Bachelor**International Studies, B.A.**

International Studies, B.A. Program (120 units)

Program Description

The International Studies BA consists of an integrated group of courses reflecting international aspects of various disciplines. It is designed to provide the student with a broad base of understanding of the world community and of international processes and relationships while providing the opportunity to specialize in an area of interest. A minor in International Studies is also offered.

The International Studies major consists of a lower division requirement eighteen (18) to twenty-seven (27) units. These include one course in international studies (1 course), plus one course in each of the following five areas: culture/society, geography, economics, politics, and the humanities/languages (5 courses). They also include proficiency in a foreign language at the intermediate level. The foreign language requirement can be met through study to the intermediate level (12 units), through Advanced Placement scores, or through documented native oral and written proficiency. Students without documented proficiency should contact the Director to determine eligibility for a waiver from language course requirements. The lower division program maps closely to the California Community College transfer degree in Global Studies.

The upper division requirements range from 21-29 units depending on whether 3 or 4 unit courses are selected from the choices available. Requirements include a methods course, a modern history course, and two INTS courses (the senior seminar and an international field experience, the latter not needed if the student elects to study abroad). The student will complete the major with four courses (12-16 units) of internationally-focused coursework with a particular emphasis on; a region of the world (e.g. Asia), a related discipline (e.g. Anthropology), or a topic (e.g. Peace and Conflict). Many course electives will also meet general education requirements and INTS can be easily dovetailed with many other degrees for those seeking a double major within their 120 units of study.

Career Opportunities

Career opportunities are highly diverse, depending on the student's interests and skills and new opportunities are rapidly emerging and expanding. Our Graduates work in all sectors: governmental, non-profit, private, and education. Our Alumni pursue graduate degrees in many fields including but not limited to: foreign service, law, political science, international relations, and management and business and some elect to join the Peace Corps or pursue other international service opportunities before continuing to graduate school or their chosen career path.

Job titles include, but are not limited to:

Diplomacy and Foreign Service • Educational and Cultural Exchange Programs • Federal Government • Humanitarian and Development Work • International Business • International Organizations • Journalism • Law • Local Services to Foreign Language Speakers • Politics • Tourism • Teaching • Translation

Features

The University encourages firsthand experience abroad. INTS 398 (International Field Work) is designed to afford such an opportunity. Optimally the student will elect to complete an internship or other practical experience, either paid or voluntary, in a foreign country. The University recognizes that this may not always be possible and therefore accepts the completion of the internship locally if the work experience is clearly internationally related. The student may also elect to fulfill the international work experience requirement by completing a course of study through the CSU International Programs or another recognized year-long, quarter, semester, or summer program abroad. Any such activity must be approved by the International Studies Director before being undertaken to establish the learning goals for the activity and align them with the stated program goals.

Program Learning Outcomes

In addition to the university-wide institutional learning outcomes, students graduating with a B.A. in International Studies from Cal State East Bay will be able to:

- demonstrate cross-cultural competencies, including second language capabilities and knowledge of other cultures and cultural systems.
- demonstrate knowledge of global political, economic, social, and geographic systems including their interconnections and sustainability challenges.
- demonstrate the ability to research, write and communicate orally about complex international issues both individually and through collaborative learning and teamwork.
- demonstrate broad knowledge of the international dimensions and issues of a chosen emphasis area (a region, a discipline, or a clearly defined topic)
- demonstrate the ability to participate successfully in international cultural and/or civic engagement activities and enterprises.
- articulate personal career goals, recognize the variety of career opportunities related to international studies, and prepare for their chosen career(s).

Degree Requirements Unit-Outline

- A baccalaureate of arts degree requires a total of 120 units:
- The major requirements consists of 39-57 units
- General Education (GE) & Graduation Requirements (GR) consists of 57 units;
- Free Electives may consist of 7-24 units (*actual number of free elective units may depend on GE/GR units*).

Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.

International Studies Major Requirements (39-57 units)

Lower Division Coursework

Students must take a total of six (6) courses, at least one (1) course from each of the following areas, for 18-19 units:

International Studies

- INTS 101 - Introduction to International Studies Units: 3 ; G.E./G.R. Area: D1-3

Culture and Society

- ANTH 130 - Introduction to Cultural Anthropology Units: 3 ; G.E./G.R. Area: D1-3
- HIST 102 - World History II Units: 3 ; G.E./G.R. Area: C2

Geography

- GEOG 110 - Physical Geography: Earth Processes and Outcomes Units: 3 ; G.E./G.R. Area: B1
- GEOG 120 - Human Geography: Diversity and Globalization Units: 3 ; G.E./G.R. Area: D1-3
- GEOG 125 - World Regions and Development Units: 3 ; G.E./G.R. Area: D1-3

Economics

- ECON 100 - Economics of Public Issues *Units: 3 ; G.E./G.R. Area: D1-3*
- ECON 200 - Principles of Microeconomics *Units: 3 ; G.E./G.R. Area: D1-3; Social Justice*
- ECON 205 - Principles of Macroeconomics *Units: 3 ; G.E./G.R. Area: D1-3*

Political Science

- POSC 100 - Introduction to Political Science *Units: 3*
- POSC 150 - Conflict in World Politics *Units: 3 ; G.E./G.R. Area: D1-3*

Humanities and Modern Language

- ENGL 220 - Immigration and Migration in American Literature *Units: 4 ; G.E./G.R. Area: C2*
- MUS 104 - Introduction to World Music *Units: 3 ; G.E./G.R. Area: C1*
- or other humanities class approved by the International Studies Director (one foreign language course will satisfy this requirement).

Upper Division Course & Field Work

Students are required to take 3-6 units of the following as outlined:

The following course is required for 3 units:

- HIST 328 - 20th Century World *Units: 3 ; G.E./G.R. Area: C4*

International Field Experience, for 0-3 units, is required:

- INTS 398 - Internship *Units: 2-3*

Note: All INTS majors, with the exception of those who participate in an approved study abroad program, must take INTS 398.

Methods Coursework

Students must choose one (1) course for 3-4 units from the following:

- ANTH 430 - Field Course in Ethnography *Units: 3*
- ECON 310 - Introduction to Econometrics *Units: 3*
- ENVT 320 - Environmental Resource Analysis *Units: 4*
- HIST 301 - Historical Writing *Units: 4 ; G.E./G.R. Area: UWSR*
- MGMT 350 - Decision Science *Units: 3 ; G.E./G.R. Area: B6*
- POSC 330 - Voting and Public Opinion *Units: 3*
- PSYC 200 - Methods of Investigation in Psychology *Units: 3*
- SOC 390 - Sociological Research Methods *Units: 4*
- STAT 310 - Statistical Methods in the Social Sciences *Units: 3*
- STAT 473 - Introduction to Nonparametric Statistics *Units: 3*

Emphasis Coursework

With approval from the International Studies Director, 12-16 units of emphasis coursework in one of the following areas are required:

- a discipline area
- a regional area
- a topic area

Foreign Language Proficiency

Oral and written proficiency in a modern foreign language equivalent to two (2) full years of university-level studies. The requirement can be fulfilled by the completion of the second semester of intermediate language at Cal State East Bay or by other proof of oral and written proficiency at that level. This area consists of 0-9 units.

Capstone Requirement

The following senior seminar for 3 units is required to complete the major:

- INTS 499 - Senior Seminar in International Studies *Units: 3*

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

Courses

International Studies

- • INTS 101 - Introduction to International Studies *Units: 3 ; G.E./G.R. Area: D1-3*
- • INTS 398 - Internship *Units: 2-3*
- • INTS 490 - Independent Study *Units: 1-3*
- • INTS 497 - Issues in International Studies *Units: 3*
- • INTS 499 - Senior Seminar in International Studies *Units: 3*

Minor

International Studies Minor

Minor Requirements (17-26 units)

Language Requirement

Six (6) semester units (two-course sequence) of a modern foreign language or the equivalent as determined by examination for 0-6 units is required.

Required Course

Take the following 3 units:

- **INTS 101 - Introduction to International Studies** *Units: 3 ; G.E./G.R. Area: D1-3*

Lower Division Elective

Choose one (1) course for 3-4 units from the following:

- **ANTH 130 - Introduction to Cultural Anthropology** *Units: 3 ; G.E./G.R. Area: D1-3*
- **ECON 100 - Economics of Public Issues** *Units: 3 ; G.E./G.R. Area: D1-3*
- **ECON 200 - Principles of Microeconomics** *Units: 3 ; G.E./G.R. Area: D1-3; Social Justice*
- **ECON 205 - Principles of Macroeconomics** *Units: 3 ; G.E./G.R. Area: D1-3*
- **ENGL 220 - Immigration and Migration in American Literature** *Units: 4 ; G.E./G.R. Area: C2*
- **GEOG 110 - Physical Geography: Earth Processes and Outcomes** *Units: 3 ; G.E./G.R. Area: B1*
- **GEOG 120 - Human Geography: Diversity and Globalization** *Units: 3 ; G.E./G.R. Area: D1-3*
- **GEOG 125 - World Regions and Development** *Units: 3 ; G.E./G.R. Area: D1-3*
- **HIST 102 - World History II** *Units: 3 ; G.E./G.R. Area: C2*
- **MUS 104 - Introduction to World Music** *Units: 3 ; G.E./G.R. Area: C1*
- **POSC 100 - Introduction to Political Science** *Units: 3*
- **POSC 150 - Conflict in World Politics** *Units: 3 ; G.E./G.R. Area: D1-3*

Upper Division Coursework

Take 11-13 units as outlined below:

Students must take three (3) courses of upper division international course work (minimum of 9 units) in an area of emphasis. Area of emphasis to be chosen with approval of International Studies Director.

- a discipline area
- a regional area
- a topic area

Plus, students must take 2-3 units of either International Field Work or an approved program of Study Abroad. Students must successfully complete at least one (1) three-credit class on an appropriate study abroad program.

- **INTS 398 - Internship** *Units: 2-3*

Faculty

Professor

Keri O'Neal (Human Development and Women's Studies) (Director), Ph.D. Texas Tech University

Program Statement

The Liberal Studies Major aims to provide a rich liberal art educational experience through selected courses from a wide range of academic disciplines, while at the same time allowing students to select a field for in-depth study of their own interest. The broad-based, interdisciplinary nature of Liberal Studies provides a solid well-rounded undergraduate educational experience, integrating knowledge from arts and humanities, social sciences, and natural sciences, with analytical and communication skills well suited for many careers and professions.

The major consists of a common core and a choice from seven concentrations, designed to meet diverse student interests and needs not only for school teaching, but also for leadership in government, non-profit organizations, and business, and for graduate education in law, counseling, social work and services, public affairs and administration, and educational leadership.

Bachelor

Liberal Studies, B.A.: Early Childhood Development Concentration

Liberal Studies, B.A. Program (120 units)

Program Description

The Liberal Studies Major aims to provide a rich liberal art educational experience through selected courses from a wide range of academic disciplines, while at the same time allowing students to select a field for in-depth study of their own interest. The broad-based, interdisciplinary nature of Liberal Studies provides a solid well-rounded undergraduate educational experience, integrating knowledge from arts and humanities, social science, and natural sciences, with analytical and communication skills well suited for many careers and professions.

The major consists of a common core and a choice from seven concentrations, designed to meet diverse student interests and needs not only for school teaching, but also for leadership in government, non-profit organizations, and business, and for graduate education in law, counseling, social work and services, public affairs and administration, and educational leadership.

Program Learning Outcomes

Students graduating with a B.A. in Liberal Studies from Cal State East Bay will be able to:

- demonstrate solid understanding of major contemporary global issues about individuals, society, and nature, by integrating interdisciplinary knowledge of humanity, social science, and natural science, with more in depth understanding of one specialized subject area or discipline;
- apply methods of different disciplines to critically thinking about these issues;
- communicate ideas clearly and persuasively in speech and writing;
- work with others in teams collaboratively and productively, showing sensitivity and respect for others, and readiness to learn from others;
- demonstrate commitment to promoting social justice, diversity, democratic values, and sustainable environment.

Career Opportunities

Administrator • Business Executive • Customer Service Representative • Educational Leadership • Foreign Service Officer • Human Resources Administrator • Journalist • Lawyer • Manager • Nonprofit Organizations • Personnel Representative • Salesperson • Social and Human Services • Teacher (K-6, Pre-K, Early Childhood, Special Education) • Writer

Degree Requirements Unit-Outline

- A baccalaureate of arts degree requires a total of 120 units;
- The major requirements consists of 71-80 units
- General Education & Graduation Requirements consists of 57 units ;
- Free Electives may consist of 0 units (*actual number of free elective units may depend on GE/GR units*).

Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.

Liberal Studies Major Requirements (71-80 units)

Core Requirements

Liberal Studies majors must complete the following 48-49 units of core coursework as outlined. *Please note that the core requirements also satisfy the upper-division GE requirements in areas C4, D4, and B6.*

Liberal Studies Courses

Students must take both of the following courses (6 units):

- LBST 201 - Introduction to Liberal Studies *Units: 3*
- LBST 499 - Liberal Studies Senior Seminar *Units: 3*

Humanities Courses

Students must take all of the following courses (10 units):

- ART 120 - Monuments of World Art *Units: 3 ; G.E./G.R. Area: C1*
- ENGL 204 - Writing About Literature *Units: 4 ; G.E./G.R. Area: C2*
- HIST 101 - World History I *Units: 3 ; G.E./G.R. Area: C2*

English, Math, and Expressive Basic Skills Courses

Students must take all of the following courses (10 units):

- ENGL 303 - Advanced Expository Writing *Units: 4*
- MATH 318 - Mathematical Contributions to Modern Society *Units: 3 ; G.E./G.R. Area: B6*
- THEA 341 - Dramatic Activities for Children *Units: 3 ; G.E./G.R. Area: C4*

Students must take one (1) of the following courses (4 units):

- ENGL 309 - Major Works of British Literature *Units: 4*
- ENGL 320 - Major Works of American Literature *Units: 4*

Social Science, Natural Science, and Critical Thinking Integration Courses

Students must take all of the following courses (9 units):

- ANTH 300 - Anthropology of Global Change *Units: 3 ; G.E./G.R. Area: D4*
- ENSC 320 - The Science of Global Change *Units: 3 ; G.E./G.R. Area: B6; Sustainability*
- PHIL 311 - Environmental Ethics *Units: 3 ; G.E./G.R. Area: C4; Sustainability*

Students must take one (1) of the following courses (3-4 units):

- CHEM 100 - Introduction to College Chemistry *Units: 3 ; G.E./G.R. Area: B1, B3*
- GEOL 100 - Earth Systems Science *Units: 4 ; G.E./G.R. Area: B1, B3; Sustainability*
- PHYS 115 - Elementary Physics *Units: 3 ; G.E./G.R. Area: B1, B3*

Human Development and Social Context Courses

Students must take both of the following courses (6 units):

- HDEV 381 - Interdisciplinary Perspectives on Lifespan Human Development
Units: 3
- HIST 382 - California and the World *Units: 3 ; G.E./G.R. Area: D4; US-3*

Concentrations

Liberal Studies majors must complete one (1) of the seven available concentrations in addition to the core requirements:

- Liberal Studies, B.A.: Early Childhood Development Concentration
- Liberal Studies, B.A.: Early Childhood Education Concentration
- Liberal Studies, B.A.: Foundational Mathematics Concentration
- Liberal Studies, B.A.: Foundational Science Concentration
- Liberal Studies, B.A.: Liberal Arts Concentration
- Liberal Studies, B.A.: Studies in Educational Psychology Concentration
- Liberal Studies, B.A.: Teacher Preparation Concentration

Early Childhood Development Concentration

The Early Childhood Development concentration is 25-27 units. Students must complete the following coursework as outlined:

Students must take one (1) of the following courses for 3-4 units:

- ANTH 110 - Introduction to Biological Anthropology *Units: 3 ; G.E./G.R. Area: B2*
- BIOL 100 - Biology in the Real World *Units: 4 ; G.E./G.R. Area: B2, B3*

Students must take one (1) of the following courses for 3 units:

- HIST 488 - Education and American Democracy *Units: 3 ; G.E./G.R. Area: C4*
- PHIL 371 - Philosophy of Education *Units: 3 ; G.E./G.R. Area: C4*

Students must take both of the following courses for 8 units:

- ENGL 463 - Children's Literature after 1900 *Units: 4*
- HDEV 413 - Children in Families and Communities *Units: 4*

Students must take 11-12 units from the following courses. At least five (5) of these units must come from upper-division courses:

- HDEV 411 - Early Childhood Cognitive Development: Theory and Research
Units: 4
- HDEV 412 - Early Childhood Social Development: Theory & Research *Units: 4*
- HDEV 414 - Creative and Artistic Development in Early Childhood *Units: 4*

- HDEV 423 - Child Language Development *Units: 4*
- SCI 308 - Hands-On Science Teaching *Units: 1*
- Any California Community College CAP certified course on child, family, and community.
- Any transferrable course in supervised field experience, curriculum, adult supervision or administration in ECE settings.

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

Liberal Studies, B.A.: Early Childhood Education Concentration

Liberal Studies, B.A. Program (120 units)

Program Description

The Liberal Studies Major aims to provide a rich liberal art educational experience through selected courses from a wide range of academic disciplines, while at the same time allowing students to select a field for in-depth study of their own interest. The broad-based, interdisciplinary nature of Liberal Studies provides a solid well-rounded undergraduate educational experience, integrating knowledge from arts and humanities, social science, and natural sciences, with analytical and communication skills well suited for many careers and professions.

The major consists of a common core and a choice from seven concentrations, designed to meet diverse student interests and needs not only for school teaching, but also for leadership in government, non-profit organizations, and business, and for graduate education in law, counseling, social work and services, public affairs and administration, and educational leadership.

Program Learning Outcomes

Students graduating with a B.A. in Liberal Studies from Cal State East Bay will be able to:

- demonstrate solid understanding of major contemporary global issues about individuals, society, and nature, by integrating interdisciplinary knowledge of humanity, social science, and natural science, with more in depth understanding of one specialized subject area or discipline;
- apply methods of different disciplines to critically thinking about these issues;
- communicate ideas clearly and persuasively in speech and writing;
- work with others in teams collaboratively and productively, showing sensitivity and respect for others, and readiness to learn from others;
- demonstrate commitment to promoting social justice, diversity, democratic values, and sustainable environment.

Career Opportunities

Administrator • Business Executive • Customer Service Representative • Educational Leadership • Foreign Service Officer • Human Resources Administrator • Journalist • Lawyer • Manager • Nonprofit and Social Advocacy Organizations • Personnel Representative • Salesperson • Social and Human Services • Teacher (K-6, Pre-K, Early Childhood, Special Education) • Writer

Degree Requirements Unit-Outline

- A baccalaureate of arts degree requires a total of 120 units;
- The major requirements consists of 71-80 units
- General Education & Graduation Requirements consists of 57 units ;
- Free Electives may consist of 0 units (*actual number of free elective units may depend on GE/GR units*).

Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.

Liberal Studies Major Requirements (71-80 units)

Core Requirements

Liberal Studies majors must complete the following 48-49 units of core coursework as outlined. *Please note that the core requirements also satisfy the upper-division GE requirements in areas C4, D4, and B6.*

Liberal Studies Courses

Students must take both of the following courses (6 units):

- LBST 201 - Introduction to Liberal Studies *Units: 3*
- LBST 499 - Liberal Studies Senior Seminar *Units: 3*

Humanities Courses

Students must take all of the following courses (10 units):

- ART 120 - Monuments of World Art *Units: 3 ; G.E./G.R. Area: C1*

- ENGL 204 - Writing About Literature *Units: 4 ; G.E./G.R. Area: C2*
- HIST 101 - World History I *Units: 3 ; G.E./G.R. Area: C2*

English, Math, and Expressive Basic Skills Courses

Students must take all of the following courses (10 units):

- ENGL 303 - Advanced Expository Writing *Units: 4*
- MATH 318 - Mathematical Contributions to Modern Society *Units: 3 ; G.E./G.R. Area: B6*
- THEA 341 - Dramatic Activities for Children *Units: 3 ; G.E./G.R. Area: C4*

Students must take one (1) of the following courses (4 units):

- ENGL 309 - Major Works of British Literature *Units: 4*
- ENGL 320 - Major Works of American Literature *Units: 4*

Social Science, Natural Science, and Critical Thinking Integration Courses

Students must take all of the following courses (9 units):

- ANTH 300 - Anthropology of Global Change *Units: 3 ; G.E./G.R. Area: D4*
- ENSC 320 - The Science of Global Change *Units: 3 ; G.E./G.R. Area: B6; Sustainability*
- PHIL 311 - Environmental Ethics *Units: 3 ; G.E./G.R. Area: C4; Sustainability*

Students must take one (1) of the following courses (3-4 units):

- CHEM 100 - Introduction to College Chemistry *Units: 3 ; G.E./G.R. Area: B1, B3*
- GEOL 100 - Earth Systems Science *Units: 4 ; G.E./G.R. Area: B1, B3; Sustainability*
- PHYS 115 - Elementary Physics *Units: 3 ; G.E./G.R. Area: B1, B3*

Human Development and Social Context Courses

Students must take both of the following courses (6 units):

- HDEV 381 - Interdisciplinary Perspectives on Lifespan Human Development *Units: 3*

- Liberal Studies, B.A.: Early Childhood Development Concentration
- Liberal Studies, B.A.: Early Childhood Education Concentration
- Liberal Studies, B.A.: Foundational Mathematics Concentration
- Liberal Studies, B.A.: Foundational Science Concentration
- Liberal Studies, B.A.: Liberal Arts Concentration
- Liberal Studies, B.A.: Studies in Educational Psychology Concentration
- Liberal Studies, B.A.: Teacher Preparation Concentration

Early Childhood Education Concentration

The Early Childhood Education concentration is 26-27 units. Students must complete the following courses as outlined:

Students must take one (1) of the following courses for 3-4 units:

- ANTH 110 - Introduction to Biological Anthropology *Units: 3 ; G.E./G.R. Area: B2*
- BIOL 100 - Biology in the Real World *Units: 4 ; G.E./G.R. Area: B2, B3*

Students must take one (1) of the following courses for 3 units:

- HIST 488 - Education and American Democracy *Units: 3 ; G.E./G.R. Area: C4*
- PHIL 371 - Philosophy of Education *Units: 3 ; G.E./G.R. Area: C4*

Students must take all of the following courses for 20 units:

- ENGL 463 - Children's Literature after 1900 *Units: 4*
- TED 470 - Early Childhood Education: Integrated Language & Literacy Development *Units: 3*
- TED 471 - Early Childhood Education: Integrated Math and Science *Units: 3*
- TED 472 - Early Childhood Education: Integrated Arts and Social Studies *Units: 3*
- TED 473 - Early Childhood Education: Inclusive Practices *Units: 3*
- TED 474 - Early Childhood Education: Professional Seminar and Practicum *Units: 4*

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

Concentrations

Liberal Studies majors must complete one (1) of the seven available concentrations in addition to the core requirements:

- Liberal Studies, B.A.: Early Childhood Development Concentration
- Liberal Studies, B.A.: Early Childhood Education Concentration
- Liberal Studies, B.A.: Foundational Mathematics Concentration
- Liberal Studies, B.A.: Foundational Science Concentration
- Liberal Studies, B.A.: Liberal Arts Concentration
- Liberal Studies, B.A.: Studies in Educational Psychology Concentration
- Liberal Studies, B.A.: Teacher Preparation Concentration

Liberal Arts Concentration

The Liberal Arts concentration is 25-26 units. Students must complete the following coursework as outlined below:

Students must take one (1) of the following two courses for 3-4 units:

- ANTH 110 - Introduction to Biological Anthropology *Units: 3 ; G.E./G.R. Area: B2*
- BIOL 100 - Biology in the Real World *Units: 4 ; G.E./G.R. Area: B2, B3*

Students must take one (1) of the following courses for 4 units:

- ENGL 321 - American Indian Literature *Units: 4 ; G.E./G.R. Area: C4*
- ENGL 322 - African-American Literature Before 1945 *Units: 4 ; G.E./G.R. Area: C4; Social Justice*
- ENGL 323 - African-American Literature After 1945 *Units: 4 ; G.E./G.R. Area: C4; Diversity*
- ENGL 324 - American Women's Literature *Units: 4 ; G.E./G.R. Area: C4; Social Justice*
- ENGL 328 - Latina/o Literature *Units: 4 ; G.E./G.R. Area: C4*
- ENGL 327 - LGBT Literature and Queer Theory *Units: 4 ; G.E./G.R. Area: C4; Social Justice*
- ENGL 330 - Classical Literature *Units: 4*
- ENGL 331 - Global World Literature: Antiquity to the Early Modern World *Units: 4*

Students must take the following course for 3 units:

- HIST 389 - Social Justice and Reform Movements in America *Units: 3 ; G.E./G.R. Area: D4; Social Justice*

Depth of Study Coursework

Students must complete either A or B for a minimum of 15 units:

Depth of Study A.

Students may create a special depth of study with the help of an advisor. All fifteen (15) units must be unique and cannot be used to satisfy any other components of the Liberal Studies major. At least twelve (12) units must be upper-division. GS courses may not be used for this requirement.

Depth of Study B.

Select any Minor offered by any department or program in the CSUEB catalog. At least fifteen (15) units in the minor must be unique and cannot be used to satisfy any other components of the Liberal Studies major.

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

Liberal Studies, B.A.: Studies in Educational Psychology Concentration

Liberal Studies, B.A. Program (120 units)

Program Description

The Liberal Studies Major aims to provide a rich liberal art educational experience through selected courses from a wide range of academic disciplines, while at the same time allowing students to select a field for in-depth study of their own interest. The broad-based, interdisciplinary nature of Liberal Studies provides a solid well-rounded undergraduate educational experience, integrating knowledge from arts and humanities, social science, and natural sciences, with analytical and communication skills well suited for many careers and professions.

The major consists of a common core and a choice from seven concentrations, designed to meet diverse student interests and needs not only for school teaching, but also for leadership in government, non-profit organizations, and business, and for graduate education in law, counseling, social work and services, public affairs and administration, and educational leadership.

Program Learning Outcomes

Students graduating with a B.A. in Liberal Studies from Cal State East Bay will be able to:

- demonstrate solid understanding of major contemporary global issues about individuals, society, and nature, by integrating interdisciplinary knowledge of humanity, social science, and natural science, with more in depth understanding of one specialized subject area or discipline;
- apply methods of different disciplines to critically thinking about these issues;
- communicate ideas clearly and persuasively in speech and writing;
- work with others in teams collaboratively and productively, showing sensitivity and respect for others, and readiness to learn from others;
- demonstrate commitment to promoting social justice, diversity, democratic values, and sustainable environment.

Career Opportunities

Administrator • Business Leadership • Foreign Administrator • Journalist • Lawyer • Manager • Nonprofit	Executive • Customer Service Manager • Nonprofit	Service Officer • Human and	Representative • Educational Social Advocacy

Organizations • Personnel Representative • Salesperson • Social and Human Services • Teacher (K-6, Pre-K, Early Childhood, Special Education) • Writer

Degree Requirements Unit-Outline

- A baccalaureate of arts degree requires a total of 120 units:
- The major requirements consists of 71-80 units
- General Education & Graduation Requirements consists of 57 units ;
- Free Electives may consist of 0 units (*actual number of free elective units may depend on GE/GR units*).

Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.

Liberal Studies Major Requirements (71-80 units)

Core Requirements

Liberal Studies majors must complete the following 48-49 units of core coursework as outlined. *Please note that the core requirements also satisfy the upper-division GE requirements in areas C4, D4, and B6.*

Liberal Studies Courses

Students must take both of the following courses (6 units):

- LBST 201 - Introduction to Liberal Studies *Units: 3*
- LBST 499 - Liberal Studies Senior Seminar *Units: 3*

Humanities Courses

Students must take all of the following courses (10 units):

- ART 120 - Monuments of World Art *Units: 3 ; G.E./G.R. Area: C1*
- ENGL 204 - Writing About Literature *Units: 4 ; G.E./G.R. Area: C2*
- HIST 101 - World History I *Units: 3 ; G.E./G.R. Area: C2*

English, Math, and Expressive Basic Skills Courses

Students must take all of the following courses (10 units):

- ENGL 303 - Advanced Expository Writing *Units: 4*
- MATH 318 - Mathematical Contributions to Modern Society *Units: 3 ; G.E./G.R. Area: B6*
- THEA 341 - Dramatic Activities for Children *Units: 3 ; G.E./G.R. Area: C4*

Students must take one (1) of the following courses (4 units):

- ENGL 309 - Major Works of British Literature *Units: 4*
- ENGL 320 - Major Works of American Literature *Units: 4*

Social Science, Natural Science, and Critical Thinking Integration Courses

Students must take all of the following courses (9 units):

- ANTH 300 - Anthropology of Global Change *Units: 3 ; G.E./G.R. Area: D4*

- ENSC 320 - The Science of Global Change *Units: 3 ; G.E./G.R. Area: B6; Sustainability*
- PHIL 311 - Environmental Ethics *Units: 3 ; G.E./G.R. Area: C4; Sustainability*

Students must take one (1) of the following courses (3-4 units):

- CHEM 100 - Introduction to College Chemistry *Units: 3 ; G.E./G.R. Area: B1, B3*
- GEOL 100 - Earth Systems Science *Units: 4 ; G.E./G.R. Area: B1, B3; Sustainability*
- PHYS 115 - Elementary Physics *Units: 3 ; G.E./G.R. Area: B1, B3*

Human Development and Social Context Courses

Students must take both of the following courses (6 units):

- HDEV 381 - Interdisciplinary Perspectives on Lifespan Human Development
Units: 3
- HIST 382 - California and the World *Units: 3 ; G.E./G.R. Area: D4; US-3*

Concentrations

Liberal Studies majors must complete one (1) of the seven available concentrations in addition to the core requirements:

- Liberal Studies, B.A.: Early Childhood Development Concentration
- Liberal Studies, B.A.: Early Childhood Education Concentration
- Liberal Studies, B.A.: Foundational Mathematics Concentration
- Liberal Studies, B.A.: Foundational Science Concentration
- Liberal Studies, B.A.: Liberal Arts Concentration
- Liberal Studies, B.A.: Studies in Educational Psychology Concentration
- Liberal Studies, B.A.: Teacher Preparation Concentration

Studies in Educational Psychology Concentration

The Studies in Educational Psychology concentration is 23-25 units. Students must complete the following as outlined:

Students must take one (1) of the following courses for 3-4 units:

- ANTH 110 - Introduction to Biological Anthropology *Units: 3 ; G.E./G.R. Area: B2*
- BIOL 100 - Biology in the Real World *Units: 4 ; G.E./G.R. Area: B2, B3*

Students must take one (1) of the following courses for 3 units:

- HIST 488 - Education and American Democracy *Units: 3 ; G.E./G.R. Area: C4*
- PHIL 371 - Philosophy of Education *Units: 3 ; G.E./G.R. Area: C4*

Students must take one (1) of the following courses for 3-4 units:

- DANC 341 - Dance for Children *Units: 3 ; G.E./G.R. Area: C4*
- HDEV 423 - Child Language Development *Units: 4*
- HSC 440 - Global Health and Disability *Units: 3 ; G.E./G.R. Area: D4; Social Justice*
- KIN 321 - Elementary Classroom Teachers as Movement Educators *Units: 4*
- SPPA 300 - Communicative and Cognitive Development Across the Lifespan
Units: 3

- SPPA 304 - Introduction to Communication Disorders *Units: 3*

Students must take all of the following courses for 14 units:

- ENGL 463 - Children's Literature after 1900 *Units: 4*
- EPSY 230 - Strategies for Lifespan Mental Health *Units: 3*
- EPSY 301 - Orientation to Careers in Counseling *Units: 3*
- SPED 500 - Educating All Learners in Diverse Classrooms *Units: 4*

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

- Liberal Studies, B.A.: Foundational Science Concentration
- Liberal Studies, B.A.: Liberal Arts Concentration
- Liberal Studies, B.A.: Studies in Educational Psychology Concentration
- Liberal Studies, B.A.: Teacher Preparation Concentration

Teacher Preparation Concentration

The Teacher Preparation concentration is 25-26 units. Students must complete the following coursework as outlined below:

Students must take all of the following courses for 16 units:

- BIOL 100 - Biology in the Real World *Units: 4 ; G.E./G.R. Area: B2, B3*
- ENGL 463 - Children's Literature after 1900 *Units: 4*
- HIST 488 - Education and American Democracy *Units: 3 ; G.E./G.R. Area: C4*
- KIN 321 - Elementary Classroom Teachers as Movement Educators *Units: 4*
- SCI 308 - Hands-On Science Teaching *Units: 1*

Students must take one (1) of the following courses for 3 units:

- ART 102 - 2D Processes *Units: 3 ; G.E./G.R. Area: C1*
- DANC 341 - Dance for Children *Units: 3 ; G.E./G.R. Area: C4*
- TED 420 - Art Skills for Teachers *Units: 3*

Students must take one (1) of the following courses for 3-4 units:

- ANTH 340 - Language and Culture *Units: 3 ; G.E./G.R. Area: D4*
- ENGL 351 - Modern English Grammar *Units: 4*
- HDEV 423 - Child Language Development *Units: 4*

Students must take one (1) of the following courses for 3 units:

- HSC 115 - Human Health and Wellness *Units: 3*
- HSC 270 - Investigating Disease Outbreaks and Epidemics *Units: 3 ; G.E./G.R. Area: C2; Social Justice*
- HSC 440 - Global Health and Disability *Units: 3 ; G.E./G.R. Area: D4; Social Justice*

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

Certificate

Liberal Studies Teacher Preparation Multiple Subject CSET Waiver Certificate

Note: This program is not currently available to students.

See Errata for corrections to this content.

Liberal Studies Teacher Preparation MS CSET Waiver Certificate Program

This Certificate is for students who wish to seek a waiver of the CSET for the Multiple Subject Matter requirement. Students who plan to teach in a public school in California for K-6 and need a CSET Waiver program for the purpose of applying for the Multiple Subject Teaching Credential programs in California should major in Liberal Studies with the Teacher Preparation Concentration, plus this certificate. Completion of both programs will provide a waiver for the Multiple Subject CSET requirement, which is a prerequisite for the Multiple Subject Teaching Credential programs in California.

Certificate Requirements

This Certificate requires 20-27 units to complete.

Note: BPEP students completing this certificate are required to complete an additional course: TED 571 for one (1) unit.

Take all of the following 14 units:

- MATH 402 - Mathematics for K-8 Educators I Units: 4
- MATH 403 - Mathematics for K-8 Educators II Units: 4
- MUS 302 - What to Listen for in Music Units: 3 ; G.E./G.R. Area: C4
- STAT 100 - Elements of Statistics and Probability Units: 3 ; G.E./G.R. Area: B4

Complete two (2) of the following courses for 6 units that are not completed in the Teacher Preparation Concentration:

- CHEM 100 - Introduction to College Chemistry Units: 3 ; G.E./G.R. Area: B1, B3
- GEOL 100 - Earth Systems Science Units: 4 ; G.E./G.R. Area: B1, B3; Sustainability
- PHYS 115 - Elementary Physics Units: 3 ; G.E./G.R. Area: B1, B3

Students in BPEP must also take the following course for 1 unit:

- TED 571 - Multiple Subject Fieldwork Seminar II Units: 1

Prior K-6 Classroom Teaching Experience Requirements (0-6 units) Complete either A or B:

A: Prior experience certification form signed by a teacher or principal verifying experience in a K-6 classroom (minimum 45 hours, 15 hours of which must be in a public school)

B: Complete the following two (2) courses (6 units):

- TED 301 - Introduction to Education Units: 3
- TED 302 - Introduction to Teaching Units: 3

Program Statement

The California State University operates the Moss Landing Marine Laboratories (MLML) at Moss Landing on Monterey Bay, California. This facility functions as a seaside extension of the campuses of seven cooperating California State Universities (East Bay, Monterey Bay, San Jose, San Francisco, Sacramento, Stanislaus, and Fresno) and offers course work in marine biology, geology, oceanography, and other marine sciences.

Facilities

Since January 2000, the Laboratories have occupied new facilities in Moss Landing overlooking Monterey Bay, replacing the original laboratory demolished in the 1989 Loma Prieta earthquake. The stunning new building provides modern, up-to-date classrooms, laboratories, research facilities, library and conference room for faculty, staff and students of the consortium campuses.

MLML's Marine Operations Center, located also in Moss Landing, facilitates oceanographic and near-shore classes and research by providing shore support. The Center houses equipment used for in-port maintenance of scientific equipment, SCUBA air compressor, shore-based radio operations, and other support needs.

The MLML maintains a collection of nautical charts and topographical maps with an emphasis on the West Coast and there is a growing collection of reprints. It also subscribes to abstracting services such as "Oceanic Abstracts" and "Aquatic Sciences and Fisheries Abstracts." A terminal is available for computer literature searches. Close ties are maintained with libraries at Stanford's Hopkins Marine Station, U.C. Santa Cruz, Naval Postgraduate School, San Jose State University, and the Monterey Bay Aquarium Research Institute. Materials are borrowed from these agencies or further afield as the need arises. A special effort has been made to collect materials relating to Monterey Bay and Elkhorn Slough.

As a member of the Central California Oceanographic Cooperative (CENCAL), MLML operates the 135-foot Research Vessel Point Sur. The R/V Point Sur, built in 1981, is well-equipped for instructional use and research, with a trawl winch, two hydrographic winches and three laboratories, scientific equipment for sampling and oceanographic profiling, Smith-McIntyre grabs, rock dredges, and various types of coring devices. Also available is a variety of nets for bottom and midwater trawls.

The Laboratories also own and operate the 56-foot R/V John Martin and the 35-foot R/V Ed Ricketts. These boats are used for trawling, water sampling and other work near shore, and serve as diving platforms.

In addition, faculty and students at MLML utilize other University National Oceanographic Laboratory System (UNOLS) vessels when they have research requirements for larger vessels or for vessels in a different area of the world. MLML personnel have participated in cruises to Baja California, Hawaii, the Bahamas, Mexico, South America, the Arctic, and the Antarctic.

Graduate Program

A Master of Science in Marine Science degree program is offered at MLML for students from Cal State East Bay and the other consortium schools. Details of this program follow. In addition, graduate students from Cal State East Bay may take such courses at Moss Landing as are appropriate to their degree objectives, including that of an M.S. in Biological Science or an M.S. in Geology. (See the Department of Biological Sciences and Department of Earth and Environmental Sciences chapters in this catalog.) A major part of the work leading to the M.S. degree in Biological Science, particularly in the environmental biology option, or to the M.S. degree in Geology, may be completed at the Marine Laboratories. Normally, a minimum of one or two quarters enrollment for other necessary courses on the Hayward campus may also be required.

Courses Offered

Full-time coursework and research in marine sciences are offered the year around. Emphasis in instruction and research is at the upper-division undergraduate and graduate levels. The Laboratories operate on a semester system during the academic year.

A total of thirty to forty units is offered each term in marine biological and physical sciences. Contact the Cal State East Bay Department of Biological Sciences for a current list of courses for the term you wish to attend, or you can write to Moss Landing Marine Labs, 8272 Moss Landing Road, Moss Landing, CA 95039. Basic courses offered every term include marine ecology, marine science diving, graduate seminar, and selected topics in marine sciences. See the BIOL and ENSC course prefixes in the Course Descriptions chapter in this catalog.

Nature of Instructional Program

Classes usually are small, with major emphasis upon field and laboratory instruction, and with a strong independent study or directed research component. Coursework usually is organized into large blocks of time (all day on a given day). Since field and laboratory activities are more demanding of time and energy than is usual for on-campus courses, the staff recommends that the student limit his or her academic load to twelve units. While it is possible to commute to Moss Landing for part-time work, this is not recommended because of the time and energy drain. In addition to standard course offerings, independent study (undergraduate) and graduate research and thesis work may be undertaken under supervision of staff members currently in residence.

Research Areas and Emphases at Moss Landing

Stress is upon field-oriented studies of marine and estuarine ecosystems, with physical science research concerned particularly with geological, chemical, and physical limiting factors, and biological investigations dealing with relationships of organisms to these factors. Where possible, physical and biological studies are paired to provide reciprocal benefits from a team approach and from interdisciplinary faculty sponsorship. The near-shore shallow waters of Monterey Bay, Elkhorn Slough, and the deep waters of the Monterey Submarine Canyon provide a wide diversity of habitats.

Housing in Moss Landing Area

Commercial housing (apartments, small furnished houses, rooms with or without board, etc.) is available at communities near Moss Landing (Castroville, Salinas, Watsonville, Aptos, Monterey). Short-distance commuting from these areas is necessary; thus, availability of a car or participation in a car pool usually is required.

Registration Procedures

Since MLML courses are offered on the semester system (fall and spring semesters), there are special registration procedures.

Students must complete and submit a "Space Reservation" form to MLML (available through the Cal State East Bay Department of Biological Sciences and through MLML). Permission must be given by Cal State East Bay Biological Sciences for East Bay MLML students to register online. Students must also attend the first day of classes at MLML.

Fall and spring registration for MLML courses is at the same time as Cal State East Bay's regular fall and spring registration. Fall registration fees are paid at the same time as regular fall registration fees. Spring registration fees must be paid at the beginning of spring semester MLML classes (end of January).

Pre-Professional Programs (PHAP)

The Pre-Professional Health Academic Program (PHAP) Office is located on the 1st floor of the North Science Building, SC N113

Office Phone: (510) 885-4764

Faculty

Professor

Oscar Wambuguh, Ph.D. University of California, Berkeley

Program Statement

PHAP is operated by Continuing Education, in collaboration with the College of Science, and prepares undergraduate and post-baccalaureate students interested in biomedical careers (medicine, dentistry, pharmacy, optometry, veterinary science, graduate nursing, physician assistant, podiatry, physical therapy

and selected allied health programs) for application to these doctoral programs. Students are encouraged to review information on the PHAP website to learn more about differences between those categories.

A student interested in entering medicine, dentistry, optometry, pharmacy, physical therapy, veterinary science, or allied health sciences should contact the PHAP Office at the North Science Building, SC N113 (510-885-4764) for information and registration in the program. The office will direct the student to a preprofessional health advisor to discuss individual course needs and counseling about the requirements for admission to professional schools. Information about specific health and veterinary fields, schools, admission requirements, applications, etc., is available through numerous online documents listed under "Links" at the PHAP website. The national health professional associations (AAMC, ADEA, AACOM, ASCO, AAVMC, etc.) also have listings of schools which may be linked to from their sites.

The Director of PHAP is Dr. Oscar Wambuguh, also a pre-health advisor and professor in health sciences. There are three other pre-health faculty advisors in the program who can be reached for an appointment using the links at the College of Science highlighted below. Students should make an appointment to meet with the advisor as often as necessary. The pre-health advisor engages students in discussions concerning courses, course mix, course load, and volunteer, research, and community service opportunities required by many professional schools. Information about advising appointments can also be obtained by e-mailing phap@csueastbay.edu

Pre-Professional Health Academic Program Certificate

Pre-Professional Health Academic Program

Program Description

The Pre-Professional Health Academic Program (PHAP) is designed to provide the competitive advantage needed to enter a health professional school and launch a rewarding career in medicine, optometry, dentistry, veterinary medicine, physical therapy, and other healthcare fields like public health, nursing and physician assistant.

Students accepted into the program need have completed a bachelor's degree in a science or non-science field with a minimum cumulative graduating GPA of 2.8. There are two academic tracks in the program depending on student's undergraduate degree.

Track I

For students with a non-science degree and have not taken any biomedical school prerequisite science courses, the program offers a two-and-a-half-year curriculum (Career Changer). Track I students will complete all foundation science courses plus selected upper division courses in genetics, anatomy and physiology, biomedical physiology, immunology, biochemistry I, biochemistry II, psychology, medical humanities, and two 2-unit post-baccalaureate seminar courses.

Track II

For students who have completed a bachelor's degree in a science field and taken most or all foundation science courses. Students will complete upper division courses in all major biomedical areas: genetics, molecular/cell biology, microbiology, physiology, neurosciences, immunology, endocrinology, biochemistry, mathematics, psychology, medical humanities, and two 2-unit post-baccalaureate seminar courses.

Program Learning Outcomes

At the completion of the certificate program PHAP students will have:

- Acquired the required baseline knowledge in entrance and advanced science courses to competitively apply to health professional schools.
- Gained necessary experience in various health settings.
- Prepared and taken national entrance exams such as the MCAT, DAT, GRE, PCAT, and OAT.
- Have had opportunities to engage in basic or clinical research and participate in community service.
- Received mentoring and tutoring to prepare for the health professional school application process.
- Developed personal characteristics and acquired skill-based professional training for career advancement.

Admission Requirements

To qualify for entry into the Pre-Professional Health Academic Program (PHAP) at Cal State East Bay, applicants must:

- Submit of a graduate application at www.calstate.edu/apply for either Track I (Career Changer) or Track II (Academic Enhancer).
- Submit a supplementary PHAP application.
- Provide a one page (single-spaced) personal statement detailing applicant's career objectives in biomedical sciences as part of the supplementary application.
- Hold a baccalaureate degree with a minimum cumulative GPA of 2.8 (the average accepted GPA is 3.0).
- Submit official transcripts of all courses taken at every college attended.
- Be prepared to participate in a pre-admission interview with the program admissions staff lasting about one hour.

Note: Students who have not taken Math 120 Precalculus or Math 125 Precalculus with Algebra prior to admission will be required to take one of those courses even though they are not offered in conjunction with the program.

Post-Baccalaureate Pre-Professional Health Sciences Certificate Program

TRACK I

Track I is for students with a non-science degree and have not taken any biomedical school prerequisite science courses, the program offers a two-and-a-half-year curriculum (Career Changer). Track I students will complete foundation science courses plus selected upper division courses in genetics, anatomy and physiology, biomedical physiology, immunology, biochemistry I, biochemistry II, psychology, medical humanities, and two 2-unit postbaccalaureate seminar courses.

Foundation course requirements will be determined by the advisor depending on the student's career goal. A minimum of 47 units will be required.

Foundation Science Coursework (47-59 units)

Biology

- BIOL 140A - Principles of Cell and Molecular Biology *Units: 5 ; G.E./G.R. Area: B2, B3*
- BIOL 140B - Principles of Organismal Biology *Units: 5*

Physics

- PHYS 125 - Principles of Physics I *Units: 4 ; G.E./G.R. Area: B1, B3*
- PHYS 126 - Principles of Physics II *Units: 4 ; G.E./G.R. Area: B1, B3*

Chemistry

- CHEM 111 - General Chemistry I *Units: 5 ; G.E./G.R. Area: B1, B3*
- CHEM 112 - General Chemistry II *Units: 5*
- CHEM 331 - Organic Chemistry I *Units: 5*
- CHEM 332 - Organic Chemistry II *Units: 5*

Mathematics

- MATH 130 - Calculus I *Units: 4 ; G.E./G.R. Area: B4*

Psychology

- PSYC 100 - General Psychology *Units: 3 ; G.E./G.R. Area: D1-3*
- PSYC 330 - Cognitive Psychology *Units: 4*

Statistics

- STAT 303A - Biostatistics for Health Science *Units: 3*

Health Science

- HSC 130 - Health Humanities *Units: 3 ; G.E./G.R. Area: C2*

Seminar Coursework

- BIOL 420 - Cell and Molecular Biology Undergraduate Seminar *Units: 2*
- BIOL 670 - Seminar in Physiology *Units: 2*

Elective Lower and Upper Division Coursework (minimum of 21 units)

Select from the following:

- BIOL 270 - Human Anatomy & Physiology I *Units: 4 ; G.E./G.R. Area: B2, B3*

- BIOL 271 - Human Anatomy & Physiology II *Units: 4*
- BIOL 310 - Genetic Analysis I *Units: 4*
- BIOL 330 - General Microbiology *Units: 5*
- BIOL 410 - Genetic Analysis II *Units: 3*
- BIOL 426 - Advanced Molecular and Cell Biology *Units: 3*
- BIOL 434 - Molecular Microbiology *Units: 3*
- BIOL 440 - Molecular Virology *Units: 3*
- BIOL 441 - Parasitology *Units: 3*
- BIOL 442 - Epidemiology *Units: 3*
- BIOL 444 - Medical Entomology *Units: 3*
- BIOL 445 - Immunology *Units: 3*
- BIOL 470 - Animal Senses *Units: 4*
- BIOL 471 - Neurobiology *Units: 3*
- BIOL 473 - Comparative Physiology *Units: 3*
- BIOL 474 - Biomedical Physiology *Units: 3*
- BIOL 476 - General Endocrinology *Units: 3*
- BIOL 488 - Environmental Physiology *Units: 3*
- CHEM 441 - Biochemistry I *Units: 4*
- CHEM 442 - Biochemistry II *Units: 4*
- CHEM 445 - Protein Structure *Units: 3*
- CHEM 446 - Nucleic Acid Chemistry *Units: 3*
- CHEM 447 - Major Organ Biochemistry *Units: 3*
- CHEM 490 - Independent Study *Units: 1-4*
- HSC 315 - Public Health *Units: 3*
- HSC 355 - Bioethics *Units: 3*
- MATH 131 - Calculus II *Units: 3*
- PHYS 125A - Principles of Physics I - Discussion *Units: 1*
- PHYS 126A - Principles of Physics II - Discussion *Units: 1*

TRACK II

Track II is for students who have completed a bachelor's degree in a science field and taken most or all foundation science courses. Students will complete upper division courses in all major biomedical areas: genetics, molecular/cell biology, microbiology, physiology, neurosciences, immunology, endocrinology, biochemistry, mathematics, psychology, medical humanities, and two 2-unit postbaccalaureate seminar courses.

Student will choose a program of at least 34 units with the advance approval of an advisor.

Elective Lower and Upper Division Coursework (minimum of 34 units)

Biology

- BIOL 270 - Human Anatomy & Physiology I *Units: 4 ; G.E./G.R. Area: B2, B3*
- BIOL 271 - Human Anatomy & Physiology II *Units: 4*
- BIOL 310 - Genetic Analysis I *Units: 4*
- BIOL 330 - General Microbiology *Units: 5*

- BIOL 410 - Genetic Analysis II *Units: 3*
- BIOL 424 - Bioinformatics *Units: 3*
- BIOL 426 - Advanced Molecular and Cell Biology *Units: 3*
- BIOL 430 - Microbial Physiology and Metabolism *Units: 3*
- BIOL 432 - Microbe-Host Interactions *Units: 3*
- BIOL 434 - Molecular Microbiology *Units: 3*
- BIOL 440 - Molecular Virology *Units: 3*
- BIOL 441 - Parasitology *Units: 3*
- BIOL 442 - Epidemiology *Units: 3*
- BIOL 444 - Medical Entomology *Units: 3*
- BIOL 445 - Immunology *Units: 3*
- BIOL 470 - Animal Senses *Units: 4*
- BIOL 471 - Neurobiology *Units: 3*
- BIOL 473 - Comparative Physiology *Units: 3*
- BIOL 474 - Biomedical Physiology *Units: 3*
- BIOL 476 - General Endocrinology *Units: 3*
- BIOL 488 - Environmental Physiology *Units: 3*

Chemistry

- CHEM 111 - General Chemistry I *Units: 5 ; G.E./G.R. Area: B1, B3*
- CHEM 112 - General Chemistry II *Units: 5*
- CHEM 331 - Organic Chemistry I *Units: 5*
- CHEM 332 - Organic Chemistry II *Units: 5*
- CHEM 441 - Biochemistry I *Units: 4*
- CHEM 442 - Biochemistry II *Units: 4*
- CHEM 445 - Protein Structure *Units: 3*
- CHEM 446 - Nucleic Acid Chemistry *Units: 3*
- CHEM 447 - Major Organ Biochemistry *Units: 3*

Physics

- PHYS 125 - Principles of Physics I *Units: 4 ; G.E./G.R. Area: B1, B3*
- PHYS 126 - Principles of Physics II *Units: 4 ; G.E./G.R. Area: B1, B3*
- PHYS 303 - Biophysics *Units: 3 ; G.E./G.R. Area: B6*

English

- ENGL 100 - College Writing: Stretch I *Units: 3*
- ENGL 101 - College Writing: Stretch II *Units: 3 ; G.E./G.R. Area: A2*
- ENGL 200 - College Writing II *Units: 3 ; G.E./G.R. Area: Writing II*

Health Science

- HSC 130 - Health Humanities *Units: 3 ; G.E./G.R. Area: C2*
- HSC 315 - Public Health *Units: 3*
- HSC 355 - Bioethics *Units: 3*
- HSC 405 - Toxicology *Units: 3*

Mathematics

- MATH 130 - Calculus I *Units: 4 ; G.E./G.R. Area: B4*
- MATH 131 - Calculus II *Units: 3*

Psychology

- PSYC 100 - General Psychology *Units: 3 ; G.E./G.R. Area: D1-3*
- PSYC 330 - Cognitive Psychology *Units: 4*
- PSYC 360 - Social Psychology *Units: 4*
- PSYC 381 - Psychopathology *Units: 4*
- PSYC 421 - Cognitive Neuroscience *Units: 4*

Statistics

- STAT 303A - Biostatistics for Health Science *Units: 3*

Seminars

- BIOL 420 - Cell and Molecular Biology Undergraduate Seminar *Units: 2*
- BIOL 670 - Seminar in Physiology *Units: 2*

Independent Study

- CHEM 490 - Independent Study *Units: 1-4*
- PHYS 125A - Principles of Physics I - Discussion *Units: 1*
- PHYS 126A - Principles of Physics II - Discussion *Units: 1*

- • CHEM 651 - Graduate Physical Chemistry *Units: 3*
- • CHEM 652 - Computational Chemistry *Units: 3*
- • CHEM 680 - Seminar *Units: 1*
- • CHEM 681 - Research *Units: 1-2*
- • CHEM 690 - Independent Study *Units: 1-3*
- • CHEM 691 - University Thesis *Units: 2*
- • CHEM 692 - Comprehensive Exam *Units: 2*
- • CHEM 693 - Review Paper *Units: 2*
- • CHEM 697 - Issues in Chemistry *Units: 3*

School of Arts and Media

Participating Departments
Art, Communication, Music, Theatre & Dance

School Mission

The field of video production, for television as well as for corporate, educational, and Web uses, is expanding rapidly and there is much demand by employers for people with these skills. Other programs and courses at Cal State East Bay feature documentary and news production (COMM); stage acting (THEA); fiction writing for the printed page and the Internet (ENGL). This program introduces a new dimension to each of these areas: narrative or creative video. The new minor enables these departments to collaborate and actually create several videos of broadcast quality each year, giving students the opportunity to learn skills by practicing them.

Master

Multimedia, M.A.: Interaction Design Concentration

Multimedia, M.A. Program

Program Description

The master's degree in Multimedia is a unique interdisciplinary program at the intersection of interactive content development and interaction design. The program emphasizes the creative and technical aspects of current and emerging technology and its use in creating, controlling, delivering, and presenting compelling content in an interactive form. This degree draws upon elements from a number of fields including art, journalism, computer science, psychology, and telecommunications.

The master's degree in Multimedia focuses on Interaction Design, the creation of interactive applications and objects as part of designed user experience.

The Multimedia graduate program embraces industry skills and practices by emphasizing teamwork and project-oriented goals. Students learn the skills needed to adapt quickly to new environments - a valuable asset for any profession. Because multimedia is a rapidly developing and rapidly changing field, the program focuses as much on the enduring creative process as on the transient technology.

The Multimedia master's is a two-year degree program. Most coursework is offered in the evening. During the first year, students develop a theoretical foundation in multimedia technology, enhance their creative skills and learn to work effectively in teams. During the second year, small teams of students with various backgrounds and talents create innovative, professional-quality interactive multimedia

projects. Ideas for group projects can originate from students, faculty or external sources. Many of the program's student projects have won national and international awards.

Students in the Multimedia graduate program enjoy a number of benefits including small student-teacher ratios and a dedicated interdisciplinary faculty. Thesis project students have 24-hour access to their own professional-quality multimedia production studio. These facilities are well equipped and maintained with the latest technology.

Career Opportunities

Located in the San Francisco Bay Area, the epicenter of the interactive digital media industry and technological innovation, the Multimedia graduate program prepares students for successful careers across multiple growing industries.

Interaction Designers create meaningful relationships between people and their interactive digital products, environments, systems, or services.

Creative Technologists are both strategists and innovators - technology-focused individuals integrated into a creative team. They are integrators who blur the lines between technology and creativity and create new ways of telling stories using technology.

Multimedia M.A. graduates are skilled team members - innovators with a high degree of expertise in interactive content development. They are at home in film and video studios, graphic and exhibition design studios, production and post-production houses, publishers, training and communication groups, scientific visualization teams, support teams for educational institutions and business presentations, and advertising agencies and news outlets.

Admission

Applicants are individually evaluated for admission to the Multimedia graduate program using the following criteria:

- A minimum GPA of 3.0 in the last 60 semester units of undergraduate work,
- A portfolio of work reflecting the applicant's talents and abilities in digital and interactive media,
- Evidence of professional experience in relevant fields.

To apply for admission to the Multimedia graduate program, students must complete the online university application at CALSTATE Apply. In addition, applicants must complete a departmental application and submit it along with a statement of purpose, resume, work sample, two reference letters and copies of academic transcripts. Applicants are selected by an admissions panel of the Multimedia Program Committee.

Students are admitted for the fall semester only. See the Multimedia Graduate Program website at <http://multimedia.csueastbay.edu> for the application deadline. No entrance exam is required for admission, however international students must take the TOEFL exam and achieve a score of 213.

Applicants who have not completed all prerequisite requirements may be placed in "Conditionally Classified Graduate" status if they can demonstrate the ability to complete these requirements.

Requirements for Continuation

Once admitted to the program, students must satisfy the University Writing Skills Requirement. Students who have completed all the prerequisite requirements and the University Writing Skills Requirement are

given "Classified Graduate" status. For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call (510) 885-3661.

Advancement to Candidacy is a University requirement for graduation. A student with "Classified Graduate" status may apply for Advancement to Candidacy after completing at least 20 semester units towards the master's degree with a minimum GPA of 3.0 (a grade of "B" or higher). Before being Advanced to Candidacy, a student's complete course of study and progress must be approved by the Multimedia Program Committee.

Program Learning Outcomes

Students graduating with an M.A. in Multimedia from Cal State East Bay will possess the following skills:

- **Critical Thinking and Reasoning:** Graduates will research, assess, and ethically use information in the field of multimedia design and journalism.
- **Creativity and Innovation:** Graduates will produce high-level work that demonstrates innovative and creative use of interactive technologies.
- **Information Literacy:** Graduates will analyze, interpret, evaluate, and reflect upon the effects of media and the historical evolution of information technologies.
- **Craft:** Graduates will demonstrate, through practical projects and written documentation, comprehensive knowledge of digital imaging, interactivity, and web, video and audio production.
- **Collaboration and Responsibility:** Graduates will work in collaborative teams to analyze and present solutions to local, regional, national, and global problems.

Multimedia Degree Requirements (34 units)

Required Core Courses

The following 17 units of core coursework is required:

- MM 601 - Seminar in Interactive Art & Design *Units: 3*
- MM 602 - Project and Story Development *Units: 3*
- MM 640 - Forum *Units: 1* (must be taken four times, once each semester for a total of 4 units)
- MM 680 - Interactive Content Development *Units: 3*
- MM 682 - Individual Multimedia Research and Practice *Units: 3*
- MM 694 - Project Documentation *Units: 1* (this course will be taken twice; once in the first semester of the second year and again as part of the capstone experience.)

Interaction Design Concentration

Interaction Design, for 17 units, focuses on the creation of meaningful experiences expressed as interactive applications and objects. Students analyze interactivity in art, design, and everyday life; acquire skills and develop prototypes; and work in collaborative teams to creatively solve real world problems.

Interaction Design Core

Two (2) courses for 6 units are required:

- MM 621 - Screen Based Interaction *Units: 3*
- MM 622 - Physical Prototyping *Units: 3*

Interaction Design Electives

Choose two (2) electives for 6 units:

- MM 665 - Experiments in Interactivity *Units: 3*
- MM 666 - Experiments in Art and Technology *Units: 3*
- MM 667 - Experiments in Storytelling *Units: 3*

Interaction Design Capstone

The following 5 units are required to complete the program capstone:

- MM 693 - Interaction Design Capstone Project *Units: 4*
- MM 694 - Project Documentation *Units: 1*

Other Graduate & Post-Baccalaureate Degree Requirements

In addition to departmental requirements, every student must also satisfy the University requirements for graduation as described throughout this catalog. These include the 70% unit residence requirement; the five-year rule on currency of subject matter; the minimum number of units in 600-level courses; the "C" minimum grade for each graduate course; the 3.00 cumulative grade point average; and the University Writing Skills Requirement.

Note: For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call (510) 885-3661.

- • MM 694 - Project Documentation *Units: 1*
- • MM 698 - Internship *Units: 1-6*

School of Engineering

Computer Engineering, Industrial Engineering, Engineering Management, and Construction Management

The Department Office is located on the 5th Floor of the Student Faculty Building (SF), Room 524.

Hours Open: 9:00 a.m. to 6:00 p.m., Monday through Friday.

Dept. Phone: (510) 885-2654

Faculty

Professors

David Bowen, Ph.D. University of California, Berkeley

Farnaz Ganjeizadeh, Ph.D. University of Alabama at Huntsville

Saeid Motavalli (Chair), Ph.D. University of Pittsburgh

Zinovy Radovilsky (joint appointment in Engineering and Management), Ph.D. Scientific Research Institute of Labor, Moscow

Farzad Shahbodaghlu, Ph.D. Purdue University

Eric A. Suess (joint appointment in Engineering and Statistics), Ph.D. University of California, Davis

Helen Zong, Ph.D. University of Houston

Associate Professor

Cristián Gaedicke, Ph.D. University of Illinois, Urbana-Champaign

Assistant Professors

Reza Akhavian, Ph.D. University of Central Florida

Fadi Castronovo, Ph.D. Pennsylvania State University

Roger Doering, Ph.D. University of California, Berkeley

James Tandon, Ph.D. University of California, Santa Barbara

Department Statement

The School of Engineering offers undergraduate degrees in Industrial Engineering, Computer Engineering and Construction Management, and graduate degrees in Engineering Management and Construction Management. Certificates in Quality, Project Management, Construction Planning and Control and Construction Administration are also offered. The School serves a diverse regional and international student population, and utilizes modern tools and laboratories for active learning and student engagement while emphasizing collaborative learning.

Computer Engineers are involved in all aspects of computing, from the design of individual microprocessors, personal computers, and supercomputers, to circuit design, as well as the integration of computer systems into other kinds of systems (a motor vehicle, for example, has a number of subsystems that are computer oriented). Common computer engineering tasks include writing embedded software for real-time microcontrollers, working with sensors, designing mixed signal circuit boards, and designing operating systems. The Computer Engineering Program is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, Telephone: (410) 347-7700.

Industrial Engineers serve an essential need in today's technical society. As the interface between humans and technology, industrial engineers work to improve the quality and efficiency of the production of goods and services. The depth and caliber of academic preparation required to excel in this field is embodied in CSUEB's Industrial Engineering curriculum. The Industrial Engineering Program is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, Telephone: (410) 347-7700.

Engineering Management curriculum is distinctive in that it provides a blend of qualitative management and quantitative industrial engineering skills. Courses are offered in engineering, business, computer science and statistics. Students gain theoretical and practical training in how to plan, organize, allocate resources, and direct and control activities that have technological components.

Construction Management goals are to prepare effective managers for public and private construction projects, to prepare the workforce required for the expected increase in the State's transportation infrastructure improvements, and to enable high school graduates, transfer students and working professionals to assume leadership roles in the construction industry. Special attention is given to working students with classes offered mainly at times convenient to students.

Bachelor

Computer Engineering, B.S.

Computer Engineering, B.S. Program (127 units)

Program Description

Reach your full potential in the field of engineering and realize the future you envision with an undergraduate degree in Computer Engineering from California State University, East Bay. As a graduate of the Bay Area's latest engineering degree program, you'll qualify yourself for a high potential career in designing and building semiconductor hardware and software systems. Computer engineers are involved in all aspects of computing, from the design of individual microprocessors, personal computers, and supercomputers, to circuit design, as well as the integration of computer systems into other kinds of systems (a motor vehicle, for example, has a number of subsystems that are computer oriented). Common computer engineering tasks include writing embedded software for real-time microcontrollers, working with sensors, designing mixed signal circuit boards, and designing operating systems.

Career Opportunities

Exciting careers in designing and building semiconductor hardware and software systems, including individual microprocessors, personal computers, supercomputers, circuit design, integration of computer systems, writing embedded software for real-time microcontrollers, working with sensors, designing mixed-signal circuit boards, and designing operating systems.

Features

Relatively small class sizes, many hands-on lab and project experiences, easy access to faculty for advice and academic help, proximity to industry in the Silicon Valley area, and good opportunities for internships.

Program Learning Outcomes

Students who graduate with a B.S. in Computer Engineering will be able to:

- An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
- An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
- An ability to communicate effectively with a range of audiences.
- An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.

- An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
- An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Degree Requirements Unit-Outline

- A baccalaureate of science degree requires a total of 127 units;
 - The major requirements consists of 89 units;
 - General Education (GE) & Graduation Requirements (GR) consists of 57 units;
 - Free Electives may consist of 0 units (*actual number of free elective units may depend on GE/GR units*).
- Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.*

Computer Engineering Major Requirements (88 units)

Lower Division Core

The following 47 units of lower-division interdisciplinary coursework is required:

- CHEM 110 - General Chemistry for Engineering Units: 3 ; G.E./G.R. Area: B1, B3
- CS 101 - Computer Science I Units: 4
- CS 201 - Computer Science II Units: 4
- CS 211 - Discrete Structures Units: 3
- CS 221 - Computer Organization and Assembly Language Units: 3
- ENGR 200 - Introduction to Engineering and Design Units: 3 ; GE/GR Area: Writing II
- ENGR 220 - Statics Units: 3
- ENGR 230 - Electric Circuits I Units: 3
- MATH 130 - Calculus I Units: 4 ; G.E./G.R. Area: B4
- MATH 131 - Calculus II Units: 3
- MATH 210 - Linear Algebra with Differential Equations Units: 3
- MATH 230 - Calculus III Units: 3
- PHYS 135 - Physics for Scientists and Engineers I Units: 4 ; G.E./G.R. Area: B1, B3
- PHYS 136 - Physics for Scientists and Engineers II Units: 4

Upper Division Core

The following 35 units of upper-division coursework is required:

- CMPE 322 - Digital Design Laboratory Units: 1
- CMPE 330 - Electric Circuits II Units: 3
- CMPE 344 - Microprocessor Laboratory Units: 3
- CMPE 370 - Digital Signal Processing I Units: 3
- CMPE 421 - Computer Architecture II Units: 3

- CMPE 480 - VLSI Circuit Design/Layout *Units: 3*
- CMPE 492 - Senior Design I *Units: 3*
- CMPE 493 - Senior Capstone: Senior Design II *Units: 3*
- CS 301 - Data Structures and Algorithms *Units: 4*
- CS 321 - Computer Architecture *Units: 3*
- INDE 330 - Engineering Statistics and Probability *Units: 3*
- MATH 375 - Differential Equations I *Units: 3*

Elective Courses

Students shall select a minimum of 6 units of Engineering elective courses:

- CMPE 430 - Analog Design *Units: 3*
- CMPE 470 - Digital Signal Processing II *Units: 4*
- CS 401 - Software Engineering *Units: 4*
- CS 421 - Operating Systems *Units: 3*
- CS 441 - Computer Networks *Units: 3*
- CS 455 - Computer Graphics *Units: 3*
- ENGR 310 - CAD/CAM Graphics *Units: 3*

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

Courses

Computer Engineering

- • CMPE 330 - Electric Circuits II *Units: 3*
- • CMPE 344 - Microprocessor Laboratory *Units: 3*
- • CMPE 370 - Digital Signal Processing I *Units: 3*
- • CMPE 398 - Internship *Units: 1-3*
- • CMPE 421 - Computer Architecture II *Units: 3*
- • CMPE 430 - Analog Design *Units: 3*
- • CMPE 470 - Digital Signal Processing II *Units: 4*
- • CMPE 480 - VLSI Circuit Design/Layout *Units: 3*

- • CMPE 490 - Independent Study *Units: 1-4*
- • CMPE 492 - Senior Design I *Units: 3*
- • CMPE 493 - Senior Capstone: Senior Design II *Units: 3*
- • CMPE 497 - Issues in Computer Engineering *Units: 3*

Construction Management

- • CMGT 101 - Introduction to Construction Management *Units: 3*
- • CMGT 142 - Construction Graphics and Plans Reading *Units: 2*
- • CMGT 201 - Surveying *Units: 2*
- • CMGT 206 - Construction Materials *Units: 3*
- • CMGT 207 - Construction Methods *Units: 3*
- • CMGT 310 - Statics and Strength of Materials *Units: 3*
- • CMGT 320 - Construction Law *Units: 3*
- • CMGT 325 - Electrical and Mechanical Systems in Construction *Units: 3*
- • CMGT 340 - Construction Cost Estimating *Units: 3*
- • CMGT 345 - Building Codes and Commissioning *Units: 3*
- • CMGT 350 - Construction Project Planning, Scheduling and Control *Units: 4*
- • CMGT 360 - Soil Mechanics and Building Foundations *Units: 3*
- • CMGT 410 - Building Information Modeling *Units: 3*
- • CMGT 430 - Environmental Issues and Green Building *Units: 3*
- • CMGT 440 - Construction Project Management *Units: 3*
- • CMGT 480 - Construction Safety *Units: 3*
- • CMGT 490 - Independent Study *Units: 1-3*
- • CMGT 493 - Senior Project *Units: 4*
- • CMGT 497 - Issues in Construction Management *Units: 3*

Construction Management: Graduate

- • CMGT 610 - BIM and Advanced Technologies *Units: 3*
- • CMGT 620 - Legal Issues in Construction Management *Units: 3*
- • CMGT 630 - Environmental Issues and Sustainable Construction *Units: 3*
- • CMGT 640 - Cost Estimating for Construction Management *Units: 3*
- • CMGT 650 - Construction Project Management, Planning, and Scheduling *Units: 3*
- • CMGT 660 - Cost Accounting, Control and Reporting in Construction *Units: 3*
- • CMGT 670 - Construction Enterprise and Risk Management *Units: 3*
- • CMGT 675 - Temporary Structures in Construction *Units: 3*
- • CMGT 680 - Construction Safety and Health *Units: 3*
- • CMGT 685 - Special Topics in Construction Management *Units: 3*
- • CMGT 690 - Independent Study *Units: 3*
- • CMGT 693A - Applied Research in Construction Management *Units: 3*
- • CMGT 693B - Master's Project Capstone *Units: 3*
- • CMGT 697 - Issues in Construction Management *Units: 3*

Engineering

- • ENGR 200 - Introduction to Engineering and Design *Units: 3 ; GE/GR Area: Writing II*
- • ENGR 210 - Manufacturing Materials and Processes *Units: 4*
- • ENGR 215 - Computational Methods in Engineering *Units: 3*
- • ENGR 220 - Statics *Units: 3*
- • ENGR 221 - Dynamics *Units: 3*
- • ENGR 230 - Electric Circuits I *Units: 3*

- • ENGR 310 - CAD/CAM Graphics *Units: 3*
- • ENGR 320 - Engineering Economics *Units: 3*
- • ENGR 400A - Historical Architectural Virtual Prototyping I *Units: 4 ; G.E./G.R. Area: D4*
- • ENGR 400B - Historical Architectural Virtual Prototyping II *Units: 4*

Engineering: Graduate

- • ENGR 610 - Analytical Methods In Engineering Management *Units: 3*
- • ENGR 615 - Finance for Engineers *Units: 3*
- • ENGR 620 - System Modeling with Simulation *Units: 3*
- • ENGR 630 - Quality and Reliability Management *Units: 3*
- • ENGR 640 - Engineering Sustainable Supply Chains *Units: 3*
- • ENGR 650 - Project Management *Units: 3*
- • ENGR 660 - Sustainable Product and Process Design *Units: 3*
- • ENGR 670 - Design and Management of Human Work Systems *Units: 3*
- • ENGR 680 - Engineering Systems Modeling *Units: 3*
- • ENGR 690 - Independent Study *Units: 3*
- • ENGR 693A - Applied Research in Engineering Management *Units: 3*
- • ENGR 693B - Master's Project Capstone *Units: 3*
- • ENGR 697 - Issues in Engineering Management *Units: 3*

Industrial Engineering

- • INDE 330 - Engineering Statistics and Probability *Units: 3*
- • INDE 340 - Design of Engineering Experiments *Units: 3*
- • INDE 360 - Operations Research *Units: 4*
- • INDE 390 - Human Factors and Work Methods *Units: 4 ; G.E./G.R. Area: B6*
- • INDE 410 - Facility Planning, Design and Material Handling *Units: 3*
- • INDE 420 - Discrete Event Simulation *Units: 3*
- • INDE 430 - Design of Work Systems *Units: 4*
- • INDE 440 - Sustainable Production and Supply Chain Systems *Units: 4*
- • INDE 450 - Systems Quality & Reliability *Units: 4*
- • INDE 460 - Service and Manufacturing Systems Modeling *Units: 4*
- • INDE 490 - Independent Study *Units: 1-3*
- • INDE 492 - Senior Design *Units: 4*
- • INDE 497 - Issues in Industrial Engineering *Units: 3*
- • INDE 498 - Internship *Units: 1-3*

Construction Management, B.S.

Construction Management, B.S. Program (120 units)

Program Description

The goals of the B.S. degree in Construction Management are to prepare effective managers for public and private construction projects, to prepare the workforce required by the construction industry, and to enable high school graduates, transfer students and working professionals to assume leadership roles in the construction industry. Special attention is given to promote students participating in internships and working professionals with classes offered mainly at times convenient to students.

Career Opportunities

With the expected increase in large construction work, in part stemming from the increase in public spending on California's transportation infrastructure improvement, there is considerable demand for individuals who can technically and scientifically manage large construction projects. Also, there are increasing opportunities from the local and regional high tech sector for expansion and new construction projects. The construction industry, as a whole, is one of the largest industries in the nation with a great need for skilled project managers. Sample jobs are construction manager, site manager and others.

Program Learning Outcomes

Students graduating with a B.S. in Construction Management will be able to:

- Create written communications appropriate to the construction discipline.
- Create oral presentations appropriate to the construction discipline.
- Create a construction project safety plan.
- Create construction project cost estimates.
- Create construction project schedules.
- Analyze professional decisions based on ethical principles.
- Analyze construction documents for planning and management of construction processes.
- Analyze methods, materials, and equipment used to construct projects.
- Apply construction management skills as a member of a multi-disciplinary team.
- Apply electronic-based technology to manage the construction process.
- Apply basic surveying techniques for construction layout and control.
- Understand different methods of project delivery and the roles and responsibilities of all constituencies involved in the design and construction process.
- Understand construction risk management.
- Understand construction accounting and cost control.
- Understand construction quality assurance and control.
- Understand construction project control processes.
- Understand the legal implications of contract, common, and regulatory law to manage a construction project.
- Understand the basic principles of sustainable construction.
- Understand the basic principles of structural behavior.
- Understand the basic principles of mechanical, electrical and piping systems.

Degree Requirements Unit-Outline

- A baccalaureate of science degree requires a total of 120 units:
- The major requirements consists of 78 units;
- General Education (GE) & Graduation Requirements (GR) consists of 57 units;
- Free Electives may consist of 0 units (*actual number of free elective units may depend on GE/GR units*).

Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.

Construction Management Major Requirements (81 units)

Lower Division Core

The following 37 units of interdisciplinary coursework is required:

- ACCT 210 - Introduction to Financial Accounting *Units: 3*
- CHEM 110 - General Chemistry for Engineering *Units: 3 ; G.E./G.R. Area: B1, B3*
- CMGT 101 - Introduction to Construction Management *Units: 3*
- CMGT 142 - Construction Graphics and Plans Reading *Units: 2*
- CMGT 201 - Surveying *Units: 2*
- CMGT 206 - Construction Materials *Units: 3*
- CMGT 207 - Construction Methods *Units: 3*
- ECON 200 - Principles of Microeconomics *Units: 3 ; G.E./G.R. Area: D1-3; Social Justice*
- MATH 130 - Calculus I *Units: 4 ; G.E./G.R. Area: B4*
- PHYS 125 - Principles of Physics I *Units: 4 ; G.E./G.R. Area: B1, B3*
- PHYS 126 - Principles of Physics II *Units: 4 ; G.E./G.R. Area: B1, B3*
- PSYC 100 - General Psychology *Units: 3 ; G.E./G.R. Area: D1-3*

Upper Division Core

The following 41 units are required:

- CMGT 310 - Statics and Strength of Materials *Units: 3*
- CMGT 320 - Construction Law *Units: 3*
- CMGT 325 - Electrical and Mechanical Systems in Construction *Units: 3*
- CMGT 340 - Construction Cost Estimating *Units: 3*
- CMGT 345 - Building Codes and Commissioning *Units: 3*
- CMGT 350 - Construction Project Planning, Scheduling and Control *Units: 4*
- CMGT 360 - Soil Mechanics and Building Foundations *Units: 3*
- CMGT 410 - Building Information Modeling *Units: 3*
- CMGT 430 - Environmental Issues and Green Building *Units: 3*
- CMGT 440 - Construction Project Management *Units: 3*
- CMGT 480 - Construction Safety *Units: 3*
- CMGT 493 - Senior Project *Units: 4*
- MGMT 312 - Human Resources Management *Units: 3*

Elective Courses

Select one (1) course for 3 units from the following (or other 300 and/or 400 level courses with department approval):

- ACCT 215 - Introduction to Managerial Accounting *Units: 3*
- ACCT 302 - Cost Accounting *Units: 3*
- BUS 220 - Legal Environment of Business *Units: 3 ; G.E./G.R. Area: D1-3; Social Justice*
- BUS 330 - Financial Management *Units: 3*
- FIN 480 - Real Estate Finance *Units: 3*

- FIN 482 - Real Estate Valuation *Units: 3*
- MGMT 314 - Leadership and Management *Units: 3*
- MGMT 350 - Decision Science *Units: 3 ; G.E./G.R. Area: B6*
- MGMT 364 - Global Supply Chain Management *Units: 3*

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

- • INDE 410 - Facility Planning, Design and Material Handling *Units: 3*
- • INDE 420 - Discrete Event Simulation *Units: 3*
- • INDE 430 - Design of Work Systems *Units: 4*
- • INDE 440 - Sustainable Production and Supply Chain Systems *Units: 4*
- • INDE 450 - Systems Quality & Reliability *Units: 4*
- • INDE 460 - Service and Manufacturing Systems Modeling *Units: 4*
- • INDE 490 - Independent Study *Units: 1-3*
- • INDE 492 - Senior Design *Units: 4*
- • INDE 497 - Issues in Industrial Engineering *Units: 3*
- • INDE 498 - Internship *Units: 1-3*

Industrial Engineering, B.S.

Industrial Engineering, B.S. Program (125 units) * see Errata-Program page

Program Description

Reach your full potential in the field of engineering and - realize the future you envision with an undergraduate degree in Industrial Engineering from California State University, East Bay (CSUEB). As a graduate of CSUEB's ABET accredited Industrial Engineering degree program you'll be prepared for a highly rewarding professional career designing, building, and managing state-of-the-art manufacturing and service systems. Industrial Engineers serve an essential need in today's technical society as the interface between humans and technology. Industrial engineers work to improve the quality and efficiency of the production of goods and delivery of services.

Career Opportunities

Career opportunities for industrial engineers exist in many sectors including manufacturing, services, financial, healthcare, pharmaceutical, high tech. It also involves many functions such as planning, logistics and supply chain optimization, quality, forecasting and simulation, project supervision and improvement.

Features

Relatively small class sizes, easy access to faculty for advising and academic help, good opportunities for internships.

Program Learning Outcomes

Students who graduate with a B.S. in Industrial Engineering will be able to:

- An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
- An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
- An ability to communicate effectively with a range of audiences.
- An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
- An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
- An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Degree Requirements Unit-Outline

- A baccalaureate of science degree requires a total of 125 units: *see Errata - Programs page
 - The major requirements consists of 89 units;
 - General Education (GE) & Graduation Requirements (GR) consists of 57 units;
 - Free Electives may consist of 0 units (*actual number of free elective units may depend on GE/GR units*).
- Note: It may be possible to double-count units within the graduation requirements or that a course may satisfy both a graduation requirement and a major requirement. Students should contact their program and AACE advisors for information.*

Industrial Engineering Major Requirements (89 units)

Lower Division Core

The following 40 units of lower-division interdisciplinary coursework is required:

- CHEM 110 - General Chemistry for Engineering Units: 3 ; G.E./G.R. Area: B1, B3
- ENGR 200 - Introduction to Engineering and Design Units: 3 ; GE/GR Area: Writing II
- ENGR 210 - Manufacturing Materials and Processes Units: 4
- ENGR 215 - Computational Methods in Engineering Units: 3
- ENGR 220 - Statics Units: 3
- ENGR 230 - Electric Circuits I Units: 3
- MATH 130 - Calculus I Units: 4 ; G.E./G.R. Area: B4
- MATH 131 - Calculus II Units: 3
- MATH 210 - Linear Algebra with Differential Equations Units: 3
- PHYS 135 - Physics for Scientists and Engineers I Units: 4 ; G.E./G.R. Area: B1, B3
- PHYS 136 - Physics for Scientists and Engineers II Units: 4
- PSYC 100 - General Psychology Units: 3 ; G.E./G.R. Area: D1-3

Upper Division Core

The following 43 units of upper-division Engineering coursework is required:

- ENGR 320 - Engineering Economics *Units: 3*
- INDE 330 - Engineering Statistics and Probability *Units: 3*
or STAT 316 Statistics and Probability for Science and Engineering
- INDE 340 - Design of Engineering Experiments *Units: 3*
- INDE 360 - Operations Research *Units: 4*
- INDE 390 - Human Factors and Work Methods *Units: 4 ; G.E./G.R. Area: B6*
- INDE 410 - Facility Planning, Design and Material Handling *Units: 3*
- INDE 420 - Discrete Event Simulation *Units: 3*
- INDE 430 - Design of Work Systems *Units: 4*
- INDE 440 - Sustainable Production and Supply Chain Systems *Units: 4*
- INDE 450 - Systems Quality & Reliability *Units: 4*
- INDE 460 - Service and Manufacturing Systems Modeling *Units: 4*
- INDE 492 - Senior Design *Units: 4*

Elective Courses

Under consultation with their advisor, students shall select a minimum of 6 units of approved, upper-division Math/Basic Science elective courses.

Other Undergraduate Degree Requirements

In addition to major requirements, every student must also complete the University's baccalaureate requirements for graduation, which are described in the Requirements, Exams & Testing chapter of this catalog.

Courses

Computer Engineering

- • CMPE 330 - Electric Circuits II *Units: 3*
- • CMPE 344 - Microprocessor Laboratory *Units: 3*
- • CMPE 370 - Digital Signal Processing I *Units: 3*
- • CMPE 398 - Internship *Units: 1-3*
- • CMPE 421 - Computer Architecture II *Units: 3*

- • CMPE 430 - Analog Design *Units: 3*
- • CMPE 470 - Digital Signal Processing II *Units: 4*
- • CMPE 480 - VLSI Circuit Design/Layout *Units: 3*
- • CMPE 490 - Independent Study *Units: 1-4*
- • CMPE 492 - Senior Design I *Units: 3*
- • CMPE 493 - Senior Capstone: Senior Design II *Units: 3*
- • CMPE 497 - Issues in Computer Engineering *Units: 3*

Construction Management

- • CMGT 101 - Introduction to Construction Management *Units: 3*
- • CMGT 142 - Construction Graphics and Plans Reading *Units: 2*
- • CMGT 201 - Surveying *Units: 2*
- • CMGT 206 - Construction Materials *Units: 3*
- • CMGT 207 - Construction Methods *Units: 3*
- • CMGT 310 - Statics and Strength of Materials *Units: 3*
- • CMGT 320 - Construction Law *Units: 3*
- • CMGT 325 - Electrical and Mechanical Systems in Construction *Units: 3*
- • CMGT 340 - Construction Cost Estimating *Units: 3*
- • CMGT 345 - Building Codes and Commissioning *Units: 3*
- • CMGT 350 - Construction Project Planning, Scheduling and Control *Units: 4*
- • CMGT 360 - Soil Mechanics and Building Foundations *Units: 3*
- • CMGT 410 - Building Information Modeling *Units: 3*
- • CMGT 430 - Environmental Issues and Green Building *Units: 3*
- • CMGT 440 - Construction Project Management *Units: 3*
- • CMGT 480 - Construction Safety *Units: 3*
- • CMGT 490 - Independent Study *Units: 1-3*
- • CMGT 493 - Senior Project *Units: 4*
- • CMGT 497 - Issues in Construction Management *Units: 3*

Construction Management: Graduate

- • CMGT 610 - BIM and Advanced Technologies *Units: 3*
- • CMGT 620 - Legal Issues in Construction Management *Units: 3*
- • CMGT 630 - Environmental Issues and Sustainable Construction *Units: 3*
- • CMGT 640 - Cost Estimating for Construction Management *Units: 3*
- • CMGT 650 - Construction Project Management, Planning, and Scheduling *Units: 3*
- • CMGT 660 - Cost Accounting, Control and Reporting in Construction *Units: 3*
- • CMGT 670 - Construction Enterprise and Risk Management *Units: 3*
- • CMGT 675 - Temporary Structures in Construction *Units: 3*
- • CMGT 680 - Construction Safety and Health *Units: 3*
- • CMGT 685 - Special Topics in Construction Management *Units: 3*
- • CMGT 690 - Independent Study *Units: 3*
- • CMGT 693A - Applied Research in Construction Management *Units: 3*
- • CMGT 693B - Master's Project Capstone *Units: 3*
- • CMGT 697 - Issues in Construction Management *Units: 3*

Engineering

- • ENGR 200 - Introduction to Engineering and Design *Units: 3 ; GE/GR Area: Writing II*
- • ENGR 210 - Manufacturing Materials and Processes *Units: 4*
- • ENGR 215 - Computational Methods in Engineering *Units: 3*

- • ENGR 220 - Statics *Units: 3*
- • ENGR 221 - Dynamics *Units: 3*
- • ENGR 230 - Electric Circuits I *Units: 3*
- • ENGR 310 - CAD/CAM Graphics *Units: 3*
- • ENGR 320 - Engineering Economics *Units: 3*
- • ENGR 400A - Historical Architectural Virtual Prototyping I *Units: 4 ; G.E./G.R. Area: D4*
- • ENGR 400B - Historical Architectural Virtual Prototyping II *Units: 4*

Engineering: Graduate

- • ENGR 610 - Analytical Methods In Engineering Management *Units: 3*
- • ENGR 615 - Finance for Engineers *Units: 3*
- • ENGR 620 - System Modeling with Simulation *Units: 3*
- • ENGR 630 - Quality and Reliability Management *Units: 3*
- • ENGR 640 - Engineering Sustainable Supply Chains *Units: 3*
- • ENGR 650 - Project Management *Units: 3*
- • ENGR 660 - Sustainable Product and Process Design *Units: 3*
- • ENGR 670 - Design and Management of Human Work Systems *Units: 3*
- • ENGR 680 - Engineering Systems Modeling *Units: 3*
- • ENGR 690 - Independent Study *Units: 3*
- • ENGR 693A - Applied Research in Engineering Management *Units: 3*
- • ENGR 693B - Master's Project Capstone *Units: 3*
- • ENGR 697 - Issues in Engineering Management *Units: 3*

Industrial Engineering

- • INDE 330 - Engineering Statistics and Probability *Units: 3*
- • INDE 340 - Design of Engineering Experiments *Units: 3*
- • INDE 360 - Operations Research *Units: 4*
- • INDE 390 - Human Factors and Work Methods *Units: 4 ; G.E./G.R. Area: B6*
- • INDE 410 - Facility Planning, Design and Material Handling *Units: 3*
- • INDE 420 - Discrete Event Simulation *Units: 3*
- • INDE 430 - Design of Work Systems *Units: 4*

- • INDE 497 - Issues in Industrial Engineering *Units: 3*
- • INDE 498 - Internship *Units: 1-3*

Master

Construction Management, M.S.

Construction Management, M.S. Program

Department Information

The School of Engineering offers undergraduate degrees in Industrial Engineering Computer Engineering and Construction Management, and graduate degrees in Engineering Management and Construction Management. Certificates in Quality, Project Management, Construction Planning and Control and Construction Administration are also offered. The School serves a diverse regional and international student population, and utilizes modern tools and laboratories for active learning and student engagement while emphasizing collaborative learning.

Program Description

The School of Engineering is offering a Master's of Science degree in Construction Management. This degree is targeted for working professionals who are in leadership/management positions in the construction industry or planning to advance their careers to manage large construction projects.

The goals of the Masters of Science degree in Construction Management are to prepare effective managers for large public and private construction projects, to prepare the workforce required for the state's transportation infrastructure improvements, and to enable current and future engineers and other professionals to assume leadership roles in the construction industry.

This program is different from other construction management programs as it is based on a well-balanced curriculum covering various aspects of the construction management profession. Special attention is given to working professionals with classes offered at times convenient for the students. Students will take required courses in legal and environmental issues in construction, advanced technology, project planning and control, cost estimating, financial and risk management issues. Also issues in construction safety and current trends in construction industry will be discussed. Students will also have a broad choice of electives from courses in construction management, engineering, business, or other graduate courses with department approval.

Career Opportunities

With the expected increase in large construction work, in part stemming from the increase in public spending on California's transportation infrastructure improvement, there is considerable demand for individuals who can technically and scientifically manage large construction projects. Also, there are increasing opportunities from the local and regional high tech sector for expansion and new construction projects. The construction industry, as a whole, is one of the largest industries in the nation with a great need for skilled project managers. Sample jobs are construction manager, site manager and others.

Admission Requirements

The M.S. in Construction Management is open to individuals planning a career or advancing their career in the construction industry, and who have:

- A baccalaureate degree from an accredited university with a minimum overall GPA of 2.5 (4.0 basis) in their undergraduate work,
- Relevant work or academic experience, and
- College Algebra and Trigonometry or equivalent level math courses.

In addition to the University Graduate and Post-baccalaureate Application, all applicants should submit to the department:

- Personal statement explaining their reasons for wanting to pursue the M.S. in Construction Management degree,

- A resume detailing their professional and academic achievements, and
- Two letters of recommendation.

Admission to the University and admission to the M.S. in Construction Management degree program are separate steps.

For **international students**, check with CSUEB Center for International Education (CIE) for further requirements. In addition, proficiency in English language is required for all students to whom English is not their native language.

Student Standing and Progress Toward the Degree

There are three categories of student status which reflect student progress toward the degree: "Conditionally Classified Graduate" student, "Classified Graduate" student, and "Advancement to Candidacy" student.

- Students achieve "Conditionally Classified Graduate" status when they have been admitted to the M.S. in Construction Management degree program, but have not yet completed the prerequisites for "Classified Graduate" status in the M.S. in Construction Management.
- Students achieve "Classified Graduate" status when they have satisfied the University Writing Skills Requirement and completed all program prerequisites. For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call (510) 885-3661.
- Students are advanced to Candidacy when they have completed the required courses with a 3.0 or better GPA.

Note: Students who fail to maintain progress by falling below a 3.0 GPA in their graduate courses for two or more consecutive semesters will be academically disqualified from the university.

Program Learning Outcomes

Students graduating with a M.S. Construction Management degree from Cal State East Bay will be able to:

- understand and implement risk management, scheduling and estimating, building information modeling, high performance building assessment systems, and project delivery methods.
- use effective communication skills to solve practical construction problems, explain and defend the application of advanced construction practices associated with planning, staffing, scheduling and controlling construction projects.
- plan and deliver a project meeting the desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, constructability, and sustainability.

Degree Requirements

The M.S. degree program in Construction Management requires completion of 36 semester units distributed among required courses, elective courses, and the project or comprehensive exam. Of these units, at least 27 units must be completed in residence (transfer units are limited to 9 semester units); at least 30 units must be in courses in the 600 series. No course numbered 100 to 299 (or equivalent if taken elsewhere) may be used as part of the 36-unit graduate degree program.

No more than 3 units of Independent Study (CMGT 690) may be counted toward the 36 units required for the degree. Project credit may not exceed 3 units.

A grade point average of 3.0 must be maintained in all 36-semester units taken to satisfy the degree requirements. All graduate degree requirements must be completed within five (5) years.

Construction Management Degree Requirements (36 units)

Core Courses

The following 27 units are required:

- CMGT 610 - BIM and Advanced Technologies *Units: 3*
- CMGT 620 - Legal Issues in Construction Management *Units: 3*
- CMGT 630 - Environmental Issues and Sustainable Construction *Units: 3*
- CMGT 640 - Cost Estimating for Construction Management *Units: 3*
- CMGT 650 - Construction Project Management, Planning, and Scheduling *Units: 3*
- CMGT 660 - Cost Accounting, Control and Reporting in Construction *Units: 3*
- CMGT 670 - Construction Enterprise and Risk Management *Units: 3*
- CMGT 680 - Construction Safety and Health *Units: 3*
- CMGT 685 - Special Topics in Construction Management *Units: 3*

Elective Courses

Students completing the capstone must take 6 elective units. Those who elect to take the comprehensive exam need to take an additional third elective (a total of 9 elective units) with the comprehensive exam to satisfy the graduation requirement.

Electives can be chosen from other graduate programs with departmental approval.

- CMGT 697 - Issues in Construction Management *Units: 3*
- CMGT 690 - Independent Study *Units: 3*
- CMGT 675 - Temporary Structures in Construction *Units: 3*

Capstone Requirement

To complete a capstone project requirement, students enroll in one (1) of the capstone courses below for 3 units *or pass a comprehensive exam*. Students who elect to take the comprehensive exam cannot take CMGT 693A or CMGT 693B, but have to complete an additional 3 unit elective.

The Applied Research in Construction Management, CMGT 693A, is a capstone course based on the coursework completed for the degree and is accompanied by a written document. The Master's Project Capstone, CMGT 693B, is an individual research project where a faculty member from the department supervises the student's work. One copy of the written component of the project is required by the department.

For comprehensive exam and other information, see your graduate advisor.

Grades of "RP" (Report in Progress) may be given for CMGT 693A or CMGT 693B if the project is not completed at the end of the semester. The "RP" grade must be removed within one year or it will become an "F".

- CMGT 693A - Applied Research in Construction Management *Units: 3*
- CMGT 693B - Master's Project Capstone *Units: 3*

Other Graduate & Post-Baccalaureate Degree Requirements

In addition to departmental requirements, every student must also satisfy the University requirements for graduation as described throughout this catalog. These include the 70% unit residence requirement; the five-year rule on currency of subject matter; the minimum number of units in 600-level courses; the "C" minimum grade for each graduate course; the 3.00 cumulative grade point average; and the University Writing Skills Requirement.

Note: For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call (510) 885-3661.

Engineering Management, M.S.

Engineering Management, M.S. Program

School Information

The School of Engineering offers undergraduate degrees in Industrial Engineering, Computer Engineering and Construction Management, and graduate degrees in Engineering Management and Construction Management. Certificates in Quality, Project Management, Construction Planning and Control and Construction Administration are also offered. The School serves a diverse regional and international student population, and utilizes modern tools and laboratories for active learning and student engagement while emphasizing collaborative learning.

Program Description

The California State University, East Bay School of Engineering, provides an interdisciplinary master's of science degree in Engineering Management. This degree is designed for working engineers and professionals who are in leadership/management positions or who are planning to advance their careers into the management of technical enterprises. It is also designed to benefit engineering or science graduates who are interested in assuming leadership positions in industry. Students gain theoretical and practical training in how to plan, organize, allocate resources, and direct and control activities that have technological components. The curriculum is distinctive in that it provides a blend of qualitative

management and quantitative industrial engineering skills. Courses are offered in engineering, business, computer science and statistics.

Career Opportunities

The Engineering Management Degree MS is designed for engineering or science graduates interested in assuming leadership positions in industry. Students gain theoretical and practical training in how to plan, organize, optimize and allocate resources, and to direct and control projects and activities that have technological components. Examples include: Managing technical enterprises and technical personnel; System analyst; Technical project leader. These positions occur in diverse industry sectors such as telecommunications, software development, healthcare, financial institutions and service industries.

Admission Requirements

The M.S. Degree in Engineering Management is open to students planning a career, or seeking to advance their career in managing technical enterprises who: (1) have a baccalaureate degree in engineering, basic science or related technical field from an accredited institution, and (2) have earned an overall grade point average of 2.5 (4.0 basis) or better in their undergraduate work. Degrees from foreign institutions will be individually evaluated. Submission of your GRE and/or GMAT results is highly recommended. In addition to the University Graduate and Post-baccalaureate Application, all applicants should submit the following materials along with their application to Graduate Admissions:

- Submit a personal statement with the application stating their reasons for wanting to pursue the M.S. in Engineering Management degree, describing relevant work experience, and explaining their past academic performance;
- Submit two letters of recommendation; and
- Submit a resume.

Admission to the university and admission to the M.S. in Engineering Management degree program are separate steps. **International students** check CSUEB Center for International Education (CIE) for further requirements.

Student Standing and Progress Toward the Degree

There are three categories of student status which reflect student progress toward the degree: "Conditionally Classified Graduate," "Classified Graduate," and "Advancement to Candidacy."

Students achieve "Conditionally Classified Graduate" status when they have been admitted to the M.S. in Engineering Management degree program, but have not yet completed the prerequisites for "Classified Graduate" status in the M.S. in Engineering Management degree program. Students achieve "Classified Graduate" status when they have satisfactorily completed the three prerequisites for the M.S. in Engineering Management degree program or their equivalents, and satisfied the University Writing Skills Requirement. (See "Prerequisites for Classified Graduate Status" below.) Students are Advanced to Candidacy when they have completed the required courses with a 3.0 or better GPA

Note: Students who fail to maintain progress by falling below a 3.0 GPA in their graduate courses for two or more consecutive semesters will be academically disqualified from the university.

Program Learning Outcomes

- Develop advanced analytical skills in optimization, planning and control, and other quantitative management techniques.
- Effectively manage teams of multi-disciplinary and multi-cultural professionals.
- Understand the impact of engineering and management decisions in a global, economic, environmental, and societal context.
- Have the ability to effectively and persuasively communicate.
- Recognize the need for, and have an ability to engage in, life-long learning.

Engineering Management Degree Requirements (30 units)

Prerequisites or Foundation Requirements

The prerequisites or foundation coursework below (or their equivalents) are required for all students in the M.S. in Engineering Management program. Please check individual course requirements for additional prerequisites. These prerequisites must be completed before beginning graduate-level coursework. This area may require 0-13 units that are not included in the major units:

- ACCT 210 - Introduction to Financial Accounting *Units: 3*
- ENGR 320 - Engineering Economics *Units: 3*

And, one (1) of the following for 3 units:

- INDE 330 - Engineering Statistics and Probability *Units: 3*
- STAT 316 - Statistics and Probability for Science and Engineering *Units: 3*
- STAT 330 - Statistical Inference *Units: 3*

Core Courses

The following 21 units of core coursework are required:

- ENGR 610 - Analytical Methods In Engineering Management *Units: 3*
- ENGR 615 - Finance for Engineers *Units: 3*
- ENGR 620 - System Modeling with Simulation *Units: 3*
- ENGR 630 - Quality and Reliability Management *Units: 3*
- ENGR 640 - Engineering Sustainable Supply Chains *Units: 3*
- ENGR 650 - Project Management *Units: 3*
- ENGR 660 - Sustainable Product and Process Design *Units: 3*

Elective Courses

Choose two (2) courses for 6 units:

- ENGR 670 - Design and Management of Human Work Systems *Units: 3*
- ENGR 680 - Engineering Systems Modeling *Units: 3*
- ENGR 690 - Independent Study *Units: 3*
- Or another 600-level course with departmental approval for a minimum of 3 units.

Capstone Requirement

Choose one (1) of the following options of capstone coursework for 3 units:

- ENGR 693A - Applied Research in Engineering Management *Units: 3*

OR

- ENGR 693B - Master's Project Capstone *Units: 3*

OR

- Comprehensive Exam and one (1) additional 600-level elective course for a minimum of 3 units with departmental approval.

Other Graduate & Post-Baccalaureate Degree Requirements

In addition to departmental requirements, every student must also satisfy the University requirements for graduation as described throughout this catalog. These include the 70% unit residence requirement; the five-year rule on currency of subject matter; the minimum number of units in 600-level courses; the "C" minimum grade for each graduate course; the 3.00 cumulative grade point average; and the University Writing Skills Requirement.

Note: For information on meeting the University Writing Skills Requirement, see the Testing Office website at www.csueastbay.edu/testing or call (510) 885-3661.

Courses

Computer Engineering

- • CMPE 330 - Electric Circuits II *Units: 3*
- • CMPE 344 - Microprocessor Laboratory *Units: 3*
- • CMPE 370 - Digital Signal Processing I *Units: 3*
- • CMPE 398 - Internship *Units: 1-3*
- • CMPE 421 - Computer Architecture II *Units: 3*
- • CMPE 430 - Analog Design *Units: 3*
- • CMPE 470 - Digital Signal Processing II *Units: 4*
- • CMPE 480 - VLSI Circuit Design/Layout *Units: 3*
- • CMPE 490 - Independent Study *Units: 1-4*
- • CMPE 492 - Senior Design I *Units: 3*
- • CMPE 493 - Senior Capstone: Senior Design II *Units: 3*
- • CMPE 497 - Issues in Computer Engineering *Units: 3*

Construction Management

- • CMGT 101 - Introduction to Construction Management *Units: 3*
- • CMGT 142 - Construction Graphics and Plans Reading *Units: 2*
- • CMGT 201 - Surveying *Units: 2*
- • CMGT 206 - Construction Materials *Units: 3*
- • CMGT 207 - Construction Methods *Units: 3*
- • CMGT 310 - Statics and Strength of Materials *Units: 3*
- • CMGT 320 - Construction Law *Units: 3*
- • CMGT 325 - Electrical and Mechanical Systems in Construction *Units: 3*
- • CMGT 340 - Construction Cost Estimating *Units: 3*
- • CMGT 345 - Building Codes and Commissioning *Units: 3*
- • CMGT 350 - Construction Project Planning, Scheduling and Control *Units: 4*
- • CMGT 360 - Soil Mechanics and Building Foundations *Units: 3*
- • CMGT 410 - Building Information Modeling *Units: 3*
- • CMGT 430 - Environmental Issues and Green Building *Units: 3*
- • CMGT 440 - Construction Project Management *Units: 3*
- • CMGT 480 - Construction Safety *Units: 3*
- • CMGT 490 - Independent Study *Units: 1-3*
- • CMGT 493 - Senior Project *Units: 4*
- • CMGT 497 - Issues in Construction Management *Units: 3*

Construction Management: Graduate

- • CMGT 610 - BIM and Advanced Technologies *Units: 3*
- • CMGT 620 - Legal Issues in Construction Management *Units: 3*
- • CMGT 630 - Environmental Issues and Sustainable Construction *Units: 3*
- • CMGT 640 - Cost Estimating for Construction Management *Units: 3*
- • CMGT 650 - Construction Project Management, Planning, and Scheduling *Units: 3*
- • CMGT 660 - Cost Accounting, Control and Reporting in Construction *Units: 3*
- • CMGT 670 - Construction Enterprise and Risk Management *Units: 3*
- • CMGT 675 - Temporary Structures in Construction *Units: 3*
- • CMGT 680 - Construction Safety and Health *Units: 3*
- • CMGT 685 - Special Topics in Construction Management *Units: 3*
- • CMGT 690 - Independent Study *Units: 3*
- • CMGT 693A - Applied Research in Construction Management *Units: 3*
- • CMGT 693B - Master's Project Capstone *Units: 3*
- • CMGT 697 - Issues in Construction Management *Units: 3*

Engineering

- • ENGR 200 - Introduction to Engineering and Design *Units: 3 ; GE/GR Area: Writing II*
- • ENGR 210 - Manufacturing Materials and Processes *Units: 4*
- • ENGR 215 - Computational Methods in Engineering *Units: 3*
- • ENGR 220 - Statics *Units: 3*
- • ENGR 221 - Dynamics *Units: 3*
- • ENGR 230 - Electric Circuits I *Units: 3*
- • ENGR 310 - CAD/CAM Graphics *Units: 3*
- • ENGR 320 - Engineering Economics *Units: 3*
- • ENGR 400A - Historical Architectural Virtual Prototyping I *Units: 4 ; G.E./G.R. Area: D4*
- • ENGR 400B - Historical Architectural Virtual Prototyping II *Units: 4*

Engineering: Graduate

- • ENGR 610 - Analytical Methods In Engineering Management *Units: 3*
- • ENGR 615 - Finance for Engineers *Units: 3*
- • ENGR 620 - System Modeling with Simulation *Units: 3*
- • ENGR 630 - Quality and Reliability Management *Units: 3*
- • ENGR 640 - Engineering Sustainable Supply Chains *Units: 3*
- • ENGR 650 - Project Management *Units: 3*
- • ENGR 660 - Sustainable Product and Process Design *Units: 3*
- • ENGR 670 - Design and Management of Human Work Systems *Units: 3*
- • ENGR 680 - Engineering Systems Modeling *Units: 3*
- • ENGR 690 - Independent Study *Units: 3*
- • ENGR 693A - Applied Research in Engineering Management *Units: 3*
- • ENGR 693B - Master's Project Capstone *Units: 3*
- • ENGR 697 - Issues in Engineering Management *Units: 3*

Industrial Engineering

- • INDE 330 - Engineering Statistics and Probability *Units: 3*
- • INDE 340 - Design of Engineering Experiments *Units: 3*
- • INDE 360 - Operations Research *Units: 4*
- • INDE 390 - Human Factors and Work Methods *Units: 4 ; G.E./G.R. Area: B6*
- • INDE 410 - Facility Planning, Design and Material Handling *Units: 3*
- • INDE 420 - Discrete Event Simulation *Units: 3*
- • INDE 430 - Design of Work Systems *Units: 4*
- • INDE 440 - Sustainable Production and Supply Chain Systems *Units: 4*
- • INDE 450 - Systems Quality & Reliability *Units: 4*
- • INDE 460 - Service and Manufacturing Systems Modeling *Units: 4*
- • INDE 490 - Independent Study *Units: 1-3*
- • INDE 492 - Senior Design *Units: 4*
- • INDE 497 - Issues in Industrial Engineering *Units: 3*
- • INDE 498 - Internship *Units: 1-3*

University Honors Program

Office of Undergraduate Studies

Student Services and Administration Building, Suite 4500

Phone: (510) 885-3716

E-mail: uhp@csueastbay.edu

Program Director

Shirley Yap (Mathematics)

Arnab Mukherjee (Health Sciences), Interim for Fall

Program Description

The University Honors Program provides outstanding students the opportunity for academic challenge by completing specialized courses, seminars, and projects under the direction of faculty mentors. They are

considered for periodic awards and scholarships. University Honors Program students also receive recognition on their official transcripts and diplomas, and enjoy special acknowledgement at both the Honors Convocation and commencement ceremonies.

Program Learning Outcomes

Students who complete the University Honors Program will be able to:

- Demonstrate the ability to design, plan, and execute an original research or creative project that would meet professional standards in a specialized discipline or interdisciplinary field.
- Effectively communicate the methods, techniques, and findings of their original research or creative project in a written, oral, or visual format.
- Work collaboratively with persons from different fields of specialization to address complex challenges and everyday problems.
- Demonstrate responsible leadership skills through participating in one or more significant organizational roles in Honors curricular or co-curricular projects or service-learning fieldwork.

Admission

Admission to the University Honors Program is open to students who have maintained at least a 3.6 GPA in their last 2 semesters of study at CSUEB or transfer students whose transferred course GPA is at least 3.6. In addition, all students considering applying to the honors program must intend to be enrolled in the University for at least two more years so that they will have sufficient time to complete the program requirements.

Program Course Requirements

Consult the University Honors Program Director for clarification and interpretation of course requirements.

To graduate from the program, every Honors student must satisfactorily complete:

- A minimum of two classes (each consisting of three or more course units) as Honors-designated courses. To earn the Honors designation for a particular course on their transcripts, students shall:
- Design, plan, and execute an original research or creative project in consultation with the course instructor, who agrees to evaluate the honors project in addition to, and separate from, assignments and assessments for the course in which the student is enrolled. Honors-designated courses may be in the student's major or minor, as well as in General Education and elective courses.
- Submit an instructor-approved project form for each course in which Honors projects will be completed to the University Honors Program Director for review and approval.
- Earn a letter grade of "B" (3.0 earned grade point) or better (see: Grading and Academic Standards FAQ) in the course in which an Honors project is completed.
- GS 309 Honors Service and Leadership (3 units) in students' sophomore or junior years, with a letter grade of "B" (3.0 earned grade point) or better.
- GS 399 Honors Presentation (1 unit) in their senior year, in conjunction with a capstone course within students' degree program, with a letter grade of "B" (3.0 earned grade point) or better.

Additional Breadth and Eligibility Requirements

Students must:

- Take Honors-designated courses with letter grades only. Credit/No Credit courses will not be accepted for Honors designation.
- Make progress towards program completion by taking at least one Honors-designated course per academic year, if needed, with a letter grade of "B" (3.0 earned grade point) or better.
- Maintain a cumulative GPA of 3.60.
- Attend one or more special learning, professional development at CSUEB each semester in which they are enrolled in the University Honors Program. Events sponsored by the Honors Student Council will be especially encouraged.

Early Registration

Excluding freshmen, all students in good standing in the University Honors Program enjoy Early Registration for most classes.

Special Recognition

University Honors Program students will receive special recognition at the Honors Convocation and/or at commencement in the academic year they graduate. University Honors Program students will also receive recognition on their transcripts and their diplomas, as well as a certificate of recognition from the program.

Program Director

The director coordinates University Honors Program courses, as well as special events for University Honors Program students and faculty. The director tracks student progress, invites eligible students to join the program, and notifies students who are failing to meet the program requirements.

Cal State East Bay General Education Program & Breadth Requirements

- Purpose of General Education (GE)
- Objectives
- GE Requirements
- Lower-Division Requirements
- Upper-Division Requirements
- GE Checklist
- Quarter System GE Requirements
- Local Breadth Requirements

The Purpose of General Education

General Education (GE) empowers students to become independent thinkers, able to transform their learning into meaningful action. Cal State East Bay's GE Program is designed to educate its students holistically and is central to the university experience. The GE Program provides students with opportunities to explore disciplines and ideas that are new, that may change their world perspectives, and that help define them as educated citizens of the global community.

While a college diploma opens doors to career and employment opportunities, the true value of the degree is not the degree itself but the experiences and relationships developed while in college--the value is in the journey not the destination. Cal State East Bay's campus community is dedicated to supporting students through their journey. Although students may struggle to make meaning and see the immediate benefits of their college curriculum as they look to the end goal of graduation, Cal State East Bay is focused on its graduates being educated people whose quality of life will be vastly improved by the college experience. Students should make the best use of all opportunities and resources open to them, including the selection of courses that make up their GE pathway.

Objectives

Every undergraduate student at Cal State East Bay follows a degree program composed primarily of major courses and GE courses. Successful completion of these courses assures that graduates make measurable progress toward becoming truly educated persons who can contribute to a diverse society. The GE Program and Breadth Requirements are designed and organized to help students attain the program's objectives, which are aligned to Cal State East Bay's Institutional Learning Outcomes and to the Essential Learning Outcomes of the Liberal Education and America's Promise (LEAP) initiative, all of which express the knowledge, skills, and values Cal State East Bay graduates are expected to attain. These outcomes include:

- knowledge of human cultures and the physical and natural world through study in the sciences and mathematics, social sciences, humanities, histories, languages, and arts;

- intellectual and practical skills, including inquiry and analysis, critical and creative thinking, written and oral communication, quantitative literacy, information literacy, and teamwork and problem solving; and
- personal and social responsibility, including civic knowledge and engagement at local and global levels, intercultural knowledge and competence, ethical reasoning and action, and foundations and skills for lifelong learning.

General Education Requirements

All Cal State East Bay undergraduate students participate in the General Education (GE) Program, along with their major program, to develop and bolster a breadth of their knowledge and skills. Cal State East Bay has a vibrant and meaningful GE Program that includes both state-mandated and CSUEB-specific ("local") requirements.

By CSU policy, all baccalaureate students must complete a minimum of 48 semester units of GE distributed over five areas. Transfer students who have earned lower division GE credit from a California community college, another CSU, or the University of California prior to attending Cal State East Bay will have those lower division credits honored. However, transfer students still must complete 9 semester units of upper division GE at a CSU.

In addition to the state-mandated GE courses, there are a few Cal State East Bay breadth requirements:

- Second Composition lower division course
- Overlay courses in:
 - Diversity
 - Social Justice
 - Sustainability

Two additional baccalaureate requirements: *the University Writing Skills Requirement* and *American Institutions ("Code") Requirement* are described in the Requirements, Exams & Testing chapter. GE and major pathways should be planned carefully. Important GE policies to keep in mind are described below.

48 Units of General Education (Lower-division and Upper-division GE Courses)

The program requires a minimum of 48 semester units of GE, including a minimum of 9 semester units of upper-division GE, distributed over five areas (GE Areas A-E), as specified in the GE Area descriptions below. Transfer students must earn a minimum of 39 semester units in lower-division GE courses that meet the requirements of the CSU or IGETC transfer plan and complete a minimum of 9 semester units of upper-division GE at a CSU.

9 Units Upper-division GE

At least 9 of the 48 semester units must be from approved upper division (at Cal State East Bay, these are numbered 300 and above) GE courses taken within the CSU. Upper-division GE cannot be taken until earning a minimum of 60 semester units (junior standing) in all baccalaureate-level coursework and lower-division GE courses in Areas A1, A2, A3, and B4 have been passed with grades of C- (CR) or better.

Minimum Course Grades

Grades of C- (CR) or better are required in Communication in the English Language (GE Subareas A1 and A2), Critical Thinking (A3), and Quantitative Reasoning (B4).

Allowances for Double-counting in GE

Major courses and campus-wide required courses that are approved for GE credit will also fulfill (double count for) the GE requirement.

For Areas A, B, C, and D, no one course or test can be used to clear more than one GE Area requirement. One American Institutions (U.S. Code) class may be double-counted to meet a GE requirement: U.S. Code. Transfer students from institutions that allow both U.S. Code classes to double-count with GE will have those agreements honored. Students who take one U.S. Code class elsewhere and one at Cal State East Bay will only be allowed to double-count one of the courses with GE. Students who take a course that is approved for both GE and Overlay may count that course for both requirements. Students who take a course that is approved for Second Composition and one of GE Areas A3, B, C, or D may count that course for both requirements.

Lower-Division GE Requirements (39 Semester Units) and Learning Outcomes

Area A. Communication in the English Language and Critical Thinking (9 Semester Units)

Students should complete this area of the GE requirements (along with GE Subarea B4) during their freshman year and must complete this area before reaching junior status. Students must take one course (minimum 3 semester units) from each GE Subarea: A1, A2, and A3.

Students taking courses in fulfillment of GE Subareas A1 and A2 will develop knowledge and understanding of the form, content, context, and effectiveness of communication. Students will develop proficiency in oral and written communication in English, examining communication from the rhetorical perspective and practicing reasoning and advocacy, organization, and accuracy. Students will enhance their skills in the discovery, critical evaluation, and reporting of information, as well as reading, writing, and listening effectively.

A1. Oral Communication (3 semester units)

Subarea A1 courses emphasize communication theory and provide several speaking and listening experiences in multiple modes, e.g., small-group discussion, interpersonal communication, and persuasive discourse presented extemporaneously. Upon completion of the A1 requirement, students will be able to:

1. speak effectively when making oral presentations in English;
 2. explain the principles of effective oral communication, including form, content, context, and style;
 3. advocate for a cause or idea, presenting facts and arguments in an organized and accurate manner;
- and

4. critically evaluate oral presentations.

The A1 course must be passed with a C- (CR) or better to satisfy GE Subarea A1. Any approved A1 course with an In Progress Grade (i.e., I, RP, or RD) will not be counted in Subarea A1 until a passing final course grade is posted. As appropriate, American Sign Language may be substituted for oral communication.

Courses approved for Subarea A1 are listed here: [GE Area A1 Courses](#)

A2. Written Communication (3 semester units)

Subarea A2 courses emphasize the rhetorical principles that govern reading and writing. These principles are fundamental to logical thinking and clear expression. For reading, they presume open-mindedness combined with critical thinking and analytical skills. For writing, they presume an awareness of audience, context, and purpose. Upon completion of the A2 requirement, students will be able to:

1. write effectively in English;
2. explain the principles and rhetorical perspectives of effective writing, including its form, content, context, and style;
3. advocate for a cause or idea, presenting facts and arguments in an organized and accurate manner; and
4. practice the discovery, critical evaluation, and reporting of information.

The A2 course must be passed with a C- (CR) or better to satisfy GE Subarea A2. Any approved A2 course with an In Progress Grade (i.e., I, RP, or RD) will not be counted in Subarea A2 until a passing final course grade is posted.

Courses approved for Subarea A2 are listed here: [GE Area A2 Courses](#)

A3. Critical Thinking (3 semester units)

In Subarea A3 courses emphasize the development of clarity and rigor in reasoning and its presentation, and the ability to understand, represent, and evaluate the presentations of reasoning made by others. Upon completion of the A3 requirement, students will be able to:

1. understand logic and its relation to language, elementary inductive and deductive reasoning, and formal and informal fallacies;
2. demonstrate the ability to distinguish among different sorts of claims, such as statements of opinion, reasoned judgments, proofs, and articles of faith;
3. develop the ability to identify, analyze, evaluate, and present arguments, and construct arguments both to support and refute claims; and
4. develop the ability to reason inductively and deductively.

The A3 course must be passed with a C- (CR) or better to satisfy GE Subarea A3. Any approved A3 course with an In Progress Grade (i.e., I, RP, or RD) will not be counted in Subarea A3 until a passing final course grade is posted.

Courses approved for Subarea A3 are listed here: [GE Area A3 Courses](#)

Area B. Scientific Inquiry and Quantitative Reasoning (9 Semester Units)

Lower-division Subarea B courses emphasize the key principles and concepts in the natural sciences and mathematics or statistics and the important roles that scientific practice and inquiry play in advancing scientific knowledge and discovery.

Students must choose one course from each lower-division GE Subarea B: B1, B2, and B4. At least one of the B1 or B2 courses must have a laboratory component, prerequisite, or co-requisite to satisfy GE Subarea B3.

B1. Physical Science (3 semester units)

Upon completion of the B1 requirement, students will be able to:

1. demonstrate knowledge of scientific theories, concepts, and data about the physical sciences;
2. demonstrate an understanding of scientific practices, including the scientific method; and
3. describe the potential limits of scientific endeavors, including the accepted standards and ethics associated with scientific inquiry.

Courses approved for Subarea B1 are listed here: [GE Area B1 Courses](#)

B2. Life Sciences (3 semester units)

Upon completion of the B2 requirement, students will be able to:

1. demonstrate knowledge of scientific theories, concepts, and data about the life sciences;
2. demonstrate an understanding of scientific practices, including the scientific method; and
3. describe the potential limits of scientific endeavors, including the accepted standards and ethics associated with scientific inquiry.

Courses approved for Subarea B2 are listed here: [GE Area B2 Courses](#)

B3. Laboratory Activity

Subarea B3 courses emphasize active engagement, collaboration, and hands-on experiences that facilitate understanding of science concepts and the development of sound science practices and habits of mind. Upon completion of the B3 requirement, students will be able to:

1. apply their knowledge of scientific theories, concepts, and data about the physical and sciences through laboratory activities;
2. apply their understanding of scientific practices, including the scientific method in a laboratory setting; and
3. demonstrate accepted standards and ethics associated with scientific inquiry, while completing laboratory activities.

Laboratory activities that are not a component of a B1 or B2 course must have a prerequisite or co-requisite of a B1 or B2 course in the same discipline.

Courses approved for Subarea B3 are listed here: [GE Area B3 Courses](#)

B4. Mathematics/Quantitative Reasoning (3 semester units)

Area B4 courses provide practice in computational skills as well as engagement in more complex mathematical work. Upon completion of the B4 requirement, students will be able to:

1. explain and apply basic mathematical concepts; and
2. solve problems through quantitative reasoning.

The B4 course must be passed with a C- (CR) or better satisfy GE Subarea B4. Any approved B4 course with an In Progress Grade (i.e., I, RP, or RD) will not be counted in Subarea B4 until a passing final course grade is posted. Students must attempt to complete this area of the GE requirement (along with GE Subareas A1 - 3) during their freshman year.

Courses approved for Subarea B4 are listed here: [GE Area B4 Courses](#)

Area C. Arts and Humanities (9 Semester Units)

Students must complete a minimum of nine units in lower division Area C including a minimum of three units in each of the subareas of Arts (C1) and Humanities (C2). Area C (including upper-division GE Subarea C4) must be completed with courses from at least three different disciplines as represented by course prefix.

C1. Arts (3 semester units)

Subarea C1 courses integrate the evaluative and descriptive aspects of the history, theory, aesthetics, and criticism of different works, forms, styles, and schools of art. Upon completion of the C1 requirement, students will be able to:

1. demonstrate an appreciation of the arts using their intellect, imagination, sensibility, and sensitivity;
2. respond to aesthetic experiences in the arts and develop an understanding of the integrity of both emotional and intellectual responses; and
3. in their intellectual and subjective considerations, demonstrate an understanding of the relationship among the self, the creative arts, and culture.

Courses approved for Subarea C1 are listed here: [GE Area C1 Courses](#)

C2. Humanities (3 semester units)

Subarea C2 courses emphasize the ideas and theories behind the intellectual and cultural traditions of humans using historical, linguistic, literary, philosophical, and rhetorical approaches and methods. Upon completion of the C2 requirement, students will be able to:

1. show appreciation for the humanities using their intellect, imagination, sensibility, and sensitivity;
2. develop their affective and cognitive faculties through studying great works reflecting the rich diversity of human imagination and/or inquiry; and
3. engage in critical self-reflection relating themes in the humanities to the students' own lives.

Courses approved for Subarea C2 are listed here: [GE Area C2 Courses](#)

Additional Arts (C1) or Humanities (C2) course (3 semester units)

Students must take a third lower-division Area C course to complete the lower division Area C requirement.

Area D. Social Sciences (9 Semester Units)

Students must choose three lower-division courses (minimum 3 units each) approved for GE Subareas D1-3. Area D (including upper-division GE Subarea D4) must be completed with courses from at least three different disciplines as represented by course prefix.

D1-3. Lower-division Social Science Electives (9 semester units)

Upon completion of the lower-division Area D requirement, students will be able to:

1. specify how social, political, economic, and environmental systems and/or behavior are interwoven;
2. explain how humans individually and collectively relate to relevant sociocultural, political, economic, and/or environmental systems-how they produce, resist, and transform them;
3. discuss and debate issues from the course's disciplinary perspective in a variety of cultural, historical, contemporary, and/or potential future contexts; and
4. explore principles, methodologies, value systems, and ethics employed in social scientific inquiry.

Courses approved for Subareas D1-3 are listed here: [GE Area D1-3 Courses](#)

Area E. Lifelong Learning and Self-Development (3 Semester Units)

Area E courses may address topics such as human behavior, sexuality, nutrition, physical and mental health, stress management, physical literacy, information literacy, social relationships, relationships with the environment, implications of death and dying, and avenues for lifelong learning. Students who need additional support in their A2 or B4 courses may be required to take 2 semester units of General Studies Foundations of Success (GS 101A and GS 101B) courses taken during each term (1 unit per term) of the freshman year to partially satisfy their Area E and provide additional academic support. Foundations of Success courses focus on building networks and communities of support; developing self-agency and growth mindset; practicing strategies for college success; finding and using campus resources; engaging in community (campus and beyond); understanding major and GE requirements; and planning for sophomore year and beyond. Information literacy courses focus on the skills needed to find relevant resources; access, evaluate, and organize information; understand the ethical, social, and legal dimensions; and select and use appropriate technology. The Information Literacy courses are particularly useful when taken concurrently with Second Composition courses.

Upon the completion of the Area E requirement, students will be able to:

1. develop intellectual, practical, and/or physical skills and abilities that will serve them throughout their lives;
2. apply their learning to other pursuits within and outside of the classroom; and
3. demonstrate the capacity to make informed and ethical decisions.

Courses approved for Area E are listed here: GE Area E Courses

Upper Division GE Requirements (9 Semester Units) and Learning Outcomes

To be eligible to take any upper-division GE course (numbered 300 or above at Cal State East Bay), students must have completed a minimum of 60 semester units of baccalaureate-level coursework and lower-division GE courses in Subareas A1, A2, A3, and B4 have been passed with grades of C- (CR) or better. *(See the Errata Chapter for changes to this paragraph)*

B6. Upper-division Science Inquiry and Quantitative Reasoning (3 semester units)

Subarea B6 courses integrate and build upon the quantitative analysis/reasoning skills and science content knowledge attained through lower-division Area B. Upon completion of the B6 requirement, students will be able to:

1. demonstrate advanced and/or focused science or quantitative content knowledge in a specific scientific field, using appropriate vocabulary and referencing appropriate concepts (such as models, uncertainties, hypotheses, theories, and technologies);
2. apply advanced quantitative skills (such as statistics, algebraic solutions, interpretation of graphical data) to scientific problems and evaluate scientific claims;
3. demonstrate understanding of the nature of science and scientific inquiry and the experimental and empirical methodologies used in science to investigate a scientific question or issue; and
4. apply science content knowledge to contemporary scientific issues (e.g., global warming) and technologies (e.g., cloning), where appropriate.

Courses approved for Subarea B6 are listed here: GE Area B6 Courses

C4. Upper-division Arts or Humanities (3 semester units)

Subarea C4 courses integrate and build upon the skills and content knowledge attained through lower-division GE coursework, particularly in Subareas A1, A2, A3, C, and E. Subarea C4 courses require skills in advanced writing, critical thinking, information literacy, oral communication (or sign language), and collaboration with peers. Upon completion of the C4 requirement, students will be able to:

1. demonstrate an understanding of and ability to apply the principles, methodologies, value systems, and thought processes employed in the arts and humanities;
2. analyze cultural production as an expression of, or reflection upon, what it means to be human; and
3. demonstrate how the perspectives of the arts and humanities are used by informed, engaged, and reflective citizens to benefit local and global communities.

Courses approved for Subarea C4 are listed here: GE Area C4 Courses

D4. Upper-division Social Sciences (3 semester units)

Subarea D4 courses integrate and build upon the skills and content knowledge attained through lower-division GE coursework, particularly in Subareas A1, A2, A3, D, and E. Subarea D4 courses require skills in advanced writing, critical thinking, information literacy, oral communication (or sign language), and collaboration with peers. Upon completion of the D4 requirement, students will be able to:

1. analyze how power and social identity affect social outcomes for different cultural and economic groups using methods of social science inquiry and vocabulary appropriate to those methods;
2. demonstrate an understanding of and ability to apply accurately disciplinary concepts of the social or behavioral sciences; and
3. demonstrate an understanding of and ability to effectively plan or conduct research using an appropriate method of the social or behavioral sciences.

Courses approved for Subarea D4 are listed here: [GE Area D4 Courses](#)

GE Checklist

Cal State East Bay students are required to fulfill the 48-unit General Education (GE) pattern as described in the GE Checklist. Download the checklist here: [GE Checklist](#).

Although courses approved for GE credit at the time of publication are noted in this catalog, new courses may be added and some courses may lose their GE certification. Courses approved for GE and/or breadth credit during this year, but after publication will be so listed in the Errata of the catalog.

Students with Quarter System GE Catalog Rights

Students who have quarter system GE Catalog rights will notice that GE Area F and Subarea B5, as well as the "Cultural Groups and Women" Overlay requirement do not exist in this Catalog.

Students who have not fulfilled Subarea B5 may satisfy the requirement by taking an additional B1 or B2 course or by taking a course that is listed in this Catalog as equivalent to a quarter-based course that had approval for Subarea B5 in the 2017-8 Catalog, provided that the course is taken before Fall Semester, 2021.

Students who need to satisfy 4 quarter units of Area F can use the courses on this list: [Area F courses](#). *Note: 1 semester unit is equivalent to 1.5 quarter units. They may also take a course(s) that is equivalent to a course approved for Area F under quarters, but the student cannot count the course for both Area F and another area of GE.*

Students who have not fulfilled the Cultural Groups and Women Overlay under quarters may take any semester-based Diversity Overlay course to satisfy the quarter-based requirement.

Local Breadth Requirements

Beyond the CSU requirements, Cal State East Bay requires baccalaureate students to take a Second Composition course and courses in three Overlay areas. These are described below.

Second Composition

Students must complete the Second Composition requirement by the time they reach "junior" standing. Before taking the Second Composition course, students must pass a course satisfying GE Subarea A2 with a grade of "C-" or above or "CR." Second Composition courses may also receive GE credit. Transfer students who did not satisfy this requirement at their previous college must take Second Composition during their first semester at Cal State East Bay. Some California community colleges refer to this as the "A4" requirement. The student learning outcomes for all Second Composition courses are described below.

Upon the successful completion of the Second Composition course, students will be able to:

1. complete a variety reading and writing tasks that incorporate subject-matter knowledge;
2. adjust their writing for different audiences, showing awareness of expectations for academic writing in general and adhering to discipline-specific conventions when appropriate;
3. demonstrate critical thinking and logical reasoning, including strategies common in a discipline, in the development and organization of ideas in written texts;
4. take into account multiple perspectives and key disciplinary concepts when presenting their ideas in writing; and
5. revise their writing in response to feedback in order to improve development, clarity, coherence, and correctness.

Courses approved for Second Composition are listed here: [Second Composition Courses](#)

Overlay Requirements

An "Overlay" is a graduation requirement that is fulfilled by completing an approved course. This requirement "lays over" the GE and major programs, because an Overlay course may be lower division or upper division and may also satisfy a GE or major requirement. Thus, the student should not need to take additional courses to meet the Overlay requirements. Please consult with your academic advisor to plan your coursework for your Overlay requirements.

A minimum of 9 semester units of coursework is required in courses that are linked to three of the University's Institutional Learning Outcomes (see the Cal State East Bay at a Glance chapter): Diversity Overlay, Social Justice Overlay, and Sustainability Overlay. The student learning outcomes for the three Overlay requirements are below.

Diversity Overlay

After completion of a course designated as fulfilling the Diversity Overlay requirement, students will be able to:

1. describe the histories and/or experiences of one or more U. S. cultural groups and the resilience and agency of group members;
2. identify structures of oppression and the diverse efforts and strategies used by groups to combat the effects of oppressive structures;

3. analyze the intersection of the categories of race and gender as they affect cultural group members' lived realities and/or as they are embodied in personal and collective identities;
4. recognize the way that multiple differences (including, for example, gender, class, sexuality, religion, disability, immigration status, gender expression, color/phenotype, racial mixture, linguistic expression, and/or age) within cultural groups complicate individual and group identities. "Cultural group(s)" refers to historically oppressed groups in the United States, such as African Americans, Asian Americans, Pacific Islanders, Latinx, American Indians, Arab Americans, women, and GLBTQ (gays, lesbians, bisexuals, transgender, and queer identified people).

Students who satisfied the "Cultural Groups and Women's Requirement" prior to Fall Semester, 2018 are considered to have satisfied this requirement.

Courses approved for the Diversity Overlay are listed here: [Diversity Overlay Courses](#)

Social Justice Overlay

After completion of a course designated as fulfilling the Social Justice Overlay requirement, students will be able to:

1. use a disciplinary perspective to analyze issues of social justice and equity;
2. describe the challenges to achieving social justice; and
3. identify ways in which individuals and/or groups can contribute to social justice within local communities, nations, or the world.

Courses approved for Social Justice Overlay are listed here: [Social Justice Overlay](#)

Sustainability Overlay

After completion of a course designated as fulfilling the Sustainability Overlay requirement, students will be able to:

1. identify the environmental, social, and economic dimensions of sustainability, either in general or in relation to a specific problem;
2. analyze interactions between human activities and natural systems;
3. describe key threats to environmental sustainability; and
4. explain how individual and societal choices affect prospects for sustainability at the local, regional, and/or global levels.

Courses approved for Sustainability Overlay are listed here: [Sustainability Overlay Courses](#)

Online Degree Programs & Information

- State Authorization
- About Online Learning
- Online Classes
- Online Degree Programs

Online Degree Program State Authorization

State and federal laws require colleges and universities to be authorized to offer online degree programs in states other than their own. At this time, Cal State East Bay may not be authorized to offer online degree programs for students residing in certain states. For more information on *CSUEB Distance Education State Authorization Status* go to: http://www.csueastbay.edu/online/admissions-and-costs/state_authorization.html for further information.

About Online Learning at Cal State East Bay

California State University, East Bay offers a number of online learning options. These include:

Selected online classes for enrolled students in one of two differing formats:

- Online classes, in which 100% of the class communications and coursework are online, and exams are delivered either online via the Internet, on campus, or proctored at an off-site location.
- Hybrid classes, in which some classroom meetings are replaced by online activities.

Visit the link below for more specific information about online classes and degree programs.

<http://www.csueastbay.edu/online/degree-programs.html>

Online Classes Offered This Semester

Students can view current online and hybrid course offerings at *MyCSUEB*.

Note: Please be sure to check the individual class "notes" for other possible important information about the class. To see the class "notes":

- Click the green arrow for the class;
- Click the bright blue section number hyperlink [for example: 02-LEC(123)] and scroll down to "Notes".

Online Degree Programs

A BA/BS Degree Completion Program is for anyone who has completed their lower division general education breadth requirements. All major requirements will be taken completely online.

Concord Campus Programs & Services

- About the Concord Campus
- Orientation for Concord

The Concord Campus

The Concord Campus is a branch campus of Cal State East Bay located at 4700 Ygnacio Valley Road near Clayton, Walnut Creek, Pleasant Hill, Pittsburg, and Antioch. The campus is uniquely positioned to serve the educational needs of county residents.

The 386-acre campus includes over 300 acres of open space, community sports fields, and views of Mt. Diablo and the Sacramento Delta. In 2017, the Concord Campus celebrated 25 years of providing public higher education to students and professionals. Many residents benefit from Cal State East Bay's presence in the heart of Contra Costa County and enjoy the small class size and intimate educational experiences the Concord Campus provides.

Degree Programs

Functioning primarily as an upper-division and post baccalaureate campus in Contra Costa County, the Concord Campus offers quality educational programs taught by East Bay faculty. Academic degree and credential programs currently offered at the Concord Campus are:

Undergraduate Fields of Study

Note: See the Concord Campus website for the most current majors and programs available.

Undergraduate degree completion programs with at least upper division coursework that can be completed entirely at Concord include:

- Business
- Liberal Studies
- Nursing
- Psychology

Upper division courses for the following majors are also offered at the Concord Campus. Students may be required to take additional coursework online or at the Hayward Campus in order to complete their degree program:

- Criminal Justice
- Health Sciences
- Human Development
- Sociology

Graduate Fields of Study

- Masters in Educational Leadership

Application and/or registration through either the Hayward or Concord Campus qualifies a student to enroll in courses at both sites. Academic expectations and standards, as well as University policies, are the same at both locations.

- Masters in Early Childhood Education

Application and/or registration through either the Hayward or Concord Campus qualifies a student to enroll in courses at both sites. Academic expectations and standards, as well as University policies, are the same at both locations.

Credentials

- Multiple Subject Teaching Credential
- Single Subject Teaching Credential

Certificate Program

- Paralegal Program Certificate

Post Baccalaureate Program

- Pre-Professional Health Academic Program

Services and Facilities

The Concord Campus promotes student success through a variety of services. These include academic advising on General Education (GE) and graduation requirements, as well as administrative and instructional support services. Students are referred to their departments for major advising.

Instructional support services include advanced computer laboratories, modern smart classrooms, a branch of the University's Library, student collaboration room, on-site bookstore, outdoor fitness park, student lounge and a free shuttle service between the campus and the Concord BART station.

For assistance, or information on any of these services, call (925) 602-6700 or visit <http://www.csueastbay.edu/concord>

Click the icon for a map of the Concord Campus

Orientation for Concord, International, and Graduate Students

Concord, international, and graduate students may attend other orientations. Contact the following offices to receive information:

- Concord Students: Contact Concord Transfer Center at cctransfercenter@csueastbay.edu or call (925) 602-6399 to find out more about the Concord Campus Orientation.

- International Students: Contact the Center for International Education at cie@csueastbay.edu for available orientation information or visit this website: <http://www.csueastbay.edu/cie/news/orientation.html>
- Graduate Students: Contact the major department about orientation information that may be offered, as not all graduate programs offer orientation.

University Honors Program

University Honors Program

Office of Undergraduate Studies

Student Services and Administration Building, Suite 4500

Phone: (510) 885-3716

E-mail: uhp@csueastbay.edu

Program Director

Shirley Yap (Mathematics)

Arnab Mukherjea (Health Sciences), Interim for Fall

Program Description

The University Honors Program provides outstanding students the opportunity for academic challenge by completing specialized courses, seminars, and projects under the direction of faculty mentors. They are considered for periodic awards and scholarships. University Honors Program students also receive recognition on their official transcripts and diplomas, and enjoy special acknowledgement at both the Honors Convocation and commencement ceremonies.

Program Learning Outcomes

Students who complete the University Honors Program will be able to:

1. Demonstrate the ability to design, plan, and execute an original research or creative project that would meet professional standards in a specialized discipline or interdisciplinary field.
2. Effectively communicate the methods, techniques, and findings of their original research or creative project in a written, oral, or visual format.
3. Work collaboratively with persons from different fields of specialization to address complex challenges and everyday problems.
4. Demonstrate responsible leadership skills through participating in one or more significant organizational roles in Honors curricular or co-curricular projects or service-learning fieldwork.

Admission

Admission to the University Honors Program is open to students who have maintained at least a 3.6 GPA in their last 2 semesters of study at CSUEB or transfer students whose transferred course GPA is at least 3.6. In addition, all students considering applying to the honors program must intend to be enrolled in the University for at least two more years so that they will have sufficient time to complete the program requirements.

Program Course Requirements

Consult the University Honors Program Director for clarification and interpretation of course requirements.

To graduate from the program, every Honors student must satisfactorily complete:

- A minimum of two classes (each consisting of three or more course units) as Honors-designated courses. To earn the Honors designation for a particular course on their transcripts, students shall:
 - Design, plan, and execute an original research or creative project in consultation with the course instructor, who agrees to evaluate the honors project in addition to, and separate from, assignments and assessments for the course in which the student is enrolled. Honors-designated courses may be in the student's major or minor, as well as in General Education and elective courses.
 - Submit an instructor-approved project form for each course in which Honors projects will be completed to the University Honors Program Director for review and approval.
 - Earn a letter grade of "B" (3.0 earned grade point) or better (see: Grading and Academic Standards FAQ) in the course in which an Honors project is completed.
- GS 309 Honors Service and Leadership (3 units) in students' sophomore or junior years, with a letter grade of "B" (3.0 earned grade point) or better.
- GS 399 Honors Presentation (1 unit) in their senior year, in conjunction with a capstone course within students' degree program, with a letter grade of "B" (3.0 earned grade point) or better.

Additional Breadth and Eligibility Requirements

Students must:

1. Take Honors-designated courses with letter grades only. Credit/No Credit courses will not be accepted for Honors designation.
2. Make progress towards program completion by taking at least one Honors-designated course per academic year, if needed, with a letter grade of "B" (3.0 earned grade point) or better.
3. Maintain a cumulative GPA of 3.60.
4. Attend one or more special learning, professional development at CSUEB each semester in which they are enrolled in the University Honors Program. Events sponsored by the Honors Student Council will be especially encouraged.

Early Registration

Excluding freshmen, all students in good standing in the University Honors Program enjoy Early Registration for most classes.

Special Recognition

University Honors Program students will receive special recognition at the Honors Convocation and/or at commencement in the academic year they graduate. University Honors Program students will also receive recognition on their transcripts and their diplomas, as well as a certificate of recognition from the program.

Program Director

The director coordinates University Honors Program courses, as well as special events for University Honors Program students and faculty. The director tracks student progress, invites eligible students to join the program, and notifies students who are failing to meet the program requirements.

GS 309 - Honors Service and Leadership

Units: 3

Introduction to the practice and theory of civic leadership, with emphasis upon community engagement. Service learning hours required. Please note: effective spring 2019 this course prefix will change from GS to HON. *Discussion Units: 1; Activity Units: 2*

Prerequisites: Department consent.

Equivalent Quarter Course: GS 3099.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

GS 399 - Honors Seminar

Units: 1

Students in the University Honors Program produce and present a digital portfolio of their academic and service accomplishments, assessing their Honors work in the context of program learning outcomes and professional goals. *Please note: effective spring 2019 this course prefix will change from GS to HON.*

Prerequisites: Admission to Honors Program, Junior standing or higher, and department consent.

Equivalent Quarter Course: GS 3999.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Course Descriptions

Use the filter below to look up specific course information **or** click on the *About Courses* link for more general information:

- **About Courses**

Note: Please see Errata page for corrections to BAN, CS, GEOL, GS, MKTG, SOC and SPPA courses' content.

Accounting

ACCT 210 - Introduction to Financial Accounting

Units: 3

Introduction to basic financial accounting concepts and procedures. Learn how to identify, record, and interpret the effects of economic events on financial statements for financing, investing, and operating decision-making.

Equivalent Quarter Course: ACCT 2251.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

ACCT 215 - Introduction to Managerial Accounting

Units: 3

Use of accounting information for managerial decision-making on planning and control. Topics include cost classifications, estimation, and analysis; cost-volume-profit and relevant cost analysis; job-order and activity-based costing; standard costs and variance analysis; profit planning; capital budgeting; performance evaluation.

Prerequisites: ACCT 210.

Equivalent Quarter Course: ACCT 2253.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

ACCT 302 - Cost Accounting

Units: 3

In-depth study of the reporting and analysis of cost information for managerial decision-making. Topics include job-order costing, activity-based costing, process costing, strategy and balanced scorecard, cost allocation, customer profitability and sales variance analysis, allocation of support department costs, transfer pricing.

Prerequisites: ACCT 215

Equivalent Quarter Course: ACCT 3230.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

ACCT 311 - Intermediate Financial Accounting I

Units: 3

First in the two-course intermediate financial accounting sequence. Topics include conceptual framework for financial reporting, financial statements preparation, revenue recognition, and accounting for cash, receivables, inventories, and operating tangible and intangible assets. Differences between US GAAP and IFRS are emphasized.

Prerequisites: ACCT 210 with grade C or better.

Equivalent Quarter Course: ACCT 3212 or ACCT 3212T

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

ACCT 312 - Intermediate Financial Accounting II

Units: 3

Second in the two-course intermediate financial accounting sequence. Topics include investments, liabilities, leases, income taxes, pensions, stockholders' equity, earnings per share, and statement of cash flows. Differences between US GAAP and IFRS are emphasized.

Prerequisites: ACCT 311 with grade C or better.

Equivalent Quarter Course: ACCT 3213.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

ACCT 320 - Business Law for Accountants

Units: 3

Business law topics of the CPA exam including contract law, commercial law (UCC), compliance with government regulations, negotiable instruments, secured transactions, bankruptcy, agency, employment and labor law, antitrust law, federal securities laws, business entities, and property.

Equivalent Quarter Course: ACCT 4223.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

ACCT 321 - Auditing I

Units: 3

Introduction to the auditor's decision-making process in a financial statement audit as well as an

integrated audit of both financial statement and internal control over financial reporting. Topics include audit planning and engagement, internal control, sampling, audit evidences and reports.

Prerequisites: ACCT 312 with grade C or better.

Equivalent Quarter Course: ACCT 4250.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

ACCT 331 - Federal Taxation for Individuals

Units: 3

Taxation for individuals under the U.S. Federal Income Tax System. Reporting tax for incomes, exemptions, deductions, and capital gains and losses. Tax planning and strategies, and other related tax topics are discussed.

Prerequisites: ACCT 210 with grade C or better.

Equivalent Quarter Course: ACCT 3220.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

ACCT 335 - VITA - Individual Income Tax Return Preparation

Units: 3

Classroom training in Federal and California income tax return preparation using resources from the IRS VITA program. Students need to pass the IRS certification tests and help prepare Federal and California in-scope individual income tax returns for the community.

Strongly Recommended Preparation: ACCT 331.

Prerequisites: Department consent.

Equivalent Quarter Course: ACCT 3228.

Repeatability: May be repeated once for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ACCT 340 - Accounting Information Systems

Units: 3

Design and production of accounting information to meet organization needs. Topics include accounting and business cycles, internal control systems, document flowcharts, data flow diagrams, fundamental information security issues, accounting database, disaster recovery, and business continuity.

Prerequisites: ACCT 210 with grade C or better.

Equivalent Quarter Course: ACCT 3170.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

ACCT 342 - Accounting Ethics

Units: 3

Accountant's ethical responsibilities defined by professional guidance by the American Institute of CPA's (AICPA), the Securities and Exchange Commission (SEC), and Sarbanes-Oxley Act (SOX). Discussions of ethical issues using ethical reasoning techniques and financial statement fraud cases.

Prerequisites: ACCT 210 with grade C or better.

Equivalent Quarter Course: ACCT 4911.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

ACCT 370 - Accounting for Governmental and Not-for-Profit Entities

Units: 3

Introduction to distinctive characteristics of accounting and financial reporting for governmental and not-for-profit entities. Topics include modified accrual basis, fund-based accounting, budgetary accounting, government reporting model, and net assets in not-for-profit organizations.

Prerequisites: ACCT 312 with grade C or better.

Equivalent Quarter Course: ACCT 3280.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

ACCT 398 - Internship

Units: 1-3

Introduction to the internship experience; integration of the academic program with career aspirations; emphasis on internship readiness and preparation for professional success.

Prerequisites: Department consent and minimum 2.0 GPA.

Credit Restrictions: No units may be applied to any CBE major or minor.

Equivalent Quarter Course: ACCT 3898.

Repeatability: May be repeated with department consent for a maximum of 3 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

ACCT 411 - Advanced Financial Accounting

Units: 3

Advanced topics in financial accounting include accounting for partnerships, business investment and consolidation, and foreign currency translation.

Prerequisites: ACCT 312 with grade C or better.

Equivalent Quarter Course: ACCT 4211.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

ACCT 421 - Auditing II

Units: 3

In-depth study of U.S. and international professional auditing and ethics standards. Topics include US and international auditing and ethics standards of an Issuer and a Non-issuer, and US standards governing governmental entities, attestation and assurance, accounting and review services.

Prerequisites: ACCT 321 with grade C or better.

Equivalent Quarter Course: ACCT 4251.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

ACCT 422 - Internal Auditing

Units: 3

Roles of the internal auditor in: ensuring the reliability and integrity of information, compliance with operating and reporting requirements, internal control audit, operational audit and management audit. An in-depth study of the standards of the Institute of Internal Auditors (IIA).

Prerequisites: ACCT 311 with grade C or better.

Equivalent Quarter Course: ACCT 4253.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

ACCT 423 - Information Technology Audit

Units: 3

Using information technology (IT) to audit accounting information systems. Topics include understanding IT risks, applying internal control framework to design IT internal controls, audits of computerized accounting information systems, and application of generalized audit software.

Prerequisites: ACCT 321 and ACCT 340, both with grade C or better.

Equivalent Quarter Course: ACCT 4252.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

ACCT 424 - Forensic Accounting and Fraud Examination

Units: 3

Examines fraud schemes and related financial transactions along with approaches to detect and deter fraud and studies the legal and investigative aspects of fraud examination. This course will assist students in the preparation for certification for Fraud Examiner.

Prerequisites: ACCT 312 with grade C or better.

Equivalent Quarter Course: ACCT 4254.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

ACCT 432 - Federal Taxation for Corporations

Units: 3

Taxation of domestic corporations. Topics include tax rules for determining a corporation's taxable income and tax liability, reconciling GAAP financial statement net income to corporate taxable income, tax consequences and planning strategies for corporate distributions including dividends, redemptions, and liquidations.

Prerequisites: ACCT 312 and ACCT 331, both with grade C or better.

Equivalent Quarter Course: ACCT 4220.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

ACCT 433 - Federal Taxation for Partnerships

Units: 3

Income tax rules applying to partnerships. Topics include taxation of partnership earnings, transactions between partners and the partnership, a partner's basis in a partnership interest, distributions to the partners, ownership changes, liquidation and termination of partnership and tax planning techniques.

Prerequisites: ACCT 312 and ACCT 331, both with grade C or better.

Equivalent Quarter Course: ACCT 4221.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

ACCT 435 - VITA - Quality Review of Individual Income Tax Returns

Units: 3

Classroom training on quality review for Federal and California individual income tax returns. Students learn to be quality reviewers for the VITA program to review Federal and California in-scope individual income tax returns prepared for the community by VITA preparers.

Strongly Recommended Preparation: ACCT 335.

Prerequisites: Department Consent.

Equivalent Quarter Course: ACCT 4227.

Repeatability: May be repeated once for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ACCT 490 - Independent Study

Units: 1-4

Independent study under the supervision a department faculty member.

Prerequisites: Department consent and minimum 2.0 GPA.

Credit Restrictions: No more than 12 units of independent study may be applied in the major department and 8 units in other departments to a baccalaureate degree.

Equivalent Quarter Course: ACCT 4900.

Repeatability: May be repeated for credit, with department consent, for a total of 12 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ACCT 497 - Issues in Accounting

Units: 3

Readings, discussion, and research on contemporary and/or significant issues in accounting.

Equivalent Quarter Course: ACCT 3999.

Repeatability: May be repeated for credit when content varies, for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

BUS 220 - Legal Environment of Business

Units: 3 ; G.E./G.R. Area: D1-3; Social Justice

Legal and institutional setting in which business operates; the nature, sources, functions, and processes of law and legal reasoning relating to the U.S. court system, court procedures, alternative dispute resolution, ethics, contracts, torts, basic criminal law and intellectual property.

Equivalent Quarter Course: ACCT 2701.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *D1-3 - Lower Division Social Sciences, Overlay - Social Justice*

BUS 330 - Financial Management

Units: 3

Theory and practices that underlie the financial manager's decision-making process. Capital investment analysis, cost of capital, risk and return, and market valuation of the financial assets.

Prerequisites: All of: ACCT 210, ECON 200, ECON 205, MATH 180, STAT 110.

Equivalent Quarter Course: FIN 3300.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

Accounting: Graduate

ACCT 611 - Financial Reporting and IFRS I

Units: 3

First course in a two-course sequence on Financial Reporting. Topics include: U.S. GAAP and IFRS on the conceptual framework for financial reporting, financial statements, revenue recognition, cash, receivables, inventories, and operating tangible and intangible assets.

Prerequisites: ACCT 210 with grade B- or better.

Equivalent Quarter Course: ACCT 6612.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ACCT 612 - Financial Reporting and IFRS II

Units: 3

Second course in a two-course sequence on Financial Reporting. Topics include U.S. GAAP and IFRS on current and non-current liabilities, investments, leases, income taxes, pensions, stockholders' equity, earning per share, accounting changes, and statement of cash flows.

Prerequisites: ACCT 210 with grade B- or better.

Equivalent Quarter Course: ACCT 6613.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ACCT 613 - Advanced Topics in Accounting

Units: 3

Advanced topics include accounting for partnerships, business consolidations, foreign currency translation, state and local governments, and not-for-profit organizations.

Prerequisites: ACCT 612 with grade C or better.

Equivalent Quarter Course: ACCT 6620.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ACCT 621 - Accountants' Ethics and Professional Responsibilities

Units: 3

Study of the ethical, legal, regulatory issues and social responsibilities facing the accounting profession. Topics include the elements of ethical reasoning, corporate governance, professional codes of conduct of the AICPA and other regulatory bodies, and their real-world applications.

Prerequisites: ACCT 210 with grade B- or better.

Equivalent Quarter Course: ACCT 6660.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ACCT 622 - Auditing Theory and Practice I

Units: 3

Introduction to the auditing process of historical financial statements and the current professional auditing and ethics standards of PCAOB and AICPA. Topics include internal control, nature and scope of audit engagement, planning, evidence, procedures, and reports.

Prerequisites: ACCT 612 with grade C or better.

Equivalent Quarter Course: ACCT 6640.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ACCT 623 - Auditing Theory and Practice II

Units: 3

Advanced study of U.S. and international professional auditing and ethics standards. Topics include audits of an Issuer, a Non-issuer, and governmental entities, attestation and assurance standards, and standards for performing accounting and review services.

Prerequisites: ACCT 622 with a grade C or better.

Equivalent Quarter Course: ACCT 6650.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ACCT 631 - Corporate Tax

Units: 3

Corporate income taxation from formation to complete liquidation. Topics include business entity comparisons, check-the-box regulations, common law doctrines of federal taxation, accounting periods and methods, carryovers of corporate tax attributes, personal holding companies, and accumulated earnings tax.

Prerequisites: ACCT 612 with grade C or better.

Equivalent Quarter Course: ACCT 6202.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ACCT 639 - Business Law and Regulation

Units: 3

Focuses on strategic, policy and risk management aspects of the legal rights and responsibilities of a

business. Utilizes case studies, group projects and presentations to develop practical approaches to deal pro-actively with key stakeholders in legal and regulatory compliance matters.

Prerequisites: ACCT 210 with grade B- or better.

Equivalent Quarter Course: ACCT 6670.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ACCT 671 - Business Communications and Professional Development I

Units: 1.5

Building professional and leadership skills through authentic communication. Development of leadership skill set that enables an individual to motivate, inspire, and connect to an audience. Improve individual presentation style.

Prerequisites: M.S. Accounting major.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ACCT 672 - Business Communications and Professional Development II

Units: 1.5

Building effective written communication skills for business.

Prerequisites: M.S. Accounting major.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ACCT 681 - Financial Statement Analysis and Business Valuation

Units: 3

Examine a company's competitive strategies and its industry characteristics. Analyze the profitability and risk of a company. Prepare forecast for a company. Study the valuation of the company using dividend-based, cash-flow-based, earnings-based and market-based valuation models.

Prerequisites: ACCT 613 with grade C or better.

Equivalent Quarter Course: ACCT 6560.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ACCT 690 - Independent Study

Units: 1-4

Independent study under the supervision of a member of the graduate faculty.

Prerequisites: Department consent and minimum 3.0 GPA.

Equivalent Quarter Course: ACCT 6900.

Repeatability: May be repeated for credit, with department consent, for a total of 12 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ACCT 693 - Project

Units: 3

Capstone project on analyzing a real world company's financial statements and its valuation.

Prerequisites: ACCT 613 with grade C or better.

Equivalent Quarter Course: ACCT 6899.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ACCT 697 - Issues in Accounting

Units: 3

Readings, discussion, and research on contemporary and/or significant issues in accounting.

Equivalent Quarter Course: ACCT 6999.

Repeatability: May be repeated for credit when content varies, for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ACCT 698 - Internship

Units: 1-3

Formal advanced work opportunities integrating the academic program with their career aspirations. Integral advanced hands-on experience enhancing education and preparing for professional and personal success.

Prerequisites: Department consent and minimum 3.0 GPA.

Credit Restrictions: No units may be applied to any CBE graduate degree.

Equivalent Quarter Course: ACCT 6898.

Repeatability: May be repeated with department consent for a maximum of 3 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

BUS 604 - Financial Accounting

Units: 3

Learn to read, analyze and interpret financial statements using real company data to make informed business decisions. Topics include constructing, analyzing and interpreting financial statements, and

reporting and analyzing operating income, operating assets, debt and owner financing.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: ACCT 6015.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Anthropology

ANTH 100 - Introduction to Anthropology

Units: 3 ; G.E./G.R. Area: D1-3

The study of human biology and culture for non-majors: concepts of human evolution, prehistory, and culture; discussion of human biological variation and deconstruction of concept of race; structure and function in social organization; synthesis of biological, cultural, and social factors.

Equivalent Quarter Course: ANTH 1000.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D1-3 - Lower Division Social Sciences*

ANTH 110 - Introduction to Biological Anthropology

Units: 3 ; G.E./G.R. Area: B2

An introduction to human biology from an evolutionary perspective. Topics include philosophy of science, evolutionary theory, evolution of primates and humans, the human fossil record, behavioral studies of humans and other primates, and modern human variation.

Equivalent Quarter Course: ANTH 1100.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B2 - Lower Division Life Sciences*

ANTH 120 - Introduction to Archaeology

Units: 3 ; G.E./G.R. Area: B1

Introduction to prehistory. Familiarization with the techniques used in recovery and interpretation of archaeological materials. Examples of the processes of cultural reconstructions from sites in the old and new world.

Equivalent Quarter Course: ANTH 1200.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B1 - Lower Division Physical Science*

ANTH 130 - Introduction to Cultural Anthropology

Units: 3 ; G.E./G.R. Area: D1-3

Functional approaches to the structure and dynamics of culture and society around the world; comparative study of human behavior and value systems in varied ecological settings.

Equivalent Quarter Course: ANTH 1300.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D1-3 - Lower Division Social Sciences*

ANTH 140 - Introduction to Linguistic Anthropology

Units: 3 ; G.E./G.R. Area: D1-3

An anthropological exploration of the human communicative capacity, starting with the communicative modalities of language and the body and culminating in the study of contemporary language and media.

Equivalent Quarter Course: ANTH 2801.

Possible Instructional Methods: *Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D1-3 - Lower Division Social Sciences*

ANTH 300 - Anthropology of Global Change

Units: 3 ; G.E./G.R. Area: D4

An introduction to applied anthropology. The relevance of anthropology to contemporary social issues and world problems including human rights, ethnic conflict, gender inequality, and inner-city poverty.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ANTH 3000.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D4 - Upper Division Social Sciences*

ANTH 490 - Independent Study

Units: 1-4

Independent study under the supervision a department faculty member.

Prerequisites: Department consent and minimum 2.0 GPA.

Credit Restrictions: No more than 12 units of independent study may be applied in the major department and 8 units in other departments to a baccalaureate degree.

Equivalent Quarter Course: ANTH 4900.

Repeatability: May be repeated for credit, with department consent, for a total of 12 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ANTH 497 - Issues in Anthropology

Units: 3

Readings, discussion, and research on contemporary and/or significant issues in anthropology.

Equivalent Quarter Course: ANTH 3999.

Repeatability: May be repeated for credit when content varies, for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

Anthropology: Applied Anthropology

ANTH 370 - Anthropology in Action

Units: 3

Application of anthropological theory and methods to selected contemporary problems, including public health issues and policy, education, families, community development. Service learning activity at a local community organization.

Equivalent Quarter Course: ANTH 3785.

Possible Instructional Methods: *Entirely On-line.*

Grading: A-F or CR/NC (student choice).

ANTH 371 - Business Anthropology

Units: 3 ; G.E./G.R. Area: D4

Study of culture, institutions, and globalization through a focus on the anthropology of doing business. Application of anthropological insights to commercial encounters, consumer research, and organizational behavior.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ANTH 3765.

Possible Instructional Methods: *Entirely On-line.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D4 - Upper Division Social Sciences*

ANTH 372 - Medical Anthropology

Units: 3 ; G.E./G.R. Area: D4; Diversity

The ecology of health, traditional practices, and medicine; public health and medical problems as affected by cultural differences; the effects of acculturation upon mental and physical health.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ANTH 3720.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: D4 - Upper Division Social Sciences, Overlay - Diversity

ANTH 377 - Museum Studies Anthropology

Units: 3

Hands-on experience in museum management. Students learn the role of a curator in acquisition, identification, recording, repair, preservation and display of anthropological materials. Two external museum visits are required.

Prerequisites: One of: ANTH 110, ANTH 120, ANTH 130.

Equivalent Quarter Course: ANTH 3710.

Repeatability: Course may be repeated once for credit for a maximum of six 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ANTH 398 - Internship

Units: 1-3

Introduction to the internship experience; integration of the academic program with career aspirations; emphasis on internship readiness and preparation for professional success.

Prerequisites: Department consent and minimum 2.0 GPA.

Credit Restrictions: No more than 3 units may be applied to the Anthropology major.

Equivalent Quarter Course: ANTH 3898.

Repeatability: May be repeated with department consent for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

Anthropology: Archaeology

ANTH 320 - Archaeological Science

Units: 3

Introduction to the application of the physical sciences in the solutions of problems in prehistory. Emphasis on dating methods and paleo-environmental reconstructions.

Strongly Recommended Preparation: ANTH 120.

Prerequisites: ANTH 120.

Equivalent Quarter Course: ANTH 3200.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ANTH 321 - Archaeology of the Americas

Units: 3 ; G.E./G.R. Area: D4

The origins, growth and interaction of the North American, Mesoamerican and South American societies, with particular emphasis on the large pre-contact civilizations, Aztecs, Incas, and Mayas. Archaeological, historical and ethnographic evidence.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ANTH 3250.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D4 - Upper Division Social Sciences*

Anthropology: Area Studies

ANTH 350 - Indians of California

Units: 3 ; G.E./G.R. Area: D4

Archaeology, ethno-history, and ethnography of the people living in and around what is now known as California before Old World-New World contact.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ANTH 3505.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D4 - Upper Division Social Sciences*

ANTH 354 - China

Units: 3 ; G.E./G.R. Area: D4

Cultural patterns, social structures, and regional variations of China, Taiwan, and Hong Kong; their traditional, present, and future roles in the world.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ANTH 3545.

Possible Instructional Methods: *Entirely On-line.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D4 - Upper Division Social Sciences*

ANTH 355 - Japan

Units: 3

Cultural patterns, religion, social structure and ecological settings of Japan. Topics will include family and kinship, gender roles, work groups, socialization, and education.

Equivalent Quarter Course: ANTH 3550.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

Anthropology: Biological Anthropology

ANTH 310 - Evolutionary Biology of Humans

Units: 3 ; G.E./G.R. Area: B6

Evolutionary biology, with an emphasis on humans. History of evolutionary thought, pattern and macroevolution, fossils and deep time, molecular biology and genetics, behavioral ecology and evolutionary psychology.

Prerequisites: Completion of GE areas A1, A2, A3 and B4 ; and ANTH 110.

Equivalent Quarter Course: ANTH 3100.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B6 - Upper Division Science Inquiry and Quantitative Reasoning*

ANTH 311 - Human Fossil Record

Units: 3 ; G.E./G.R. Area: B6

Human evolutionary history: Paleontology, comparative anatomy, and molecular systematics. The empirical evidence for human evolution.

Prerequisites: Completion of GE areas A1, A2, A3 and B4 ; and ANTH 110.

Equivalent Quarter Course: ANTH 3101.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B6 - Upper Division Science Inquiry and Quantitative Reasoning*

ANTH 312 - Primate Behavioral Ecology

Units: 3 ; G.E./G.R. Area: D4

A survey course concerned with behavior of primates, including humans. Relationships between social structure, instinct, behavioral ecology, and the environment. The relevance of the study of evolution and non-human primate behavior to an understanding of human behavior will be emphasized.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ANTH 3110.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: D4 - Upper Division Social Sciences

Anthropology: Methods

ANTH 410 - Bioarchaeology Laboratory

Units: 3

A laboratory course on the human skeleton that emphasizes identification of fragmentary material and context. Methods of identifying bone modification, pathology, and trauma are introduced.

Prerequisites: ANTH 110.

Equivalent Quarter Course: ANTH 4260.

Repeatability: Course may be repeated twice for a maximum of 9 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ANTH 411 - Human Forensic Osteology

Units: 3

Identification and interpretation of human skeletal remains. Includes significant anatomy content designed to build skills in identifying bone fragments. Analysis of identity, trauma, pathology, and bone modification emphasized, especially as relevant to reconstructing events in life and immediately surrounding death.

Strongly Recommended Preparation: Concurrent enrollment in ANTH 410.

Prerequisites: One of: ANTH 110, BIOL 270, BIOL 271.

Equivalent Quarter Course: ANTH 4280.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ANTH 420 - Archaeology Laboratory

Units: 3

General field and laboratory techniques for retrieval and analysis of data recovered from prehistoric and/or historic sites.

Prerequisites: ANTH 120.

Equivalent Quarter Course: ANTH 4240.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ANTH 421 - Field Archaeology

Units: 3

Techniques of surface survey and scientific excavation; controlled data retrieval from a variety of archaeological field situations. Aspects emphasized will depend on available opportunities.

Prerequisites: ANTH 120 or ANTH 320.

Equivalent Quarter Course: ANTH 4250.

Repeatability: Course may be repeated twice for a maximum of 9 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ANTH 430 - Field Course in Ethnography

Units: 3

Securing, recording, ordering, and analyzing of cultural data; problems of participant observation and reporting information from cultural consultants; methods of data collection.

Equivalent Quarter Course: ANTH 4310.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

Anthropology: Linguistic Anthropology

ANTH 340 - Language and Culture

Units: 3 ; G.E./G.R. Area: D4

Language as a social and cultural phenomenon. The structured nature of language, key approaches to the study of language and culture, and linguistic-anthropological research on language-related social issues.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ANTH 3800.

Possible Instructional Methods: *Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D4 - Upper Division Social Sciences*

ANTH 341 - Linguistic Diversity and Social Justice

Units: 3 ; G.E./G.R. Area: D4; Social Justice

An examination of language as a potential site of social conflict and social justice, particularly with respect to questions of "race" and ethnicity. Topics include multilingualism, regional and ethnically linked dialects, and language-based discrimination in various public and private contexts.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ANTH 3801.

Possible Instructional Methods: *Entirely On-line, Hybrid (every section of this course may be taught both online*

and on-ground).

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: D4 - Upper Division Social Sciences, Overlay - Social Justice

ANTH 342 - Language and Sexuality

Units: 3 ; G.E./G.R. Area: D4; Diversity

An anthropological exploration of the relations between language and various aspects of sexuality, with emphasis on the role of language in the construction of sexual identities in different parts of the world.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Possible Instructional Methods: *Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: D4 - Upper Division Social Sciences, Overlay - Diversity

Anthropology: Sociocultural Anthropology

ANTH 330 - Social Anthropology

Units: 3

Structural-functional approach to the comparative study of human institutions, with emphasis on changing kinship, family, and social structure in various regions of the world. Critical analysis of major ethnographic works and substantial writing required.

Equivalent Quarter Course: ANTH 3400.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ANTH 331 - Folklore

Units: 3 ; G.E./G.R. Area: D4

Introduction to and survey of oral traditions, e.g., folktales, myths, legends, proverbs, riddles, etc. methods and theories of folklore analysis and the use of folklore in studies of diffusion, social functions, world view, and religion.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ANTH 3410.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: D4 - Upper Division Social Sciences

ANTH 333 - Women in Cross-Cultural Perspective

Units: 3 ; G.E./G.R. Area: D4; Social Justice

Similarities and differences in women's experiences in various societies around the world. Questions concerning gender identity, sexuality, marriage, the family, work, power, and intersections of gender with age, class and other inequalities.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ANTH 3750.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D4 - Upper Division Social Sciences, Overlay - Social Justice*

ANTH 334 - Human Sexuality: Anthropological Perspectives

Units: 3 ; G.E./G.R. Area: D4

A cross-cultural and evolutionary study of human sexuality expanding the constricted perspectives of Western cultures, including a review of sexual practices and attitudes, gender roles in sensuality, and sexual orientation in both Western and non-Western societies.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ANTH 3745.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D4 - Upper Division Social Sciences*

ANTH 431 - Advanced Anthropological Theory

Units: 3

Seminar in history and philosophy of anthropological thought: its place among the sciences and the humanities, schools of thought and the respective contributions of eminent anthropologists.

Prerequisites: Senior Standing.

Equivalent Quarter Course: ANTH 4910.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

Art

ART 440 - Forum

Units: 1

Advanced practitioners at the intersections of art, science, and technology present and discuss their work in a dynamic and open format with students. Students are actively engaged in a conversation about current trends and paradigms in contemporary media.

Repeatability: May be repeated for credit for a maximum of 4 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 490 - Independent Study

Units: 1-3

Independent study under direction of faculty.

Prerequisites: Department consent and minimum 2.0 GPA.

Equivalent Quarter Course: ART 4900.

Repeatability: May be repeated for credit for a maximum of 12 units.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

ART 491 - BFA Critique

Units: 1

Students present and contextualize their own art and design work and describe, analyze, interpret, and evaluate the work of their peers in small, instructor-led, discussion groups to provide in-depth, constructive feedback for continuing art and design practice.

Prerequisites: Junior, senior or post-baccalaureate standing.

Repeatability: May be repeated for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 498 - Internship

Units: 1-6

Supervised work experience in which student completes academic assignments integrated with off-campus paid or volunteer activities.

Prerequisites: Department consent and minimum 2.0 GPA.

Equivalent Quarter Course: ART 3898.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

Art: History

ART 120 - Monuments of World Art

Units: 3 ; G.E./G.R. Area: C1

Selected monuments of art and visual culture from various world cultures since the ancient era.

Equivalent Quarter Course: ART 1010.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C1 - Lower Division Arts*

ART 124 - History of Animation

Units: 3 ; G.E./G.R. Area: C1

Survey of historical developments, styles, techniques, theory and criticism of animation as an art form.

Equivalent Quarter Course: ART 1081.

Possible Instructional Methods: *Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *C1 - Lower Division Arts*

ART 127 - History of Play, Games, and Interactivity

Units: 3 ; G.E./G.R. Area: C1

Students examine, analyze and contextualize play, games, and interactivity over time and across media, with emphasis on building context for their own creative work and understanding how game structure, style, genre, and interactivity impacts playfulness and fun.

Equivalent Quarter Course: ART 1085.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *C1 - Lower Division Arts*

ART 220 - Monuments of Western Art I

Units: 3 ; G.E./G.R. Area: C1

Selected monuments of Mediterranean and European art from prehistory through the Renaissance.

Working independently and in groups, students practice writing art histories, trying out multiple ways of contextualizing art in relation to changing structures of power.

Credit Restrictions: Not open for credit to students who have completed ART 3220, ART 3055, or ART 1014.

Equivalent Quarter Course: ART 1014.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *C1 - Lower Division Arts*

ART 221 - Monuments of Western Art II

Units: 3 ; G.E./G.R. Area: C1

Selected monuments of European and American art and visual culture since the Renaissance. Working independently and in groups, students practice writing art histories, trying out multiple ways of contextualizing art in relation to social and political change.

Strongly Recommended Preparation: ART 220.

Credit Restrictions: Not open for credit to students who have completed ART 3224 or ART 3225.

Equivalent Quarter Course: ART 3224.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *C1 - Lower Division Arts*

ART 225 - Art and Social Engagement

Units: 3 ; G.E./G.R. Area: C1; Social Justice

Students investigate and analyze the histories and forms of art that are socially engaged. Students explore issues of social justice, community building, and participation as they practice teamwork and experiment with creative solutions to a specific local problem.

Credit Restrictions: Not open to for credit to Art majors.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *C1 - Lower Division Arts, Overlay - Social Justice*

ART 226 - History of Graphic Design

Units: 3

Students identify, analyze, and contextualize works of graphic design history from the invention of writing through the digital era, with emphasis on building context for their own creative work and examining the cultural impacts of graphic design practice.

Strongly Recommended Preparation: ART 120.

Equivalent Quarter Course: ART 4060.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

ART 229 - Writing About Art and Design

Units: 3 ; G.E./G.R. Area: Writing II

Students develop strategies of composition and revision of writing on topics in the visual arts and design. Students practice description, analysis, evaluation, summary, persuasive writing, and professional correspondence.

Strongly Recommended Preparation: ART 120.

Prerequisites: Completion of GE area A2.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *Writing II*

ART 320 - Comparative World Art I

Units: 3 ; G.E./G.R. Area: C4

Students research selected world art and cultures comparatively through team and independent projects. Students will practice close reading and evidence-based writing about visual and material culture objects and develop sensitivity for specific contexts of transcultural exchanges. Repeatable when topic varies.

Strongly Recommended Preparation: ART 120.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ART 3010.

Repeatability: May be repeated once for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities*

ART 323 - Modern Media, Art, and Culture I

Units: 3

Technological and stylistic developments of media and art, from the 18th century rise of the European public sphere to the beginnings of globalization in the late 20th century. Evidence-based writing about various cultures during modernity.

Strongly Recommended Preparation: ART 120.

Equivalent Quarter Course: ART 3035.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

ART 325 - Race and Representation in American Art

Units: 3 ; G.E./G.R. Area: C4; Diversity

The construction and representation of race across American art and visual culture from colonial encounter to contemporary movement politics, attending to how power functions through visual images to imbed ideas about identification in subcultural communities and dominant culture.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ART 3040.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities, Overlay - Diversity*

ART 326 - Contemporary Visual Studies I

Units: 3

Investigation of how art and visual culture since 1989 have engaged with politics, performativity, materiality, participation, and/or mediation.

Strongly Recommended Preparation: ART 120.

Equivalent Quarter Course: ART 4071.

Repeatability: May repeat once for credit for a maximum of 6 units when topic varies.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

ART 327 - Cinema Art Studies

Units: 3 ; G.E./G.R. Area: C4

Examine, analyze and contextualize works of cinema art from the invention of cinema through the current era, with emphasis on building context for their own creative work and understanding how film structure, style and genre impacts message.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ART 4005 (x-listed w/COMM 4005).

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities*

ART 420 - Comparative World Art II

Units: 3 ; G.E./G.R. Area: C4

Through close analysis of material and visual culture and its supporting texts, students research the dynamics of cultural exchange for one period, culture or theme. Gain familiarity with research methodologies, including archaeological, anthropological, and postcolonial.

Strongly Recommended Preparation: ART 320.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ART 4020.

Repeatability: May be repeated once for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: C4 - Upper Division Arts or Humanities

ART 423 - Modern Media, Art and Culture II

Units: 3 ; G.E./G.R. Area: C4

Students produce research on one aspect of how modern media and art engaged with politics, identity, and everyday life, through close reading and evidence-based writing. They gain familiarity with research methods and Marxist and feminist methodologies. Repeatable when topic varies.

Strongly Recommended Preparation: ART 323.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ART 3400.

Repeatability: May be repeated once for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: C4 - Upper Division Arts or Humanities

ART 426 - Contemporary Visual Studies II

Units: 3 ; G.E./G.R. Area: C4

Students engage in focused, thematic study of contemporary art and visual cultures, through close reading, evidence-based writing, and in-depth research. They gain familiarity with research methods and contemporary methodologies, including sociological, post-structuralist, and new materialist approaches. Repeatable when topic varies.

Strongly Recommended Preparation: ART 326.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ART 4070.

Repeatability: May be repeated once for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: C4 - Upper Division Arts or Humanities

ART 493G - Art History and Visual Studies Senior Project

Units: 3

Students practice advanced research methods to develop and produce a sophisticated piece of art historical and/or theoretical writing. Students explore professional opportunities related to art history and visual studies and produce career materials.

Prerequisites: Department consent.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Art: Studio

ART 100 - Fundamentals of Drawing

Units: 3 ; G.E./G.R. Area: C1

Introduction to principles, elements, and practices of drawing, employing a wide range of subject matter and drawing media. Focus on perceptually based drawing, observational skills, technical abilities, and creative responses to materials and subject matter.

Equivalent Quarter Course: ART 1113.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *C1 - Lower Division Arts*

ART 101 - Photography I

Units: 3 ; G.E./G.R. Area: C1

Introduction to the processes, principles, and tools of photography. Topics include the development of technical and aesthetic skills, elements of design and composition, camera technology, materials and equipment, and contemporary trends in photography.

Equivalent Quarter Course: ART 2630.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *C1 - Lower Division Arts*

ART 102 - 2D Processes

Units: 3 ; G.E./G.R. Area: C1

Introduction to two-dimensional art, design and composition, including basic principles and elements of line, shape, texture, value, color and spatial illusion in traditional and digital media. Students practice ideation and critical thinking processes used to design, analyze, and produce imagery.

Equivalent Quarter Course: ART 2810.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *C1 - Lower Division Arts*

ART 103 - 3D Processes

Units: 3 ; G.E./G.R. Area: C1

Introduction to three-dimensional art, design and spatial composition, including the elements and

organizing principles of design applied to space and form in traditional and digital media. Students design, analyze, and produce objects and sculpture through studio projects and written assignments.

Strongly Recommended Preparation: ART 102.

Equivalent Quarter Course: ART 1116.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *C1 - Lower Division Arts*

ART 104 - 4D Processes

Units: 3 ; G.E./G.R. Area: C1

Introduction to time based art and design using traditional and digital media. Students design, analyze, and produce time based artworks and experiences, through presentations, studio projects, problem solving, and written assignments

Equivalent Quarter Course: ART 1020.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *C1 - Lower Division Arts*

ART 111 - Sculpture I

Units: 3 ; G.E./G.R. Area: C1

Introduction to three-dimensional sculptural principles, techniques, and concepts utilizing a wide range of materials and practices. Various sculpture methods are practiced with attention to creative self-expression and historical context.

Equivalent Quarter Course: ART 1116.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *C1 - Lower Division Arts*

ART 115 - Ceramics I

Units: 3 ; G.E./G.R. Area: C1

Introduction to ceramics materials, concepts, and processes including basic design principles, creative development, hand-building, throwing, glaze techniques, firing and ceramic terminology. Course covers aesthetics and creative development of clay objects examining historical, contemporary, and personal modes of expression across cultures.

Strongly Recommended Preparation: ART 103.

Equivalent Quarter Course: ART 1112.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: C1 - Lower Division Arts

ART 152 - Web Design I: Foundations

Units: 3

Students learn terminology and skills of graphic surface and interface design. Course covers graphics, layout, file- and version-management, wire-framing, prototyping, images, visual fundamentals and principles of interaction design to create web based interfaces and web sites.

Prerequisites: ART 100 and ART 102.

Equivalent Quarter Course: ART 2830.

Possible Instructional Methods: Entirely On-ground.

Grading: A-F grading only.

ART 172 - Painting I

Units: 3 ; G.E./G.R. Area: C1

Basic principles of painting including: color interaction and mixing, painting from observation and invention, various techniques, and how composition relates to personal response, subject matter and content. Demonstrations and digital presentations accompany projects.

Equivalent Quarter Course: ART 1114.

Possible Instructional Methods: Entirely On-ground.

Grading: A-F grading only.

G.E./G.R. Area Satisfied: C1 - Lower Division Arts

ART 181 - Introduction to Transdisciplinary Art and Design

Units: 3 ; G.E./G.R. Area: C1

Theory and practice of contemporary transdisciplinary visual arts research to permit new pathways for learning between, across, and beyond traditional disciplines and majors. Explorations into how two or more disciplines can be used to creatively answer art and design challenges.

Possible Instructional Methods: Entirely On-ground.

Grading: A-F grading only.

G.E./G.R. Area Satisfied: C1 - Lower Division Arts

ART 211 - Sculpture II

Units: 3 ; G.E./G.R. Area: C1

Deep engagement with sculptural principles, techniques, and concepts. Students focus on in-depth projects in a chosen medium, developing their skills at three-dimensional art making.

Strongly Recommended Preparation: ART 100, ART 101, ART 102, ART 103.

Prerequisites: ART 111.

Equivalent Quarter Course: ART 3316.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *C1 - Lower Division Arts*

ART 215 - Ceramics II

Units: 3 ; G.E./G.R. Area: C1

Developing expertise with core techniques and adding skills with new materials, concepts, and processes including complex hand-building, wheel throwing, a variety of glaze techniques, and firings. Exploration, analysis and comparison of clay works both personal and across cultures.

Strongly Recommended Preparation: ART 102, ART 103, ART 104.

Prerequisites: ART 115.

Equivalent Quarter Course: ART 3512.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *C1 - Lower Division Arts*

ART 230 - Graphic Arts

Units: 3

Traditional graphic arts practices, analog and digital materials, and hand and computer based methods are used to explore creative output beyond computers while examining the relationship of historical graphic arts to current design processes, technology and equipment.

Prerequisites: ART 101 and ART 102.

Co-requisites: ART 226.

Equivalent Quarter Course: ART 2805.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 240 - Photography II

Units: 3

Advanced camera and digital darkroom techniques, including preparing images for the web and large format printing. Photography as a visual language, photographic color theory, and the aesthetics of photographic images.

Prerequisites: ART 101.

Equivalent Quarter Course: ART 3600.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 241 - 4D Project Development and Preproduction

Units: 3

Project development and pre-production processes for video, animation, and other time based media such as digital games. Topics covered include proposals (treatments, budgets, marketing/distribution, locations, and personnel), scriptwriting, storyboarding, copyright and legal issues.

Prerequisites: All of: ART 100, ART 101, ART 102, ART 103.

Co-requisites: ART 104.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 242 - Audio Production for Video and Animation

Units: 3 ; G.E./G.R. Area: C1

The theory and practice of audio production for video, animation, and other applications. Students will learn the fundamentals of sound design and aesthetics, microphone use, and digital recording equipment. Hands on experience recording, editing, mixing and mastering audio.

Co-requisites: ART 104.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *C1 - Lower Division Arts*

ART 243 - Video I

Units: 3

Production of introductory to intermediate level digital film and video with emphasis on storytelling and creative communication. Analysis and application of film aesthetics through filmmaking assignments.

Prerequisites: All of: ART 100, ART 101, ART 102, ART 103, ART 104.

Co-requisites: ART 241.

Equivalent Quarter Course: ART 3820.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 244 - Animation I

Units: 3

Production of introductory to intermediate level computer-based animation with emphasis on drawn and stop-motion techniques used for storytelling and creative communication. Analyze and apply animation principles in assignments and projects using both digital and non-digital media.

Prerequisites: All of: ART 100, ART 101, ART 102, ART 103, ART 104.

Co-requisites: ART 241.

Equivalent Quarter Course: ART 3800.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 245 - Motion Graphics I

Units: 3

Introductory to intermediate level computer-based motion graphics. Analysis and application of animation and design principles in assignments and projects.

Prerequisites: All of: ART 100, ART 101, ART 102, ART 103, ART 104.

Co-requisites: ART 241.

Equivalent Quarter Course: ART 3825.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 246 - 3D Modeling and Animation I

Units: 3

Intermediate level 3D models used in 3D digital animation for storytelling and creative communication. Modeling techniques & animation principles using both digital and non-digital media.

Prerequisites: All of: ART 100, ART 101, ART 102, ART 103, ART 104.

Co-requisites: ART 241.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 247 - Landscape Photography

Units: 3

Theory, special techniques and the aesthetics of landscape photography, Learn from the work of historical to contemporary landscape photographers, to produce high quality landscape photographs. Field trips will be required.

Prerequisites: ART 101.

Equivalent Quarter Course: ART 3654.

Repeatability: Course may be repeated once for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 251 - Interaction and Experience Design Foundations

Units: 3

Principles, practices and design of interactions between people, objects, and systems. Best practices for the application of interaction design principles and the tools and techniques to create and test meaningful

and effective user interfaces and user experiences.

Strongly Recommended Preparation: ART 103 and ART 104.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 255 - Game Design I

Units: 3 ; G.E./G.R. Area: C1

Students explore, analyze and compare game designs across multiple genres such as sports, game shows, games of chance, board and video games. Students then design, develop and test their own original analog games.

Strongly Recommended Preparation: ART 251.

Equivalent Quarter Course: ART 2851.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *C1 - Lower Division Arts*

ART 259 - Interaction Design Studio I: Tools for Designers

Units: 3

Introduction to the use of software and authoring tools to develop meaningful screen-based interactivity for use in web pages, applications, and visualizations. Students use digital tools to develop high fidelity interactive prototypes and experiences for the screen.

Strongly Recommended Preparation: ART 152 and ART 251.

Equivalent Quarter Course: ART 4200.

Repeatability: May be repeated once for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

ART 260 - Introduction to Illustration

Units: 3

An introduction to the field and practice of Illustration, historical and contemporary. Focus on the various areas of illustration practice such as editorial, narrative, character, etc.

Prerequisites: All of: ART 100, ART 101, ART 102, ART 120.

Equivalent Quarter Course: ART 3145.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 270 - Drawing II

Units: 3

Basic drawing skills, using a wide range of drawing media towards a personal aesthetic. Discussions of the social and cultural contexts underlying historical and contemporary drawing. Descriptive, subjective and conceptual projects.

Prerequisites: ART 100.

Equivalent Quarter Course: ART 3141.

Repeatability: Course may be repeated once for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 272 - Painting II

Units: 3

Varied approaches to painting through class projects. Contemporary uses of the media, technical demonstrations and critiques. Focus on developing an open, personal process and body of work.

Strongly Recommended Preparation: Art 100.

Prerequisites: ART 172.

Equivalent Quarter Course: ART 3212.

Repeatability: Course may be repeated once for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 274 - Figure Drawing I

Units: 3

Drawing the human figure from observation, using different media and techniques descriptively and interpretively. Basic anatomy, proportions and composition. Highlight on figure drawing's relevance in traditional and contemporary art.

Prerequisites: ART 100.

Equivalent Quarter Course: ART 3142.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 278 - Bookmaking I

Units: 3 ; G.E./G.R. Area: C1

Create, examine and analyze book art through experience with the basic materials, equipment, and processes of bookmaking, including various bindings and techniques for image content. Skill building exercises, viewing of book art, concept development, and complete book projects.

Equivalent Quarter Course: ART 1121.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *C1 - Lower Division Arts*

ART 279 - Printmaking I

Units: 3 ; G.E./G.R. Area: C1

Create, examine and analyze graphic art through experience with the basic materials, equipment, and processes of printmaking, including relief (linocut and woodcut), intaglio (etching), monotype, and stencil.

Equivalent Quarter Course: ART 1115.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *C1 - Lower Division Arts*

ART 310 - 3D Modeling and Fabrication

Units: 3

Design and fabrication of 3D objects and artworks, from creation with digital solid modeling software to realization through 3D Printing, CNC Mills and associated technologies. Digital sculpting and engineering approaches to developing models for artistic and design goals.

Prerequisites: ART 246.

Repeatability: Course may be repeated for credit for a maximum of 9 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 311 - Sculpture III

Units: 3

Advanced three-dimensional art making with an emphasis on self-directed investigation and development of a personal style and coherent body of work.

Prerequisites: ART 211.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 315 - Ceramics III

Units: 3

Advanced work in art and design with clay. Integrate new techniques while building mastery over the material. Develop a personal portfolio.

Prerequisites: ART 215.

Equivalent Quarter Course: ART 3513.

Repeatability: Course may be repeated once for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 330 - Typography I

Units: 3

History, theory and contemporary practices of typography in the practice of design. Topics cover typographic terminology, conventions, typesetting fundamentals, grid systems, type as visual/verbal expressive communication and development of unique alphabet letterforms.

Prerequisites: ART 226.

Co-requisites: ART 331.

Equivalent Quarter Course: ART 3815.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 331 - Design Concepts and Narratives

Units: 3

Development of conceptual design solutions to communicate ideas, information and narrative in response to a creative brief. Ideas are visualized using design elements and principles and refined through design thinking, iteration and problem solving processes.

Prerequisites: ART 226.

Co-requisites: ART 330.

Equivalent Quarter Course: ART 3810.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 332 - Design for Production

Units: 3

Industry standard publication and digital media practices, materials and finishes, production terminologies and print based assembly and publishing software for pre-press, production and printing technology artwork requirements for graphic design reproduction.

Prerequisites: ART 226.

Co-requisites: ART 335.

Equivalent Quarter Course: ART 3860.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 335 - Design Strategy and Collaborations

Units: 3

Students apply graphic design principles and design thinking (ideation, research, prototyping) to problem solve more complex and comprehensive design projects. Emphasis is placed on conceptual thinking, formal experimentation and creative collaborations.

Prerequisites: ART 330 and ART 331.

Co-requisites: ART 332.

Equivalent Quarter Course: ART 3855.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 336 - Information Design

Units: 3

Explore ways of making complex data, events and processes understandable to viewers through the creative use of animated visualizations, diagrams, maps, timeline, charts and interactive graphics. Considerations of information clarity, readability and editorial expression are covered.

Prerequisites: All of: ART 152, ART 330, ART 331.

Co-requisites: ART 430.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 340A - Creative Photography I

Units: 3

Photography as fine art and the creative use of photography. Merging images and ideas, students will explore and produce expressive and creative fine art imagery.

Prerequisites: ART 240.

Equivalent Quarter Course: ART 4645.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 340B - Creative Photography II

Units: 3

Creative use of photography as a fine art form. Merging images and fine art theory, students will produce a creative fine art portfolio and participate in an exhibition.

Prerequisites: ART 340A.

Equivalent Quarter Course: ART 4645.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 340C - Creative Photography III

Units: 3

Students will work individually on their own fine art projects, developing their own artistic vision throughout the semester ending with a portfolio of new fine art images and participating in an exhibition.

Prerequisites: ART 340B.

Repeatability: Course may be repeated once for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 341 - Advanced Photography and Social Justice

Units: 3 ; G.E./G.R. Area: Social Justice

Photography since its invention has been used to address social injustice. In this class students will learn advanced photography, visual communication, documentary and fine art skills, which will be used in social justice projects. *Lecture Units: 2; Activity Units: 1*

Prerequisites: ART 101.

Repeatability: Course may be repeated once for credit for a maximum of 6 units.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *Overlay - Social Justice*

ART 343 - Video II

Units: 3

Production of intermediate to advanced video with emphasis on storytelling and creative communication. Analyze and apply cinematic aesthetic principles in assignments and projects.

Strongly Recommended Preparation: ART 327.

Prerequisites: ART 243.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 344 - Animation II

Units: 3

Production of intermediate to advanced level computer-based animation with emphasis on drawn and stop-motion techniques used for storytelling and creative communication. Analyze and apply animation principles in assignments and projects using both digital and non-digital media.

Strongly Recommended Preparation: ART 327.

Prerequisites: ART 244.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 345 - Motion Graphics II

Units: 3

Production of intermediate to advanced level motion graphics animations with emphasis on creative communication. Analyze and apply motion graphics aesthetic principles in assignments and projects.

Strongly Recommended Preparation: ART 327.

Prerequisites: ART 245.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 346 - 3D Modeling and Animation II

Units: 3

Production of intermediate level 3D models of characters and scenes for use in 3D digital animation used for storytelling and creative communication. Analyze and apply camera, lighting, and modeling techniques with animation principles in assignments and projects.

Strongly Recommended Preparation: ART 323.

Prerequisites: ART 241 and ART 246.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 348A - Studio Lighting and Product Photography

Units: 3

Studio strobes, basic lighting principles, and the use of digital cameras and view cameras in the creation of commercial-quality product photography for print and the web. Field trips may be required.

Prerequisites: Art 240.

Equivalent Quarter Course: ART 3670.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 348B - Advanced Studio Lighting and Product Photography

Units: 3

Advanced training with studio strobes, lighting principles, and the use of digital cameras and view cameras in the creation of commercial-quality product photography for print and the web. Field trips may be required.

Prerequisites: ART 348A.

Equivalent Quarter Course: ART 3671.

Repeatability: Course may be repeated once for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 349A - Portrait Photography

Units: 3

Studio lighting, digital imaging and camera techniques for professional portraiture. Students using a DSLR camera will learn the fundamentals of both studio and natural light portraiture with a variety of lighting equipment and professional techniques.

Prerequisites: ART 240.

Equivalent Quarter Course: ART 3660.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 349B - Advanced Portrait Photography

Units: 3

Studio lighting, digital imaging and camera techniques for professional portraiture. Students will learn a variety of advanced portrait technique in order to produce professional quality images.

Prerequisites: ART 349A.

Equivalent Quarter Course: ART 3661.

Repeatability: Course may be repeated once for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 351 - User Experience Theory and Design

Units: 3

Learn to design and validate meaningful experiences and understand the theories behind them. Generate design ideas and learn rapid prototyping for feedback from teammates, clients, and users. Course also covers principles of visual design, perception, and cognition that inform effective interaction design.

Prerequisites: ART 251 and ART 259.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 352 - Web Design II: Screen Interactions

Units: 3

Intermediate level web Designers and Fine Artists explore advanced interactivity for the Web. Course covers audio, video, animation, dynamic data, user-centered design, HCI and accessibility. Students create and publish websites and web apps solo and in teams.

Prerequisites: ART 152 and ART 251.

Equivalent Quarter Course: ART 3870.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 355 - Game Design II

Units: 3

Combining game design art, concepts, methods and authoring tools to create a variety of games. Students create art, use mechanics, build prototypes, design, and user test original games, individually and in teams using a range of authoring tools.

Prerequisites: ART 226 and ART 259.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 356 - Interaction Design Studio II : Prototyping the Internet of Things

Units: 3

Intermediate level interaction Designers and Fine Artists apply UX and Ixd skills to objects and spaces and solve problems using prototyping screen-based interaction, touch displays, and embedded sensors. Covers basic information on project development, wire-framing, prototyping, user-testing, sensor technology and electronics.

Prerequisites: All of: ART 101, ART 104, ART 152, ART 251, ART 255, ART 259.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 357 - Interaction Design Studio III : Interactive Immersive Experiences

Units: 3

Intermediate level interaction Designers and Fine Artists use a range of techniques, software and tools including sensors, computer-vision, physical computing and electronics to create immersive experiences on multiple screens, or in Virtual, Augmented- and Mixed-Reality, video-projection, touch-screen interactions.

Prerequisites: ART 226 or 255, and ART 356.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 361 - Color and Concept

Units: 3

Exploration of the use of color focusing on physical, perceptual, historical and cultural aspects of color. Hands on assignments will apply color systems, illusionary color, emotional, graphic and cultural symbolism. Readings, art/design lectures and field trips augment the course.

Equivalent Quarter Course: ART 3810.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 362 - Illustrating Dynamic Forms

Units: 3

Focusing on traditional tools, students will increase skills of rendering characters, creatures and figures in active poses. Clothing, drapery, lighting will be subjects as well through the use of models and photos. Tools include ink, graphite, colored pencil and watercolor.

Prerequisites: ART 260.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 363 - Narrative Illustration

Units: 3

Surveys techniques in sequential imagery. Digital tools explore characters and narrative styles and practices such as children's books, comic books and graphic novels. Focus on digital and vector painting processes.

Prerequisites: ART 361.

Equivalent Quarter Course: ART 2146.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 364 - Advanced Illustration

Units: 3

Creation of illustrations focusing on the development of an individual style through professionally modeled assignment briefs. Students will practice editing and revising as well as development of individual communication on specific topics including portraits and environmental matte painting.

Prerequisites: ART 361 and ART 362.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 370 - Drawing III

Units: 3

Continued study using varied drawing media and approaches to address contemporary drawing issues. Increased emphasis on individual expression, increased skill analyzing and interpreting original artwork in verbal or written formats, deeper understanding of contemporary and historical art concepts.

Prerequisites: ART 270.

Equivalent Quarter Course: ART 4143.

Repeatability: Course may be repeated twice for credit for a maximum of 9 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 378 - Bookmaking II

Units: 3

Students will create, examine and analyze book art through experience and research with the materials, equipment, and more advanced processes of bookmaking. Emphasizing self-directed investigation and development of concepts, content, and structures that lead to complete books.

Prerequisites: ART 278.

Equivalent Quarter Course: ART 3121.

Repeatability: Course may be repeated twice for credit for a maximum of 9 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 379 - Printmaking II

Units: 3

Create, examine and analyze graphic art through experience and research with the materials, equipment, and more advanced processes of printmaking. Emphasis on self-directed investigation and development of concepts and content with chosen techniques that lead to complete print editions.

Prerequisites: ART 279.

Equivalent Quarter Course: ART 4857.

Repeatability: Course may be repeated twice for credit for a maximum of 9 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 418 - Advanced 3D Practice

Units: 3

Create, document, examine and analyze spatial art and design through experience and research with the materials, equipment, and more advanced processes. Emphasis on self-directed investigation and development of concepts and content with chosen media that show mastery in complete 3D productions.

Prerequisites: Two courses from: ART 310, ART 311, ART 315, ART 346.

Repeatability: Course may be repeated twice for credit for a maximum of 9 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 430 - Typography for Print and Interactive Publications

Units: 3

Emerging relationships between typography, publication design and technology. Content covers the expressive elements and forms of typography for print and online publications, user interactivity, page and screen architecture and the influence of audience, culture and history.

Prerequisites: All of: ART 152, ART 330, ART 331.

Co-requisites: ART 336.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 448 - Advanced 4D Projects

Units: 3

Create, document, examine and analyze time-based art through experience and research with the materials, equipment, and more advanced processes. Emphasis on self-directed investigation and development of concepts and content with chosen media that show mastery in complete 4D productions.

Prerequisites: Two courses from: ART 343, ART 344, ART 345, ART 346.

Equivalent Quarter Course: ART 4220

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 449 - Select Topics in Video Animation

Units: 3

Research, analyze, create and develop concepts, methods and content from an area of video/animation outside of the established courses. Topics may vary.

Prerequisites: ART 241.

Repeatability: Course may be repeated twice for credit for a maximum of 9 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 452 - Web Design III: Design Evolution

Units: 3

Advanced level web Designers and Fine Artists build dynamic webapps, research and design for

emerging technologies, such as to the Web of Things and respond to forecasting challenges, theory and applications of human-computer interaction for ubiquitous computing of the future.

Prerequisites: ART 351 and ART 352.

Repeatability: Course may be repeated once for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 455 - Game Development Team Project

Units: 3

Teams design and plan a complex interactive and playable media. Students interactively create a complete game while exploring the many roles on a creative team such as animator, interaction, graphic, audio, and level designer.

Prerequisites: ART 355.

Equivalent Quarter Course: ART 3851.

Repeatability: Course may be repeated once for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 457 - Interaction Design Studio IV : Speculative Interaction Research Lab

Units: 3

Advanced level interaction Designers and Fine Artists use forecasting, critical making, and design research to explore emerging technology, Design trends and Fine Art practices, students develop experimental and speculative prototypes of interaction for ubiquitous computing of the future.

Prerequisites: ART 357.

Repeatability: Course may be repeated three times for credit for a maximum of 12 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 472 - Painting III

Units: 3

Continued study in studio painting using varied media and stylistic approaches. Emphasis on developing individual expression and strong work habits to sustain continued growth. Develop fluency in verbal/written analysis of artwork showing an understanding of contemporary and historical art concepts.

Note: please see Errata chapter of this catalog for changes to this content.

Prerequisites: All of: ART 100, ART 172, ART 272.

Equivalent Quarter Course: ART 3213.

Repeatability: Course may be repeated twice for credit for a maximum of 9 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 474 - Figure Drawing II

Units: 3

Advanced practice of drawing the figure, including further study of anatomy using skeletons and muscle charts, as well as contemporary approaches to figuration, color and non-traditional techniques and media.

Prerequisites: ART 274.

Repeatability: Course may be repeated once for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 481 - Transdisciplinary Art and Design Seminar

Units: 3

Contemporary topics in transdisciplinary art and design with an emphasis on how students can frame their projects in terms of larger cultural, political, and technological shifts by critically reflecting on their own creative processes and work.

Prerequisites: ART 181.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 485 - Transdisciplinary Art Laboratory

Units: 3

Research and development laboratory featuring two to three unique projects developed by faculty, external partners, or visiting designers. Students work in small teams and complete one project per lab in a pre-assigned team.

Prerequisites: ART 181.

Repeatability: Course may be repeated twice for credit for a maximum of 9 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 493A - Illustration Senior Project

Units: 3

Students produce a body of Illustration work reflecting mastery of creative, design, and printing skills and processes that meet professional standards. Students develop a professional portfolio and career documents, and prepare to transition to postgraduate life.

Prerequisites: B.F.A. major and senior standing.
Equivalent Quarter Course: ART 4230.
Possible Instructional Methods: *Entirely On-ground.*
Grading: A-F grading only.

ART 493B - Interaction and Game Design Senior Project

Units: 3

Students produce an interaction design project, complex website, or game reflecting mastery of creative, design, coding and development skills and processes that meet professional standards. Students develop a professional portfolio and career documents, and prepare to transition to postgraduate life.

Prerequisites: B.F.A. major, senior standing, ART 351 and ART 352.
Equivalent Quarter Course: ART 4220.
Possible Instructional Methods: *Entirely On-ground.*
Grading: A-F grading only.

ART 493C - Photography Senior Project

Units: 3

Students produce a body of photographic work reflecting mastery of creative, design, and printing skills and processes that meet professional standards. Students develop a professional portfolio and career documents, and prepare to transition to postgraduate life.

Prerequisites: ART 340C and ART 349A.
Equivalent Quarter Course: ART 4745.
Possible Instructional Methods: *Entirely On-ground.*
Grading: A-F grading only.

ART 493D - 3D Art & Design Senior Project

Units: 3

Students produce a capstone project reflecting mastery of their respective concentration. Students develop a professional portfolio and career documents, and prepare to transition to postgraduate life.

Prerequisites: B.F.A. major, senior standing and ART 418.
Equivalent Quarter Course: ART 4720 and ART 4730.
Possible Instructional Methods: *Entirely On-ground.*
Grading: A-F grading only.

ART 493E - Transdisciplinary Senior Project

Units: 3

Students produce an art/design project reflecting mastery of conceptual and cultural theories and practices of transdisciplinary and creative, design, and development skills and processes that meet professional

standards. Students transition to postgraduate life, developing a portfolio and career documents.

Prerequisites: ART 448.

Equivalent Quarter Course: ART 4220.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 493F - Video Animation Senior Project

Units: 3

Students will create, refine, and document a capstone time-based art project which requires research and development of concepts, methods and content. The comprehensive project with chosen media will show mastery in 4D production. Students prepare for transition from undergraduate life.

Prerequisites: All of: ART 351, ART 352, B.F.A. major, senior standing.

Equivalent Quarter Course: ART 4220.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 493H - Fine Art Practice Senior Project

Units: 3

Students produce a body of fine art work reflecting mastery of materials, processes, and creative production skills that meet professional standards. Students develop a professional portfolio and career documents, and prepare to transition to postgraduate life.

Prerequisites: B.A. Art major or B.F.A. major, and senior standing.

Equivalent Quarter Course: ART 4720 and ART 4730.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 493I - Graphic Design Senior Project

Units: 3

Students will formulate conceptually rich, multi-faceted portfolio quality work that showcases their ability to problem solve, innovate, communicate and achieve professional standards of work in print and electronic media and transition to postgraduate practice.

Prerequisites: All of: ART 323, ART 326, ART 332.

Equivalent Quarter Course: ART 4230.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ART 496 - Special Topics

Units: 3

Critical trends and topics examining a variety of specialized, timely, or cutting-edge areas in art and design practice. Offerings will vary from term to term, and are open to all Art majors.

Prerequisites: All of: ART 100, ART 101, ART 102, ART 103, ART 104; and, either ART 120 or ART 220.

Repeatability: Course may be repeated for credit for a maximum of 12 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Biological Science

BIOL 100 - Biology in the Real World

Units: 4 ; G.E./G.R. Area: B2, B3

Key concepts in biology presented in thematic Units:, emphasizing connections to everyday life and addressing real-world issues. Builds foundational knowledge and skills in biology for students pursuing or interested in a science major or liberal studies major (STEM teaching pathway). *Lecture Units: 3; Lab Units: 1*

Credit Restrictions: Not open to students with credit for BIOL 101.

Equivalent Quarter Course: BIOL 1000.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B2 - Lower Division Life Sciences, B3 - Lower Division Laboratory Activity*

BIOL 101 - Introduction to Biology

Units: 3 ; G.E./G.R. Area: B2

Plants, animals, and microorganisms and the modern biological concepts that apply to their structure and function on cellular, organismal, population, and ecosystem levels. Special emphasis on humans and their relationships with other living things.

Strongly Recommended Preparation: Concurrent enrollment in BIOL 102.

Credit Restrictions: Not for biology major or minor credit; not open to students with credit for BIOL 100.

Equivalent Quarter Course: BIOL 1001.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B2 - Lower Division Life Sciences*

BIOL 102 - Introduction to Biology Lab

Units: 1 ; G.E./G.R. Area: B3

Laboratory exposure to biological phenomena including microscope activities of cells, osmosis, diffusion, human nutrition, human genetics, plant growth, classification of plants and animals, fertilization and

development, natural selection simulation, field ecology and ecosystems.

Co-requisites: BIOL 101.

Equivalent Quarter Course: BIOL 1002.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B3 - Lower Division Laboratory Activity*

BIOL 140A - Principles of Cell and Molecular Biology

Units: 5 ; G.E./G.R. Area: B2, B3

Introduction to molecular and cellular biology with emphasis on the integration of structure and function in the living cell (Prokaryotes and Eukaryotes) as a biological system, cellular aspects of inheritance and basic principles of evolution. *Lecture Units: 3; Lab Units: 1; Activity Units: 1*

Equivalent Quarter Course: BIOL 1401 and BIOL 1402 both completed with grade C- or better.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *B2 - Lower Division Life Sciences, B3 - Lower Division Laboratory Activity*

BIOL 140B - Principles of Organismal Biology

Units: 5

Introduction to the study of the diversity of life with emphasis on the adaptation of organisms to different environments and their ecological interactions with emphasis on the comparative understanding of eukaryotic life. *Lecture Units: 3; Lab Units: 1; Activity Units: 1*

Prerequisites: BIOL 140A with grade C- or better.

Equivalent Quarter Course: BIOL 1402 and BIOL 1403 both completed with grade C- or better.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

BIOL 230 - Introduction to Clinical Microbiology

Units: 4 ; G.E./G.R. Area: B2, B3

Introduction to beneficial and harmful microorganisms that interact with humans. Basic laboratory practice in handling microorganisms, including techniques of identification and culture. Designed for health sciences and nursing majors. *Lecture Units: 3; Lab Units: 1*

Credit Restrictions: Not for BIOL B.S. or B.A. degree credit. Not open to students with credit for BIOL 330.

Equivalent Quarter Course: BIOL 2025.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *B2 - Lower Division Life Sciences, B3 - Lower Division Laboratory Activity*

BIOL 270 - Human Anatomy & Physiology I

Units: 4 ; G.E./G.R. Area: B2, B3

An integrated approach to essential concepts of human physiology and anatomy. Analysis of tissues, and of the skeletal, muscular, nervous, cardiovascular and respiratory systems. *Lecture Units: 3; Lab Units: 1*

Strongly Recommended Preparation: High school biology and chemistry, or BIOL 101 and BIOL 102; CHEM 100.

Credit Restrictions: Not for BIOL B.S. or B.A. degree credit.

Equivalent Quarter Course: BIOL 2010 completed with grade C- or better.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *B2 - Lower Division Life Sciences, B3 - Lower Division Laboratory Activity*

BIOL 271 - Human Anatomy & Physiology II

Units: 4

An integrated analysis of human physiology and anatomy of the integumentary, autonomic and central nervous, endocrine, urinary and reproductive systems and of the blood and special senses. Coverage of histology, metabolism, and thermoregulation. *Lecture Units: 3; Lab Units: 1*

Prerequisites: BIOL 270 with grade C- or better.

Credit Restrictions: Not for BIOL B.S. or B.A. degree credit.

Equivalent Quarter Course: BIOL 2020 completed with grade C- or better.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 301 - Biology Connections

Units: 3

Connections between biology and other sciences with real-world applications. Focuses on the Next Gen Science Standards to prepare pre- and in-service teachers for the CSET General Science Subtest II (life science section) to obtain a Foundational Science Credential.

Prerequisites: BIOL 100 or BIOL 101.

Credit Restrictions: Not for biology major or minor credit.

Equivalent Quarter Course: BIOL 3011.

Possible Instructional Methods: *Entirely On-line.*

Grading: A-F or CR/NC (student choice).

BIOL 302 - Biology Connections Laboratory

Units: 1

Laboratory providing connections between biology and other sciences with real-world applications. Focuses on the Next Gen Science Standards to prepare pre- and in-service teachers for the CSET General

Science Subtest II (life science section) to obtain a Foundational Science Credential.

Strongly Recommended Preparation: BIOL 301 (concurrent or completion).

Prerequisites: BIOL 100 or BIOL 101.

Credit Restrictions: Not for Biology major or minor credit.

Equivalent Quarter Course: BIOL 3012.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

BIOL 310 - Genetic Analysis I

Units: 4

A comprehensive analysis of gene structure, function, and inheritance incorporating classical and molecular-based approaches. Emphasis on the experimental evidence that has led to our current understanding of the nature of the gene, drawing on examples from bacteria to humans. *Lecture Units: 3; Activity Units: 1*

Prerequisites: BIOL 140A.

Equivalent Quarter Course: BIOL 3121.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

BIOL 315 - Marine Biology

Units: 4

The general biology of marine organisms with emphasis on the ecology of local marine communities, including field methods. Exploration of diversity of marine life and how the sea affects humanity. *Lecture Units: 2; Lab Units: 2*

Prerequisites: BIOL 140B.

Equivalent Quarter Course: BIOL 3215.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

BIOL 320 - Evolutionary Biology

Units: 3

A survey of the primary mechanisms underlying the evolution of natural populations. Topics may also include: principle methods of evolutionary analysis, history of life on Earth and a discussion of Evolution as it applies to the welfare of modern humans.

Prerequisites: BIOL 310.

Equivalent Quarter Course: BIOL 3130.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 330 - General Microbiology

Units: 5

Biology of major groups of microorganisms, including bacteria, fungi, protozoans, and viruses with emphasis on the fundamentals of microbial reproduction, growth and control. *Lecture Units: 3; Lab Units: 2*

Prerequisites: BIOL 140B.

Co-requisites: CHEM 112.

Equivalent Quarter Course: BIOL 3405.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 333 - Humans and Sex

Units: 3 ; G.E./G.R. Area: B6; Diversity

The genetic, hormonal, and behavioral basis of sexuality in humans from conception to adulthood; developmental and behavioral variation; enhancement and suppression of fertility; genetic screening.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Credit Restrictions: Not for Biology major credit.

Equivalent Quarter Course: BIOL 3065.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B6- Upper Division Science Inquiry and Quantitative Reasoning, Overlay - Diversity*

BIOL 334 - Humans and the Living Planet

Units: 3 ; G.E./G.R. Area: B6; Sustainability

An overview of biological principles through the lens of human impacts on the biosphere, with a focus on issues of emerging concern, such as climate change, genetically modified organisms, and loss of biodiversity.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Credit Restrictions: Not for Biology major credit.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B6- Upper Division Science Inquiry and Quantitative Reasoning, Overlay - Sustainability*

BIOL 335 - Humans: Health and Disease

Units: 3 ; G.E./G.R. Area: B6; Social Justice

An introduction to basic principles of human biology, including genetics and physiology, as a way of understanding human health and the diseases that can affect it.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Credit Restrictions: Not for Biology major credit.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B6- Upper Division Science Inquiry and Quantitative Reasoning, Overlay - Social Justice*

BIOL 350 - Ecology

Units: 4

An examination of the factors influencing the relationships between organisms and the living and non-living aspects of their environment. Issues explored include species interactions, population dynamics, physiological adaptations, population growth, community structure, energy flow, nutrient cycling, and biodiversity loss. *Lecture Units: 3; Lab Units: 1*

Prerequisites: BIOL 140B, MATH 115, STAT 303.

Equivalent Quarter Course: BIOL 3110.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 352 - Biogeography

Units: 4

Theory, practice and applications of analyzing large-scale distributions of organisms, the evolution and ecology of biomes, their biota, dispersal, change in range, phylogenetic systematics and habitat islands. Illustrated lectures and individual field observations.

Prerequisites: BIOL 350.

Equivalent Quarter Course: BIOL 4130 or GEOG 4130.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

BIOL 356 - Freshwater Environments

Units: 4

Principles, practices, and applications of analyzing freshwater physical and biological environments with their major communities of plants and animals, including comparisons of diverse habitats from freshwater wetlands through rivers and lakes. Illustrated lectures and individual field observations.

Prerequisites: BIOL 350.

Equivalent Quarter Course: BIOL 3216.

Repeatability: Course may be repeated for credit for a maximum of 8 units when course content varies.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

BIOL 368 - Fungi of California

Units: 3

A survey of the Fungi of California, exploring the biology and systematics of macroscopic fungi belonging to phyla Basidiomycota and Ascomycota. Particular attention will be given to the ecology, physiology, taxonomy, diversity and evolution of these organisms. *Lecture Units: 2; Lab Units: 1*

Prerequisites: BIOL 140B.

Equivalent Quarter Course: BIOL 3510.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

BIOL 370 - Animal Physiology

Units: 4

Core principles/concepts in animal physiology with emphasis on the regulation and integration of vertebrate systems, from the molecular/cellular level to the whole organism. Gateway course for all upper division physiology core courses and electives. *Lecture Units: 3; Lab Units: 1*

Strongly Recommended Preparation: STAT 303.

Prerequisites: BIOL 140B with grade C- or better and CHEM 112.

Equivalent Quarter Course: BIOL 3151.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 372 - Microscopic Methods: Quantitative Analysis of Structure & Function

Units: 3

In-depth analysis of cell and tissue structure and function using advanced microscopy techniques including confocal. Students will learn optical theory, labeling techniques, sample preparation methods, digital imaging, video analysis and quantification. *Lecture Units: 1; Lab Units: 2*

Prerequisites: BIOL 140A.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice)

BIOL 398 - Internship

Units: 1-4

Supervised work experience in which student completes academic assignments integrated with off-campus paid or volunteer activities.

Prerequisites: Department consent and minimum 2.0 GPA.

Credit Restrictions: No more than a total of four (4) units of BIOL 398, 490, 698, or 690 or a combination thereof, may be applied to Biology major credit.

Equivalent Quarter Course: BIOL 3898.

Repeatability: May be repeated for credit, for a maximum of 8 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

BIOL 410 - Genetic Analysis II

Units: 3

A continuation of BIOL 310. Modern molecular and genetic techniques used to study the development of genetic model organisms (i.e. yeast, worms and flies). Topics include cell-cell communication, asymmetric cell division and stem cell biology among others.

Prerequisites: BIOL 310.

Equivalent Quarter Course: BIOL 3122.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

BIOL 415 - PCR, Sequencing and Fragment Analysis

Units: 3

Laboratory course covering the theory and applications of PCR, DNA sequencing and Fragment Analysis. Topics include DNA sequencing and sequence analysis, genomic PCR, quantitative PCR, RT-PCR, DNA fingerprinting. Individual project. *Lecture Units: 1; Lab Units: 2*

Prerequisites: BIOL 310.

Equivalent Quarter Course: BIOL 4485.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 420 - Cell and Molecular Biology Undergraduate Seminar

Units: 2

A seminar course at the undergraduate level emphasizing the reading, interpretation, discussion and analysis of primary literature from the fields of Cell and Molecular Biology.

Prerequisites: BIOL 140B, BIOL 310.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 424 - Bioinformatics

Units: 3

Introduction to Molecular Bioinformatics. This course will introduce computational analysis of DNA sequences from genes to genomes, gene expression, phylogenetics, protein structure and function. *Lecture Units: 1; Lab Units: 2*

Prerequisites: BIOL 310.

Equivalent Quarter Course: BIOL 4490.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 425 - Techniques in Mammalian Cell Culture

Units: 3

Techniques of in vitro culturing of primary and established cell lines of multi-cellular origin. Topics include nutrition, growth, cloning, cell fusion, transformation, preservation, karyotyping, autoradiography, metabolic labeling, quality control applications. *Lecture Units: 1; Lab Units: 2*

Prerequisites: BIOL 310 and BIOL 330.

Equivalent Quarter Course: BIOL 4450.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 426 - Advanced Molecular and Cell Biology

Units: 3

In-depth look at molecular aspects of cellular processes. Emphasis on experimental evidence of molecular mechanisms responsible for implementation and regulation of gene expression, protein synthesis, membrane transport, intracellular transport, cell signaling, and cell division.

Prerequisites: BIOL 310.

Equivalent Quarter Course: BIOL 4455.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 427 - Molecular and Cell Biology Lab

Units: 3

Techniques of contemporary molecular and cell biology. Laboratory mimics, in practical fashion, the usual course a researcher takes in examining an experimental question. Includes: polymerase chain reaction, recombinant DNA procedures, flow cytometry, protein characterization and analysis and cell culture techniques. *Lecture Units: 1; Lab Units: 2*

Prerequisites: BIOL 310.

Co-requisites: BIOL 426.

Equivalent Quarter Course: BIOL 4456.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 428 - Genomics

Units: 3

An integrated presentation of genome structure and function in prokaryotes and eukaryotes, with emphasis on genome evolution. Introduction to tools and databases available, as well as current techniques in genome sequencing, characterization, and analysis. *Lecture Units: 2; Lab Units: 1*

Prerequisites: BIOL 424.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 430 - Microbial Physiology and Metabolism

Units: 3

Microbial function and biology required to fully understand microbial growth relevant to medical and economic importance, including the exploitation of microbial processes for biotechnological advancement.

Prerequisites: BIOL 330, and CHEM 340 or CHEM 441.

Equivalent Quarter Course: BIOL 4405.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 431 - Medical Microbiology

Units: 5

Microbial bacterial pathogens, including routes of transmission, pathogenesis, host immune response, and methods of control and prevention including antibiotics, vaccines, aseptic technique, and public health measures. Identification of common pathogenic bacteria using standard clinical laboratory procedures and assays. *Lecture Units: 3; Lab Units: 2*

Prerequisites: BIOL 330.

Equivalent Quarter Course: BIOL 4413.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 432 - Microbe-Host Interactions

Units: 3

Microorganisms in ecological and environmental systems, including aspects of microbial diversity in terrestrial, extreme, and marine and freshwater environments; microbial contributions of global biogeochemical cycles; and the use of microorganisms to solve modern-day issues.

Prerequisites: BIOL 330.

Equivalent Quarter Course: BIOL 4142.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 433 - Microbial Ecology

Units: 3

Microorganisms in ecological and environmental systems, including aspects of microbial diversity in terrestrial, extreme, and marine and freshwater environments; microbial contributions of global biogeochemical cycles; and the use of microorganisms to address modern-day issues.

Prerequisites: BIOL 330.

Equivalent Quarter Course: BIOL 4340.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 434 - Molecular Microbiology

Units: 3

Molecular principles underlying basic microbial processes, such as regulation of growth, molecular determination of virulence, and phylogenetic relationships between microorganisms.

Prerequisites: BIOL 330.

Equivalent Quarter Course: BIOL 4143.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 440 - Molecular Virology

Units: 3

Survey of DNA and RNA viruses of bacteria, plants and animals. Focus on the molecular mechanisms of infection and replication, Braggs Law and viral structure with emphasis viruses of biomedical importance such as HIV and HCV, prions and viroids.

Strongly Recommended Preparation: BIOL 445.

Prerequisites: BIOL 310.

Equivalent Quarter Course: BIOL 4441.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 441 - Parasitology

Units: 3

Introduction to the general biology of parasites and the host immune responses to and methods of evasion by parasites. Ecology and evolutionary biology of parasitic infections and modern methods for their control as well as their impact on human civilizations.

Prerequisites: BIOL 310.

Equivalent Quarter Course: BIOL 3441.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 442 - Epidemiology

Units: 3

Study of the patterns of health and disease conditions in populations. Identification of risk factors for disease transmission and targets for preventive healthcare. Introduction to the epidemiological study areas such as outbreak investigation, disease surveillance, biomonitoring, and clinical trials evaluation.

Prerequisites: BIOL 140B.

Equivalent Quarter Course: BIOL 3410.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 443 - Hematology

Units: 4

Basic morphology, function and composition of human blood fluids and cells, both normal and diseased.

Lecture Units: 3; Lab Units: 1

Prerequisites: BIOL 140B and CHEM 112.

Equivalent Quarter Course: BIOL 3430.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 444 - Medical Entomology

Units: 3

Role of arthropods in the transmission of human pathogens. General anatomy, physiology, and classification of medically important arthropods, as well as the epidemiology and pathogenesis of their associated diseases, and the principles and methods of vector control.

Prerequisites: BIOL 140B.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 445 - Immunology

Units: 3

Topics include the innate and adaptive immune systems; emphasizing key experiments in immunology, TLR signaling, NK cells, complement, antimicrobial peptides, phagocytes, genetics, structure and function of immune molecules, lymphocyte activation, hypersensitivity reactions and regulation of immune responses.

Prerequisites: BIOL 310 and CHEM 332.

Equivalent Quarter Course: BIOL 4430.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 454 - Biology of Fungi

Units: 4

Major lineages of Kingdom Fungi, including their classification, evolution, life cycles, ecology, morphology and development, with focus on the medical, economic and cultural applications and significance of this diverse group of organisms. *Lecture Units: 3; Lab Units: 1*

Prerequisites: BIOL 140B with grade C- or better.

Equivalent Quarter Course: BIOL 4425.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 455 - Vertebrate Biology

Units: 4

Biology, evolution, diversity, and natural history of vertebrate species. Labs involve identification of anatomical and physiological features and taxonomy of fishes, amphibians, reptiles, birds, and mammals, with focus on species found in the San Francisco Bay Area. *Lecture Units: 2; Lab Units: 2*

Prerequisites: BIOL 140B.

Equivalent Quarter Course: BIOL 4583.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 458 - Animal Behavior

Units: 4

Behavioral patterns of animals with emphasis on their evolution and ecological significance. Topics to be considered include social living, mating and reproduction, antipredator strategies, and the influence of genetics and the environment on behavioral activities. *Lecture Units: 3; Lab Units: 1*

Prerequisites: BIOL 140B.

Equivalent Quarter Course: BIOL 4518.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 460 - Ecology and Evolutionary Biology Undergraduate Seminar

Units: 2

A seminar course at the undergraduate level emphasizing the reading, interpretation, discussion and

analysis of primary literature from the fields of Ecology and Evolutionary Biology.

Prerequisites: BIOL 320 and BIOL 350.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 466 - Population Biology

Units: 4

Study of the sizes, distributions and genetics of natural populations, including the processes affecting reproduction, age structure, density, growth, population fluctuations and evolution. *Lecture Units: 2; Lab*

Units: 2

Prerequisites: BIOL 320.

Equivalent Quarter Course: BIOL 4175.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 468 - Molecular Ecology

Units: 4

Use of molecular genetic tools in addressing basic and applied questions in ecological research, including ecological, population and conservation genetics, microbial ecology, behavioral ecology and phylogeography. Course includes intensive hands-on laboratories, lectures and student-led discussions.

Lecture Units: 2; Lab Units: 2

Prerequisites: BIOL 310 and BIOL 320.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 469 - Conservation Biology

Units: 4

Biological, economic, political and ethical issues inherent to current conservation problems. Concepts covered include the causes and consequences of biodiversity loss, conservation approaches and strategies, and the ecological, evolutionary, and anthropogenic influences underlying these issues. *Lecture Units: 3;*

Lab Units: 1

Prerequisites: BIOL 350.

Credit Restrictions: Not open for students with credit for BIOL 6350 or BIOL 6351.

Equivalent Quarter Course: BIOL 4351 or BIOL 4350.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 470 - Animal Senses

Units: 4

How animals use remarkable sensory abilities to communicate, navigate, and detect prey, predators and mates, including sensory systems such as echolocation, electroreception, and magnetoreception, as well as vision, smell, touch, and hearing. Discussion of research and scientific writing emphasized.

Strongly Recommended Preparation: BIOL 471.

Prerequisites: BIOL 370.

Equivalent Quarter Course: BIOL 4513.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

BIOL 471 - Neurobiology

Units: 3

The structure and function of the vertebrate and invertebrate nervous system with emphasis on the principles of communication, control, and sensorimotor responses. Survey of concepts of neurochemistry, feedback, bionic models, and higher brain processes.

Prerequisites: BIOL 370.

Equivalent Quarter Course: BIOL 4510.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

BIOL 472 - Neurobiology Laboratory

Units: 4

Basic principles of neurobiology demonstrated using laboratory experiments that include intracellular and extracellular nerve recording, membrane potentials, action potentials, sensory and motor neural processing, nerve tracing, and histology. *Lecture Units: 2; Lab Units: 2*

Prerequisites: BIOL 471.

Equivalent Quarter Course: BIOL 4512.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

BIOL 473 - Comparative Physiology

Units: 3

Physiology of metabolic, respiratory, circulatory, excretory, muscle, and nervous systems of vertebrates and invertebrates with an emphasis on physiological diversity and adaptation.

Prerequisites: BIOL 370.

Equivalent Quarter Course: BIOL 4504.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 474 - Biomedical Physiology

Units: 3

Physiological processes and interactions at the molecular, cellular, and organ levels involved in human pathology. Provides a foundation for understanding the etiology, recognition, and treatment of diseases and the mechanisms of drugs.

Strongly Recommended Preparation: CHEM 340.

Prerequisites: BIOL 370; or BIOL 270 and BIOL 271.

Equivalent Quarter Course: BIOL 4160.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

BIOL 475 - Global Change Biology

Units: 4

Mechanisms by which plants, animals, and ecosystems are responding to global change and to appreciate the links between physical, chemical, and biological systems and human activities. *Lecture Units: 3; Lab Units: 1*

Prerequisites: BIOL 370.

Equivalent Quarter Course: BIOL 4355.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 476 - General Endocrinology

Units: 3

A broad study of endocrinology from both an anatomical and physiological perspective including synthesis, distribution, and regulation of hormones in human and animal endocrine systems, as well as the pathophysiology of endocrine disorders.

Prerequisites: BIOL 370.

Equivalent Quarter Course: BIOL 4505.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 488 - Environmental Physiology

Units: 3

Concepts in environmental physiology emphasizing adaptations to environmental stressors. Physiological strategies for living in extreme environments and impacts of exposure to recent environmental challenges (e.g., climate change, pollution) also discussed.

Prerequisites: BIOL 370.

Equivalent Quarter Course: BIOL 4516.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

BIOL 490 - Independent Study

Units: 1-4

Independent study in biological science under the supervision a department faculty member.

Prerequisites: Department consent and minimum 2.0 GPA.

Equivalent Quarter Course: BIOL 4900.

Repeatability: May be repeated for credit with consent of instructor, for a maximum of 12 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

BIOL 497 - Issues in Biological Science

Units: 1-3

Readings, discussion, and research on contemporary and/or significant issues in biological science

Equivalent Quarter Course: BIOL 3999.

Repeatability: May be repeated for credit when content varies, for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

SCI 308 - Hands-On Science Teaching

Units: 1

Direct experience teaching science to visiting elementary and middle school students. Foundational science concepts demonstrated in engaging activities that promote scientific thinking. Emphasis on Crosscutting Concepts underlying and linking the natural sciences as explicated in the Next Generation Science Standards.

Prerequisites: Department consent.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

Biological Science: Graduate

BIOL 601A - Foundations of Scientific Research

Units: 1

Foundations of Master's level skills needed to complete a research thesis. Application of the scientific method in the context of thesis formulation, experimental design, and accessing/evaluating scientific literature. Involves critical review of sample thesis proposals and drafting original thesis proposal.

Prerequisites: M.S. Biological Science major.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 601B - Foundations of Scientific Communication

Units: 1

Foundations of Master's level skills for effectively communicating scientific information. Application of the scientific method, in the context of communicating scientific findings and evidence-based conclusions. Emphasizes strategies in the presentation of scientific content and data to various audiences.

Prerequisites: BIOL 601A.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 602 - Preparation for Undergraduate Instruction in Biology

Units: 3

Prepares graduate students for the roles and responsibilities of the Biology Teaching Associate (TA). Involves training in disciplinary pedagogy, policies, and safety. Provides opportunities to develop teaching skills, access resources, receive feedback, and participate in a support network.

Prerequisites: M.S. Biological Science major.

Possible Instructional Methods: *Entirely On-ground.*

Grading: ABC/NC grading only.

BIOL 610 - Seminar in Cell & Molecular Biology

Units: 2

Presentation, discussion and analysis of current research literature in Cell & Molecular Biology.

Strongly Recommended Preparation: Consultation with Thesis Advisor.

Prerequisites: M.S. Biological Science major.

Equivalent Quarter Course: BIOL 6821.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 616 - Cell and Molecular Biology I

Units: 3

Principles of Molecular Biology, with focus on molecular techniques, genomics, proteomics, epigenetics, and control of gene expression.

Prerequisites: BIOL 310.

Equivalent Quarter Course: BIOL 6151.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 618 - Cell and Molecular Biology II

Units: 3

Principles of eukaryotic cell biology emphasizing the structure, behavior and function of membranes and associated molecules, organelles including the endomembrane system, cell-cell junctions, the cytoskeleton and signal transduction.

Prerequisites: BIOL 616.

Equivalent Quarter Course: BIOL 6152.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 620 - Functional Genomics

Units: 3

Laboratory course covering genome-wide analysis of gene and protein function, using molecular techniques. Discussion and practice in experimental design, data mining, and data analysis. *Lecture Units: 1; Lab Units: 2*

Strongly Recommended Preparation: BIOL 424.

Prerequisites: BIOL 415 or BIOL 427.

Equivalent Quarter Course: BIOL 6147.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 622 - Advanced Molecular Techniques

Units: 3

A laboratory course covering the theory, practice and application of advanced techniques in molecular biology through guided research projects and discussions of the primary literature. Techniques include current methods in recombinant DNA construction, nucleic acid isolation and gene expression analysis. *Lecture Units: 1; Lab Units: 2*

Strongly Recommended Preparation: BIOL 424.

Prerequisites: BIOL 415 or BIOL 427.

Equivalent Quarter Course: BIOL 6141.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 630 - Seminar in Microbiology

Units: 2

Seminar involving presentation, discussion, and analysis of current research literature in Microbiology.

Strongly Recommended Preparation: Consultation with Thesis Advisor.

Prerequisites: M.S. Biological Science major.

Equivalent Quarter Course: BIOL 6831.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 631 - Microbial Physiology and Biochemistry

Units: 3

Microbial function and biology required to fully understand microbial growth relevant to medical and economic importance, including the exploitation of microbial processes for biotechnological advancement.

Prerequisites: BIOL 330 and CHEM 331.

Credit Restrictions: Not open to those with credit for BIOL 4405 or BIOL 430.

Equivalent Quarter Course: BIOL 6405.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 650 - Seminar in Ecology and Evolution

Units: 2

A seminar course involving presentation, discussion and analysis of current research literature in Ecology & Evolution.

Strongly Recommended Preparation: Consultation with Thesis Advisor.

Prerequisites: M.S. Biological Science major.

Equivalent Quarter Course: BIOL 6801.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 652 - Advances in Ecology and Evolution

Units: 3

Advanced survey of experimental ideas and techniques studied in ecology and evolutionary biology.

Prerequisites: M.S. Biological Science major.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 653 - Community and Ecosystem Biology

Units: 4

Structure, dynamics, and distribution aspects of ecological communities and food web relationships to whole ecosystems. Lectures and field trips on selected communities, with emphasis on those of Central California and San Francisco Bay Area, watersheds, and ecosystem restoration projects. *Lecture Units: 3; Lab Units: 1*

Prerequisites: M.S. Biological Science major.

Equivalent Quarter Course: BIOL 6530 and BIOL 6160.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 655 - Phylogenetic Methods

Units: 3

Provides students with the knowledge required to collect, analyze and interpret molecular sequence data using phylogenetic methodologies. Topics include aligning molecular sequence data, analyzing data with parsimony, likelihood and Bayesian methods, and utilizing phylogenetic information for hypothesis testing. *Lecture Units: 2; Lab Units: 1*

Prerequisites: M.S. Biological Science major.

Equivalent Quarter Course: BIOL 6550.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 657 - Environmental Experimental Analysis

Units: 4

Advanced applications of graphic modeling, experimental design, direct and remote monitoring, and modern statistical analyses of ecological/environmental experiments, particularly concerning an organism's responses to its environment. Field trips. *Lecture Units: 3; Lab Units: 1*

Prerequisites: M.S. Biological Science major.

Equivalent Quarter Course: BIOL 4530 or BIOL 6120.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 670 - Seminar in Physiology

Units: 2

A seminar course involving presentation, discussion and analysis of current research literature in Physiology.

Strongly Recommended Preparation: Consultation with Thesis Advisor.

Prerequisites: M.S. Biological Science major.

Equivalent Quarter Course: BIOL 6811.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 671 - Advanced Topics in Physiology

Units: 3

Advanced study of selected areas of physiology with emphasis on recent research developments and experimental techniques. Includes in-depth discussions of physiological mechanisms at the molecular, cellular, and systems levels.

Prerequisites: M.S. Biological Science major.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 672 - Microscopic Methods: Quantitative Analysis of Structure & Function

Units: 3

In-depth analysis of cell and tissue structure and function using advanced microscopy techniques including confocal. Students will learn optical theory, labeling techniques, sample preparation methods, and digital imaging and video analysis and quantification. *Lecture Units: 1; Lab Units: 2*

Prerequisites: BIOL 140A.

Co-requisites: BIOL 601B.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice)

BIOL 690 - Independent Study

Units: 1-4

Independent study in biological sciences under the supervision of a member of the graduate faculty.

Prerequisites: Department consent and minimum 3.0 GPA.

Equivalent Quarter Course: BIOL 6900.

Repeatability: May be repeated for credit for a maximum of 4 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 691 - University Thesis

Units: 1-5

Development and writing of a formal research paper for submission to the university in the specified format. Supervision by a departmental committee, at least one of whom must be a Cal State East Bay faculty member. Oral defense required.

Strongly Recommended Preparation: Consultation with thesis advisor.

Prerequisites: Department consent.

Equivalent Quarter Course: BIOL 6910.

Repeatability: May be repeated for credit with approval by department for a maximum of 5 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

BIOL 697 - Issues in Biological Science

Units: 1-3

Readings, discussion, and research on contemporary and/or significant issues in biological science

Equivalent Quarter Course: BIOL 6999.

Repeatability: May be repeated for credit when content varies, for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BIOL 698 - Internship

Units: 1-4

Supervised work experience in which student completes academic assignments integrated with off-campus paid or volunteer activities.

Prerequisites: Department consent and minimum 3.0 GPA.

Credit Restrictions: Only four (4) units may be applied to biology graduate degree.

Equivalent Quarter Course: BIOL 6898.

Repeatability: May be repeated for credit for a maximum of 8 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Biostatistics: Graduate

BSTA 661 - Categorical Data Analysis

Units: 2

Applied methods for discrete data. Topics may include: proportions and counts, contingency tables, loglinear models, logistic regression, Poisson regression, generalized linear models. Data integrity. Computing techniques and analysis of discrete data. Use of SAS. Report writing.

Prerequisites: STAT 631 and STAT 632.

Equivalent Quarter Course: BSTA 6651 or STAT 6651.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Cross-listed: STAT 661.

BSTA 662 - Survival Analysis

Units: 2

Applied methods for survival analysis. Incomplete data, censored, and truncated data, life tables, nonparametric, semiparametric, and parametric methods. Accelerated failure time models, proportional hazards models, partial likelihood and advanced topics. Data integrity. Computing techniques and analysis of clinical data. Use of SAS. Report writing.

Prerequisites: BSTA 661.

Equivalent Quarter Course: BSTA 6652.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BSTA 663 - Clinical Trials in the Pharmaceutical and Biomedical Industries

Units: 2

Statistical principles, design, management of clinical trials. Topics include: recruitment, treatment allocation, stratification, blinding. Practical applications. Ethics of clinical trials. Data collection, data analysis. Data integrity, monitoring. Domestic/international regulatory guidelines emphasized. Professional protocols. Introduction to CDISC. Report writing, oral presentation.

Prerequisites: BSTA 662.

Equivalent Quarter Course: BSTA 6653.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

BSTA 668 - Longitudinal Data Analysis

Units: 2

Introduction to the principles and methods for the analysis of longitudinal data, repeated measures, and correlated outcomes, including the unbalanced and incomplete data that are characteristic of observational longitudinal data. Generalized estimating equations and generalized linear mixed models.

Prerequisites: STAT 631 and STAT 632.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Business

BUS 335 - Communications in Team Building

Units: 3

Explores competencies associated with personal and professional success. Topics may include how to communicate effectively, how to work well with others, how to set goals, and how to use influence to achieve those goals.

Prerequisites: B.S. Business Administration major or Business Administration minor.

Possible Instructional Methods: Entirely On-ground, Entirely On-line.

Grading: A-F grading only.

Chemistry

CHEM 100 - Introduction to College Chemistry

Units: 3 ; G.E./G.R. Area: B1, B3

Elementary principles of chemistry, including experimentation and science practices: measurement, properties of matter, periodic table, energy conversion and transfer, phase changes, chemical reactions, atomic theory, laws of conservation of matter and energy, reaction rates, thermal and chemical equilibria, nuclear reactions. *Lecture Units: 2; Lab Units: 1*

Co-requisites: MATH 115 or MATH 118; or MATH 120, MATH 125, or MATH 130.

Equivalent Quarter Course: CHEM 1100.

Possible Instructional Methods: Entirely On-ground.

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: B1 - Lower Division Physical Science, B3 - Lower Division Laboratory Activity

CHEM 110 - General Chemistry for Engineering

Units: 3 ; G.E./G.R. Area: B1, B3

Elementary principles of chemistry including experimentation, laboratory skills, and science practices. Focused on real-world applications, connections to engineering, and systems thinking, including: properties of matter, energy, phase changes, chemical reactions, atomic structure and theory, reaction rates, equilibria, and electrochemistry. *Lecture Units: 2; Lab Units: 1*

Co-requisites: MATH 120, MATH 125 or MATH 130.

Credit Restrictions: Not for chemistry major or minor credit.

Possible Instructional Methods: Entirely On-ground.

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: B1 - Lower Division Physical Science, B3 - Lower Division Laboratory Activity

CHEM 111 - General Chemistry I

Units: 5 ; G.E./G.R. Area: B1, B3

Fundamental principles of chemistry: periodic trends, composition of compounds and solutions, stoichiometry, gases, heat and enthalpy, atomic and molecular structure, bonding. Laboratory includes study of the chemical and physical behavior of elements and compounds, and qualitative and quantitative analysis. *Lecture Units: 3; Lab Units: 2*

Co-requisites: MATH 120, MATH 125 or MATH 130.

Equivalent Quarter Course: CHEM 1101 and CHEM 1102.

Possible Instructional Methods: Entirely On-ground.

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: B1 - Lower Division Physical Science, B3 - Lower Division Laboratory Activity

CHEM 112 - General Chemistry II

Units: 5

Fundamental principles of chemistry: solutions, kinetics, equilibrium, acids and bases, entropy and free energy, electrochemistry, nuclear chemistry, transition metals, and organic chemistry. Laboratory includes study of the chemical and physical behavior of elements and compounds, and qualitative and quantitative analysis. *Lecture Units:* 3; *Lab Units:* 2

Prerequisites: CHEM 111 with grade C- or better.

Equivalent Quarter Course: CHEM 1102 and CHEM 1103.

Possible Instructional Methods: Entirely On-ground.

Grading: A-F or CR/NC (student choice).

CHEM 161 - Basic Chemistry for the Health Sciences

Units: 4 ; *G.E./G.R. Area:* B1, B3

A one semester, terminal course in chemistry for students preparing for careers in health-related sciences including nursing. Covers basic inorganic and organic chemistry, and an introduction to biochemistry.

Lecture Units: 3; *Lab Units:* 1

Co-requisites: STAT 100 or MATH 115; or MATH 120, MATH 125, or MATH 130.

Credit Restrictions: Not for Chemistry or Biochemistry major or minor credit; not open to students with credit for CHEM 165.

Equivalent Quarter Course: CHEM 1610 or CHEM 1615.

Possible Instructional Methods: Entirely On-ground.

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: B1 - Lower Division Physical Science, B3 - Lower Division Laboratory Activity

CHEM 162 - Basic Biochemistry for the Health Sciences

Units: 3

An introduction to basic biochemistry with emphasis on the structure and function of proteins, carbohydrates, and lipids as they relate to human health.

Prerequisites: CHEM 161 or CHEM 165, both with grade C- or better.

Credit Restrictions: Not for Chemistry or Biochemistry major or minor credit.

Equivalent Quarter Course: CHEM 1620.

Possible Instructional Methods: Entirely On-ground.

Grading: A-F or CR/NC (student choice).

CHEM 165 - Basic Chemistry for Healthier Living

Units: 4 ; G.E./G.R. Area: B1, B3

A chemical perspective for healthier living. Covers basic inorganic and organic chemistry, and an introduction to biochemistry. *Lecture Units: 3; Lab Units: 1*

Co-requisites: STAT 100 or MATH 115; or MATH 120, MATH 125, or MATH 130.

Credit Restrictions: Not for Chemistry or Biochemistry major or minor credit; not open to students with credit for CHEM 161.

Equivalent Quarter Course: CHEM 1610 or CHEM 1615.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B1 - Lower Division Physical Science, B3 - Lower Division Laboratory Activity*

CHEM 220 - Quantitative Analysis

Units: 4

An introduction to analytical chemistry including determination of error in measurement, statistical analysis of data, acid-base equilibria, and electrochemical, spectrometric, and chromatographic methods of analysis. Focus on development of applied laboratory skills and practical application of technique.

Lecture Units: 2; Lab Units: 2

Prerequisites: CHEM 112 with grade C- or better.

Equivalent Quarter Course: CHEM 2200.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

CHEM 230 - Survey of Organic Chemistry

Units: 5

An introduction to the basic principles of organic chemistry with an emphasis on the chemistry of functional groups. Laboratory work in experimental organic chemistry techniques. *Lecture Units: 4; Lab Units: 1*

Prerequisites: CHEM 112 with grade C- or better.

Credit Restrictions: Not for chemistry or biochemistry major or minor credit

Equivalent Quarter Course: CHEM 2301 and CHEM 2302.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

CHEM 233 - Fundamentals of Organic Chemistry

Units: 3

Basic physical and chemical properties of the major classes of organic compounds. Emphasis is placed on those aspects of organic chemistry that are relevant to the study of human and environmental health.

Prerequisites: CHEM 112 with grade C- or better.

Credit Restrictions: Not for Chemistry or Biochemistry major or minor credit.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

CHEM 301 - Chemistry Connections

Units: 3 ; G.E./G.R. Area: B6

Connections between chemistry and other natural sciences and engineering with real-world applications and examples. Focus is on preparing to teach under the K12 Next Generation Science Standards with the goal of teaching science with confidence.

Prerequisites: Completion of GE areas A1, A2, A3 and B4 ; and CHEM 100.

Equivalent Quarter Course: CHEM 3011.

Possible Instructional Methods: *Entirely On-line.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B6- Upper Division Science Inquiry and Quantitative Reasoning*

CHEM 302 - Chemistry Connections Laboratory

Units: 1

Laboratory experience demonstrating connections between chemistry and other natural sciences and engineering. The course focuses on K12 Next Generation Science Standards with the goal of teaching science with confidence.

Strongly Recommended Preparation: CHEM 301 (concurrent or completion).

Prerequisites: CHEM 100.

Equivalent Quarter Course: CHEM 3012.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

CHEM 320 - Bioanalytical and Forensic Instrumentation

Units: 3

The lecture portion of the class will discuss the fundamental theories in forensic chemistry and the laboratory component will cover the practical aspects and techniques currently used in forensic analytical chemistry. *Lecture Units: 2; Lab Units: 1*

Prerequisites: CHEM 230 or CHEM 332, both with grade C- or better.

Equivalent Quarter Course: CHEM 3200.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CHEM 331 - Organic Chemistry I

Units: 5

Fundamental principles of organic chemistry including nomenclature, properties and reactions of organic compounds emphasizing reaction mechanisms. Laboratory work in basic techniques and synthesis.

Lecture Units: 3; Lab Units: 2

Prerequisites: CHEM 112 with grade C- or better.

Equivalent Quarter Course: Students who have completed CHEM 3301 and CHEM 3302 will receive credit for CHEM 331.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CHEM 332 - Organic Chemistry II

Units: 5

Continuation of CHEM 331 Fundamental principles of organic chemistry including properties and reactions of organic compounds emphasizing reaction mechanisms, and spectroscopic analysis. Further laboratory work in basic synthesis and organic analysis. *Lecture Units: 3; Lab Units: 2*

Prerequisites: CHEM 331 with grade C- or better.

Equivalent Quarter Course: Students who have completed CHEM 3302 and CHEM 3303 will receive credit for CHEM 332.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CHEM 340 - Survey of Biochemistry

Units: 3

A survey course covering structures of biomolecules (amino acids, proteins, carbohydrates, lipids, nucleic acids, nucleotides, and vitamins), mechanisms of membrane transport, enzyme kinetics, and cellular metabolic processes.

Prerequisites: CHEM 230 or CHEM 332, both with grade C- or better.

Equivalent Quarter Course: CHEM 3400.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

CHEM 350 - Biophysical Chemistry

Units: 3

A presentation of the fundamental concepts of physical chemistry with emphasis on applications in biological macromolecules. Thermodynamics, chemical equilibrium, enzyme kinetics, basic quantum chemistry, and molecular spectroscopy will be covered.

Prerequisites: CHEM 112, MATH 131, and PHYS 126 or PHYS 136, all with grade C- or better.

Equivalent Quarter Course: CHEM 3501.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CHEM 351 - Physical Chemistry I

Units: 3

Fundamental principles of kinetic molecular theory, chemical thermodynamics, chemical equilibrium, phase equilibrium, and chemical kinetics.

Prerequisites: CHEM 332, MATH 230, PHYS 136, all with grade C- or better.

Equivalent Quarter Course: Students who have completed CHEM 3511 and CHEM 3512 will receive credit for CHEM 351.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CHEM 352 - Physical Chemistry II

Units: 3

Fundamental principles of time-independent quantum mechanics. Translational, vibrational, and rotational motion, atomic structure, valence bond and molecular orbital theory.

Prerequisites: CHEM 351 with grade C- or better.

Equivalent Quarter Course: Students who have completed CHEM 3512 and CHEM 3513 will receive credit for CHEM 352.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CHEM 355 - Physical Chemistry Laboratory

Units: 2

Experience in the measurement of physicochemical properties, automated data acquisition, computer analysis of experimental data, and report writing.

Co-requisites: CHEM 351.

Equivalent Quarter Course: CHEM 3531 and 3532.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CHEM 398 - Internship

Units: 1-3

Introduction to the internship experience; integration of the academic program with career aspirations; emphasis on internship readiness and preparation for professional success.

Prerequisites: Department consent and minimum 2.0 GPA.

Credit Restrictions: No units may be applied to the Chemistry major or minor.

Equivalent Quarter Course: CHEM 3898.

Repeatability: May be repeated with department consent for a maximum of 3 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

CHEM 410 - Advanced Inorganic Chemistry

Units: 4

Fundamental principles of inorganic chemistry with applications to the structure, bonding, and reactivity of main group inorganic compounds, coordination and organometallic compounds, and solid state.

Prerequisites: CHEM 332; and CHEM 350 or CHEM 351, all with grade C- or better.

Equivalent Quarter Course: CHEM 4161 and CHEM 4162.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CHEM 415 - Inorganic Chemistry Laboratory

Units: 2

Laboratory experience in the preparation and characterization of main group element inorganic compounds and transition metal coordination complexes.

Prerequisites: CHEM 410 with grade C- or better.

Equivalent Quarter Course: CHEM 4180.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CHEM 420 - Instrumental Analysis

Units: 3

Principles of operation and application of various analytical instruments including visible/ultraviolet, infrared, inductive coupled plasma optical emission, fluorescence, nuclear magnetic resonance and mass spectroscopy, gas-liquid and high-performance liquid chromatography, and the basic electronics of a simple spectrometer. *Lecture Units: 2; Lab Units: 1*

Prerequisites: CHEM 220, CHEM 332; and PHYS 126 or PHYS 136, all with grade C- or better.

Equivalent Quarter Course: CHEM 4240.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CHEM 425 - Environmental Chemistry

Units: 4

Application of chemical principles to natural processes and related anthropogenic influences. Topics

include analysis of multiple equilibria systems, influence of pH and redox on solubility, interactions between soil and aqueous systems, atmospheric pollutants, and current topics. *Lecture Units: 3; Lab Units: 1*

Prerequisites: CHEM 331 with grade C- or better.

Equivalent Quarter Course: CHEM 4601 and CHEM 4602.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

CHEM 430 - Advanced Organic Chemistry

Units: 3

Mechanistic approaches to synthetic studies; the chemistry of carbonyl, heterocyclic, and polycyclic compounds with emphasis on those of natural origin or biological interest; determining and writing reasonable organic reaction mechanisms.

Prerequisites: CHEM 332 with grade C- or better.

Equivalent Quarter Course: CHEM 4311.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CHEM 441 - Biochemistry I

Units: 4

A detailed description of the structure-function relationships of biological molecules (amino acids, proteins, carbohydrates, lipids and nucleotides), with emphasis on representative proteins, membrane composition and transport, enzymes and signaling.

Prerequisites: CHEM 332 with grade C- or better.

Equivalent Quarter Course: Students who have completed CHEM 4411 and CHEM 4412 will receive credit for CHEM 441.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

CHEM 442 - Biochemistry II

Units: 4

A detailed description of metabolism of biological molecules (carbohydrate, lipids, proteins, amino acids, nucleotides, and nucleic acids), gene expression and replication, and protein synthesis.

Prerequisites: CHEM 441 with grade C- or better.

Equivalent Quarter Course: Students who have completed CHEM 4412 and CHEM 4413 will receive credit for CHEM 442.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

CHEM 443 - Biochemistry Laboratory I

Units: 3

Laboratory techniques in biochemistry with a focus on protein purification and enzyme kinetics. Intended to supplement CHEM 441 Biochemistry I. *Lecture Units: 1; Lab Units: 2*

Strongly Recommended Preparation: CHEM 220.

Co-requisites: CHEM 441.

Equivalent Quarter Course: CHEM 4430.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CHEM 444 - Biochemistry Laboratory II

Units: 3

Laboratory techniques in biochemistry. Continuation of CHEM 443 with emphasis on immunological techniques for protein characterization and manipulation of nucleic acids. *Lecture Units: 1; Lab Units: 2*

Prerequisites: CHEM 443 with grade C- or better.

Co-requisites: CHEM 442.

Equivalent Quarter Course: CHEM 4431.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CHEM 445 - Protein Structure

Units: 3

Fundamentals of protein structure and its relationship to function including structural motifs and domain classification. Emphasis on methods for determination and analysis of three dimensional protein structures.

Co-requisites: CHEM 441.

Equivalent Quarter Course: CHEM 4440.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

CHEM 446 - Nucleic Acid Chemistry

Units: 3

Nucleic acid structure, modification and processing. Emphasis on methods for chemical characterization of DNA and RNA, genome structure and organization, regulation of the transcriptome, recombinant DNA techniques and use of DNA databases.

Co-requisites: CHEM 442.

Equivalent Quarter Course: CHEM 4450.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

CHEM 447 - Major Organ Biochemistry

Units: 3

Detailed study of the unique biochemistry and metabolism of selected major organs and their interrelationships under various physiological conditions.

Co-requisites: CHEM 442.

Equivalent Quarter Course: CHEM 4460.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

CHEM 450 - Classical and Statistical Thermodynamics

Units: 3

Comprehensive treatment of selected topics in classical and statistical thermodynamics with biochemical applications.

Prerequisites: CHEM 352 with grade C- or better.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CHEM 470 - Chemical Literature

Units: 1

Systematic introduction to the use of the chemical literature, including the use of physical library resources and online database searching.

Prerequisites: CHEM 332 with grade C- or better.

Equivalent Quarter Course: CHEM 4700.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CHEM 480 - Undergraduate Research

Units: 1-2

Original research in chemistry under the supervision of a member of the department faculty.

Prerequisites: Department consent.

Equivalent Quarter Course: CHEM 4810.

Repeatability: Repeatable for a maximum of 4 units

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

CHEM 481 - Senior Thesis

Units: 1-2

Development and writing of a formal research paper on original research under the supervision of a member of the department faculty.

Prerequisites: Department consent.

Equivalent Quarter Course: CHEM 4811.

Repeatability: Repeatable for a maximum of 2 units

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

CHEM 490 - Independent Study

Units: 1-4

Independent study in chemistry under the supervision of a member of the department faculty. Students may apply no more than 12 units of independent study in the major department and 8 units in other departments to a baccalaureate degree.

Prerequisites: Department consent and minimum 2.0 GPA.

Equivalent Quarter Course: CHEM 4900.

Repeatability: Repeatable for a maximum of 4 units

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

CHEM 497 - Issues in Chemistry

Units: 3

Readings, discussion, and research on contemporary and/or significant issues in chemistry.

Equivalent Quarter Course: CHEM 3999.

Repeatability: May be repeated for credit when content varies, for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

Chemistry: Courses for Non-Science Majors

CHEM 106 - Chemistry and Society

Units: 3 ; G.E./G.R. Area: B1; Sustainability

Introduction to basic chemistry concepts and chemistry applications in everyday life. Topics include energy production, drugs, pesticides, plastics and polymers, the impact of chemicals on the environment, and sustainable chemistry practices.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be*

taught both online and on-ground).

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: B1 - Lower Division Physical Science, Overlay - Sustainability

CHEM 304 - Chemistry of Wine Making

Units: 3 ; G.E./G.R. Area: B6

The history, chemistry and technology of wine making. Production of standard types of wine from grape varieties. Laboratory illustrates chemical principles as applied to wine making. *Lecture Units: 2; Lab Units: 1*

Prerequisites: Completion of GE areas A1, A2, A3, B1 and B4.

Credit Restrictions: Not for Chemistry or Biochemistry major or minor credit.

Equivalent Quarter Course: CHEM 3010.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: B6- Upper Division Science Inquiry and Quantitative Reasoning

CHEM 306 - Green Chemistry and Sustainability

Units: 3 ; G.E./G.R. Area: B6

Introduction to the principles and fundamental concepts of general and green chemistry with an emphasis on relevant implications for the environment, technology, and public policy.

Prerequisites: Completion of GE areas A1, A2, A3, B1 and B4.

Credit Restrictions: Not for Chemistry or Biochemistry major or minor credit.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: B6 - Upper Division Science Inquiry and Quantitative Reasoning

Chemistry: Graduate

CHEM 621 - Molecular Spectroscopy

Units: 3

Investigation of the physical principles of current molecular spectroscopic methods and their applications in chemical, biochemical and biophysical research.

Prerequisites: CHEM 352 with grade C- or better.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CHEM 631 - Graduate Organic Chemistry

Units: 3

The theory and mechanism of organic reactions. Topics include conformational and stereochemical analysis, energetics of reaction paths, reaction kinetics, and chemical catalysis.

Prerequisites: CHEM 332 with grade C- or better.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CHEM 641 - Graduate Biochemistry

Units: 3

Review of biochemical fundamentals, followed by in-depth coverage of selected topics such as enzyme mechanisms, signaling, membrane function, photosynthesis, advanced metabolism, and DNA repair.

Prerequisites: CHEM 442 with grade C- or better.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CHEM 642 - Protein Chemistry Techniques

Units: 3

Techniques in protein chemistry. Methods for protein quantification, separation, identification and structure determination. Emphasis on modern methods such as liquid chromatography, electrophoresis, isoelectric focusing, expression vectors, immunological probing, mass spectrometry and computer-based analysis. *Lecture Units: 1; Lab Units: 2*

Prerequisites: CHEM 340 or CHEM 441, both with grade C- or better.

Equivalent Quarter Course: CHEM 6430.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CHEM 651 - Graduate Physical Chemistry

Units: 3

Mathematical formulation of quantum theory, approximation methods, semiclassical theory of interaction between light and matter. Emphasis on applications to the study of atoms and molecules.

Prerequisites: CHEM 352 with grade C- or better.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CHEM 652 - Computational Chemistry

Units: 3

Theory and application of molecular-scale simulation techniques for molecules, clusters, and condensed

phases. Introduction to the use of computational chemistry codes and molecular visualization tools.

Prerequisites: CHEM 651 with grade C- or better.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CHEM 680 - Seminar

Units: 1

Seminar based on oral presentations, given by the students enrolled, of current chemical literature or reports of research in progress. Effective communication and presentation skills will be emphasized.

Prerequisites: M.S. Chemistry major.

Equivalent Quarter Course: CHEM 6820.

Repeatability: May be repeated once for credit for a maximum of 2 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CHEM 681 - Research

Units: 1-2

Original research in chemistry under the supervision of a member of the graduate faculty.

Prerequisites: Department consent.

Equivalent Quarter Course: CHEM 6830.

Repeatability: May be repeated for credit for a maximum of 4 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CHEM 690 - Independent Study

Units: 1-3

Independent study in chemistry under the supervision of a member of the graduate faculty.

Prerequisites: Department consent and minimum 3.0 GPA.

Equivalent Quarter Course: CHEM 6900.

Repeatability: May be repeated for credit for a maximum of 3 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CHEM 691 - University Thesis

Units: 2

Development and writing of a formal research paper for submission to the university in the specified format. Supervision by a departmental committee, at least one of whom must be a California State East

Bay faculty member.

Prerequisites: Department consent.

Equivalent Quarter Course: CHEM 6910.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CHEM 692 - Comprehensive Exam

Units: 2

Comprehensive examination comprising of a review of the relevant areas of chemistry from the MS degree program.

Prerequisites: Department consent.

Equivalent Quarter Course: CHEM 6901.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

CHEM 693 - Review Paper

Units: 2

Development and writing of a formal review paper under the supervision of a member of the graduate faculty.

Prerequisites: Department consent.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CHEM 697 - Issues in Chemistry

Units: 3

Readings, discussion, and research on contemporary and/or significant issues in chemistry.

Prerequisites: M.S. Chemistry major.

Equivalent Quarter Course: CHEM 6999.

Repeatability: May be repeated for credit when content varies, for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CHEM 698 - Internship

Units: 1-3

Formal advanced work opportunities integrating the academic program with their career aspirations. Integral advanced hands-on experience enhancing education and preparing for professional and personal success.

Prerequisites: Department consent and minimum 3.0 GPA.

Credit Restrictions: No units may be applied to the Chemistry major.

Equivalent Quarter Course: CHEM 6898.

Repeatability: May be repeated with department consent for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

Communication

COMM 100 - Public Speaking

Units: 3 ; G.E./G.R. Area: A1

Theory, practice, and evaluation of oral communication through public speeches. Emphasis on ethical responsibility, careful selection and development of ideas, logical organization, sound reasoning, audience analysis, and delivery of informative, persuasive, and argumentative discourse. Must earn C- or better for GE credit.

Equivalent Quarter Course: COMM 1000.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *A1- Lower Division Oral Communication*

COMM 104 - Interpersonal Communication

Units: 3 ; G.E./G.R. Area: A1

Study of principles of oral communication within interpersonal encounters. Emphasizes how to analyze communicative behavior and to practice applied listening and speaking strategies for improving oral communication skills and relationships in the interpersonal contexts of work, family, friendship, and romance. Must earn C- or better for GE credit.

Equivalent Quarter Course: COMM 1004.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *A1- Lower Division Oral Communication*

COMM 202 - Communication, Media and Culture

Units: 4

Explores culture as expression of human agency, hinging on a reciprocal relationship between communication and culture. Critically investigates embodied, symbolic, technological, material, oral, visual, social, and ideological aspects of cultural studies.

Equivalent Quarter Course: COMM 3002.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

COMM 203 - Communication Theories

Units: 4

Students identify, analyze, and apply a broad spectrum of communication theories. Includes traditional and critical perspectives, with emphasis on cultural and diversity issues, and the impact of emerging media technologies.

Equivalent Quarter Course: COMM 3003.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

COMM 206 - New Media in the Digital Age

Units: 4

Interrogate how the social, political, and cultural landscape has changed in relationship to digital media technologies. Develop critical resources to better understand the history and future of these new media technologies and emerging communicative forms.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 224 - Argumentation and Advocacy

Units: 4

Students identify, analyze, and apply theories of argumentation to controversies in the personal, professional, and public spheres, emphasizing traditional and critical/cultural approaches to evidence and reasoning.

Equivalent Quarter Course: COMM 3204.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

COMM 235 - Famous Politics: Media, Celebrity and Social Life

Units: 3

In this 3-unit course we examine the role of celebrity in our social/political lives. We explore electoral politics as well as cultural politics and larger global politics as they relate to the phenomenon of celebrity.

Equivalent Quarter Course: COMM 3245.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

COMM 240 - Visual Communication and Culture

Units: 4

Students will become critical readers of visual images by employing a variety of communication-based theoretical frameworks and analytical approaches (e.g. semiotics, rhetoric) to visual artifacts, texts and acts. Explore how visual images persuade. Students will select examples of visual rhetoric to analyze, which culminates in an essay and creative project of their choosing.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

COMM 255 - Queer Cultures: Knowledge and Literacy

Units: 3 ; G.E./G.R. Area: D1-3; Social Justice

Examination of queer life through creative expression in the mainstream and as a form of self-representation. We begin with terms that communities use to express themselves. Inquiries are grounded in queer theory and critical cultural studies.

Equivalent Quarter Course: COMM 2550.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *D1-3 - Lower Division Social Sciences, Overlay - Social Justice*

COMM 256 - Persuasion Theory and Practice

Units: 4

Identify, examine, and apply theories of persuasive communication. Emphasis on cultural and diversity variables, media, and strategic applications.

Equivalent Quarter Course: COMM 3560; COMM 320 also equivalent to COMM 3560.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

COMM 260 - Documentary Film Studies

Units: 3 ; G.E./G.R. Area: C2

History of documentary film to the present day. Students will screen some of the most prolific documentary films ever made and will discuss their impact on society as art, politics, social impact and social justice.

Equivalent Quarter Course: COMM 2600.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *C2 - Lower Division Humanities*

COMM 266 - Digital Media Production Abroad

Units: 3 ; G.E./G.R. Area: C2

Theories and practices of digital media production. Students will produce VNRs, short documentaries, still-life images, and travel blogs while learning technical skills and executing their understanding of the planning process of digital media production in a multicultural environment. *Lecture Units: 2; Activity Units: 1*

Equivalent Quarter Course: COMM 3691.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice)

G.E./G.R. Area Satisfied: *C2 - Lower Division Humanities*

COMM 300 - History and Criticism of Communication

Units: 4

History of communication and media emphasizing origins and significant developments through the ages. Critical study of media exploring its effects, roles, dramatic innovation in emerging media technologies, and impact of globalization in recent years.

Equivalent Quarter Course: COMM 3000.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 304 - Quantitative Communication Research Methods

Units: 4

An overview of quantitative communication research methods, including survey research, observation, and experiments. Emphasizes design of research, writing, understanding, and presentation of descriptive and inferential statistics in communication.

Equivalent Quarter Course: COMM 3004.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

COMM 305 - Qualitative Communication Research Methods

Units: 4

An overview of qualitative communication research methods, measures, analysis, and theoretical understandings of "audience". Students become versed in the advantages of qualitative approaches and conduct primary qualitative research and analysis.

Equivalent Quarter Course: COMM 3005.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

COMM 310 - Introduction to Organizational Communication & Long Term Thinking

Units: 4

Analysis and application of theory and principles of human communication in private and public organizational settings. Historical survey of metaphors and their influence on organizational practices. Developing a long term and futures thinking mindset. Principles of strategic scenario planning, forecasting.

Equivalent Quarter Course: COMM 3107.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

COMM 312 - Journalism History and Social Justice

Units: 4

History, organization, social role, and function of journalism and its potential to help bring about social change for justice and equity as it has done since the founding of the republic.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 314 - Journalism Theory and Practice

Units: 4

Analysis of journalism and other media through a lens of cultural studies. Students examine media content and norms that guide news production, including organizational and other ideological influences on content. Students examine and begin to practice journalism as social justice.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

COMM 316 - Media and Government

Units: 4

Critical relationships between the news media and government. Attention will be devoted to how the news media influence the nation's social, cultural, economic and political development and how a lack of trust diminishes both critical entities.

Equivalent Quarter Course: COMM 4150.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 318 - Journalism Law and Ethics

Units: 4

Explores ethical and legal questions in the context of digital and traditional media from a variety of theoretical perspectives. Examines foundations of freedom of speech and press. Topics include censorship, libel, access to information, copyright, invasion of privacy, electronic speech.

Equivalent Quarter Course: COMM 4205.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 320 - Persuasion in Media

Units: 4

Examination of rhetorical influences of messages channeled through a broad variety of media, as well as rhetorical messages that influence various media.

Equivalent Quarter Course: COMM 3560; COMM 256 also equivalent to COMM 3560

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 321 - Research in Persuasive Communication

Units: 4

Social-scientific approaches to the study of persuasion. Emphasis on application of persuasion theories and principles, research on attitude structure and formation, attitude-behavior relationship, audience analysis, communication campaigns, and public opinion.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

COMM 323 - Communication of Difference

Units: 4

Students will examine issues of difference in communication and media. Emphasis will vary each semester, with topics that may include but are not limited to sex/gender, race/ethnicity, age, religion, income inequality.

Equivalent Quarter Course: COMM 4300.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 326 - Social Media and Social Change Literacies

Units: 4

Introduces the literature about and direct experience of social media literacies: research foundations and

best practices of individual digital participation and collective participatory culture, the use of collaborative media and methodologies, and the application of network know-how to life online.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

COMM 328 - Multimedia Reporting & Writing I

Units: 4

Foundations of the journalistic craft, including reporting methods, genres of news and writing approaches. Topics include interviewing, basic research, inverted pyramid leads, background and nut graphs, and basic multimedia elements. Emphasis on diverse publics. *Lecture Units: 1; Activity Units: 3*

Equivalent Quarter Course: COMM 2200.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 330 - Critical/Cultural Studies

Units: 4

With emphasis on contemporary digital media, investigates the evolution and interplay of communication, media technologies and content, culture and society, to explore constructions of identity (race, gender, ability, age), social relations/community, political discourse, and moral/political economies.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 333 - Photojournalism

Units: 2

Essentials of documentary-style journalistic photography, including news, sports and entertainment genres. Students create individual portfolios and serve as photographers for Pioneer Media .

Equivalent Quarter Course: COMM 3225.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 335 - Visual and Multimedia Storytelling I

Units: 2

This course explores visual storytelling in journalism. Students use video, sound, and still images to produce publishable multimedia work relating to social change or highlighting social problems and solutions.

Equivalent Quarter Course: COMM 3224.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 357 - Principles of Advertising

Units: 4

Principles of advertising applied to the creation and production of advertising messages in their many forms including the investigation of the psychological, sociological, economic, and legal aspects.

Co-requisites:

Equivalent Quarter Course: COMM 4520.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

COMM 358 - Principles of Public Relations

Units: 4

Principles of public relations as applied to the creation and production of messages for institutions and industry. Analysis of various and diverse "publics" and public opinion including investigation of the psychological, sociological, economic, political and ethical foundations.

Co-requisites:

Equivalent Quarter Course: COMM 4510.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

COMM 361 - Professional Speaking in Strategic Communication

Units: 4

Principles, techniques, and skills for interpersonal and public speaking in advertising, public relations, and marketing communication. Topics include pitch presentations, talking to media, client briefings, speaker training modules, and multimedia presentations. Emphasis on message development, delivery, preparation and multimedia aids.

Co-requisites:

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

COMM 362 - User Experience Research and Design

Units: 4

Theories and principles of human-centered design for effective communication. Possible topics include usability testing and design across multimedia platforms from mobility, tangibility and ubiquitous applications to human-future interaction.

Co-requisites:

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

COMM 369 - Documentary History and Theory Abroad

Units: 4 ; G.E./G.R. Area: C4

Explores indigenous documentary films of host country from 19th century to present. Engages documentary at a multi-cultural level as global consumer and citizen; examine and understand influence of multi-media visual rhetoric; analyze, discuss, create arguments about messages in documentary films.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: COMM 3690.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities*

COMM 387 - Advertising Design and Production

Units: 4

An applied course emphasizing creative copywriting and layout design, media planning and buying, and account management. Students acquire hands-on experience in the preparation of advertising materials for the Pioneer Advertising Agency.

Prerequisites: COMM 357.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

COMM 388 - Public Relations Practice

Units: 4

An applied course emphasizing message writing, editing, graphic design, layout, and dissemination across multimedia platforms for communication with various organizational publics. Students acquire hands-on experience in the preparation of departmental publications.

Prerequisites: COMM 358.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be*

taught both online and on-ground).

Grading: A-F grading only.

COMM 398 - Internship

Units: 1-4

Supervised work experience in which student completes academic assignments integrated with off-campus paid or volunteer activities.

Prerequisites: Department consent and minimum 2.0 GPA.

Credit Restrictions: Not open for credit in Communication major or minor.

Equivalent Quarter Course: COMM 3898.

Repeatability: May be repeated for credit, for a maximum of 8 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

COMM 400 - Film, Communication and Culture

Units: 4

Analyzes the communicative impact of film on culture, and how culture influences film.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 410 - Organizing Cultures of Innovation and Empathy

Units: 4

How do we create cultures of innovation and empathy? Negotiating and designing effective strategic conversations within organizations explored. Case studies of the past, present and anticipated future of organizational relationships discussed. Organizational pathologies and healthy communication re-framed with innovative perspectives.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

COMM 416 - Communication, Technology, and Social Change

Units: 4

Investigates the interplay of communication, media technologies, content and society, looking at the way media and communication participate in structuring identity, social relations, political economy. Examines participatory culture, media change, innovation, the participation gap, informal learning and knowledge communities.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be*

taught both online and on-ground).

Grading: A-F grading only.

COMM 417 - Game Studies

Units: 4

Considers games both as media and as sites of communication and culture. Games are studied through hands-on play and texts from a variety of disciplinary perspectives. Course may encompass commercial, academic, and independent games.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

COMM 418 - Organizational Change, Creativity, and Innovation

Units: 4

The ability to manage innovation and change in organizations is essential for increasingly turbulent environments. This course aims to enhance students' understanding of innovation and creative processes in organizations and how to manage such processes effectively.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

COMM 420 - Organizational Transformation

Units: 4

How can we anticipate the future of work? Learn about the new online economy and organizational change beyond one dominated by an economics of monopoly, extraction, and surveillance. Could the Internet be owned and governed differently? Visionary strategic leadership developed.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

COMM 425 - Digital Cultures

Units: 4

Identifies how computers, networks, and media technologies reproduce, reinforce, and rework cultural trends, norms, and values. Addresses media innovation and debates over social computing, artificial intelligence, virtual communities, virtual reality. Considers alternative ways to imagine and forecast emerging communication technologies.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be*

taught both online and on-ground).

Grading: A-F grading only.

COMM 428 - Multimedia Reporting and Writing II

Units: 4

Advanced multimedia reporting and writing techniques, feature writing styles, producing journalism for multiple genres such as sports, arts and culture, and politics. Emphasis on journalism for social impact. Students publish multimedia work in Pioneer Media. *Lecture Units: 1; Activity Units: 3*

Prerequisites: COMM 328.

Equivalent Quarter Course: COMM 3010.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 430 - Media Studies

Units: 4

Examines the historical, philosophical, technological, economic, political, and sociological dimensions of media studies as a field of inquiry. Emphasizes contemporary concerns in effects research and critical research.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

COMM 433 - Discourses of Difference

Units: 4

Students analyze, critique and create forms of spoken, written and visual communication that engage concepts of "difference". Topics may include gender, race, class, ethnicity, sexual identity, age, ability, and mental health.

Equivalent Quarter Course: COMM 4300 or COMM 4500.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

COMM 435 - Visual and Multimedia Storytelling II

Units: 2

Students will deepen their experience in multimedia storytelling using a number of software programs and techniques, including graphics, talent, music, and social media engagement. Students will be expected to create quality work to be published.

Prerequisites: COMM 333.

Equivalent Quarter Course: COMM 3223.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 453 - Strategic Communication Campaigns

Units: 4

Applies theories and principles of advertising, public relations, political campaigns and marketing communication to research, creation and production of all aspects of an actual campaign. Emphasis on the importance of a coordinated effort integrating various strategic communication tools.

Prerequisites: COMM 357 and COMM 358.

Equivalent Quarter Course: COMM 4530.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

COMM 455 - Communication, Media, and Society

Units: 4

An overview of media studies as a field of inquiry, including an evolutionary historical perspective culminating in the present state of the field. Emphasis is given to inquiry and analysis of content, medium and social interactions around the medium.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

COMM 461 - Popular Culture

Units: 4

Critical analysis of how popular culture (music, television, advertising, movies, fashion, style, social media, etc.) works and doesn't work dialectically in our interactions with self and others.

Equivalent Quarter Course: COMM 4610.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 465 - Identity and Difference in Media

Units: 4

Examines the construction and deployment of identity in and through electronic media. Takes up theories of difference, such as intersectionality, disidentification, and homonormativity. Emphasizes marginality, border-crossings, transgression, and critical examinations of oppression and resistance.

Prerequisites: Department consent.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

COMM 470 - Communication Campaigns

Units: 4

Study of research, practice, and criticism of communication campaigns in public, political, and professional settings. Topics may include persuasion, media effects, political communication, relationships between public relations, advertising, and media.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

COMM 471 - Strategic Communication and Difference

Units: 4

Discussion of current theories, research, and issues to increase understanding and insight into developing effective strategic communication approaches and messages to reach and engage diverse audiences. Topics may include ethnicity, social economic status, gender, age, sexual identity, religion, and ability.

Co-requisites:

Equivalent Quarter Course: COMM 4500 or COMM 4515.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

COMM 475 - Digital Organizational Communication

Units: 4

This course provides knowledge, skills, and terminology to understand development and management of digital economy organizations/communities. Students learn to engage with, critique, and discuss online communities through timely readings, guest lecturers, discussions, influential industry blogs and academic publications.

Prerequisites: Department consent.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

COMM 480 - Moral Economies of Digital Media

Units: 4

What are social and other emerging media? Who gains? How are they transforming the media landscape and how we inhabit the world? Analysis of a range of media tools and their implications toward what Trebor Scholz calls "participation literacy."

Prerequisites: Department consent.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

COMM 485 - Future of Media and Society

Units: 4

Study of the landscape of current and future media with the aim of creating stories about emerging media. Covers short, medium and long-term evolution in technology and culture. Uses scenario planning as a technique for considering complex, unpredictable interrelationships.

Prerequisites: Department consent.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

COMM 488 - Conflict Management

Units: 4

Theory and application of communication methods for managing expressed disagreements in personal, professional, and public communication spheres.

Equivalent Quarter Course: COMM 4880.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 490 - Independent Study

Units: 1-4

Independent study under the supervision a department faculty member.

Prerequisites: Department consent and minimum 2.0 GPA.

Credit Restrictions: No more than 12 units of independent study may be applied in the major department and 8 units in other departments to a baccalaureate degree.

Equivalent Quarter Course: COMM 4900.

Repeatability: May be repeated for credit, with department consent, for a total of 12 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

COMM 493 - Capstone: Social Justice Project

Units: 2

The student experience culminates in a long-form multimedia project. Students produce and

publish multimedia work with an underlying theme relating to social change or highlighting social problems and solutions.

Prerequisites: All of: COMM 328, COMM 335, COMM 428.

Equivalent Quarter Course: COMM 3221.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

COMM 495 - Journalism Practicum

Units: 2

Students spend at least one semester producing journalism for Pioneer Media , operating under the direction of a faculty advisor and editor-in-chief. May be repeated once.

Prerequisites: COMM 328 and COMM 335.

Equivalent Quarter Course: COMM 3220.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 496 - Topics in Communication

Units: 4

Selected topics in communication beyond regular course offerings. Subjects will vary and will be specified at time of offering.

Repeatability: May be repeated for credit when content varies for a maximum of 8 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

COMM 497 - Issues in Communication

Units: 4

Students will examine an important issue in communication, with attention to rhetorical, technological, critical, and cultural impacts; variable content.

Equivalent Quarter Course: COMM 3999.

Repeatability: May be repeated once for credit for a maximum of 8 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Communication: Graduate

COMM 600 - Introduction to Graduate Study

Units: 1

Introduction to the skills and attitudes relating to scholarly writing; includes approaching and justifying research, literature reviews, practice writing research proposals, conducting advanced library research, and the ethics of research.

Equivalent Quarter Course: COMM 6000.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 601 - Theories in Communication

Units: 4

In-depth reading of theories of communication across the discipline/field. Examines interconnections among theories, development of theories of communication, and the relationship of theory to criticism and practice.

Equivalent Quarter Course: COMM 6010.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 602 - Critical Cultural Methods

Units: 4

Contemporary perspectives on cultural studies as an interdisciplinary field of inquiry and as a research method. Emphasizes foundational scholars and commonly used methods such as content analysis, political economy and audience research.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 603 - Advanced Quantitative Research Methods

Units: 4

Quantitative approaches to communication social-scientific research, emphasizing applied research skills. Covers research design, statistical and data analysis, and recent advances in quantitative inquiry.

Prerequisites: COMM 304.

Equivalent Quarter Course: COMM 6050.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 604 - Advanced Qualitative Research Methods

Units: 4

Qualitative approaches to communication research, emphasizing applied research skills. Covers major

traditions in communication qualitative research and recent advances in interpretive methods.

Equivalent Quarter Course: COMM 6040.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 605 - Contemporary Rhetoric

Units: 4

Integrates the study of messages and mediatized communication within public and professional spheres, engaging tensions among theory, criticism, practice, service, and ethics across research in rhetoric, communication, and media.

Equivalent Quarter Course: COMM 6400.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 620 - Internship in Communication

Units: 1-4

Supervised experience in a variety of communication activities inside and outside the university.

Prerequisites: Department consent.

Equivalent Quarter Course: COMM 6200.

Repeatability: May be repeated for credit for a maximum of 12 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

COMM 625 - Teaching Communication

Units: 4

Theories of learning and motivations to learn. Development of strategies to communicate course content and to encourage learning for the diversity of students in the communication classroom.

Equivalent Quarter Course: COMM 6250.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 630 - Media Studies

Units: 4

Examines the historical, philosophical, technological, economic, political, and sociological dimensions of media studies as a field of inquiry. Emphasizes contemporary concerns in effects research and critical research.

Equivalent Quarter Course: COMM 6300.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 640 - Advanced Rhetorical Studies

Units: 4

Selected topics from the philosophy and theory of rhetoric, with original research by the student in areas of particular interest; special attention to the literature relating to selected topics.

Prerequisites: COMM 605.

Equivalent Quarter Course: COMM 6030.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 645 - Media and Globalization

Units: 4

Examines perspectives on globalization of media and the special role media play in globalization. Draws perspectives from political economy and critical media studies.

Equivalent Quarter Course: COMM 6450.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 655 - Communication, Media, and Society

Units: 4

An overview of media studies as a field of inquiry, including an evolutionary historical perspective culminating in the present state of the field. Emphasis is given to inquiry at the levels of content, medium and social interactions around the medium.

Equivalent Quarter Course: COMM 6020.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 665 - Identity and Difference in Media

Units: 4

Examines the construction and deployment of identity in and through electronic media. Takes up theories of difference, such as intersectionality, disidentification and homonormativity. Emphasizes marginality, border-crossings, transgression, and critical examinations of oppression and resistance.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 670 - Communication Campaigns

Units: 4

Study of research, practice, and criticism of communication campaigns in public, political, and professional settings. Topics may include persuasion, media effects, political communication, relationships between public relations, advertising, and media.

Equivalent Quarter Course: COMM 6700.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 675 - Digital Organizational Communication

Units: 4

This course provides knowledge, skills, and terminology to understand development and management of digital economy organizations/communities. Students learn to engage with, critique, and discuss online communities through timely readings, guest lecturers, discussions, influential industry blogs and academic publications.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

COMM 680 - Moral Economies of Digital Media

Units: 4

Analysis of a range of media tools and their implications toward what Trebor Scholz calls "participation literacy." What are social and other emerging media? Who gains? How are they transforming the media landscape and how we inhabit the world?

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

COMM 685 - Future of Media and Society

Units: 4

Study of the landscape of current and future media with the aim of creating stories about emerging media. Covers short, medium and long-term evolution in technology and culture. Uses scenario planning as a technique for considering complex, unpredictable interrelationships.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

COMM 690 - Independent Study

Units: 1-4

Independent study in Communications under supervision of instructor.

Prerequisites: Department consent and minimum 3.0 GPA.

Equivalent Quarter Course: COMM 6900.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 691 - University Thesis

Units: 1-6

Development and writing of a formal research paper for submission to the university in the specified format. Supervision by departmental committee, two of whom must be Communication faculty members. Oral defense is required.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: COMM 6910.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

COMM 692 - Comprehensive Exams

Units: 2

Graduate comprehensive examination. Directed readings, comprehensive essay exam questions, and an oral defense.

Prerequisites: Department consent.

Equivalent Quarter Course: COMM 6901.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

COMM 693 - Project

Units: 1-6

Development of original product summarized in a written abstract. Project and abstract are submitted to the department which specifies their formats. Supervision by departmental committee, at least two must be Communication faculty members. Oral defense is required.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: COMM 6899.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

COMM 696 - Topics in Communication

Units: 4

Selected topics in communication beyond regular course offerings. Subjects will vary and will be specified at time of offering.

Prerequisites: Department consent.

Equivalent Quarter Course: COMM 6100.

Repeatability: May be repeated for credit when content varies for a maximum of 8 units.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

COMM 697 - Issues In Communication

Units: 4

Readings, discussion, and research on contemporary and/or significant issues in communication.

Equivalent Quarter Course: COMM 6999.

Repeatability: May be repeated for credit when content varies, for a maximum of 8 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

COMM 698 - Internship

Units: 1-3

Formal advanced work opportunities integrating the academic program with their career aspirations. Integral advanced hands-on experience enhancing education and preparing for professional and personal success.

Prerequisites: Department consent and minimum 3.0 GPA.

Credit Restrictions: No more than 3 units may be applied to the Communication major.

Equivalent Quarter Course: COMM 6898.

Repeatability: May be repeated with department consent for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

Computer Engineering

CMPE 322 - Digital Design Laboratory

Units: 1

Design and implementation of combinational and sequential digital logic circuits. Digital Logic Gates, Boolean Algebra, K-maps, latches, flip-flops, registers, multiplexers, state machines. Hardware description language and FPGA programming, interface with digital hardware components.

Co-requisites: CS 321.

Equivalent Quarter Course: CMPE 3432.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMPE 330 - Electric Circuits II

Units: 3

A study of transistor-amplifier design, small- and large-signal models for diodes, BJTs, and MOSFETS, including operating points, biasing, and frequency responses. Active filters and amplifier topologies and design strategies. Introduction to design and operation of digital circuit components. *Lecture Units: 2; Lab Units: 1*

Prerequisites: ENGR 230.

Equivalent Quarter Course: CMPE 3010.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMPE 344 - Microprocessor Laboratory

Units: 3

Microprocessor organization, operation, and programming. Hardware/software interaction, I/O port interfacing, interfacing with analog and digital electronic devices. *Lecture Units: 2; Lab Units: 1*

Prerequisites: CS 301.

Equivalent Quarter Course: CMPE 3434.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMPE 370 - Digital Signal Processing I

Units: 3

Mathematical modeling of signals and systems. Continuous and discrete signals, with applications to audio, images, video, communications, and control. Frequency domain modeling and frequency response. Sampling of continuous-time signals. A simulation-based laboratory is part of the course. *Lecture Units: 2; Lab Units: 1*

Prerequisites: CMPE 330.

Equivalent Quarter Course: CMPE 3752.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMPE 398 - Internship

Units: 1-3

Introduction to the internship experience; integration of the academic program with career aspirations; emphasis on internship readiness and preparation for professional success.

Prerequisites: Department consent and minimum 2.0 GPA.

Credit Restrictions: No more than 3 units may be applied to the Engineering major.

Equivalent Quarter Course: CMPE 3898.

Repeatability: May be repeated with department consent for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

CMPE 421 - Computer Architecture II

Units: 3

Advanced computer organization and design. Topics chosen from among RISC architectures, computer arithmetic, pipelining, cache memory and parallel processors.

Prerequisites: CS 321 and CMPE 322.

Equivalent Quarter Course: CMPE 4435.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMPE 430 - Analog Design

Units: 3

Single stage and multistage transistor amplifier design. Biasing circuits, amplifier gain, and input/output impedance. Transient analysis and frequency analysis of active and passive networks. Bode plots and Nyquist stability. *Lecture Units: 2; Lab Units: 1*

Prerequisites: CMPE 330.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMPE 470 - Digital Signal Processing II

Units: 4

Implementation of signal processing systems in a floating-point DSP processor. DSP processor programming, memory management, interrupts, interfacing with registers, assembly language instructions, hardware datasheet interpretation. Real-time DSP applications involving filtering, and A/D and D/A conversion. *Lecture Units: 3; Lab Units: 1*

Prerequisites: CMPE 370.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMPE 480 - VLSI Circuit Design/Layout

Units: 3

Fundamental design techniques for VLSI circuits. Properties of silicon, polysilicon, metal, n-type, and p-type materials. NMOS and PMOS transistor sizing and delay for logic functions. Implementation of complex integrated circuits on a microchip. Use of computer aided design tools.

Prerequisites: CHEM 110 and CS 321.

Equivalent Quarter Course: CMPE 4432.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMPE 490 - Independent Study

Units: 1-4

Independent study under the supervision a department faculty member.

Prerequisites: Department consent and minimum 2.0 GPA.

Credit Restrictions: No more than 12 units of independent study may be applied in the major department and 8 units in other departments to a baccalaureate degree.

Equivalent Quarter Course: CMPE 4900.

Repeatability: May be repeated for credit, with department consent, for a total of 12 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

CMPE 492 - Senior Design I

Units: 3

Generation of engineering career documents, such as resume cover letter, project proposal, Gantt chart, bill of materials, and patent application. Initial contact with client, and project planning. Introduction to Scrum project methodology.

Prerequisites: All of: ENGR 310, CMPE 344, CMPE 370.

Equivalent Quarter Course: CMPE 4610.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMPE 493 - Senior Capstone: Senior Design II

Units: 3

Technical development and completion of a capstone design project. Continuous feedback from project clients, teammates, and instructor. Introduction to Scrum methodology. Mock U.S. Patent application, and completion of a technical journal article. Satisfies the capstone requirement.

Prerequisites: CMPE 492.

Co-requisites: CMPE 480.

Equivalent Quarter Course: CMPE 4620.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMPE 497 - Issues in Computer Engineering

Units: 3

Readings, discussion, and research on contemporary and/or significant issues in engineering.

Equivalent Quarter Course: CMPE 3999.

Repeatability: May be repeated for credit when content varies, for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

Computer Science

CS 100 - Programming for Everyone

Units: 3

An introduction to computer programming for non majors. Topics include interdisciplinary computing applications, computer systems, algorithm design, and programming language control structures. Programming projects in the Python programming language.

Credit Restrictions: Not for Computer Science major or minor credit.

Equivalent Quarter Course: CS 1160.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

CS 101 - Computer Science I

Units: 4

An introduction to computer programming for computer science majors. Topics include problem solving, algorithms, basic control structures, and program design. Programming projects in Python or other high level programming language. *Lecture Units: 3; Lab Units: 1*

Prerequisites: Mathematics/QR Placement Category I or II, or successful completion of GE area B4.

Equivalent Quarter Course: CS 1160 and CS 2360.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CS 180 - Computers in Action

Units: 3

Introduction to computer applications and the role of computer technology in society. Introduction to

word processing, spreadsheet applications, presentation software, basic database management, and website development.

Credit Restrictions: Not for computer science major or minor credit

Equivalent Quarter Course: CS 1020.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

CS 200 - Advanced Programming for Everyone

Units: 3

Further development of programming and problem solving skills, debugging techniques and testing. Topics include elementary data structures, object oriented design, and searching, sorting, and graph algorithms. Programming projects in the Python programming language.

Prerequisites: CS 100.

Credit Restrictions: Not for Computer Science major or minor credit.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

CS 201 - Computer Science II

Units: 4

Further development of programming and problem solving skills in the C++ programming language. Topics include Abstract Data Types (ADTs), data structures (stacks, queues, trees), and object oriented design. Sorting and searching algorithms. *Lecture Units: 3; Lab Units: 1*

Prerequisites: CS 101 with grade C- or better.

Equivalent Quarter Course: CS 2360 and CS 2370.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CS 211 - Discrete Structures

Units: 3

Propositional logic and predicate calculus, set theory, inference, induction, recursion, divide-and-conquer, enumeration, graphs and topology, trees, binary trees and traversals, Boolean algebra, logic gates, asymptotic notation and algorithm analysis, combinatorics, cryptography, discrete probability, computational modeling.

Prerequisites: MATH 130 with grade C- or better.

Equivalent Quarter Course: MATH 2150.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

Cross-listed: MATH 211

CS 221 - Computer Organization and Assembly Language

Units: 3

A study of the functional organization of digital computers. Fundamental principles of control and datapath units, program counter, ALU, multiplexers, registers, and memory. Digital logic gates and Boolean functions. Introduction to assemblers, linkers, and loaders. Programming with assembly language.

Prerequisites: CS 100 or CS 101, both with grade C- or better.

Equivalent Quarter Course: CS 2430.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CS 230 - Computing and Social Responsibility

Units: 3 ; G.E./G.R. Area: D1-3

Social impact and ethical aspects of computing, information privacy, security, social networking, software piracy, system reliability, human-computer interaction, net neutrality, workforce displacement, the Digital Divide, societal dependence on computing, the Internet as a democratic instrument of social change, and cyberethics.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D1-3 - Lower Division Social Sciences*

CS 250 - Introduction to Web Programming

Units: 3

Technology and design of web systems and services for non majors. Human factors issues, computer-human interfaces design, web system design, development and testing. Website development using multimedia graphics, image, and animation tools. Topics include e-commerce solutions and networking fundamentals.

Credit Restrictions: Not for CS major credit

Equivalent Quarter Course: CS 2020.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

CS 300 - Discovering Computer Science

Units: 3

Introduction to computer science. Computational problem solving as a vehicle for scientific inquiry across disciplinary boundaries, computer hardware and software, fundamental principles in computer science including abstraction, efficiency and algorithmic design, programming in Closure, Python, or other high-level programming languages.

Strongly Recommended Preparation: Any GE area B4 course.

Prerequisites: Completion of GE area B4.

Credit Restrictions: Not for Computer Science major or minor credit.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

CS 301 - Data Structures and Algorithms

Units: 4

Design and implementation of abstract data structures including stacks, queues, doubly-linked and circularly-linked lists, binary search trees, heaps, priority queues and graphs; algorithmic analysis and asymptotic notation; binary search, heapsort, merge sort, quicksort, and radix sort. *Discussion Units: 3; Lab Units: 1*

Prerequisites: CS 201 and CS 211.

Equivalent Quarter Course: CS 3240.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CS 311 - Programming Language Concepts

Units: 3

Survey and comparison of a variety of computer languages and their use in particular domains. Topics include formal descriptions of syntax and semantics, control structures, data representation, design and implementation of imperative and functional languages. Programming projects in several languages.

Prerequisites: CS 201 and CS 221.

Equivalent Quarter Course: CS 3120.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CS 321 - Computer Architecture

Units: 3

Logical design of digital computers. Boolean algebra, combinational and sequential circuits, computer arithmetic, memories, integrated circuits, control processors, input/output.

Prerequisites: CS 211 and CS 221, both with grade C- or better.

Equivalent Quarter Course: CS 3430.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CS 350 - Databases for Social and Health Sciences

Units: 3

Relational and hierarchical data models, database system architecture, and approaches for managing large volumes of social and health sciences data.

Prerequisites: CS 200.

Credit Restrictions: Not for Computer Science major or minor credit.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

CS 351 - Website Development

Units: 3

Website development emphasizing presentation layer with client side and server side technologies. Topics covered include HTML, CSS, media, JavaScript, CGI server-side programming.

Prerequisites: CS 301.

Equivalent Quarter Course: CS 3520.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CS 400 - Computer Programming for Science

Units: 3

An introduction to programming for science majors. Emphasis on scientific applications and data manipulation using Python and associated scientific libraries.

Prerequisites: MATH 130.

Credit Restrictions: Not for computer science major or minor credit.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

CS 401 - Software Engineering

Units: 4

Concepts and issues in the development of large software projects. Approaches to requirements, analysis, design, implementation, testing, and maintenance of high-quality software. Systems for software design,

management, documentation and testing such as UML, GIT, Javadoc and Junit. Programming in Java.

Lecture Units: 3; Lab Units: 1

Prerequisites: CS 301 with grade C- or better.

Equivalent Quarter Course: CS 4310.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CS 411 - Automata and Computation

Units: 3

Formal models of computation, languages and computability, deterministic and non-deterministic finite automata, regular expressions, pushdown automata, context-free languages, Pumping Lemmas, Turing machines, decidability, reducibility, and undecidable problems.

Prerequisites: CS 211 and MATH 225, both with grade C- or better.

Equivalent Quarter Course: CS 4170.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CS 413 - Analysis of Algorithms

Units: 3

Asymptotic notation, analysis framework, and efficiency classes, recurrence relations, algorithmic design methodology, searching and sorting algorithms, string matching, heaps and priority queues, doubly-linked and circularly-linked lists; trees and balancing; graph algorithms including breath-first and depth-first search, and hashing.

Prerequisites: CS/MATH 211 and CS 301.

Equivalent Quarter Course: CS 4245

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CS 421 - Operating Systems

Units: 3

Principles of operating system design and implementation. Concurrent processes, interprocess communication, job and process scheduling, deadlock. Issues in memory management (virtual memory, segmentation, paging) and auxiliary storage management (file systems, directory structuring, protection mechanisms). Performance issues. Programming projects.

Prerequisites: CS 301 with grade C- or better.

Equivalent Quarter Course: CS 4560.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CS 431 - Database Architecture

Units: 3

Data models, data description and data manipulation languages. Schemas, query processing, database system architecture. Integrity, concurrency, and security techniques. Implementation of data models in a real database.

Prerequisites: CS 301 with grade C- or better.

Equivalent Quarter Course: CS 4660 or CS 4665.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CS 441 - Computer Networks

Units: 3

Computer network analysis and design. Fundamentals of data communications: media, transmission, encoding, error detection and handling, link control, packet switching. Network architecture and topology. Network, Transport, and Application layer protocols, services, design issues and performance. Programming assignments using TCP/IP.

Prerequisites: CS 301.

Equivalent Quarter Course: CS 3590 or CS 4590.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CS 453 - Mobile Programming

Units: 3

Current practices and trends in software design, development, and deployment of mobile applications and systems. Topics include modern mobile device application development and related sensor and system technologies.

Prerequisites: CS 301 with grade C- or better.

Equivalent Quarter Course: CS 4521.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CS 455 - Computer Graphics

Units: 3

Survey of computer graphics hardware, algorithms, techniques, and standards. Software development using current graphic frameworks.

Prerequisites: CS 301 with grade C- or better.

Equivalent Quarter Course: CS 4840.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CS 461 - Artificial Intelligence

Units: 3

Intelligence as computation, rational agent architecture, state spaces, breadth-first and depth-first search, heuristic search, A* algorithm, game playing, hill-climbing and optimization, neural networks, knowledge representation, production systems, machine learning techniques, introduction to Lisp and Scheme. Programming projects.

Prerequisites: CS 301 with grade C- or better.

Equivalent Quarter Course: CS 4810.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CS 471 - Security and Information Assurance

Units: 3

Fundamentals of network and computer security. Security services and mechanisms, models, cryptography, network and wireless security, digital forensics, security threats and vulnerabilities, risk analysis and management models, security attacks and policies, and legal and regulatory issues. Programming projects.

Prerequisites: CS 301 with grade C- or better.

Equivalent Quarter Course: CS 4245 or CS 4526 or CS 4527.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CS 490 - Independent Study

Units: 1-4

Independent study in computer science under the supervision of a member of the department faculty.

Prerequisites: Department consent and minimum 2.0 GPA.

Credit Restrictions: No more than 12 units of independent study may be applied in the major department and 8 units in other departments to a baccalaureate degree.

Equivalent Quarter Course: CS 4900.

Repeatability: May be repeated for credit with consent of instructor, for a maximum of 12 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

CS 497 - Topics in Computer Science

Units: 3

Selected relevant subjects in Computer Science technologies and applications.

Prerequisites: CS 301 with grade C- or better.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CS 498 - Internship

Units: 1-3

Supervised work experience in which student completes academic assignments integrated with off-campus paid or volunteer activities.

Prerequisites: Department consent, minimum 2.0 GPA., junior or senior standing and all of: CS 101, CS 201, CS 211, CS 221, CS 230, MATH 130, MATH 131, MATH 225, PHYS 135.

Credit Restrictions: A maximum of 3 units will be accepted toward the Computer Science major.

Equivalent Quarter Course: CS 3898.

Repeatability: May be repeated for credit, for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

Computer Science: Graduate

CS 601 - Advanced Algorithms

Units: 3

Design, analysis, and implementation of algorithms; asymptotic notation and efficiency classes; recurrence relations; advanced searching and sorting techniques; string matching; heaps and priority queues; linked structures; balanced and threaded trees; graph algorithms; heuristics; intractable problems; other advanced techniques. Programming projects.

Prerequisites: CS 401 and CS 413; or M.S. Computer Science major.

Credit Restrictions: Open to M.S. or B.S. Computer Science majors only.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CS 603 - Advanced Software Engineering

Units: 3

Advanced concepts of object-oriented design; software development life-cycle models; software modeling; requirements gathering and analysis; pattern-based design of software; patterns as re-usable architecture; implementation of layered architecture code; software testing. Programming projects and review of literature.

Prerequisites: CS 401 or CS 601.

Credit Restrictions: Computer Science M.S. or B.S. students only.

Equivalent Quarter Course: CS 6310.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CS 605 - Information Coding and Cryptography

Units: 3

The study of data coding and cryptography. Topics may include: information content, Markov models, data compression codes, error correction and detection codes, symmetric and asymmetric key exchange, and other cryptographic techniques. Programming assignments and review of literature.

Prerequisites: CS 301 or CS 601.

Credit Restrictions: Computer Science M.S. or B.S. students only

Equivalent Quarter Course: CS 6715 and CS 6520.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CS 607 - Parallel Programming

Units: 3

Parallel programming fundamental principles and programming techniques. Topics may include: parallel architectures, principles of parallel algorithm design, programming shared-address space systems and scalable systems, non-numerical and numerical algorithms, GPU Programming, Visualization tools. Programming projects and review of literature.

Prerequisites: CS 421 or CS 621.

Credit Restrictions: Computer Science M.S. or B.S. students only.

Equivalent Quarter Course: CS 6575.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CS 611 - Theory of Computation

Units: 3

Alphabets, strings and languages, regular languages and finite automata, context-free languages, grammars, context-sensitivity, Turing machines and Turing-Completeness, decidability, Church-Turing thesis, reducibility, time and space complexity classes, P versus NP, NP-Completeness and NP-Hard problems.

Prerequisites: CS 411 or M.S. Computer Science major.

Credit Restrictions: Computer Science M.S. or B.S. students only.

Equivalent Quarter Course: CS 6260.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CS 615 - Compiler Design

Units: 3

Overview of compilation, lexical analysis, regular expressions, context-free grammars, top-down parsing and bottom-up parsing, semantic analysis, attribute grammars, ASTs, type-checking, intermediate representations, and constructing simple compilers. Additional topics may include register allocation, optimization, and code generation. Programming projects.

Prerequisites: CS 411 or CS 611.

Credit Restrictions: Computer Science M.S. or B.S. students only.

Equivalent Quarter Course: CS 6110.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CS 621 - Operating Systems Design

Units: 3

Advanced concepts in operating systems theory and practice. Topics may include process synchronization, concurrency, resource management, security, performance evaluation, analytic models, human interfaces, and implementation issues. Programming assignments using open-source operating systems, and review of literature.

Prerequisites: CS 421 or M.S. Computer Science major.

Credit Restrictions: Computer Science M.S. or B.S. students only.

Equivalent Quarter Course: CS 6560.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CS 623 - Cloud Computing

Units: 3

Cloud computing theory and protocols. Topics may include: Infrastructure/Platform/Software - as-a-service, cloud OS, architectures including Federated Clouds, principles of Virtualization platforms, security / privacy issues, Internet of things / data-intensive computing. Programming projects and review of literature.

Prerequisites: CS 421 or CS 621.

Credit Restrictions: Computer Science M.S. or B.S. students only.

Equivalent Quarter Course: CS 6593.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CS 625 - Advanced Computer Architecture

Units: 3

Analysis and design of computer architecture. Topics may include: Processor: instruction set principles, building data path, Instruction Pipelining: data/control hazards, Memory Hierarchy: caches, virtual memory, data/thread-level parallelism, multicore and distributed processors. Programming assignments and review of literature.

Prerequisites: CS 421 or CS 621.

Credit Restrictions: Computer Science M.S. or B.S. students only.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CS 631 - Database Systems

Units: 3

Design issues in current database systems. Topics may include: data models, storage management and access, distributed systems, query languages and query optimization, database integrity and security, encryption and decryption, concurrency control. Programming projects and review of literature.

Prerequisites: CS 431 or CS 601.

Credit Restrictions: Computer Science M.S. or B.S. students only.

Equivalent Quarter Course: CS 6660.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CS 641 - Advanced Computer Networks

Units: 3

Advanced concepts in computer network theory and practice. Specific emphasis on protocols, services, design issues and performance. Topics may include routing, software-defined networks, data-centers, overlay networks, and wireless technologies. Programming assignments using TCP/IP, and review of

literature.

Prerequisites: CS 441 or CS 621.

Credit Restrictions: Computer Science M.S. or B.S. students only.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CS 643 - Distributed Systems

Units: 3

Distributed Systems theory and semantics. Topics may include: temporal logic, proof of program properties, time (logical clocks), state (distributed snapshots), fault-tolerance, replication, rollback recovery, processes and threads, Remote Procedure Calls, file systems. Programming projects and review of literature.

Prerequisites: CS 441 or CS 621.

Credit Restrictions: Computer Science M.S. or B.S. students only.

Equivalent Quarter Course: CS 6580.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CS 645 - Network Analysis and Design

Units: 3

The practice of network analysis and design. Topics may include estimation of traffic demand, requirements specification, topology design, network cost analysis, routing, wired and wireless technologies, design tools, and fault tolerance. Programming assignments and review of literature.

Prerequisites: CS 441 or CS 641.

Credit Restrictions: Computer Science M.S. or B.S. students only.

Equivalent Quarter Course: CS 6591.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CS 651 - Web Systems

Units: 3

Current practices and trends in software design, development, and deployment of web-based systems, with particular emphasis on e-commerce. Projects incorporating the latest technologies and techniques used by the Internet community. Review of literature.

Prerequisites: CS 351 and CS 401; or M.S. Computer Science major.

Credit Restrictions: Not open for credit to non-M.S. or non-B.S. Computer Science majors.

Equivalent Quarter Course: CS 6320.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CS 661 - Advanced Artificial Intelligence

Units: 3

Intelligence, rational agent design, state-spaces, search, heuristic functions and A*, game playing, knowledge representation, formal logic, reasoning, expert systems, machine learning paradigms including neural networks and genetic algorithms, introduction to Lisp and Scheme. Programming projects and review of literature.

Prerequisites: CS 411 or CS 611.

Credit Restrictions: Computer Science M.S. or B.S. students only.

Equivalent Quarter Course: CS 6810.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CS 663 - Computer Vision

Units: 3

Mathematical and algorithmic approaches to the problem of computing properties of the 3-D world from one or more digital images. Topics may include imaging, image processing, feature detection, calibration, stereopsis, motion, object recognition, tracking. Programming projects and review of literature.

Prerequisites: CS 401 or CS 601.

Credit Restrictions: Computer Science M.S. or B.S. students only.

Equivalent Quarter Course: CS 6825.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CS 665 - Human-Computer Interaction

Units: 3

Human-centered software design, interface paradigms, prototyping, performance models, usability testing, software logging, user observation, interaction styles, aesthetics, diversity and engagement, HCI in multimedia systems, collaboration, and communication systems. Programming projects and review of literature.

Prerequisites: CS 401 or CS 651.

Credit Restrictions: Computer Science M.S. or B.S. students only.

Equivalent Quarter Course: CS 4835.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CS 667 - Machine Learning

Units: 4

Introduction to machine learning with an emphasis on the underlying mathematics. Topics such as VC dimension, central limit theorem, gradient descent. Applications such as SVM and neural nets.

Prerequisites: MATH 230 and MATH 310; or M.S. Computer Science major.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Cross-listed: MATH 667.

CS 671 - Cybersecurity

Units: 3

Security principles, scope and vulnerabilities of Cyberspace, the problem of identity, privacy, malicious software, data security, cryptography, authentication in distributed systems, e-mail security, network security, wireless security, offensive security. Programming assignments and review of literature.

Prerequisites: CS 335 or M.S. Computer Science major.

Credit Restrictions: Computer Science M.S. or B.S. students only.

Equivalent Quarter Course: CS 6525.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CS 681 - Digital Signal Processing

Units: 3

Digital Signal Processing techniques and applications. Topics may include: Discrete Time Signals and Systems, Discrete Time Networks, Input-Output Relationships, Discrete Time Fourier Transform, Discrete Fourier Transform, IIR and FIR filter design, Power Spectrum Computation. Programming projects and review of literature.

Prerequisites: CS 401 or CS 601.

Credit Restrictions: Computer Science M.S. or B.S. students only.

Equivalent Quarter Course: CS 6752.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CS 683 - Computer Simulation

Units: 3

Introduction to construction and analysis of models by computer simulation. Study of discrete and/or continuous simulation languages. Applications to modeling technological, biological, industrial, and physical processes. Programming projects and review of literature.

Prerequisites: CS 401 or CS 601.

Credit Restrictions: Computer Science M.S. or B.S. students only.

Equivalent Quarter Course: CS 6870.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CS 690 - Independent Study

Units: 3

Selected research topics agreed on between the student and the faculty supervising the course. A plan of work completion must be approved prior to proceeding with the project. Progress reports, and a final report are required.

Prerequisites: Department consent and minimum 3.0 GPA.

Credit Restrictions: Computer Science M.S. students only.

Equivalent Quarter Course: CS 6900.

Repeatability: May be repeated for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CS 692 - Capstone Examinations

Units: 3

A synthesis of important areas of Computer Science, culminating in comprehensive examinations covering three required courses in the Master's degree: Advanced Algorithms, Theory of Computation, and Operating System Design.

Prerequisites: Department consent, minimum 3.0 GPA and advancement to candidacy.

Credit Restrictions: Computer Science M.S. students only.

Equivalent Quarter Course: CS 6901.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: CR/NC grading only.

CS 693 - Capstone Project

Units: 1-4

Implementation of a substantial project in an advanced area of computer science. Supervision by a

departmental committee, at least one of whom must be a California State University East Bay Computer Science faculty member. Scientific literature research, a written report and an oral presentation is required.

Prerequisites: Department consent, minimum 3.0 GPA and advancement to candidacy.

Credit Restrictions: Computer Science M.S. students only.

Equivalent Quarter Course: CS 6899.

Repeatability: May be repeated for credit for a maximum of 4 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CS 697A - Topics in Computer Science

Units: 3

Selected relevant subjects in Computer Science, either as a traditional course or as a survey of new literature. Programming assignments required.

Prerequisites: CS 401 or CS 601.

Credit Restrictions: Computer Science M.S. or B.S. students only.

Repeatability: May be repeated for credit for a maximum of 9 units.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CS 697B - Topics in Computer Networks

Units: 3

Selected relevant subjects in Computer Networks, either as a traditional course or as a survey of new literature. Programming assignments required.

Prerequisites: CS 441 or CS 641.

Credit Restrictions: Computer Science M.S. or B.S. students only.

Equivalent Quarter Course: Any one from: CS 6526, CS 6527, CS 6592, CS 6594, CS 6596.

Repeatability: May be repeated for credit for a maximum of 9 units.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CS 699 - Capstone Thesis

Units: 1-6

Development and completion of a formal research paper in an advanced area of computer science for submission to the department, which specifies its format. Supervision by a departmental committee, at least one of whom must be a California State University East Bay Computer Science faculty member. Scientific literature research, a written report and an oral presentation is required.

Prerequisites: Department consent, minimum 3.0 GPA and advancement to candidacy.

Credit Restrictions: Computer Science M.S. students only.

Equivalent Quarter Course: CS 6909.

Repeatability: May be repeated for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Construction Management

CMGT 101 - Introduction to Construction Management

Units: 3

Introduction to construction methods, materials, practices, contracts, codes, laws and trends. Also a study of professional ethics, management techniques and interaction with professional organizations and associations related to construction.

Equivalent Quarter Course: CMGT 1011.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMGT 142 - Construction Graphics and Plans Reading

Units: 2

Engineering drawing, computer-aided design, dimensioning, and tolerancing. Plan reading and specification review process. *Lecture Units: 1; Lab Units: 1*

Equivalent Quarter Course: ENGR 1420.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMGT 201 - Surveying

Units: 2

Construction surveying site layout techniques are studied. Benchmark, building lines, property lines, leveling and profiling are discussed in lecture with applied laboratory exercises. Broad-based background in interpreting plans. Typical plans for both residential and commercial buildings will be reviewed.

Lecture Units: 1; Lab Units: 1

Prerequisites: MATH 130.

Equivalent Quarter Course: CMGT 2011.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMGT 206 - Construction Materials

Units: 3

Introduction to the fundamentals of construction materials science, with emphasis on the origin, processing, properties, and use of materials such as steel, concrete, wood, and polymers.

Prerequisites: All of: CHEM 110, CMGT 101, PHYS 125.

Co-requisites: PHYS 126.

Equivalent Quarter Course: CMGT 2060.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMGT 207 - Construction Methods

Units: 3

Methods in construction of residential, commercial, and industrial buildings; site, excavation, foundation, structural work, framing, reinforced concrete, structural steel, masonry, roofing, and finishes.

Prerequisites: CMGT 206.

Equivalent Quarter Course: CMGT 2070.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMGT 310 - Statics and Strength of Materials

Units: 3

An intermediate introduction to Newtonian mechanics. Fundamental concepts of mechanics, including resultants of force systems, free-body diagrams, equilibrium of rigid bodies, and analyses of structures. Properties of structural materials primarily for building construction majors.

Prerequisites: PHYS 125.

Equivalent Quarter Course: CMGT 3101.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMGT 320 - Construction Law

Units: 3

Introduction to rules and regulations governing construction industry, including contractors licensing law, state lien laws, health and safety regulations, personnel relations and supervision, worker compensation, employment insurance, taxes, and dispute resolution.

Prerequisites: Construction Management major.

Equivalent Quarter Course: CMGT 3280.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMGT 325 - Electrical and Mechanical Systems in Construction

Units: 3

Introduction to current principles and practices in the application of mechanical and electrical systems. Electrical power system, lighting, wiring, and power distribution. Mechanical systems such as heating ventilating, air conditioning, water supply, drainage, and sewers.

Prerequisites: PHYS 126.

Equivalent Quarter Course: CMGT 3250 or CMGT 4250.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMGT 340 - Construction Cost Estimating

Units: 3

Topics related to construction project cost from the conceptual phase to full implementation and control. Use of computer tools for construction cost estimating. *Lecture Units: 2; Lab Units: 1*

Prerequisites: Department consent.

Equivalent Quarter Course: CMGT 4400.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMGT 345 - Building Codes and Commissioning

Units: 3

Building Codes for structural, mechanical, electrical, and plumbing. Building safety and accessibility. Energy efficiency (Title 24) and commissioning.

Prerequisites: CMGT 207.

Equivalent Quarter Course: CMGT 3450.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMGT 350 - Construction Project Planning, Scheduling and Control

Units: 4

Planning, scheduling, and control of construction projects. Application of project planning techniques such as CPM and PERT. Use of computer tools for project scheduling.

Prerequisites: CMGT 207.

Equivalent Quarter Course: CMGT 4200.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMGT 360 - Soil Mechanics and Building Foundations

Units: 3

Engineering properties of soils and rocks such as permeability, compressibility and shear strength. Site evaluation for building foundations, dams, tunnels and highways. Slope stability.

Prerequisites: CMGT 310.

Equivalent Quarter Course: CMGT 3600.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMGT 398 - Internship

Units: 1-3

Introduction to the internship experience; integration of the academic program with career aspirations; emphasis on internship readiness and preparation for professional success.

Prerequisites: Department consent and minimum 2.0 GPA.

Credit Restrictions: No more than 3 units may be applied to the Construction Management major.

Equivalent Quarter Course: CMPT 3898.

Repeatability: May be repeated with department consent for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

CMGT 410 - Building Information Modeling

Units: 3

An introduction to Building Information Modeling (BIM) for design error detection and construction process improvement.

Prerequisites: CMGT 142.

Equivalent Quarter Course: CMGT 4100.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMGT 430 - Environmental Issues and Green Building

Units: 3

Fundamental understanding of environmental issues and sustainability. Issues such as land use, energy efficiency, water use, indoor environmental quality, life cycle analysis, and construction waste disposal. High performance construction and green building assessment systems.

Prerequisites: CMGT 207.

Equivalent Quarter Course: CMGT 4300.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMGT 440 - Construction Project Management

Units: 3

Project management concepts for construction; topics such as roles and responsibilities, delivery methods, labor relations and supervision, administrative systems, project control, computer tools for project management, documentation, quality management, commissioning, and process improvement.

Prerequisites: Department consent.

Equivalent Quarter Course: CMGT 3400.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMGT 480 - Construction Safety

Units: 3

Introduction to the requirements of the Occupational Safety and Health Act and other related federal and state legislations as applied to the building construction industry. Standards for accident prevention, hazard identification, and responsibility for compliance emphasized.

Equivalent Quarter Course: CMGT 4800

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMGT 490 - Independent Study

Units: 1-3

Selected research topics in construction management, agreed on between the student and the faculty supervising the course. Work plan approval required prior to starting a project. Progress reports, a final report, and a final presentation are required.

Prerequisites: Department consent and minimum 2.0 GPA.

Credit Restrictions: No more than 12 units of independent study may be applied in the major department and 8 units in other departments to a baccalaureate degree.

Equivalent Quarter Course: CMGT 4900

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMGT 493 - Senior Project

Units: 4

Topics such as construction ethics, teamwork, and project partnering will be covered. Also a real-world project request for proposal (RFP) will be assigned and the planning for the response is initiated.

Development of alternative solutions and economic analyses. Weekly submission of proposal sections according to plan. Multiple written reports and oral presentations revised as per faculty critique.

Equivalent Quarter Course: CMGT 4620.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMGT 497 - Issues in Construction Management

Units: 3

Readings, discussion, and research on contemporary and/or significant issues in construction management.

Prerequisites: Department consent.

Equivalent Quarter Course: CMGT 4990.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Construction Management: Graduate

CMGT 610 - BIM and Advanced Technologies

Units: 3

Fundamentals of Building Information Modelling (BIM), introduction to applications for 3-D, 4-D and 5-D CAD. Coordination among the project stakeholders, clash detection, basics of sensing and information technology.

Prerequisites: Admission to M.S. Construction Management program.

Equivalent Quarter Course: CMGT 6100.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMGT 620 - Legal Issues in Construction Management

Units: 3

Discussion of construction contracts including legal issues arising from design and construction services such as claims and dispute resolution, liability, and state law pertaining to construction.

Prerequisites: Admission to M.S. Construction Management program.

Equivalent Quarter Course: CMGT 6200.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMGT 630 - Environmental Issues and Sustainable Construction

Units: 3

Fundamentals of sustainability and the greenbelt environment. Issues such as integrated design, delivery methods for sustainable projects, commissioning, greenbuilding assessment methods, and life cycle analysis are discussed.

Prerequisites: Admission to M.S. Construction Management program.

Equivalent Quarter Course: CMGT 6300.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMGT 640 - Cost Estimating for Construction Management

Units: 3

Issues related to construction project cost from the conceptual phase to full implementation. Use of computer aided tools for construction cost estimating.

Prerequisites: Admission to M.S. Construction Management program.

Equivalent Quarter Course: CMGT 6400.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMGT 650 - Construction Project Management, Planning, and Scheduling

Units: 3

Application of project planning techniques such as network analysis and CPM. Project scheduling, forecasting, and updating required for project cost and scheduling control. Familiarization with the latest software for construction scheduling.

Prerequisites: Admission to M.S. Construction Management program.

Equivalent Quarter Course: CMGT 6500.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMGT 660 - Cost Accounting, Control and Reporting in Construction

Units: 3

Introduction to project and company construction financial management. Discussion of financial resources, managing cost and profit, cash flows, and making financial decisions

Prerequisites: Admission to M.S. Construction Management program.

Equivalent Quarter Course: CMGT 6600.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMGT 670 - Construction Enterprise and Risk Management

Units: 3

Quantitative techniques for risk-based analysis in construction, risk elicitation and mitigation, enterprise risk assessment and management, decision making under uncertainty.

Prerequisites: Admission to M.S. Construction Management program.

Equivalent Quarter Course: CMGT 6700.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMGT 675 - Temporary Structures in Construction

Units: 3

Study of the construction and design, as well as professional, business, safety, and legal aspects of different temporary structures used to support construction of the primary structures.

Prerequisites: Admission to M.S. Construction Management program.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

CMGT 680 - Construction Safety and Health

Units: 3

Strategic safety management techniques, quantitative tools to monitor safety performance, understanding the Occupational Safety and Health Act, workers compensation laws, and other related federal and state legislation as applied to the building construction industry.

Prerequisites: Admission to M.S. Construction Management program.

Equivalent Quarter Course: CMGT 6800.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMGT 685 - Special Topics in Construction Management

Units: 3

Selected topics that cover current issues and latest innovations in construction management.

Prerequisites: Admission to M.S. Construction Management program.

Equivalent Quarter Course: CMGT 6850.

Repeatability: May be repeated for a maximum of 6 units when content varies.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMGT 690 - Independent Study

Units: 3

Selected research topics agreed on between the student and the faculty supervising the course. A plan of work completion must be approved prior to proceeding with the project. Progress reports, a final report, and presentation is required.

Prerequisites: Department consent and minimum 3.0 GPA.

Equivalent Quarter Course: CMGT 6900.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMGT 693A - Applied Research in Construction Management

Units: 3

An integrative capstone experience in which students conduct a literature search, develop a research proposal, complete a capstone graduate individual project and write a comprehensive project report encompassing areas covered in their course work.

Prerequisites: Department consent, completion of University Writing Skills Requirement (UWSR) and a minimum of 6 courses from: CMGT 610, CMGT 620, CMGT 630, CMGT 640, CMGT 650, CMGT 660, CMGT 670, CMGT 680, CMGT 685.

Credit Restrictions: Not open to students who have taken CMGT 693A or the comprehensive exam.

Equivalent Quarter Course: CMGT 6880.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMGT 693B - Master's Project Capstone

Units: 3

Capstone project where the knowledge gained in the curriculum is applied to a real world construction project.

Prerequisites: Department consent, completion of University Writing Skills Requirement (UWSR) and a minimum of 6 courses from: CMGT 610, CMGT 620, CMGT 630, CMGT 640, CMGT 650, CMGT 660, CMGT 670, CMGT 680, CMGT 685.

Credit Restrictions: Not open to students who have taken CMGT 693A or the comprehensive exam.

Equivalent Quarter Course: CMGT 6899.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CMGT 697 - Issues in Construction Management

Units: 3

Readings, discussion, and research on contemporary and/or significant issues in construction management.

Prerequisites: Department consent.

Equivalent Quarter Course: CMGT 6999.

Repeatability: May be repeated for credit for a maximum of 6 units when content varies

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Criminal Justice

CRJ 101 - Introduction to Criminal Justice

Units: 3

Survey of the various components of the American criminal justice system, emphasizing police, courts and corrections. An historical, analytical overview.

Equivalent Quarter Course: CRJA 2500.

Possible Instructional Methods: *Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CRJ 210 - Elementary Criminal Law

Units: 3

Introduces students to the nature and function of criminal law in the United States and the principles and rules underlying its application. Covers the classification of criminal activity and the applicability of criminal defenses.

Equivalent Quarter Course: CRJA 2100.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CRJ 220 - Basic Criminal Investigation

Units: 3

The principles and methods of investigation used to acquire and to disseminate information about crimes.

Equivalent Quarter Course: CRJA 2200.

Possible Instructional Methods: *Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CRJ 230 - Police Community Relations

Units: 3

The relationship between the criminal justice systems and the public with particular emphasis on police relations with diverse communities and minorities.

Equivalent Quarter Course: CRJA 2600.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CRJ 300 - Crime and Criminal Justice in the Media and Cinema

Units: 3

Introduces students to types of crime and the inter-workings of criminal justice through the media and cinema. Students will examine the ways these media depict due process, victims and offenders, and criminal justice policy.

Equivalent Quarter Course: CRJA 3350.

Possible Instructional Methods: *Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

CRJ 310 - Corrections and Criminal Justice

Units: 3

Introduction to the evolution of the correctional system, theories of punishment, and treatment. Emphasis placed on policies, practices, legal issues, and controversies within the correctional system. Incarceration in jails and prisons, capital punishment, and probation and parole are discussed.

Equivalent Quarter Course: CRJA 3100.

Possible Instructional Methods: *Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CRJ 320 - Research Methods in Criminal Justice

Units: 3

The application of scientific research methods to selected data and statistics in justice administration. Use of scientific methodology in interpreting crime and correctional data.

Prerequisites: STAT 100.

Equivalent Quarter Course: CRJA 3200.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CRJ 330 - Crime Prevention and Control

Units: 3

Examines the concepts of planning and implementation of crime prevention and control systems. The role of security in urban society and civilian involvement in crime prevention.

Equivalent Quarter Course: CRJA 3300.

Possible Instructional Methods: *Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CRJ 340 - Advanced Criminal Investigation

Units: 3

A continuation of CRJ 220. The exploration of investigative problems in major crimes. Analysis of role of criminal investigator and the legal use of scientific aids to investigation. Case history, examination and analysis.

Prerequisites: CRJ 220.

Equivalent Quarter Course: CRJA 3400.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CRJ 345 - Animal Cruelty and the Criminal Justice System

Units: 3

An overview of the different types of animal cruelty, global perspectives of the treatment of animals, and criminal justice response to animal cruelty. Additionally, this class addresses domestic and transnational legislative trends related to animal cruelty.

Equivalent Quarter Course: CRJA 4500.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CRJ 350 - Criminal Identification

Units: 3

Personal identification in criminal and civil investigation. Photography in criminal identifications, classification and filing of fingerprints. Handwriting identification of the unknown dead and skeletal remains.

Equivalent Quarter Course: CRJA 3500.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

CRJ 360 - Police Organization and Management

Units: 3

Application of principles of organization and management to the study of police agencies and crime investigation; relationship of police agencies to other public agencies.

Equivalent Quarter Course: CRJA 3610.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CRJ 370 - Ethics and Criminal Justice Administration

Units: 3

The application of ethical theories and philosophical perspectives to the study and analysis of ethical decision-making in the criminal justice system.

Equivalent Quarter Course: CRJA 3700.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CRJ 375 - Family Violence and the Criminal Justice System

Units: 3

An introduction to the types of violence occurring within the family unit. Potential causes of family violence, impact on the individual and community, and criminal justice response are discussed.

Equivalent Quarter Course: CRJA 3750.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

CRJ 380 - Survey of Forensic Science

Units: 3

The forensic comparative process; studies of microscopic characteristics of various types of physical evidence. Topics include firearms and tool identification, impression evidence, technical photography and preparation of laboratory findings for court.

Equivalent Quarter Course: CRJA 3800.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CRJ 398 - Internship

Units: 1-3

Introduction to the internship experience; integration of the academic program with career aspirations;

emphasis on internship readiness and preparation for professional success.

Prerequisites: Department consent and minimum 2.0 GPA.

Credit Restrictions: No more than 6 units of CRJ 398 and/or CRJ 415 may be applied to electives in the Criminal Justice major.

Equivalent Quarter Course: CRJA 3898.

Repeatability: May be repeated with department consent for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

CRJ 400 - Sex Crime Investigation

Units: 3

Theoretical foundations related to sexual crimes. Review of the basic skills necessary to investigate sexual assault cases, collect and preserve physical evidence, interview and interrogate subjects and victims, and successfully prepare cases for presentation.

Equivalent Quarter Course: CRJA 4124.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

CRJ 410 - Advanced Policing Innovations

Units: 3

Examination and analysis of major policing innovations and their implementation in the last few decades from team-policing to community policing to intelligence-led policing. Includes strengths and weaknesses and the driving forces, facilitators, and obstacles of translating innovations into police practices.

Equivalent Quarter Course: CRJA 4100.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

CRJ 415 - Internship in Criminal Justice

Units: 3

Informed practical experience in a department-approved criminal justice agency (public or private). Academic assignments integrated with volunteer or paid activities.

Equivalent Quarter Course: CRJA 4128.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CRJ 420 - White Collar Crime

Units: 3

Explores criminal activity in business and corporate enterprise, organization, and the professions. Students will learn criminological theories regarding the causes and control of white collar crime.

Equivalent Quarter Course: CRJA 4200.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

CRJ 425 - Transnational Crime

Units: 3

Examines transnational crimes and international responses. Topics include but not limited to organized crime, environmental crime, terrorism, trafficking in drugs, weapons, and persons. Analysis of transnational crime control, and global organized crime issues.

Equivalent Quarter Course: CRJA 4130.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

CRJ 430 - Victimology & Crime Victims

Units: 3

The criminal justice system from the perspective of the victim and the victim's needs/concerns. Various facets of victimology including: victimization data, victim compensation, psychological impacts of crime on victims, and the victim rights movement are discussed.

Equivalent Quarter Course: CRJA 4123.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CRJ 435 - Prejudice, Violence, and Hate Crimes

Units: 3

Explores the characteristics, prevalence, causes, penalties, and constitutional issues regarding hate crimes and hate speech. Examines the history, social contexts, and political controversies surrounding hate crimes and components of prejudice, justice, and violence as it relates to marginalized groups.

Equivalent Quarter Course: CRJA 4330.

Possible Instructional Methods: *Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

CRJ 450 - Women in Criminal Justice

Units: 3

Analysis of women/girls and crime. Examines how gender impacts pathways into the criminal justice system, types of offending, victimization, and women/girls' experience of incarceration. The role of female and male criminal justice professional in interfacing with women/girls.

Equivalent Quarter Course: CRJA 4125.

Possible Instructional Methods: *Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

CRJ 455 - Youth Crime and Empowerment

Units: 3

Examines the impact of trauma on child development, the factors that influence youth involvement in elicit behaviors, compares youth empowerment strategies with traditional modalities, examines programs, and explores developmental differences among diverse youth.

Equivalent Quarter Course: CRJA 4530.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

CRJ 460 - Crime Theory

Units: 3

In-depth analysis of the theories of criminal behavior, examining major social, psychological and biological theories of crime causation. Examine historical origins of crime theories and current applications of criminological theories to contemporary crime issues and offender treatment and rehabilitation.

Equivalent Quarter Course: CRJA 4127.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CRJ 465 - Drugs, Law, and Society: Race, Gender, and U.S. Drug Policy

Units: 3

In-depth examination of drug policy on the criminal justice system and diverse communities. Impact of historical "drug scares," the war on drugs, and resulting mass incarceration. Drug policy reform such as decriminalization, legalization, harm reduction, drug courts.

Equivalent Quarter Course: CRJA 4710.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

CRJ 470 - Community Based Corrections

Units: 3

Role of community-based alternatives to incarceration. Examines theories, processes, policies, and practices involved in community based programs. Topics include reentry, pre-sentence investigations, community supervision, juvenile justice, the use of electronic monitoring, community service, and restitution.

Equivalent Quarter Course: CRJA 4700.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CRJ 475 - Restorative Justice

Units: 3

Critical look at how restorative justice responds to crime by holding offenders accountable for harm committed, repairing harm to victims and community, and promoting skills in offenders to prevent crime recurrence.

Equivalent Quarter Course: CRJA 4730.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

CRJ 480 - Criminal Law and Courts

Units: 3

Explores the structure and functions of the criminal courts and their practical operation. It follows criminal court cases from inception to conclusion, focusing on the responsibilities of legal actors, rights and protections afforded the defendant, and systemic issues.

Equivalent Quarter Course: CRJA 4770.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CRJ 483 - Seminar in Forensic Research

Units: 1

Criminal justice aspects of forensic research. Current issues in forensic science based on scientific, legal, and criminal justice concerns.

Equivalent Quarter Course: CRJA 4830.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

CRJ 490 - Independent Study

Units: 1-3

Topic of study will be determined on case-by-case basis. Students may apply no more than 12 units of independent study in the major department and 8 units in other departments to a baccalaureate degree.

Prerequisites: Department consent and minimum 2.0 GPA.

Equivalent Quarter Course: CRJA 4900.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CRJ 495 - Practicum in Criminal Justice

Units: 3

Application and synthesis of theory, research and policy related to issues in the criminal justice system.

Equivalent Quarter Course: CRJA 4126.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

CRJ 497 - Issues in Criminal Justice

Units: 3

Readings, discussion, and research on contemporary and/or significant topics in criminal justice.

Equivalent Quarter Course: CRJA 3999.

Repeatability: May be repeated for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

Dance

DANC 101 - Dance for All Bodies and Abilities

Units: 3 ; G.E./G.R. Area: C1

Embodied study of personal identity, community and body image. Role of the arts in understanding gender, race, sexual orientation, disability, age, and culture. The creative expression of themes of social change through dance. Composition exercises that include theatre and music.

Equivalent Quarter Course: DANC 1201; DANC 1201 is also equivalent to DANC 102 and THEA 100

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C1 - Lower Division Arts*

DANC 102 - World Dance: Tradition and Change

Units: 3 ; G.E./G.R. Area: C1

The human search for meaning in ritual dances that prepare us for weddings, social dances that reinforce cultural order, and artistic dance that expresses the human condition. The story of who we are and who we may become. *Lecture Units: 2; Activity Units: 1*

Equivalent Quarter Course: DANC 1202.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *C1 - Lower Division Arts*

DANC 110 - Contemporary Ballet I

Units: 1 ; G.E./G.R. Area: E

Introduction to contemporary ballet techniques, open to students of all experience levels, body sizes and shapes and abilities/disabilities. Warm-ups, barre exercises, center exercises, terminology and injury prevention.

Equivalent Quarter Course: DANC 1191 or DANC 1192 or DANC 1193.

Repeatability: May be repeated once for credit, for a total of 2 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *E - Lifelong Learning and Self-Development*

DANC 111 - Hip Hop Dance I

Units: 1 ; G.E./G.R. Area: E

Introduction to practical skills that will increase physical aptitude, historical knowledge, and aesthetic sensibilities of hip hop dance. Open to all body types and abilities/disabilities.

Equivalent Quarter Course: DANC 1131 or DANC 1132 or DANC 1133.

Repeatability: May be repeated for credit for a maximum of 2 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *E - Lifelong Learning and Self-Development*

DANC 113 - Jazz Dance I

Units: 1 ; G.E./G.R. Area: E

Introduction to practical skills that will increase physical aptitude, historical knowledge, and aesthetic sensibilities of jazz dance. Open to all body types and abilities/disabilities.

Equivalent Quarter Course: DANC 1171 or DANC 1172 or DANC 1173.

Repeatability: May be repeated for credit for a maximum of 2 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *E - Lifelong Learning and Self-Development*

DANC 114 - Modern Jazz Dance I

Units: 1 ; G.E./G.R. Area: E

Introduction to practical skills that will increase physical aptitude, historical knowledge, and aesthetic sensibilities of modern jazz dance. Open to all body types and abilities/disabilities.

Repeatability: May be repeated for credit for a maximum of 2 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *E - Lifelong Learning and Self-Development*

DANC 115 - Modern Dance I

Units: 1 ; G.E./G.R. Area: E

Introduction to practical skills that will increase physical aptitude, historical knowledge, and aesthetic sensibilities of modern dance. Open to all body types and abilities/disabilities.

Equivalent Quarter Course: DANC 1141 or DANC 1142 or DANC 1143.

Repeatability: May be repeated for credit for a maximum of 2 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *E - Lifelong Learning and Self-Development*

DANC 116 - Dance Partnering I

Units: 1 ; G.E./G.R. Area: E

Embodied study of partner dances. All experience levels. Techniques drawing from Contact Improvisation, Ballroom Dance, Social Dance, Athletics, and Martial Arts. Effective communication skills between dance partners.

Repeatability: May be repeated for credit for a maximum of 2 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *E - Lifelong Learning and Self-Development*

DANC 117 - Rhythm Tap Dance

Units: 1 ; G.E./G.R. Area: E

Movement technique from the rich history and evolution of tap dance. Some discussion of socio-political and cultural challenges, including issues of race, gender, class inequality, and marginalization, that continue to influence style. Special equipment discussed first meeting--tap shoes.

Equivalent Quarter Course: Any one from: DANC 1151, DANC 1152, DANC 1153, DANC 2151, DANC 2152, DANC 2153.

Repeatability: May be repeated for credit for a maximum of 2 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *E - Lifelong Learning and Self-Development*

DANC 210 - Contemporary Ballet II

Units: 1 ; G.E./G.R. Area: E

Continued development and strengthening of practical skills that will increase physical aptitude, historical knowledge, and aesthetic sensibilities of ballet. Intermediate level. Open to all body types and abilities/disabilities.

Equivalent Quarter Course: DANC 2191 or DANCE 2192 or DANCE 2193.

Repeatability: May be repeated once for a total of 2 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *E - Lifelong Learning and Self-Development*

DANC 211 - Hip Hop Dance II

Units: 1 ; G.E./G.R. Area: E

Continued development and strengthening of practical skills that will increase physical aptitude, historical knowledge, and aesthetic sensibilities of hip hop dance. Intermediate level. Open to all body types and abilities/disabilities.

Equivalent Quarter Course: DANC 2131 or DANC 2132 or DANC 2133.

Repeatability: May be repeated once for a total of 2 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *E - Lifelong Learning and Self-Development*

DANC 212 - African Dance

Units: 1 ; G.E./G.R. Area: E

Developing, strengthening and applying practical skills that will increase physical aptitude, historical knowledge, and aesthetic sensibilities of African dance. Open to all body types and abilities/disabilities.

Equivalent Quarter Course: DANC 1019.

Repeatability: May be repeated for credit for a maximum of 2 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *E - Lifelong Learning and Self-Development*

DANC 213 - Jazz Dance II

Units: 1 ; G.E./G.R. Area: E

Continued development and strengthening of practical skills that will increase physical aptitude, historical knowledge, and aesthetic sensibilities of jazz dance. Intermediate level. Open to all body types and abilities/disabilities.

Equivalent Quarter Course: DANC 2171 or DANC 2172 or DANC 2173.

Repeatability: May be repeated once for a total of 2 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *E - Lifelong Learning and Self-Development*

DANC 214 - Modern Jazz Dance II

Units: 1 ; G.E./G.R. Area: E

Continued development and strengthening of practical skills that will increase physical aptitude, historical knowledge, and aesthetic sensibilities of modern jazz dance. Intermediate level. Open to all body types and abilities/disabilities.

Repeatability: May be repeated once for a total of 2 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *E - Lifelong Learning and Self-Development*

DANC 215 - Modern Dance II

Units: 1 ; G.E./G.R. Area: E

Continued development and strengthening of practical skills that will increase physical aptitude, historical knowledge, and aesthetic sensibilities of modern dance. Intermediate level. Open to all body types and abilities/disabilities.

Equivalent Quarter Course: DANC 2141 or DANC 2142 or DANC 2143.

Repeatability: May be repeated once for credit for a total of 2 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *E - Lifelong Learning and Self-Development*

DANC 216 - Dance Partnering II

Units: 1 ; G.E./G.R. Area: E

Partner dancing for those with some experience. Level evaluated at first meeting. Techniques drawing from Contact Improvisation, Ballroom Dance, Social Dance, Athletics, and Martial Arts. Effective communication skills between dance partners. Includes study and practice of choreographed partnering movement.

Repeatability: May be repeated once for credit for a maximum of 2 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *E - Lifelong Learning and Self-Development*

DANC 217 - Musical Theater Dance

Units: 1 ; G.E./G.R. Area: E

Movement technique from the rich history and evolution of musical theatre dance. Some discussion of socio-political and cultural challenges, including issues of race, gender, class inequality, and marginalization, that continue to influence style.

Strongly Recommended Preparation: At least one term of Jazz Dance.

Equivalent Quarter Course: Any one from: DANC 2121, DANC 2122, DANC 2123, DANC 2124, DANC 2125.

Repeatability: May be repeated once for credit for a total of 2 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *E - Lifelong Learning and Self-Development*

DANC 233 - Street to Stage: History of Hip Hop Dance

Units: 3 ; G.E./G.R. Area: C2; Diversity

History and evolution of Hip Hop dance. Cultural influences; societal and artistic significance; and essential aspects of this contemporary dance form that developed across diverse societies and cultures.

Lecture Units: 2; Activity Units: 1

Equivalent Quarter Course: DANC 1202 or DANC 3300.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C2 - Lower Division Humanities, Overlay - Diversity*

DANC 234 - Tap and Musical Theatre Dance on Stage and Film

Units: 3 ; G.E./G.R. Area: C1; Diversity

The evolution of Rhythm Tap and Musical Theatre Dance. History that reveals the sociopolitical and cultural challenges, including the marginalization of these art forms, as well as issues of race, gender, and class inequality experienced by their practitioners. *Lecture Units: 2; Activity Units: 1*

Equivalent Quarter Course: DANC 1202 or DANC 3300.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C1 - Lower Division Arts, Overlay - Diversity*

DANC 273 - Dance on Camera

Units: 3 ; G.E./G.R. Area: C2

Translating seen and found meaning in movement to the screen. The history of screendance; basics of digital video pre-production (research and planning); production (shooting); post-production (editing); and distribution. A roadmap for creating your own dance videos. *Discussion Units: 1; Activity Units: 2*

Strongly Recommended Preparation: Previous experience in dance or video production/editing.

Equivalent Quarter Course: DANC 3330.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *C2 - Lower Division Humanities*

DANC 311 - Hip Hop Dance III

Units: 1

Strengthening and mastering practical skills that will increase physical aptitude, historical knowledge, and aesthetic sensibilities of the art form. Open to all body types and abilities/disabilities.

Equivalent Quarter Course: DANC 4131 or DANC 4132 or DANC 4133.

Repeatability: May be repeated for credit for a maximum of 4 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

DANC 313 - Jazz Dance III

Units: 1

Strengthening and mastering practical skills that will increase physical aptitude, historical knowledge, and aesthetic sensibilities of the art form. Open to all body types and abilities/disabilities.

Equivalent Quarter Course: DANC 4171 or DANC 4172 or DANC 4173.

Repeatability: May be repeated for credit for a maximum of 4 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

DANC 314 - Modern Jazz Dance III

Units: 1

Strengthening and mastering practical skills that will increase physical aptitude, historical knowledge, and aesthetic sensibilities of the art form. Open to all body types and abilities/disabilities.

Repeatability: May be repeated for credit for a maximum of 4 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

DANC 315 - Modern Dance III

Units: 1

Strengthening and mastering practical skills that will increase physical aptitude, historical knowledge, and aesthetic sensibilities of the art form. Open to all body types and abilities/disabilities.

Equivalent Quarter Course: DANC 4141 or DANC 4142 or DANC 4143.

Repeatability: May be repeated for credit for a maximum of 4 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

DANC 316 - Advanced Dance Partnering

Units: 1

Partner dancing for experienced dancers. Level evaluated at first meeting. Techniques drawing from Contact Improvisation, Ballroom Dance, Social Dance, Athletics, and Martial Arts. Effective communication skills between dance partners. Includes study and practice of choreographed movement.

Strongly Recommended Preparation: One semester of Modern or Jazz dance or equivalent experience.

Co-requisites: DANC 216.

Repeatability: May be repeated for credit for a maximum of 2 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

DANC 331 - Sex, Race, and Body Politics in Dance

Units: 3 ; G.E./G.R. Area: C4; Diversity

Exploring questions of identity: "Who am I?" and "How can we live consciously in a diverse society?" Examples from dance and performance. Focus on groups marginalized because of race, gender, sexual orientation, age, body size, disability, lifestyle. Arts for empowerment.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: DANC 3300.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities, Overlay - Diversity*

DANC 332 - World Dance and Cultures

Units: 3 ; G.E./G.R. Area: C4

Meaning of dance traditions around the world. From ritual dances of weddings and wars, to social dances reinforcing cultural order, to artistic performances expressing the human condition, dance tells us who we have been, are, and may become. *Lecture Units: 2; Activity Units: 1*

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: DANC 3252.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities*

DANC 341 - Dance for Children

Units: 3 ; G.E./G.R. Area: C4

Theory and techniques for developing movement and expressive capabilities in children through dance activities. Opportunities to create and share lesson plans, observe instruction, and work with children.

Lecture Units: 2; Activity Units: 1

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: DANC 3235.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities*

DANC 342 - The Dance Experience

Units: 3

Study of dance theory and development; dance as a creative form and process; exploration of various dance forms, techniques and methods. Opportunities to create and share lesson plans. *Lecture Units: 2;*

Activity Units: 1

Equivalent Quarter Course: DANC 3241.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

DANC 345 - How to Watch Dance

Units: 3 ; G.E./G.R. Area: C4

How to watch and interpret a performance of dance. The audience experience. What the dancing, choreography, scenery, costume, lights, sound, text and other production elements add to understanding an issue, theme or poetic expression of the human experience.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities*

DANC 360 - Inclusive Interdisciplinary Ensemble Performance

Units: 2

Create and perform an evening-length dance/theatre/music performance. Focus on inclusive method,

rigorous technique, accessibility, experimental inquiry, risk-taking, and embracing diversity.

Co-requisites: THEA 381 or THEA 382, only one per semester.

Equivalent Quarter Course: DANC 3463 or DANC 3466.

Repeatability: May be repeated for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

DANC 362 - Inclusive Interdisciplinary Ensemble

Units: 2

Study, create, and perform experimental dance/music/theater. Focus on inclusive and rigorous training, accessibility, experimental inquiry, risk-taking, and embracing diversity. For pre-professional, advanced, intermediate, and beginning students to explore methods for cross training.

Equivalent Quarter Course: DANC 3461 or DANC 3464.

Repeatability: May be repeated for credit for a maximum of 8 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

DANC 370 - Dance Ensemble Performance

Units: 2

An ensemble for students to create and perform an evening-length dance/theatre performance, with a focus on inclusive and rigorous training, choreographic risk-taking, innovative process and artistic excellence in performance. For pre-professional, advanced and other serious dance students.

Strongly Recommended Preparation: Concurrent enrollment in any dance technique class, and previous performance experience.

Equivalent Quarter Course: THEA 3499 or THEA 4499.

Repeatability: May be repeated for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

DANC 371 - Dance Stage and Screen Ensemble

Units: 2

A pre-professional dance company for dedicated, adventurous performers. Training in contemporary dance technique, cross-disciplinary artistic research and performance in all styles. Communicating and thinking critically about dance. Focus on site-specific and dance for the screen. By audition.

Strongly Recommended Preparation: Previous dance experience.

Prerequisites: Department consent.

Equivalent Quarter Course: Any two from: DANC 3451, DANC 3452, DANC 3453, DANC 3454, DANC 3455, DANC 3456.

Repeatability: May be repeated for credit for a maximum of 8 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

DANC 372 - Dance Creative Process Ensemble

Units: 2

A pre-professional student dance company for adventurous and experienced dancers. Training in contemporary dance technique, improvisation, choreography and performance in all styles. Communicating and thinking critically about dance. Open to all by audition.

Strongly Recommended Preparation: Concurrent enrollment in any dance technique course.

Prerequisites: Department consent.

Equivalent Quarter Course: Either DANC 3451 and DANC 3452; or DANC 3453 and DANC 3454; or DANC 3455 and DANC 3456.

Repeatability: May be repeated for credit for a maximum of 8 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

DANC 401 - Movement Analysis

Units: 3 ; G.E./G.R. Area: C4

How movement communicates and functions in society; observation, analysis, coaching and recording of movement. *Discussion Units: 1; Activity Units: 2*

Strongly Recommended Preparation: Two semesters of movement technique, or equivalent training.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: DANC 3251.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities*

DANC 402 - Dance Projects

Units: 2

Field placements and advanced projects for dancers. Consult with an instructor in advance. Application of artistic skills and creative vision in internships, field research, choreographic projects, major performance roles, curriculum or other significant projects. Must be taken by majors at least two times; by minors at least once.

Strongly Recommended Preparation: Concurrent enrollment in advanced dance performance ensemble or technique course. This course is for serious dance and performance students only.

Co-requisites: THEA 381 or THEA 382, only one per semester.

Equivalent Quarter Course: THEA 4151 or THEA 4152.

Repeatability: May be repeated for credit for a maximum of 8 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

DANC 490 - Independent Study

Units: 1-4

Independent study under the supervision a department faculty member.

Prerequisites: Department consent and minimum 2.0 GPA.

Credit Restrictions: No more than 12 units of independent study may be applied in the major department and 8 units in other departments to a baccalaureate degree.

Equivalent Quarter Course: DANC 4900.

Repeatability: May be repeated for credit, with department consent, for a total of 12 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

DANC 493 - Dance Projects Capstone

Units: 3

Culminating projects and classroom workshop productions of short new works featuring various styles, periods, and challenges. Opportunity to develop a compelling issue into dance, to teach dance, or to serve a substantial internship.

Prerequisites: All of: DANC 362, THEA 100, THEA 151, THEA 432, THEA 461, THEA 462; and two courses from: either DANC 360, DANC 370, DANC 371, DANC 372 or THEA 370, THEA 381, THEA 382.

Equivalent Quarter Course: THEA 4151 and THEA 4152.

Repeatability: May be repeated for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

DANC 497 - Issues in Dance

Units: 3

Readings, discussion, and research on contemporary and/or significant issues in dance.

Equivalent Quarter Course: DANC 3999.

Repeatability: May be repeated for credit when content varies, for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

Economics

ECON 100 - Economics of Public Issues

Units: 3 ; G.E./G.R. Area: D1-3

An introduction to economics with a focus on using economic analysis to examine current social, political, and global issues.

Credit Restrictions: Not for B.S. Economics credit.

Equivalent Quarter Course: ECON 1000.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *D1-3 - Lower Division Social Sciences*

ECON 101 - US Economic History and Institutions

Units: 3 ; G.E./G.R. Area: D1-3; US-1, US-2

Economic history and legal foundations of economic policies and institutions in the United States; economic context of current political and social issues.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *D1-3 - Lower Division Social Sciences, American Institutions/Code US-1 and US-2*

ECON 102 - California Economic History and Institutions

Units: 3 ; G.E./G.R. Area: D1-3

Economic development and political economy of California; impact of social and technological change, as well as state and local government policy, on the California economy.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *D1-3 - Lower Division Social Sciences*

ECON 103 - Economics of Creative Industries

Units: 3 ; G.E./G.R. Area: D1-3

Definition and economic measurement of the creative economy; organization of cultural sector; production and supply of cultural goods; determinants of audience demand for cultural goods. Course examines the economics of creative industries: music, film, performing arts, book publishing, and broadcasting.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *D1-3 - Lower Division Social Sciences*

ECON 105 - Corporate Misconduct: Crimes, Crashes, Crises

Units: 3 ; G.E./G.R. Area: D1-3

Economics behind major business failures, stock market crashes, and financial crises; US financial

history; corporate governance legislation.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *D1-3 - Lower Division Social Sciences*

ECON 106 - Urban Policy, Social Justice, and the Environment

Units: 3 ; G.E./G.R. Area: D1-3

Urban policies and their effects on spatial patterns of employment, homelessness, residential segregation, and environmental quality.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *D1-3 - Lower Division Social Sciences*

ECON 200 - Principles of Microeconomics

Units: 3 ; G.E./G.R. Area: D1-3; Social Justice

Develop basic theories of individual economic agents - the consumer and the firm - and how their behavior is interwoven in the marketplace. Emphasis on the use of microeconomic theory to evaluate various economic policies, including taxation, minimum wages, and rent control.

Strongly Recommended Preparation: Intermediate Algebra.

Equivalent Quarter Course: ECON 2301.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *D1-3 - Lower Division Social Sciences, Overlay - Social Justice*

ECON 205 - Principles of Macroeconomics

Units: 3 ; G.E./G.R. Area: D1-3

Basic macro-economic concepts; introductory analysis of the determination of national income and employment; money and banking; fiscal policy in a global context.

Strongly Recommended Preparation: MATH 115

Equivalent Quarter Course: ECON 2302.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *D1-3 - Lower Division Social Sciences*

ECON 210 - Quantitative Methods for Economists

Units: 3

Applications of mathematics and statistics to economic decision making.

Prerequisites: MATH 180 or MATH 130, and STAT 100 or STAT 110.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

ECON 211 - Programming for Data Analysts

Units: 3

Introduction to programming principles for data analysts.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

ECON 300 - Microeconomic Theory I

Units: 3

Analysis of supply and demand; production and costs; price and output determination; factor pricing and income distribution; optimum resource allocation.

Prerequisites: ECON 200.

Co-requisites: ECON 210.

Equivalent Quarter Course: ECON 3000.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

ECON 301 - Microeconomic Theory II

Units: 3

Market structure, externalities and public goods, game theory, information economics.

Prerequisites: ECON 300.

Equivalent Quarter Course: ECON 3001.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

ECON 305 - Macroeconomic Theory

Units: 3

Measurement and analysis of the determination of national income and employment; general price level; stabilization and growth.

Prerequisites: ECON 200, ECON 205 and ECON 210.

Equivalent Quarter Course: ECON 3005.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

ECON 306 - Money, Banking, & Financial Intermediaries

Units: 3 ; G.E./G.R. Area: D4

Essentials of commercial and central banking; financial intermediaries; monetary policy.

Prerequisites: Completion of GE areas A1, A2, A3, and B4.

Equivalent Quarter Course: ECON 3310.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *D4 - Upper Division Social Sciences*

ECON 310 - Introduction to Econometrics

Units: 3

Applications of statistical techniques to obtain quantitative estimates of relationships suggested by economic analysis.

Prerequisites: ECON 200, ECON 205 and ECON 210.

Equivalent Quarter Course: ECON 4400.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ECON 320 - History of Economic Thought

Units: 3

The key theories and individuals in the history of economic thought including Adam Smith, David Ricardo, and Karl Marx.

Prerequisites: ECON 200 and ECON 205.

Equivalent Quarter Course: ECON 3170

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ECON 334 - Economics of Information and Organizations

Units: 3

Information economics in issues in management and governance. Application of agency theory, adverse selection, rent-seeking, and learning models to optimal design of incentives and organizations.

Monitoring mechanisms in the US financial system, evolution of corporate structures, business models, and entrepreneurship.

Prerequisites: ECON 200.

Equivalent Quarter Course: ECON 3560.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ECON 335 - Introduction to Urban Economics

Units: 3

Economic analysis of the forces determining an urban area's income, employment, land use, industrial structure, and public sector. Applications to issues such as housing, central city-suburban relationships, transportation, and neighborhood economic development.

Prerequisites: ECON 200.

Equivalent Quarter Course: ECON 3500.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ECON 337 - Sports Economics

Units: 3 ; G.E./G.R. Area: D4

Examines economic issues in sports using tools from microeconomics and statistics. Topics include the business of professional sports teams, competitive balance, stadium financing, determinants of player salaries, talent evaluation using analytics, and issues involving the NCAA and college athletics.

Prerequisites: ECON 200 and completion of GE areas A1, A2, A3, and B4.

Equivalent Quarter Course: ECON 4550.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *D4 - Upper Division Social Sciences*

ECON 350 - International Economics

Units: 3

Study of the world economy through analysis of the flows of physical and capital goods across countries, as well as government policies that regulate those flows. International trade, foreign investment, operation and theory of foreign exchange markets, international monetary systems.

Strongly Recommended Preparation: ECON 385 should be taken prior to enrollment in this course; but must be taken concurrently if not completed.

Prerequisites: ECON 200 and ECON 205.

Co-requisites: ECON 385.

Equivalent Quarter Course: ECON 4705.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ECON 360 - Environmental Economics

Units: 3

Economic effects of national or local environmental policies around the world. Particular issues include

the costs and benefits of alternative environmental policies to deal with air pollution, water management, resource depletion, open access problem, solid waste, and global warming.

Prerequisites: ECON 200 and ECON 205.

Equivalent Quarter Course: ECON 4306.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ECON 370 - Health Economics and Public Policy

Units: 3

Economics of health and healthcare. Application of economic theories to public policy in health sector. Cost analysis, healthcare financing, public and private health insurance, and provider reimbursement models. Analysis of medical education, hospital, pharmaceutical, mental health, and long-term care markets.

Prerequisites: ECON 200 and HSC 110; HSC 110 is not required for ECON and BUAD majors.

Equivalent Quarter Course: ECON 3690.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Cross-listed: HSC 370

ECON 380 - Managerial Economics and Business Strategy

Units: 3 ; G.E./G.R. Area: B6; Sustainability

The actions and reactions of business firms and consumers in a variety of market environments, emphasizing their strategies for optimization. Course not recommended for Economics majors.

Prerequisites: Completion of GE areas A1, A2, A3 and B4 ; and ECON 200, MATH 130 or MATH 180, and STAT 100 or STAT 110.

Credit Restrictions: Not for BS Economics Major credit.

Equivalent Quarter Course: ECON 3551.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *B6 - Upper Division Science Inquiry and Quantitative Reasoning, Overlay - Sustainability*

ECON 383 - Game-Theoretic Reasoning: The Science of Interactive Behavior

Units: 3 ; G.E./G.R. Area: B6

This course introduces students to game theory as a tool for modeling strategic interaction mathematically. It covers static and dynamic games, finite and infinitely repeated, in the context of a variety of applications.

Prerequisites: Completion of GE areas A1, A2, A3 and B4 ; and ECON 200 and MATH 180.

Credit Restrictions: Not for major credit.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *B6 - Upper Division Science Inquiry and Quantitative Reasoning*

ECON 385 - Global Economic Analysis

Units: 3

International trade and finance: global allocation of production and factors, impact of interest and exchange rate policy on firms, trade, and growth.

Prerequisites: ECON 200 and ECON 205.

Equivalent Quarter Course: ECON 3107.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ECON 397 - Issues in Economic Analysis

Units: 3

Application of economic analysis to past/contemporary economic issues.

Prerequisites: ECON 200.

Repeatability: May be repeated for credit for a maximum of 18 units if content varies.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ECON 398 - Internship

Units: 1-3

Introduction to the internship experience; integration of the academic program with career aspirations; emphasis on internship readiness and preparation for professional success.

Prerequisites: Department consent and minimum 2.0 GPA.

Credit Restrictions: No units may be applied to any CBE major or minor.

Equivalent Quarter Course: ECON 3898.

Repeatability: May be repeated with department consent for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

ECON 400 - Game Theory

Units: 3

Introduction to basic concepts and tools of game theory.

Prerequisites: ECON 301 or ECON 380.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ECON 430 - Introduction to Industrial Organization

Units: 3

Factors determining industrial organization and economic behavior; operation of antitrust laws; public regulation.

Prerequisites: ECON 301 or ECON 380.

Equivalent Quarter Course: ECON 4520.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ECON 431 - Economics of Innovation & Intellectual Property

Units: 3

Examination of the conditions and mechanisms that promote firms to undertake research and development. Topics include IP licensing, network effects and standards, the role of the U.S. patent system, alternative incentive mechanisms, technological diffusion, and the U.S. copyright system.

Prerequisites: ECON 301 or ECON 380.

Equivalent Quarter Course: ECON 3555.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ECON 433 - Introduction to Labor Economics

Units: 3

Economic analysis of labor markets, including wages and wage determination, investments in human capital, employment and unemployment.

Prerequisites: ECON 300 or ECON 380.

Equivalent Quarter Course: ECON 3680.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ECON 456 - Introduction to Monetary Theory

Units: 3

Review of current literature on the demand for and supply of money; effects of monetary policy on inflation, unemployment, interest rates, and balance of payments.

Prerequisites: ECON 305.

Equivalent Quarter Course: ECON 4315.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ECON 460 - Introduction to Public Economics

Units: 3

Public sector economics; taxation, welfare economics, public goods, the rationale of government activity and collective choice.

Prerequisites: ECON 300 or ECON 380.

Equivalent Quarter Course: ECON 3370.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ECON 490 - Independent Study

Units: 1-4

Independent study under the supervision a department faculty member.

Prerequisites: Department consent and minimum 2.0 GPA.

Credit Restrictions: No more than 12 units of independent study may be applied in the major department and 8 units in other departments to a baccalaureate degree.

Equivalent Quarter Course: ECON 4900.

Repeatability: May be repeated for credit, with department consent, for a total of 12 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ECON 497 - Special Topics in Economic Analysis

Units: 3

Application of economic analysis to past and contemporary economic issues.

Prerequisites: ECON 300.

Equivalent Quarter Course: ECON 4590.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ECON 499 - Capstone: Empirical Analysis

Units: 3

Capstone course in which students complete individual empirical assignments that synthesize and apply their knowledge of microeconomics, macroeconomics, and econometrics.

Prerequisites: ECON 211 (or CS 100 or CS 101), ECON 301, ECON 305 and ECON 310.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Economics: Graduate

BUS 606 - Managerial Economics

Units: 3

Focuses on applying analytical tools from economics to make better managerial decisions. Representative topics include pricing, costs and profits, multi-period production, strategic decision making and uncertainty, principal-agent problems, market structure, and price discrimination.

Prerequisites: Post-baccalaureate standing, satisfaction of the WST.

Equivalent Quarter Course: ECON 6215.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ECON 600 - Foundations of Economic Theory

Units: 4

Mathematical analysis of optimal choices and equilibria. Topics include optimization of utility and profit functions, choice under uncertainty, measuring risk preference, and derivation of partial and general equilibria.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: ECON 6101.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ECON 601 - Advanced Microeconomics

Units: 4

Game-theoretic approaches to economic modeling, especially involving imperfect and incomplete information.

Prerequisites: ECON 600.

Equivalent Quarter Course: ECON 6102.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ECON 605 - Advanced Macroeconomics

Units: 4

Tools of modern macroeconomics, especially micro-based approaches. Topics include growth models, dynamic optimization, and real business cycles.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: ECON 6105.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ECON 610 - Advanced Econometrics

Units: 4

Standard statistical techniques in empirical analysis with emphasis on properties of estimators and use of software.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: ECON 6400.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ECON 623 - Market Design

Units: 4

Market-based solutions to business and policy problems, such as auctions and matching.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: ECON 6205.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ECON 625 - Urban Economics

Units: 4

Economic analysis of the forces determining an urban area's income, employment, land use, industrial structure, and public sector. Applications to issues such as housing, central city-suburban relationships, transportation, and neighborhood economic development.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: ECON 6501.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ECON 627 - Personnel Economics

Units: 4

Theoretical and empirical analysis of labor market operations with applications to public policy. Topics include investment in human capital, wages and wage determination, labor supply, employment and unemployment.

Prerequisites: Post-baccalaureate standing.
Equivalent Quarter Course: ECON 6680.
Possible Instructional Methods: *Entirely On-ground.*
Grading: A-F grading only.

ECON 636 - Monetary Theory

Units: 4

Review of periodical literature on static and dynamic issues of the supply and demand for money.

Prerequisites: Post-baccalaureate standing.
Equivalent Quarter Course: ECON 6315.
Possible Instructional Methods: *Entirely On-ground.*
Grading: A-F grading only.

ECON 640 - Public Economics

Units: 4

Economic analysis as applied to the public sector including public finance, welfare economics, public expenditure evaluation, theories of taxation, analysis of the U.S. tax structure, public choice, and policy issues.

Prerequisites: Post-baccalaureate standing.
Equivalent Quarter Course: ECON 6370.
Possible Instructional Methods: *Entirely On-ground.*
Grading: A-F grading only.

ECON 647 - International Economic Development

Units: 4

Selected topics in the theory and practice of international economic development with a focus on the nature and causes of development in specific areas and nations of the world.

Prerequisites: Post-baccalaureate standing.
Equivalent Quarter Course: ECON 6710.
Possible Instructional Methods: *Entirely On-ground.*
Grading: A-F grading only.

ECON 660 - Industrial Organization

Units: 4

Game-theoretic and empirical models of entry and exit, strategic competition between firms, including the models of Cournot, Bertrand, Stackelberg, Hotelling, and Salop. Research and development and adoption of new technologies.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: ECON 6520.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ECON 661 - Strategic Pricing

Units: 4

Applies economic models and econometric techniques to simulated and real data with an emphasis on demand estimation.

Prerequisites: ECON 610.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ECON 665 - Corporate Governance & Entrepreneurship

Units: 4

Incentive theory applied to understanding governance systems and executive behavior, effect of funding sources and organization structure on firm performance, collective decision making and bargaining, issues specific to new ventures

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: ECON 6225.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ECON 667 - Project Analysis

Units: 4

Benefit-cost analysis applied to resource allocation and planning. Applications to such areas as education, manpower programs, medical care, transportation, and non-profit enterprises.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: ECON 6250.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ECON 670 - Economic Research Practices

Units: 4

Provides students with analytic and research tools to increase their capacity to pose, answer, and critically evaluate questions in economic research.

Prerequisites: Post-baccalaureate standing.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ECON 688 - Applied Data Analysis

Units: 3

Econometric methods for selected applications, such as logistic regression / binary choice, multiple regression, simultaneous equations, time series. ECON 693 is a required co-requisite for MS Economics students.

Prerequisites: ECON 610.

Co-requisites: ECON 693.

Equivalent Quarter Course: ECON 6511.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ECON 690 - Independent Study

Units: 1-4

Independent study under the supervision of a member of the graduate faculty.

Prerequisites: Department consent and minimum 3.0 GPA.

Equivalent Quarter Course: ECON 6900.

Repeatability: May be repeated for credit, with department consent, for a total of 12 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ECON 693 - Project

Units: 1

Capstone experience for MS ECON program, involving a guided student project demonstrating competency in applying analytical techniques to economic problems.

Prerequisites: ECON 600 and ECON 610.

Co-requisites: ECON 688.

Equivalent Quarter Course: ECON 6896.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ECON 697 - Advanced Topics in Economics

Units: 4

Readings, discussion, and research on contemporary and/or significant issues in economics.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: ECON 6999.

Repeatability: May be repeated for credit when content varies, for a maximum of 8 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ECON 698 - Internship

Units: 1-3

Formal advanced work opportunities integrating the academic program with their career aspirations.

Integral advanced hands-on experience enhancing education and preparing for professional and personal success.

Prerequisites: Department consent and minimum 3.0 GPA.

Credit Restrictions: No units may be applied to any CBE graduate degree.

Equivalent Quarter Course: ECON 6898.

Repeatability: May be repeated with department consent for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

Education: Interdisciplinary - Graduate

EDUI 610 - The Web as an Interactive Educational Tool

Units: 4

Design and development of Web-based, effective instructional materials based on learning theories and interactions between the Web and students. Impacts of computing, such as security, social, ethical, and legal issues. Web authoring tools to incorporate design theory in Web projects.

Prerequisites: M.S. Educational Technology major.

Equivalent Quarter Course: EDUI 6110.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDUI 620 - Theory and Design of E-Learning

Units: 4

Developmental theories and research with implications for educational leaders in creating effective multimedia and web-based instructional programs. Recent technological trends showing how social and cognitive psychology can provide a theoretical foundation for educational technology design.

Prerequisites: EDUI 610.

Equivalent Quarter Course: EDUI 6200.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be*

taught both online and on-ground).

Grading: A-F grading only.

EDUI 630 - Math, Science and Technology

Units: 4

California State and National Standards in math and science. Use Internet as a tool to reflect and present best practices of math and science content. Design and develop technology-rich, problem-based learning units in math or science.

Prerequisites: EDUI 620.

Equivalent Quarter Course: EDUI 6280.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDUI 640 - Research in Educational Technology

Units: 4

Educational technology research. Identifying and critically evaluating major research issues and findings. Applying technology tools to create a bibliography and collecting data for further investigation. Analysis and synthesis of findings.

Prerequisites: Department consent.

Equivalent Quarter Course: EDUI 6500.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDUI 650 - Mobile Application Development

Units: 4

Design and develop educational applications for mobile devices using a variety of standard programming languages.

Prerequisites: M.S. Educational Technology major.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDUI 660 - Digital Graphics

Units: 4

Design and creation of digital graphics. Use of Photoshop to create or edit digital graphics. Blending images, photo retouch, automations, text Effect, adjusting image color and tone, layers, and filters.

Prerequisites: EDUI 610.

Equivalent Quarter Course: EDUI 6005.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDUI 670 - Principles of Instructional Design

Units: 4

Evaluate various instructional design theories and models. Apply one model to create stand-alone and online instructional materials, including multimedia components (e.g., text, graphics, audio, and video).

Prerequisites: Department consent.

Equivalent Quarter Course: EDUI 6210.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDUI 680 - Current Technologies

Units: 2

Identify current technologies, present the research findings of the technologies, and apply the current technologies to design and develop effective educational materials.

Prerequisites: EDUI 610.

Equivalent Quarter Course: EDUI 6350.

Repeatability: May be repeated for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDUI 690 - Independent Study

Units: 1-3

Under the direction of the Graduate Faculty. Students consult with advisor.

Prerequisites: Department consent and minimum 3.0 GPA.

Equivalent Quarter Course: EDUI 6900.

Repeatability: May be repeated for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: ABC/NC grading only.

EDUI 691 - University Thesis

Units: 1-4

Develop and write a formal research paper to submit to the University. Supervision by a department committee, at least one member of which must be a CSUEB faculty member.

Prerequisites: Department consent.

Repeatability: Course may be repeated for credit for a maximum of 4 units.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: ABC/NC grading only.

EDUI 692 - Comprehensive Examination Preparation

Units: 2

Prepare for graduate comprehensive examination. Directed readings and review of sample questions.

Prerequisites: Department consent.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: CR/NC grading only.

EDUI 693 - Master's Project

Units: 4

Develop an original project submitted in a Department approved format. Supervision by a department committee, at least one of whom must be a CSUEB faculty member.

Prerequisites: Department consent.

Equivalent Quarter Course: EDUI 6899.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: ABC/NC grading only.

EDUI 695 - Educational Technology Internship

Units: 4

Students pursuing a professional educational technology degree can apply the theory and content of coursework to real-world, on-the-job experience.

Prerequisites: Department consent.

Equivalent Quarter Course: EDUI 6420.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: ABC/NC grading only.

EDUI 697 - Issues in Education Interdisciplinary Studies

Units: 3

Readings, discussion, and research on contemporary and/or significant issues in education interdisciplinary studies.

Equivalent Quarter Course: EDUI 6999.

Repeatability: May be repeated for credit when content varies, for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EDUI 699 - Department Thesis

Units: 4

Identify an essential educational technology topic. Evaluate and investigate its impact and significance. Conduct literature review. Design research methods. Collect and analyze data. Report the findings and implications..

Prerequisites: Department consent.

Equivalent Quarter Course: EDUI 6909.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: ABC/NC grading only.

Education: Online Teaching and Learning

OTL 601 - Introduction to Online Teaching and Learning

Units: 3

Incorporate online instructional design and teaching strategies into the design of an online course, including objectives, assignments, assessment, collaboration, and participation. Adapt content to online technology and media. Design to accommodate varied learning modalities.

Prerequisites: Department consent.

Equivalent Quarter Course: OTL 6701.

Possible Instructional Methods: *Entirely On-line.*

Grading: A-F grading only.

OTL 602 - Instructional Design Models for Online Learning

Units: 3

Teaching models and their relationship to curriculum development, student learning, assessment, and learning psychology. Special attention to the application of models of teaching to online instruction, differentiated learning, various teaching and learning situations, and accessibility issues.

Prerequisites: Department consent.

Co-requisites: OTL 601.

Equivalent Quarter Course: OTL 6702.
Possible Instructional Methods: *Entirely On-line.*
Grading: A-F grading only.

OTL 603 - Technology Tools for Online Instruction

Units: 3

Design and construct online environments for teaching and learning. Attention to platform, browser, system differences, and limitations and to synchronous, asynchronous, and web-based delivery systems. Differences among online delivery providers and emphasis on maximum accessibility.

Prerequisites: OTL 601.
Equivalent Quarter Course: OTL 6703.
Possible Instructional Methods: *Entirely On-line.*
Grading: A-F grading only.

OTL 604 - Designing Curriculum for Online Instruction

Units: 3

Incorporate online teaching strategies into the design of an online course, including objectives, assignments, assessment, collaboration, participation. Adapt content to online technology and media. Design to accommodate varied learning modalities.

Prerequisites: All of: OTL 601, OTL 602, OTL 603.
Equivalent Quarter Course: OTL 6704.
Possible Instructional Methods: *Entirely On-line.*
Grading: A-F grading only.

OTL 605 - Educational Planning and Development for Online Programs

Units: 3

History of innovation in education and its effect on educational culture and thought. Organizational and managerial issues, problems, decision-making and solutions for successful implementation of online programs. Solutions to unique problems in online teaching environments, such as intensive faculty development and support.

Prerequisites: All of: OTL 601, OTL 602, OTL 603, OTL 604.
Co-requisites: OTL 606.
Equivalent Quarter Course: OTL 6705.
Possible Instructional Methods: *Entirely On-line.*
Grading: A-F grading only.

OTL 606 - Research in Online Teaching and Learning

Units: 3

Research methods in education, both quantitative and qualitative, with attention to sources, collection, and uses of data. Critical analysis of research on online teaching and learning. Preparation of a research project, including references, rationale and outline. Satisfies the University Writing Skills requirement.

Prerequisites: All of: OTL 601, OTL 602, OTL 603, OTL 604.

Equivalent Quarter Course: OTL 6706.

Possible Instructional Methods: *Entirely On-line.*

Grading: A-F grading only.

OTL 607 - History and Culture of Online Learning Communities

Units: 3

Development of the current online classroom with emphasis on the history and culture of education. The evolving roles of on-ground and online teaching and learning; institutional responsibilities; and degree, certificate and enrichment programs.

Prerequisites: All of: OTL 601, OTL 602, OTL 603, OTL 604.

Co-requisites: OTL 606.

Equivalent Quarter Course: OTL 6707.

Possible Instructional Methods: *Entirely On-line.*

Grading: A-F grading only.

OTL 672 - Content Development for Online Learning

Units: 3

Create course materials specific to various learning environments: corporate, academic, military, industrial, enrichment, online and on-ground. Relevant teaching and learning strategies for each modality. Online teaching components suitable to at least two different environments.

Prerequisites: All of: OTL 601, OTL 602, OTL 603, OTL 604.

Co-requisites: OTL 606.

Equivalent Quarter Course: OTL 6772.

Possible Instructional Methods: *Entirely On-line.*

Grading: A-F grading only.

OTL 673 - Supervising and Evaluating Online Teaching

Units: 3

Effective delivery of online materials in the context of educational theories of supervision. Adapting techniques, including clinical supervision, to promote and support online teachers' growth and development. Online mentoring of new online teachers.

Prerequisites: All of: OTL 601, OTL 602, OTL 603, OTL 604.

Co-requisites: OTL 606.

Equivalent Quarter Course: OTL 6773.

Possible Instructional Methods: *Entirely On-line.*

Grading: A-F grading only.

OTL 674 - Current Issues in Online Learning

Units: 3

Problems and promises of online teaching and learning, including gender, class, and race in online teaching and learning; potential impact of corporate influences on traditional educational paradigms; and the future of both online and on-ground education.

Prerequisites: All of: OTL 601, OTL 602, OTL 603, OTL 604.

Co-requisites: OTL 606.

Equivalent Quarter Course: OTL 6774.

Possible Instructional Methods: *Entirely On-line.*

Grading: A-F grading only.

OTL 680 - Building the Online Environment

Units: 3

Design and implement an online teaching site, including assignments, interactivity, contact protocols, syllabus, course materials, and research and development resources for student use. Presentation of materials in various formats.

Prerequisites: All of: OTL 601, OTL 602, OTL 603, OTL 604.

Co-requisites: OTL 606.

Equivalent Quarter Course: OTL 6780.

Possible Instructional Methods: *Entirely On-line.*

Grading: A-F grading only.

OTL 681 - Creating Digital Media for Online Instruction

Units: 3

Making multimedia materials available in the online classroom with texts, images, sounds, videos, and animations. Focus on needs of students with accessibility challenges.

Prerequisites: All of: OTL 601, OTL 602, OTL 603, OTL 604.

Co-requisites: OTL 606.

Equivalent Quarter Course: OTL 6781.

Possible Instructional Methods: *Entirely On-line.*

Grading: A-F grading only.

OTL 682 - Designing and Implementing User Interfaces for Online Instruction

Units: 3

Use principles of user interface, audience analysis, discourse communities and educational psychology to design online educational sites for teachers, learners and the global community. Use colors, images, animations, and interactivity to facilitate communication with online students. Accessibility issues stressed.

Prerequisites: All of: OTL 601, OTL 602, OTL 603, OTL 604.

Co-requisites: OTL 606.

Equivalent Quarter Course: OTL 6782.

Possible Instructional Methods: *Entirely On-line.*

Grading: A-F grading only.

OTL 683 - Providing Interactivity in the Online Environment

Units: 3

Use latest and most sophisticated web resources to create learning environments that maximize accessibility, interactivity, collaboration, document sharing, assessment and access to multimedia materials.

Prerequisites: All of: OTL 601, OTL 602, OTL 603, OTL 604.

Co-requisites: OTL 606.

Equivalent Quarter Course: OTL 6783.

Possible Instructional Methods: *Entirely On-line.*

Grading: A-F grading only.

OTL 693 - Capstone Project

Units: 3

Develop an online course that demonstrates best practices appropriate to candidate's subject-area expertise, learner needs and workplace opportunities and constraints. Write about the course design in terms of accessibility and formative assessment.

Prerequisites: Department consent and., minimum 3.0 GPA.

Equivalent Quarter Course: OTL 6899.

Possible Instructional Methods: *Entirely On-line.*

Grading: A-F grading only.

Educational Leadership

EDLD 600 - Leading for Social Justice and Equity in Urban Schools

Units: 4 ; G.E./G.R. Area: UWSR

Examining sociocultural contexts in education to provide emerging school leaders an introduction to theoretical and practical frameworks for the engagement and advocacy for social justice leadership in urban, suburban and rural schools.

Prerequisites: Admission to MS Educational Leadership Program.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *University Writing Skills Requirement*

EDLD 610 - Transforming Professional Learning to Support Equitable Student Outcomes

Units: 4

Examining the multiple perspectives and approaches of professional learning. Assisting emerging school leaders in understanding diversity to advocate, build, and sustain a collaborative culture of learning and opportunities for all school constituencies.

Prerequisites: Admission to either MS Educational Leadership program, and/or the Preliminary Services Credential Program.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 620 - Educational Leadership for Equitable Resources

Units: 3

Examines the decentralization of fiscal and human resources resulting in increased accountability for schools and districts. Guides emerging school leaders in evaluating the significance and consequences of decisions linked to student outcomes and accountability systems.

Prerequisites: Admission to either MS Educational Leadership program, and/or the Preliminary Services Credential Program.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 625 - School Laws, Policies and Governance for Equitable Outcomes

Units: 3

Examines statutes, court cases, and the application of legal principles. Acquaints emerging school leaders with California school law as it relates to school programs, operations, students, parents, school personnel and educational practitioners.

Prerequisites: Admission to either MS Educational Leadership program, and/or the Preliminary Services Credential Program.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 630 - Collaborative Research for Equity

Units: 4

Explores several research frameworks, particularly collaborative action research, and tools designed to collect evidence about sites. Analyzes the evidence to identify possible social justice and equity foci of great significance for inquiry.

Prerequisites: Admission to MS Educational Leadership Program.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 635 - Equity Research Design I

Units: 3

Implement an inquiry project, including sampling, site selection, research design, instrumentation, and completion of IRB approval protocol.

Prerequisites: Admission to MS Educational Leadership Program.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 645 - Equity Research Design II

Units: 3

Analyze data/evidence and report phases of the inquiry process. Extension of the inquiry project completed in fall semester.

Prerequisites: Admission to MS Educational Leadership Program.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 650 - Critical Topics in Educational Leadership I

Units: 1

Engage in readings, discussion, and inquires on contemporary and/or significant issues in educational leadership. Course may be repeated for credit when content varies for a maximum of 3 units.

Prerequisites: Admission to MS Educational Leadership Program.

Repeatability: May be repeated for credit when content varies for a maximum of 3 units.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 655 - Critical Topics in Educational Leadership II

Units: 1

Readings, discussions, and inquires on contemporary and/or significant issues in educational leadership. Participation in CSU Educational Leadership Institute required. Course may be repeated for a maximum

of 3 units.

Prerequisites: Admission to MS Educational Leadership Program.

Repeatability: May be repeated for a maximum of 3 units

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 681 - Coaching and Assessment Practicum I

Units: 2

Focus on individual candidate assessment and support plan in collaboration school district mentor and university coaches based on California Professional Standards for Education Leaders (CPSEL).

Prerequisites: Admission to Preliminary Administrative Credential Program and department consent.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: CR/NC grading only.

EDLD 682 - Coaching and Assessment Practicum II

Units: 2

Second of four courses in a professional development sequence of a two-year Administrative Credential Program. Focus on individual candidate assessment and support plan in collaboration school district mentor and university coaches based on California Professional Standards for Education Leaders (CPSEL).

Prerequisites: Department consent.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: CR/NC grading only.

EDLD 683 - Coaching and Assessment Practicum III

Units: 2

Focus on individual candidate assessment and support plan in collaboration with school district mentor and university coaches based on California Professional Standards for Education Leaders (CPSEL).

Prerequisites: Department consent.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: CR/NC grading only.

EDLD 684 - Coaching and Assessment Practicum IV

Units: 2

Individual candidate assessment and professional support from school district mentor and university coaches based on California Professional Standards for Education Leaders (CPSEL).

Prerequisites: Department consent.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: CR/NC grading only.

EDLD 685 - Managing an Organization and Developing a Collaborative Culture

Units: 1

Managing organizations to cultivate a safe productive learning and working environment. Focuses education leaders on strategies to shape a collaborative culture of teaching and learning informed by professional standards and focused on teacher professional growth.

Prerequisites: Department consent.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 686 - Professional and Community Development

Units: 1

Professional development of staff and management of communication and information systems in schools. Examines five major themes: Organizational and cultural environment, strategic planning, ethical reflective leadership, analysis of public policy, and management of human and fiscal resources

Prerequisites: Department consent.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 687 - Developing an Inquiring Community

Units: 1

Examines community and inquiry methods, such as action research, and student, adult and organizational learning. Focus on four major themes: Developing shared vision, parent and family engagement, community partnerships and community resources and services.

Prerequisites: Department consent.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 688 - Political Social Context in Education

Units: 1

Explore role of educational leaders in influencing political, social, economic, legal and cultural context to improve education policies and practices. Examines issues of ethics, integrity, justice and equity. Identify multiple stakeholders and strategies that support equitable student outcomes.

Prerequisites: Department consent.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 690 - Independent Study

Units: 1-3

Independent study under direction of faculty.

Prerequisites: Department consent and minimum 3.0 GPA.

Equivalent Quarter Course: EDLD 6900.

Repeatability: May be repeated for credit for a maximum of six (6) units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EDLD 693 - Collaborative Research Project

Units: 4

Explore social, cultural and linguistic diversity issues linked to larger equity and social justice concerns at students' sites. Students seek to uncover the issue's governing variables. Students organize and analyze the evidence and publicly report findings, conclusions and recommendations.

Prerequisites: Admission to MS Educational Leadership Program.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 695 - Fieldwork Practicum

Units: 2

Supported by a fieldwork coach, candidates for the Preliminary Administrative Services credential are required to participate in authentic administrative experiences that inextricably link the conditions of schooling and student outcomes.

Prerequisites: Admission to Preliminary Administrative Services Credential Program.

Equivalent Quarter Course: This 2 course sequence (695 & 696) was the three quarter Fieldwork sequence EDLD 6801, 6802, 6803.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: CR/NC grading only.

EDLD 696 - Fieldwork Practicum

Units: 2

Supported by the guidance of a fieldwork coach, candidates for the Preliminary Administrative Services credential are required to participate in authentic administrative experiences that illuminate issues that inextricably link the conditions of schooling and student outcomes.

Equivalent Quarter Course: This 2 course sequence (695 AND 696) replaces the three quarter course sequence EDLD 6801 and 6802 and 6803 (all three completed).

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: CR/NC grading only.

EDLD 697 - Issues in Educational Leadership

Units: 1-3

Readings, discussion, and research on contemporary and/or significant issues in educational leadership. May be repeated for credit when content varies, for a maximum of 3 units.

Prerequisites: Department consent.

Equivalent Quarter Course: EDLD 6999.

Repeatability: May be repeated for credit when content varies, for a maximum of 3 units.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

Educational Leadership: Doctoral

EDLD 700 - Transformative Leadership

Units: 3

New doctoral students acclimate to the university learning management system and practice scholarly writing; they explore research and examine their ethics and values of educational leadership for the purpose of transforming educational institutions into democratic organizations of equity and social justice.

Prerequisites: Admission to Ed.D. Educational Leadership Program.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 705 - Foundations of Inquiry for Social Justice

Units: 3

Explore multiple paradigms of inquiry, dominant and emancipatory forms of knowledge construction, and multiple dimensions that shape research/knowledge construction. Articulate an area of interest and develop a critical base for designing research about/in that area.

Prerequisites: Admission to Ed.D. Educational Leadership Program.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 710 - Social and Cultural Foundations of Education

Units: 3

Engages students in a reflective and analytic approach to recognize underlying social, historical, and political influences that limit or promote social justice within schools and society. Demonstrates how transformative leaders leverage cultural and economic resources for eliminating injustice and exclusion.

Prerequisites: Admission to Ed.D. Educational Leadership Program.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 715 - Transforming Teaching and Learning in Schools

Units: 3

Examine theoretical and empirical literature regarding pedagogy and curriculum for social justice, teacher learning and development, and ongoing professional learning. Draft pedagogical vision, conduct a teacher-learning inquiry, and design a professional learning plan.

Prerequisites: Admission to Ed.D. Educational Leadership Program.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 720 - Qualitative Inquiry for Social Justice

Units: 3

Engage with multiple methods of qualitative inquiry to promote social justice. Examine constructivist, critical, and gender-influenced approaches to three main research designs: Case study, ethnography, and action/participatory research. Conduct a community-based mini-research project.

Prerequisites: EDLD 705.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 725 - Reading and Writing about Educational Leadership

Units: 3

Students synthesize the empirical literature to provide compelling evidence for the importance of an identified educational issue, the state of current research and the need for future research.

Prerequisites: Admission to Ed.D. Educational Leadership Program.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 730 - Community Advocacy, Outreach, and Organizing

Units: 3

Examine the role of community organizing and action for fostering school change. Study efforts to

engage in community collaboration, learn strategies for community advocacy, outreach, and grassroots organizing, and take part in a research project with a community organization.

Prerequisites: EDLD 720.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 735 - Engaging Critical Social Theories for Designing Research for Equity and Social Justice

Units: 3

Taps critical theoretical schools of thought to understand and address salient problems impacting schools, students and communities. Evaluates research designs and strategies for engaging in inquiry for social justice.

Prerequisites: Admission to Ed.D. Educational Leadership Program.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 740 - Reform and Change for Social Justice

Units: 3

The theory, underlying values, and empirical evidence of various approaches to educational reform. Critical examination of reform approaches in light of social justice.

Prerequisites: Admission to Ed.D. Educational Leadership Program.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 745 - Quantitative Inquiry: Data Analysis and Evaluation for Leaders

Units: 3

Examining the philosophical, ethical, and methodological issues embedded in quantitative approaches to educational research, including the relationship of data use to equity and evaluation, including a hands-on experience generating and using survey data for evaluation.

Prerequisites: Admission to Ed.D. Educational Leadership Program.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 750 - Critical Policy Studies in Education

Units: 3

Develops a critical orientation towards the construction, implementation, and social impact of educational policies. Recognizes how educational leaders exert agency through constructing and implementing

policies that challenge injustice, inequality, and power imbalances in educational institutions and society.

Prerequisites: Admission to Ed.D. Educational Leadership Program.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 755 - Applied Study of Educational Issues: Professional Residency I

Units: 3

Practical leadership experience working in the educational field. Students apply skills and knowledge to identify, analyze, and impact relevant educational issues. Residency experiences fulfill the requirements for the Professional California Administrative Credential.

Prerequisites: Admission to Ed.D. Educational Leadership Program.

Repeatability: May be repeated for credit for a maximum of 15 units.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 760 - Evaluation Research Practicum for Social Justice

Units: 3

Focuses on the core knowledge and skills needed to design, conduct and report on an empirical study. Students will design and conduct a pilot study related to their dissertation. They will analyze data to create and report major findings.

Prerequisites: Admission to Ed.D. Educational Leadership Program.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 765 - Applied Study of Educational Issues: Professional Residency II

Units: 2

Students gain practical leadership experience working in the educational field as they apply skills and knowledge to identify, analyze, and impact relevant educational issues. Residency experience fulfill the requirements for the Professional California Administrative Credential.

Prerequisites: Admission to Ed.D. Educational Leadership Program.

Repeatability: May be repeated for four (4) times for credit for a maximum 10 units.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 770 - Critical Perspectives for Finance and Resource Management

Units: 3

Theory, policy, law and structure of organization and resources in equitable and democratic educational

institutions that foster high academic achievement for all students.

Prerequisites: Admission to Ed.D. Educational Leadership Program.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 775 - Organizations and Systems for Equity

Units: 3

Organizational theory is examined and students enhance their ability to think systemically as they learn models and strategies to facilitate their knowledge for the purpose of implementing inclusive cultures that foster trust, challenge assumptions, resolve conflict, and support teaching and learning.

Prerequisites: Admission to Ed.D. Educational Leadership Program.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 780 - Research for Equity and Social Justice

Units: 2

Present preliminary dissertation findings in academic and professional venues. Investigates the ethical issues tied to format and styles used in disseminating research. Evaluates the impact disseminating research has on promoting social justice in schools and communities.

Credit Restrictions: Open for credit to Ed.D. Cohorts only.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 790 - Research Topic Exploration

Units: 2

Explore an area of research interest leading to a dissertation. Supported guidance in reading, writing and research.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 791 - Collaborative Proposal Research

Units: 1

Formulate an area of research interest leading to the dissertation proposal. With supporting guidance learn the fundamentals of beginning the dissertation process.

Prerequisites: Admission to Ed.D. Educational Leadership Program.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*
Grading: A-F grading only.

EDLD 792 - Collaborative Proposal Development

Units: 2

With supporting guidance of faculty, students narrow their research to a problem of significance in education and begin to develop the dissertation proposal. Learn best practices in organizing information.

Prerequisites: Admission to Ed.D. Educational Leadership Program.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 793 - Collaborative Dissertation Writing

Units: 3

Dissertation writing with supported guidance. Learn best practices of finalizing research for the dissertation.

Prerequisites: Admission to Ed.D. Educational Leadership Program.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EDLD 799 - Dissertation Seminar

Units: 3

Research and writing that culminates in the doctoral dissertation. Learn how to include implications for equity and social justice.

Prerequisites: Admission to Ed.D. Educational Leadership Program.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

Educational Psychology

EPSY 101 - Career Planning For College Students

Units: 2 ; G.E./G.R. Area: E

For students who are unclear about their career goals. Discussion, individual and small group activities designed to increase students' self-knowledge in terms of interests, abilities, and values, as well as information about the world of work and effective decision making techniques.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

G.E./G.R. Area Satisfied: *E - Lifelong Learning and Self-Development*

EPSY 230 - Strategies for Lifespan Mental Health

Units: 3

Using theory and research from mental health disciplines to develop strategies for maintaining psychological health and peak performance over the lifespan. The impact of relationships, self-concept, cognitions, emotions, spirituality, body image, and diverse cultural identities on mental health.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EPSY 301 - Orientation to Careers in Counseling

Units: 3

Overview of counseling profession and different types of employment using counseling skills through self awareness activities; assists students with career/major choices. Skills and licenses required for marriage and family, career, school, rehabilitation and substance-abuse counseling.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

EPSY 497 - Issues in Educational Psychology

Units: 3

Readings, discussion, and research on contemporary and/or significant issues in educational psychology.

Equivalent Quarter Course: EPSY 3999.

Repeatability: May be repeated for credit when content varies, for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

Educational Psychology: Graduate

EPSY 630 - Law, Ethics and Professional Issues

Units: 3

Professional ethics and statutory, regulatory and decisional laws currently applicable to the practice of counseling and psychotherapy. Confidentiality, mandated reporting laws, family and child laws as they affect clinical practice. The relationship between a counselor's personal values and professional behavior and ethics.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 631 - Intimate Partner Violence

Units: 1

Detection, assessment, and diagnosis of spousal or partner abuse. Clinical issues regarding emotional abuse and violence in domestic relationships. Interventions for the treatment of couples in abusive relationships.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 632 - Child Abuse Assessment and Reporting

Units: 1

Legal and clinical aspects of child abuse as an issue in counseling and psychotherapy practice. Child abuse reporting laws and procedures, the psychological and family system variables important in assessment, and both individual and family treatment strategies.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 633 - Substance Abuse

Units: 3

Survey of concepts of alcoholism and other chemical substance dependency. Assessment and treatment modalities applied to addictive disorders.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 634 - Family and Life Cycle Development

Units: 3

Theory and research covering family and life cycle development. Emphasis on the interaction of biological and social factors and their psychological consequences.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 635 - Pre-Practicum Microcounseling Skills in Relational Practice

Units: 2

Develop and practice the basic skills of systemic-relational counseling, especially the skills of listening. Use of brief videotaped counseling sessions ("microcounseling"). Students role-play to observe, analyze, and evaluate techniques of counseling.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 636 - Counseling Theories

Units: 3

Current theories of counseling and psychotherapy; development of individual counseling approach.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 637 - Multicultural Counseling

Units: 3

Multicultural counseling and psychotherapy, cultural values and personality formation; value orientation inherent in counseling and psychotherapy; psychological effects of cultural racism; effects of sex roles and life styles within different cultures.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 638 - Psychopathology

Units: 3

Etiology, assessment, and treatment of the major psychological disorders of childhood through adulthood. Ability to prevent psychological disorders. A multidimensional perspective presented through case study, differential diagnosis, assessment procedures, treatment planning and intervention.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 639 - Community Mental Health Counseling

Units: 3

Community mental health theories and skills required by the BBS: Recovery orientation treatment for severe mental illness, disaster and trauma response, impoverished and homeless services, foster-care, case management, client advocacy, collaboration, community service resources, and medical family therapy.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 641 - Child and Youth Psychotherapy

Units: 3

Theories, research, and techniques of psychotherapeutic assessment and treatment of children, youth and their families. Developmental considerations, assessment, diagnosis, and interventions; working with special populations. Experiential component combining theory and practice.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 642 - Grief, Trauma, and Crisis Counseling

Units: 2

The unique problems and situations of people facing loss, grief, and bereavement. Emotional reactions to death and loss. Counseling strategies based on stress reduction and the development of positive resolutions.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 643 - Family Therapy

Units: 3

Discussion and activities in psychotherapeutic techniques. Theory and research dealing with family interaction and communication. Diagnostic and intervention methods for dysfunctional family systems.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 644 - Pre-Practicum Microcounseling Skills in Relational Practice II

Units: 2

Development of the counselor's ability to influence others. Use of brief videotaped counseling sessions ("microcounseling"). Students will role-play to observe, analyze, and evaluate techniques of counseling.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 645 - Introduction to Systemic-Relational Practice

Units: 2

The principles and concepts of systemic-relational counseling, including communication dynamics, intervention techniques, and development of a personal theory of counseling. Introductory learning experience to prepare graduate students for professional counseling in clinical settings.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 646 - Contemporary Issues: Aging & Long-Term Care

Units: 2

Seminar in theoretical, research, and counseling approaches concerning special issues and populations,

such as delinquents, drug users, aged, the poor.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 647 - Psychopharmacology

Units: 3

Theory and research from the psychiatric and psycho-pharmacological disciplines used to increase counselors' knowledge of the medical treatments for adult and child psychological and developmental disorders. The interface between psychotherapy and these medications.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 648 - Assessment and Testing

Units: 3

Diagnostic interviewing, personality, intelligence and achievement testing and assessments commonly used in psychotherapy practice. Test construction, validity and reliability, interpretation of results, and ethics of testing. Meets BBS LMFT/LPCC requirements.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 650 - Group Counseling Theory and Practice

Units: 3

Theories, principles of group dynamics and processes facilitating individual, small group, and organizational change. Interpersonal skills in group process. Clinical analysis of actual group experiences

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 651 - Research Methods for Evidenced-Based Practice and Advocacy

Units: 3

Advocacy through research application and methods for action research in settings employing counselors, educators, and psychologists.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 652 - Human Sexuality and Gender

Units: 1

Physiological, psychological, social and cultural variables and their effects on sexual identity, sexual behavior and sexual disorders. Clinical treatment of sexual problems. Gender addressed.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 653 - Couples Therapy

Units: 3

Theory and techniques of counseling clients in couples, with an emphasis on spousal relationships. Assessment and treatment planning with issues of communication, intimacy, sexuality, goals, domestic violence, marriage, and divorce.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 654 - Career Counseling

Units: 3

Career planning theory and counseling techniques with various populations; development of career libraries and centers, employability development techniques; observation and participation in career counseling in mental health, school and community settings.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 655 - Advanced Pupil Personnel Services

Units: 3

Theory and practice of pupil personnel services. Application of best practices to school placements. Development of professional goals and professional portfolio.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 660 - Clinic Rounds

Units: 3

Clinical, professional, and mental health service seminar with Director of Community Counseling Clinic (CCC). Discussion of procedures, practices, case assignment, Clinic ethics, rules, and responsibilities. Topics address clinical, professional, and mental health service training. Course must be repeated twice: 3 units in the fall and 3 units in the spring.

Prerequisites: EPSY 695.

Co-requisites: EPSY 666.

Repeatability: Must be repeated for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 661 - Academic Counseling

Units: 3

Focus on the academic domain in school counseling as detailed by the American School Counselor Association (ASCA) National Model. Emphasis on orienting school counselors-in-training to theoretical and practical academic aspects of comprehensive school counseling programs.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 662 - Cognitive Behavior Therapy

Units: 3

Principles and practice of cognitive and behavior therapies, including individual and group interventions. School and personal growth projects emphasize data collection for intervention planning in social-emotional and psychological development.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 663 - Psychoeducational Report Writing

Units: 3

Foundations of multi-method, multi-source data collection and psychoeducational report writing. Application of record review, interview, observation, and testing in K-12 schools with a caseload of students.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 664 - Diverse Needs in School Counseling

Units: 2

The role of the school counselor and supporting the diverse needs that school counselors-in-training will encounter in the field. Primary emphasis on special education and support for English Learners and recently immigrated students.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 665 - Leadership, Advocacy, and Wellness

Units: 2

The personal/social aspects of the American School Counseling Association (ASCA) standards for school counseling. Emphasis on ways that school counselors-in-training can be advocates and participatory leaders at their future campuses.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 666 - Psychological Services in School Psychology

Units: 1

The planning and delivery of psychological and counseling services. Concepts, responsibilities and functions of the School Psychologist in collaboration with other school-based service providers. History of School Psychology, NASP Standards and professional identity.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 668 - Social and Emotional Assessment

Units: 3

Clinical skills for childhood and adolescent emotional and behavioral assessment and intervention in schools and community settings. Application of multi-method procedures for assessing students exhibiting social-emotional difficulties. Treatment planning and community referrals for mental-health prevention.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 669 - Moderate/Severe Disability Identification and Intervention

Units: 3

Assess children who evince low incidence handicapping conditions. Identify community-based and school resources. Collaborate with other professionals in supporting healthy development and academic growth. Apply case study reviews and special education law

Prerequisites: Admission to M.S. in Counseling, School Psychology Concentration.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 671 - Academic/Behavioral Assessment and Interventions

Units: 3

Early academic and social-behavioral screenings, using an alternative framework-Response to Intervention & Instruction. Knowledge and skills to provide educational recommendations for children on a systemic level of services in schools who exhibit academic and behavioral deficits from diverse backgrounds.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 672 - Cognitive and Developmental Assessment

Units: 5

Concepts and theories of intelligence and measurement applied to assessment of ability and learning. Administration and supervision of standardized instruments, report writing and test interpretation. Major types of individually administered intelligence tests, uses, and interpretation.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 673 - Assessment of English Language Learners

Units: 1

Language acquisition and cultural factors impacting English Language Learners (ELL) with emphasis on classroom experiences and special educational assessment. Classroom observation and case-study assignments required with students acquiring English.

Prerequisites: Admission to M.S. in Counseling, School Psychology Concentration.

Credit Restrictions: Open to School Psychology cohorts only.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 674 - Lab: Psychoeducational Report Writing

Units: 2

This lab course provides professional and technical evaluation and feedback for psychoeducational report writing.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 678 - School Psychology Practicum: First-Year Supervision

Units: 3

Required year-long first-year professional practicum in School Psychology practice incorporating 10 NASP Training Skill Domains. Must be repeated for credit for a maximum of 6 units.

Repeatability: Course must be repeated for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

EPSY 679 - School Psychology Advanced Practicum: Second-Year Supervision

Units: 3

Required year-long second-year professional practicum in School Psychology incorporating 10 NASP Training Skill Domains. Must be repeated for 6 units.

Repeatability: Must be repeated once for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

EPSY 680 - School Psychology Internship Supervision

Units: 6

Supervised third-year experience in a professional setting using the full range of competencies in the Interns' concentration.

Repeatability: Must be repeated for a maximum of 12 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

EPSY 681 - Foundations in School Counseling

Units: 3

Focus on the American School Counselor Association (ASCA) National Model and the creation and implementation of a comprehensive school counseling program. Emphasis on experiential learning in the field using the theoretical concepts learned in the course.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 682 - Mental Health Consultation in Schools

Units: 3

Social Justice advocacy in schools through collaboration and multicultural consultation. Theory and practice applied to K-12 educators. Ongoing consultation with classroom teacher required.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 683 - Crisis in Schools and Mental Health Settings

Units: 2

System-based training before, during, and after crises. Knowledge about crisis intervention theory, implementing crisis interventions and crisis counseling to promote mental health, risk and resiliency of individuals affected by crisis events at the individual, school-wide, and community level.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 684 - Neuropsychology of Learning Disorders

Units: 4

Diagnosis and rehabilitation of learning disorders emphasizing a neuropsychological approach with focus on two primary psychological processing test batteries.

Prerequisites: EPSY 672.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 685 - Advanced Service Delivery in School Psychology

Units: 3

Advanced professional preparation in the theory and practice of school psychology. Specific assessment of all 10 NASP Skill areas through course content, professional reflection, and case-based assignments.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 690 - Independent Study

Units: 1-4

Independent study under the supervision of a member of the graduate faculty.

Prerequisites: Department consent and minimum 3.0 GPA.

Equivalent Quarter Course: EPSY 6900.

Repeatability: May be repeated for credit, with department consent, for a total of 12 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 692 - Action Research and Comprehensive Evaluation

Units: 3

Examination of current counseling and psychotherapy theories. Individuals will practice counseling skills and techniques in the classroom. Strong focus on development of individual counseling approach.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 693A - Project in Marriage and Family Therapy

Units: 4

Development of an original product which is summarized in a written abstract. Both the project and the abstract are submitted to the department which specifies their formats. Supervision by a departmental committee, at least one of whom must be a Cal State East Bay faculty member. Oral defense may be required.

Prerequisites: Admission to M.S. Counseling: Marriage and Family Therapy Concentration.

Equivalent Quarter Course: EPSY 6899.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

EPSY 693B - Project in School Counseling

Units: 4

Development of an original Project in School Counseling. Supervised by a department faculty member. Oral defense may be required.

Prerequisites: Admission to M.S. Counseling: School Counseling Concentration.

Equivalent Quarter Course: EPSY 6899.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

EPSY 693C - Project in School Psychology

Units: 4

Development of an original project in School Psychology. Supervised by a department faculty member. Oral defense may be required.

Prerequisites: Admission to M.S. Counseling: School Psychology Concentration.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

EPSY 695 - Practicum

Units: 1-4

Supervised experience in a professional setting using the competencies in the student's concentration.

Prerequisites: Department consent.

Repeatability: May be repeated for credit for a maximum of 12 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

EPSY 696 - Advanced Practicum

Units: 3

Advanced practicum is an intensive, supervised clinical experience intended to prepare students in the development of counseling interventions through recorded sessions and discussions of ongoing cases in the Community Counseling Clinic (CCC) and in school placements.

Prerequisites: EPSY 695.

Co-requisites: EPSY 644.

Repeatability: Course must be repeated for a maximum of 6 units (3 units in the fall and 3 units in the spring).

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

EPSY 697 - Issues in Educational Psychology

Units: 2

Readings, discussion, and research on contemporary and/or significant issues in educational psychology.

Equivalent Quarter Course: EPSY 6999.

Repeatability: May be repeated for credit when content varies, for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

EPSY 698 - Internship

Units: 1-3

Formal advanced work opportunities integrating the academic program with their career aspirations. Integral advanced hands-on experience enhancing education and preparing for professional and personal success.

Prerequisites: Department consent and minimum 3.0 GPA.

Equivalent Quarter Course: EPSY 6898.

Repeatability: May be repeated once with department consent for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

SPED 500 - Educating All Learners in Diverse Classrooms

Units: 4

Within general and special education, instruction of diverse students eligible for special education services or considered at-risk for school failure with evidence-based practices and service delivery that

meet federal and state requirements.

Prerequisites: Admission to M.S. Special Education program.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

SPED 601 - Educational Practices: Mild/Moderate Disabilities

Units: 4

Methods, practices, materials, media and technology to increase student learning across special and general education; instruction, intervention and adaptation within and across CCSSS curriculums. Strategies for designing and implementing evidence-based curricular and instructional practices in academic and related areas.

Prerequisites: Admission to M.S. Special Education program.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

SPED 602 - Evidence-based Practices: Moderate/Severe Disabilities

Units: 4

Education Specialist candidates in Moderate-Severe Disabilities learn to instruct and support the diverse range of students through general and special education evidence-based curricular and instructional practices in behavioral, academic and related domains.

Prerequisites: Admission to M.S. Special Education program.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

SPED 603 - Teaming, Collaborative Educational Processes and Transition Services

Units: 4

Prepares prospective Education Specialists and other professionals to provide well-coordinated, collaborative, inclusive special education services through research-based trans-disciplinary team planning, effective management, consultative, cooperative teaching practices and innovative service delivery approaches with general education, specialists, community agencies and families.

Prerequisites: Admission to M.S. Special Education program.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

SPED 604 - Individual and School-Wide Behavioral Needs, Mental Health & Positive Supports

Units: 4

Prepares Specialists and other professionals to provide coordinated educational services through evidence-based strategies: individual and school-wide Positive Behavior Intervention and Support (PBIS); social emotional learning as prevention and intervention; classroom management; mental health intervention and community resources to support students/families.

Prerequisites: Admission to M.S. Special Education program.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

SPED 605 - Communication and Technology

Units: 4

Evidence based social, communication, environmental, and instructional strategies to meet the needs of students with disabilities to enhance participation in home, school and community activities. Use of assistive technology and augmentative/ alternative communication systems and non-technology based practices.

Prerequisites: Admission to M.S. Special Education program.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

SPED 606 - Assessment: Students with Mild/Moderate Disabilities

Units: 4

Presentation and application of assessment practices that consider the diverse backgrounds and needs of students being assessed and the nature of information being gathered. Includes formal and informal assessment practices, analysis of data, IEP goals, instructional planning, and service delivery.

Prerequisites: Admission to M.S. Special Education program.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

SPED 607 - Curriculum and Instruction: Students with Mild/Moderate Disabilities

Units: 4

Curriculum and instructional strategies to meet the academic, social, behavioral and executive functioning needs of students with mild/moderate disabilities. Coordination of diagnostic/prescriptive evaluation, curriculum, instruction, and transition to increase self-efficacy and positive learning outcomes for students.

Prerequisites: Admission to M.S. Special Education program.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

SPED 608 - Instruction and Behavioral Supports and Strategies: Moderate-Severe Disabilities

Units: 4

Prepares prospective Education Specialists with evidence-based tools and instructional techniques to facilitate M/S students' access, active participation and positive learning outcomes with general education peers across Common Core curriculum, related subjects and individualized need areas.

Prerequisites: Admission to M.S. Special Education program.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

SPED 609 - Advanced Assessment and Curriculum: Moderate-Severe Disabilities

Units: 4

Prepares prospective Education Specialists in Moderate-Severe Disabilities with evidence-based tools, strategies and materials for needs assessment and progress across academic and basic skills (e.g., communication, motor and social behavior) and systematic instruction across these key curricular domains.

Prerequisites: Admission to M.S. Special Education program.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

SPED 610 - Research and Professional Practices

Units: 4

Intersection of research, best practices, and strategies for developing as a professional educator. Survey of research philosophy and methods for conducting studies in diverse settings

Prerequisites: Admission to M.S. Special Education program.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

SPED 611 - Fieldwork I: Mild/Moderate Disabilities

Units: 3

Part-time supervised, mentored, fieldwork experience in a clinical setting. Candidates demonstrate competencies in assessment, curriculum and instruction, communication, collaboration, mild-moderate disabilities, positive behavior support, staff development, case management and other responsibilities as an education specialist.

Prerequisites: Admission to M.S. Special Education program.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

SPED 612 - Fieldwork II: Mild/Moderate Disabilities

Units: 3

Part-time supervised, mentored, fieldwork experience in a clinical setting. Candidates demonstrate competencies in assessment, curriculum and instruction, communication, collaboration, mild-moderate disabilities, positive behavior support, staff development, case management and other responsibilities as an education specialist

Prerequisites: Admission to M.S. Special Education program.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

SPED 613 - Final Student Teaching: Mild/Moderate Disabilities

Units: 6

Full-time supervised, mentored, fieldwork experience in a clinical setting. Candidates demonstrate competencies in assessment, curriculum and instruction, communication, collaboration, mild-moderate disabilities, positive behavior support, staff development, case management and other responsibilities as an education specialist

Prerequisites: Admission to M.S. Special Education program.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

SPED 615 - Fieldwork I: Moderate-Severe Disabilities

Units: 3

Links theory and practice within supervised fieldwork in a public school setting for developing candidates' specialized skills and practices, including assessment, systematic instruction, positive behavior supports/intervention, Universal Design for Learning, adaptation and modification, and team collaboration.

Prerequisites: Admission to M.S. Special Education program.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

SPED 616 - Fieldwork II: Moderate-Severe Disabilities

Units: 3

Supervised fieldwork with Master Teacher in inclusive classroom settings. Occurs with different age group than first fieldwork and across range of M/S disability students. Enhances competence in assessment, instruction, curriculum, collaboration, positive behavior support and intervention.

Prerequisites: Admission to M.S. Special Education program.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

SPED 617 - Final Student Teaching: Moderate-Severe Disabilities

Units: 6

Full-time, supervised student teaching with Master Teacher in public school, successfully demonstrating specialized skills and practice of all Teaching Performance Expectations and credential standards in assessment, systematic instruction, positive behavior intervention, communication, collaboration, adaptation, caseload management, and personnel development.

Prerequisites: Admission to M.S. Special Education program.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

SPED 693 - Capstone Research Project

Units: 4

Intersection of research, best practices, and strategies for developing as a professional educator. Survey of research philosophy and methods for conducting studies in diverse settings; completion of culminating project requirement for the Master of Science Degree and Education Specialist Credential.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

SPED 695 - Special Education Internship

Units: 2

Supervised, mentored fieldwork intern teaching in a clinical setting. Interns demonstrate competencies in assessment, curriculum and instruction, communication, collaboration, mild-moderate disabilities, positive behavior support, staff development, case management and other responsibilities as an education specialist.

Prerequisites: Department consent.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

SPED 697 - Issues in Special Education

Units: 2

Readings, discussion, and research on contemporary and/or significant issues, policies and practices in special education-moderate-severe disabilities. Candidates investigate areas of interest and professional development content with a focus on diversity and multifaceted needs of students/families and school communities.

Prerequisites: Admission to M.S. Special Education program.

Repeatability: May repeat course four times for a maximum of 8 units

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Engineering

ENGR 200 - Introduction to Engineering and Design

Units: 3 ; GE/GR Area: Writing II

Engineering history, disciplines and professions, current global issues in engineering. Engineering design process, visualization, and graphics. Introduction to CAD, and computer tools such as spreadsheet, mathematics software, and presentation software. Teamwork skills, technical communication, engineering ethics, and critical thinking. *Discussion Units: 2; Lab Units: 1*

Equivalent Quarter Course: ENGR 1011.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *Writing II*

ENGR 210 - Manufacturing Materials and Processes

Units: 4

Mechanical, thermal and electrical properties of engineering materials, including metal alloys, ceramics, semiconductors, polymers, and composites. Phase diagrams, heat treatments, materials selection. Traditional, non-traditional, and advanced manufacturing processes. Manufacturing process selection. *Lecture Units: 3; Lab Units: 1*

Prerequisites: CHEM 110 and MATH 130.

Equivalent Quarter Course: ENGR 2060 and ENGR 2070.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGR 215 - Computational Methods in Engineering

Units: 3

Computational algorithms used in solving engineering problems. Use of computer tools for solving a system of equations, matrix manipulations, numerical integration and differentiation, optimization, and simulation for engineering applications. *Lecture Units: 2; Lab Units: 1*

Prerequisites: MATH 131.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGR 220 - Statics

Units: 3

An intermediate application of Newtonian mechanics to solve engineering problems. Fundamental concepts of mechanics, including resultants of force systems, free-body diagrams, equilibrium of rigid bodies, and analyses of structures.

Prerequisites: PHYS 135.

Equivalent Quarter Course: INDE 3101.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGR 221 - Dynamics

Units: 3

Kinematics and kinetics of particles and rigid bodies with applications of Newton's second law and the principles of work-energy and impulse momentum. Analysis of structural members and systems subject to dynamic loads.

Prerequisites: ENGR 220.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGR 230 - Electric Circuits I

Units: 3

A study of fundamental circuit laws and components, and techniques for analog circuit analysis. Voltage, current, power, Ohm's Law, Kirchoff's laws, node voltage and mesh current analysis, op-amps, capacitors, inductors, RC, RL, RLC circuits. Impedance, frequency response, and Bode. *Lecture Units: 2; Lab Units: 1*

Prerequisites: PHYS 136 and MATH 210.

Equivalent Quarter Course: ENGR 2010.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGR 310 - CAD/CAM Graphics

Units: 3

Use of Computer Aided Design software tools to correctly specify the designs of system components for manufacture using all major methods. A laboratory component will allow students to fabricate components they have designed.

Prerequisites: ENGR 220.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGR 320 - Engineering Economics

Units: 3

Cost estimations, time value of money, cash flow diagrams, compound interest, economic equivalence, pay back periods, net present values, net annual equivalence, rate of return, depreciations, income taxes, gain taxes, and inflation. Economic analysis and decision making on engineering alternatives.

Prerequisites: MATH 130.

Equivalent Quarter Course: INDE 3140.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGR 400A - Historical Architectural Virtual Prototyping I

Units: 4 ; G.E./G.R. Area: D4

Design, development and creation of business plans and interactive virtual prototypes of historical architectural buildings and structures with innovative technology to improve the historical preservation of such structures and enhance community understanding of historical architecture. *Lecture Units: 2; Lab Units: 2*

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *D4 - Upper Division Social Sciences*

ENGR 400B - Historical Architectural Virtual Prototyping II

Units: 4

Advanced design, development and creation of business plans and interactive virtual prototypes of historical architectural buildings and structures with innovative technology to improve the historical preservation of such structures and enhance community understanding of historical architecture. *Lecture Units: 2; Lab Units: 2*

Prerequisites: ENGR 400A.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Engineering: Graduate

ENGR 610 - Analytical Methods In Engineering Management

Units: 3

An application-oriented course with emphasis on quantitative techniques in engineering management. Topics include: theory and applications of linear programming including formulation, simplex method, duality, integer programming formulation, branch-and-bound and network flow problems, decision-making under uncertainty, risk analysis and multi-criteria decision-making.

Credit Restrictions: Not open to students with credit for INDE 360.

Equivalent Quarter Course: ENGR 6400.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGR 615 - Finance for Engineers

Units: 3

Basics of financial statements, inventories, long-term productive assets, bonds and other liabilities, stockholders equity, and statement of changes in financial position. Also corporate governance, performance analysis, capital investment decisions, cost of capital, long and short term financial policy are covered.

Credit Restrictions: Not open to students with credit for FIN 6215.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGR 620 - System Modeling with Simulation

Units: 3

Analyze, improve and design stochastic processes of manufacturing and service systems by using computer simulation techniques. Identify, define and solve stochastic process problems using queuing theory. Use of computer simulations to measure and improve system performance, and optimize system designs.

Prerequisites: INDE 330.

Credit Restrictions: Not open to students with credit for INDE 420.

Equivalent Quarter Course: ENGR 5200.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGR 630 - Quality and Reliability Management

Units: 3

Quality and reliability techniques and applications for analyzing system performance, identifying root-causes, and improving quality and reliability. Topics include 6-Sigma, ANOVA, design of experiments, statistical process control charts, process capability indexes, system reliability, Pareto charts, process flow charts, acceptance sampling.

Prerequisites: INDE 330.

Equivalent Quarter Course: ENGR 6300.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGR 640 - Engineering Sustainable Supply Chains

Units: 3

Implementation of manufacturing resource planning and control systems including demand forecasting, production planning, master scheduling, bill-of-material, and inventory master file. Capacity requirements planning and shop floor control. Introduction of sustainability concepts needed to design and produce new products and processes. *Lecture Units: 2; Lab Units: 1*

Credit Restrictions: Not open to students with credit for INDE 440.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGR 650 - Project Management

Units: 3

Holistic approach to project management. Planning, scheduling, organizing, managing projects i.e., product development, construction, information systems, new business, and special events. Mastery of key tools give you an advantage in the marketplace. *Lecture Units: 2; Activity Units: 1*

Equivalent Quarter Course: ENGR 6200.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGR 660 - Sustainable Product and Process Design

Units: 3

Planning and execution of new product-process design and manufacture. Introduction of innovation, sustainability, and methods covering material selection, design-build-test, reverse engineering, objective trees, function-means trees, and functional maps provide students with tools needed to design and sustainably produce new products.

Equivalent Quarter Course: ENGR 5180.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGR 670 - Design and Management of Human Work Systems

Units: 3

Qualitative and quantitative techniques to maximize labor productivity, employee well-being, and organizational performance. Topics include worker motivation and incentive systems, leadership, worker autonomy, and management of collaborative organizational structures including quality control circles, total productive maintenance teams, and socio-technical systems.

Credit Restrictions: Not open to students with credit for INDE 4280.

Equivalent Quarter Course: ENGR 5280.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGR 680 - Engineering Systems Modeling

Units: 3

Systems approach to problem identification, description, modeling, and resolutions derived by traditional optimization. Approaches for the planning, manufacturing, deployment, product use and disposal cycles are presented. The design criteria, specifications, analysis, and verification through system life cycle is discussed to ensure that a system's functional, interface, performance, physical, cost and other quality characteristics. These factors are balanced to meet the needs of system stakeholders. *Lecture Units: 2; Activity Units: 1*

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGR 690 - Independent Study

Units: 3

Selected research topics agreed on between the student and the faculty supervising the course. A plan of work completion must approved prior to proceeding with the project. Progress reports, a final report, and a final presentation to the committee.

Prerequisites: Department consent and minimum 3.0 GPA.

Equivalent Quarter Course: ENGR 6900.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGR 693A - Applied Research in Engineering Management

Units: 3

An integrative capstone experience in which students conduct a literature search, develop a research proposal, complete a capstone graduate individual project and write a comprehensive project report encompassing areas covered in their course work.

Prerequisites: Department consent and completion of University Writing Skills Requirement (UWSR).

Equivalent Quarter Course: ENGR 6800.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGR 693B - Master's Project Capstone

Units: 3

Completion of a research or applied project, a written report submitted to the department, which specifies its format. Project supervised by a faculty member. Oral defense may be required. A faculty member supervises the project. Oral defense may be required.

Prerequisites: Department consent and completion of University Writing Skills Requirement (UWSR).

Equivalent Quarter Course: ENGR 6899.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGR 697 - Issues in Engineering Management

Units: 3

Readings, discussion, and research on contemporary and/or significant issues in engineering.

Prerequisites: Department consent.

Equivalent Quarter Course: ENGR 6999.

Repeatability: May be repeated for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

English: American/Global Literature

ENGL 328 - Latina/o Literature

Units: 4 ; G.E./G.R. Area: C4

Literature of all genres written by Latina/o authors that reflects diverse cultural backgrounds and experiences, and that explores themes such as immigration, class, gender, and sexuality.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ENGL 3680.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities*

English: American Literature

ENGL 220 - Immigration and Migration in American Literature

Units: 4 ; G.E./G.R. Area: C2

Literary works that represent the social, political, and cultural effects of immigration and migration in the U.S.

Equivalent Quarter Course: ENGL 2600.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C2 - Lower Division Humanities*

ENGL 320 - Major Works of American Literature

Units: 4

Selected major works of poetry, drama, nonfiction, and fiction from American literature of all periods, colonial to contemporary.

Equivalent Quarter Course: ENGL 3600.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ENGL 321 - American Indian Literature

Units: 4 ; G.E./G.R. Area: C4

American Indian myth, legend, and folklore, as well as nineteenth-, twentieth-, and twenty-first century literature by American Indians.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ENGL 3660.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities*

ENGL 322 - African-American Literature Before 1945

Units: 4 ; G.E./G.R. Area: C4; Social Justice

A survey of writings by people of African descent living in North America from the Colonial era through the 19th century. Covers early poetry, autobiographies, fiction, drama, and essays that form the basis of an African-American literary tradition.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ENGL 3691.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities, Overlay - Social Justice*

ENGL 323 - African-American Literature After 1945

Units: 4 ; G.E./G.R. Area: C4; Diversity

A survey of writings by African Americans from the middle of the 20th century through the Black Arts Movement. Identifies major authors in a variety of genres and provides historical contexts for literary movements from the period.

Strongly Recommended Preparation: ENGL 200.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ENGL 3692.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities, Overlay - Diversity*

ENGL 324 - American Women's Literature

Units: 4 ; G.E./G.R. Area: C4; Social Justice

Literary works written by U. S. women of diverse ethnic and cultural backgrounds that explore feminist themes such as class, gender, sexuality and that convey the private as well as public stories of women's lives.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ENGL 3650.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities, Overlay - Social Justice*

ENGL 325 - Asian-American Literature

Units: 4 ; G.E./G.R. Area: C4; Diversity

Literature of different genres by Asian-American authors that reflects diverse cultural backgrounds and experiences, and that explores themes such as immigration, class, gender, and sexuality.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ENGL 3670.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities, Overlay - Diversity*

ENGL 421 - 19th-Century American Literature

Units: 4

Historical survey of American literature before 1900.

Equivalent Quarter Course: ENGL 4635 or ENGL 4636.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ENGL 422 - 20th- and 21st-Century American Literature

Units: 4

Historical survey of American literature, 1900 to the present.

Equivalent Quarter Course: ENGL 4637.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ENGL 423 - Ethnic American Women's Literature After 1900

Units: 4

Selected authors and topics in ethnic American women's fiction, autobiography, drama, and/or poetry by African-American, Latina, American Indian, and Asian-American writers.

Equivalent Quarter Course: ENGL 4650.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ENGL 424 - American Fiction Before 1900

Units: 4

Selected novels and short fiction by 19th-century authors.

Equivalent Quarter Course: ENGL 4860.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ENGL 425 - American Novel After 1900

Units: 4

Selected American novels, 1900 to the present.

Equivalent Quarter Course: ENGL 4870 or ENGL 4874 or ENGL 4876.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ENGL 444 - Short Story

Units: 4

Development of the modern short story in American and Europe.

Equivalent Quarter Course: ENGL 4840.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ENGL 445 - Ethnic American Autobiography

Units: 4

Selected memoirs and autobiographical writings by African-American, Latino/a, American Indian, Asian-

American, and other ethnic American writers.

Equivalent Quarter Course: ENGL 4660.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

English: British Literature

ENGL 309 - Major Works of British Literature

Units: 4

Study major works in verse, drama, and prose fiction, selected from British literature: medieval to modern periods.

Prerequisites: ENGL 101 or ENGL 102.

Equivalent Quarter Course: ENGL 3400.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ENGL 332 - Chaucer

Units: 4

Close reading and analysis of the poetical works of Geoffrey Chaucer: Canterbury Tales, Troilus and Criseyde, Minor Poems.

Equivalent Quarter Course: ENGL 4151.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ENGL 411 - Shakespeare I

Units: 4 ; G.E./G.R. Area: C4

A survey of representative early plays and poems; dramatic conventions of Renaissance theater' Renaissance intellectual background; Elizabethan genres.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ENGL 4251.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities*

ENGL 412 - Shakespeare II

Units: 4 ; G.E./G.R. Area: C4

A survey of representative later plays; dramatic conventions of Renaissance theater; Renaissance

intellectual background; Elizabethan and Jacobean genres.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ENGL 4251.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities*

ENGL 413 - Milton

Units: 4

A selection of major works drawn from Milton's poetry and selected prose.

Equivalent Quarter Course: ENGL 4260.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ENGL 414 - Restoration and 18th-Century British Literature

Units: 4

Historical survey of British literature from the Restoration to 1800.

Equivalent Quarter Course: ENGL 4325.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ENGL 415 - 19th-Century British Literature

Units: 4

Historical survey of British literature before 1900.

Equivalent Quarter Course: ENGL 4411 or ENGL 4412.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ENGL 416 - British Novel before 1800

Units: 4

Selected British novels, 1700 to 1800.

Equivalent Quarter Course: ENGL 4831.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ENGL 417 - British Novel 1800-1900

Units: 4

Selected British novels, 1800-1900.

Equivalent Quarter Course: ENGL 4832.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ENGL 418 - British Novel After 1900

Units: 4

Selected British novels from the innovations of modernism in 1900, to the present.

Strongly Recommended Preparation: ENGL 204.

Equivalent Quarter Course: ENGL 4833.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

ENGL 440 - English Drama to 1642

Units: 4

A selection of British dramatic works from the beginnings to the closing of the theaters.

Equivalent Quarter Course: ENGL 4810.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

English: Education

ENGL 398 - Internship

Units: 1-3

Introduction to the internship experience; integration of the academic program with career aspirations; emphasis on internship readiness and preparation for professional success.

Prerequisites: Department consent and minimum 2.0 GPA.

Credit Restrictions: No more than 6 units may be applied to the English major; no more than 3 units may be applied to the English minor.

Equivalent Quarter Course: ENGL 3898.

Repeatability: May be repeated with department consent for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

ENGL 460 - Seminar in English Education

Units: 4

The integration of language, literature, and composition studies in the secondary-school curriculum, with on-site observation and supervised group discussion

Equivalent Quarter Course: ENGL 4000.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

English: Film

ENGL 240 - Introduction to American Film

Units: 4 ; G.E./G.R. Area: C2

Study of American cinema that introduces students to the language of film analysis and to key figures, scripts, and films from the silent era, the Hollywood studio system, independent filmmakers, and contemporary film productions.

Equivalent Quarter Course: ENGL 2740 or ENGL 2745.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C2 - Lower Division Humanities*

ENGL 447 - Film Criticism

Units: 4

Study of films that focus on the work of U. S. and international writer-directors, emphasizing characterization, themes, cinematic techniques, and application of film theory and criticism.

Equivalent Quarter Course: ENGL 4745

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

English: Foundation

ENGL 100 - College Writing: Stretch I

Units: 3

First semester of a year-long course in writing for academic purposes, critical analysis, and argumentation.

Strongly Recommended Preparation: ENGL 109.

Prerequisites: ENGL 109 required for students in Category IV.

Credit Restrictions: Not for English major credit.

Possible Instructional Methods: *Entirely On-ground.*

Grading: ABC/NC grading only.

ENGL 101 - College Writing: Stretch II

Units: 3 ; G.E./G.R. Area: A2

An introduction to writing for academic purposes, critical analysis, and argumentation. Must complete course with a grade of "C-" or better in order to earn General Education credit.

Strongly Recommended Preparation: ENGL 109.

Prerequisites: ENGL 100.

Credit Restrictions: Not for English major credit.

Equivalent Quarter Course: ENGL 1001.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *A2 - Lower Division Written Communication*

ENGL 102 - Accelerated College Writing

Units: 3 ; G.E./G.R. Area: A2

An introduction to writing for academic purposes, critical analysis, and argumentation. Must complete course with a grade of "C-" or better in order to earn General Education A2 credit.

Strongly Recommended Preparation: ENGL 109.

Prerequisites: Category II placement or Category III with concurrent enrollment in English 109.

Credit Restrictions: Not for English major credit.

Equivalent Quarter Course: ENGL 1001.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *A2 - Lower Division Written Communication*

ENGL 103 - College Writing: Stretch I (English for Speakers of Other Languages)

Units: 3

First semester of year-long course in writing for academic purposes, critical analysis, and argumentation. Designed with English for Speakers of Other Languages pedagogy for multilingual students.

Strongly Recommended Preparation: ENGL 109.

Prerequisites: ENGL 109 required for students in Category IV.

Credit Restrictions: Not for English major credit.

Possible Instructional Methods: *Entirely On-ground.*

Grading: ABC/NC grading only.

ENGL 104 - College Writing: Stretch II (English for Speakers of Other Languages)

Units: 3 ; G.E./G.R. Area: A2

Second semester of year-long course in writing for academic purposes, critical analysis, and argumentation. Designed with English for Speakers of Other Languages pedagogy for multilingual students. Earn "C-" or better for A2 general education credit in written communication.

Strongly Recommended Preparation: ENGL 109.

Prerequisites: ENGL 103.

Credit Restrictions: Not for English major credit.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: A2 - *Lower Division Written Communication*

ENGL 105 - College Reading for Fluency

Units: 3 ; G.E./G.R. Area: C2

Read multiple works of fiction and non-fiction to build English language fluency, academic vocabulary, learning strategy repertoire, and cultural background knowledge for the U.S. context. Enrollment limited to first-year international students.

Equivalent Quarter Course: ENGL 1020.

Repeatability: May be repeated for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: C2 - *Lower Division Humanities*

ENGL 106 - Academic Vocabulary Development

Units: 3 ; G.E./G.R. Area: C1

Vocabulary study, including multiple meanings in context, word-formation, related grammatical features, historical changes, and idiomatic and other usage considerations. Emphasis on academic English, but colloquial vocabulary also studied. Course is part of international student cluster for C3 general education credit.

Equivalent Quarter Course: ENGL 2000.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: C1 - *Lower Division Arts*

ENGL 109 - College Writing Lab

Units: 1

Writing lab for students to use feedback from faculty and peers in order to identify and address writing challenges.

Strongly Recommended Preparation: Concurrent enrollment in one of the following courses: ENGL 100,

ENGL 101, ENGL 102, ENGL 103, ENGL 104, ENGL 200 or ENGL 201.

Repeatability: May be repeated for credit for a maximum of 4 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

ENGL 200 - College Writing II

Units: 3 ; G.E./G.R. Area: Writing II

Further work in expository writing with emphasis on argumentation and persuasion. Introduction to the preparation and writing of the research paper.

Prerequisites: One of: ENGL 101, ENGL 102, ENGL 104.

Credit Restrictions: Not for English major credit.

Equivalent Quarter Course: ENGL 1002.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *Writing II*

ENGL 201 - College Writing II (English for Speakers of Other Languages)

Units: 3

Further work in expository writing with emphasis on argumentation and persuasion. Introduction to the preparation and writing of the research paper. ESOL sections are specifically designed for international and other multilingual students.

Strongly Recommended Preparation: ENGL 109.

Prerequisites: One of: ENGL 101, ENGL 102, ENGL 104.

Credit Restrictions: Not for English major credit.

Equivalent Quarter Course: ENGL 1002.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

ENGL 204 - Writing About Literature

Units: 4 ; G.E./G.R. Area: C2

Theory and practice of critical writing based on selected readings of major literary works.

Equivalent Quarter Course: Any two from: ENGL 2030, ENGL 2040, ENGL 2050

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C2 - Lower Division Humanities*

ENGL 490 - Independent Study

Units: 1-4

Independent study under the supervision a department faculty member.

Prerequisites: Department consent and minimum 2.0 GPA.

Credit Restrictions: No more than 12 units of independent study may be applied in the major department and 8 units in other departments to a baccalaureate degree.

Equivalent Quarter Course: ENGL 4900.

Repeatability: May be repeated for credit, with department consent, for a total of 12 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

English: Global Literature

ENGL 310 - Medieval Literature

Units: 4

Selected readings in medieval literature in translation: epic, romance, drama, lyric, and satire.

Equivalent Quarter Course: ENGL 3710.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ENGL 311 - Dante's Worlds

Units: 4

Study of Dante's Divine Comedy , especially in relation to its main literary, mystical, and historical themes.

Equivalent Quarter Course: ENGL 3715 or ENGL 3716.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ENGL 327 - LGBT Literature and Queer Theory

Units: 4 ; G.E./G.R. Area: C4; Social Justice

History and development of LGBT literature, the development and application of queer literary theory, and the role of literature in LGBT movements for equity and justice.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ENGL 3770.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities, Overlay - Social Justice*

ENGL 330 - Classical Literature

Units: 4

Selected readings in classical literature in translation: epic, drama, lyric, and satire.

Equivalent Quarter Course: ENGL 3700.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ENGL 331 - Global World Literature: Antiquity to the Early Modern World

Units: 4

Detailed study of global world literatures; classics from Japan, Africa, Mesoamerica, India, and Western Europe will be studied.

Equivalent Quarter Course: ENGL 3999.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ENGL 335 - Global Literature after 1900

Units: 4

Major works of global literature in English from 1900 to the present that reflect literary movements such as modernism and postmodernism, or genres such as colonial and post-colonial literature.

Strongly Recommended Preparation: ENGL 204.

Equivalent Quarter Course: ENGL 3760.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

ENGL 341 - The Gothic

Units: 4

British Gothic literature, 1700-2000.

Equivalent Quarter Course: ENGL 3745.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ENGL 342 - Environmental Literature

Units: 4 ; G.E./G.R. Area: C4; Sustainability

Study of divergent and contested literary representations of ecological landscapes and environments, and of how literature that represents ecological harm across race, ethnicity, class and cultural difference

influences environmentalism and environmental justice movements.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities, Overlay - Sustainability*

ENGL 343 - Detective Fiction

Units: 4

British/American detective fiction, 1800 to the present.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

Grading: A-F or CR/NC (student choice).

ENGL 434 - Global Short Story

Units: 4

Reading and analysis of short stories from around the world, classic and contemporary.

Equivalent Quarter Course: ENGL 4845.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ENGL 435 - Global Women's Literature

Units: 4

Selected works and genres of global literature in English written by women from different historical periods, nations, and cultures.

Strongly Recommended Preparation: ENGL 204.

Equivalent Quarter Course: ENGL 4450.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

ENGL 436 - Contemporary Global Novel

Units: 4

Selected contemporary novels in English written by authors from different national, cultural, and social backgrounds and representative of international literature.

Strongly Recommended Preparation: ENGL 204.

Equivalent Quarter Course: ENGL 4876.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

ENGL 446 - Modern and Contemporary Poetry

Units: 4

A study of representative Anglophone poets from 1914 to present.

Equivalent Quarter Course: ENGL 4827.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ENGL 462 - Children's Literature before 1900

Units: 4

Children's literature before 1900, with attention to social and cultural attitudes about childhood that influenced the history and development of the genre.

Strongly Recommended Preparation: ENGL 204.

Equivalent Quarter Course: ENGL 4740 or ENGL 4743.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

ENGL 463 - Children's Literature after 1900

Units: 4

Children's and young adult literature from the 20th and 21st centuries of different genres and themes, reflecting social, cultural, and ethnic diversity.

Strongly Recommended Preparation: ENGL 204.

Equivalent Quarter Course: ENGL 4741.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

English: Graduate

ENGL 600 - Introduction to Graduate Studies

Units: 4

Introduction to the major research tools for the study of English; survey and evaluation of various methods in literary criticism. Required for M.A. in English.

Equivalent Quarter Course: ENGL 6001.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 601 - The Literary Magazine

Units: 4

Practicum in which students learn about editing, layout, graphics, marketing, and distribution of a literary journal by working to produce the English Department's annual literary publication, *Arroyo Literary Review*, and by studying other university-based literary journals.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: ENGL 6060.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

ENGL 602 - Graduate Workshop in Fiction

Units: 4

Writing of long and short fiction. Theory and analysis of the art of fiction. For the prospective professional writer.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: ENGL 6070.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 603 - Graduate Workshop in Poetry

Units: 4

Writing of poetry. Theory and analysis of the art of poetry. For the prospective professional writer.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: ENGL 6075.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 610 - Medieval Literature

Units: 4

Study of major works, authors, and literary topics of the medieval period; at least one work read in the original language.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: ENGL 6100.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 611 - Renaissance Literature

Units: 4

Study of major works, authors, and literary topics of the Tudor and Stuart periods.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: ENGL 6215.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 612 - Restoration and 18th-Century British Literature

Units: 4

Study of major works, authors, and literary topics of the Restoration and the 18th century.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: ENGL 6350.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 613 - 19th-Century British Literature

Units: 4

Study of major works, authors, and literary topics of the Romantic and Victorian periods.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: ENGL 6405.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 614 - 20th Century British Literature

Units: 4

Study of major British works, authors, and literary topics of the 20th century.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: ENGL 6660.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 620 - American Literature to 1900

Units: 4

Study of major works, authors, and literary topics before 1900.

Prerequisites: Post-baccalaureate standing and declared English major.

Equivalent Quarter Course: ENGL 6600.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 621 - African-American Literature

Units: 4

Major African-American works, authors, and literary topics of the 19th and 20th centuries.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: ENGL 6690.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 622 - 20th Century American Literature

Units: 4

Study of major American works, authors, and literary topics of the 20th century.

Co-requisites: none

Equivalent Quarter Course: ENGL 6665.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 623 - Ethnic American Literature

Units: 4

Multiethnic American works, authors, and literary topics of the 20th and 21st centuries.

Prerequisites: Post-baccalaureate standing.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 630 - Women's Literature

Units: 4

Literary works written in English by women authors throughout the ages.

Prerequisites: Post-baccalaureate standing and declared English major.

Equivalent Quarter Course: ENGL 6650.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 631 - Post-Colonial Literature

Units: 4

The politics and poetics of the literature of previously colonized peoples in the aftermath of European and American imperialism.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: ENGL 6695.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 632 - Children's Literature

Units: 4

Authors, genres, themes or movements in global and multicultural literature for children.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: ENGL 6740.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 633 - Environmental Literature

Units: 4

Global works of environmental literature.

Prerequisites: Post-baccalaureate standing.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 640 - Studies in Literary Nonfiction

Units: 4

Historical and cultural perspectives on various forms of literary nonfiction.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: ENGL 6670.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 641 - Studies in Poetry and Poetics

Units: 4

Prosody and other formal issues; theory and practice of one poet or of a particular "school" or movement; relationships between poetry and cultural contexts.

Equivalent Quarter Course: ENGL 6675.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 651 - Theory and Practice of Teaching Oral Skills to Adults

Units: 4

Focuses on current research as well as practical, innovative methods for teaching listening and speaking to adult English learners.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: ENGL 6501.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 652 - Phonology, Morphology and Lexical Semantics

Units: 4

Investigation of English phonetics and phonology as well as the structural composition of English words, with emphasis on processes of word formation and theories of meaning and meaning change. Analysis of errors made by ESL learners.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: ENGL 6504.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 653 - Theory and Practice of Teaching Reading to Adults

Units: 2

Focuses on current research as well as practical, innovative methods for teaching reading to adult English learners.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: ENGL 6502.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 654 - Supervised Tutoring and Teaching

Units: 2

Supervised internship with students in ESOL classes and tutorials. Course may be repeated, but repeated units may not count towards degree.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: ENGL 6508 or ENGL 6608.

Repeatability: May be repeated for credit for a maximum of 10 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

ENGL 655 - Multilingualism and Second Language Acquisition

Units: 4

Focuses on theory and empirical research related to multilingualism as well as psycholinguistic processes, sociocultural contexts, and affective factors involved in the acquisition of a second language, with emphasis on adult learners of English.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: ENGL 6503.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 656 - Pedagogical Grammar

Units: 4

Examination of grammar needed by ESL students to develop their analytical and critical thinking skills, comprehension of ESL students' problems and challenges with learning grammar, and investigation of strategies, methods and approaches to teaching grammar effectively to ESL students.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: ENGL 6510.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 657 - Curriculum Design and Assessment in ESOL for Adult Learners

Units: 4

Focuses on best practices for ESOL curriculum development as well as methods of assessing language proficiency in adult learners. Examines adequacy of traditional evaluation methods as well as procedures in test construction and evaluation.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: ENGL 6507.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 660 - Introduction to Composition Studies Theory and Methods

Units: 4

Introduction to the field of Composition Studies and its contribution to theories and methods of teaching writing.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: ENGL 6750.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 661 - Theory and Practice of Teaching Literature

Units: 4

Theory and methods for teaching literary genres and periods appropriate for high school and community college literature courses.

Equivalent Quarter Course: ENGL 6770.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 690 - Independent Study

Units: 1-4

Graduate students may apply no more than 6 units of independent study to a graduate degree.

Prerequisites: Graduate students with at least a 3.0 (B) grade point average in all courses in the field or department in which the Independent Study is to be taken.

Prerequisites: Department consent and minimum 3.0 GPA.

Equivalent Quarter Course: ENGL 6900.

Repeatability: May be repeated for credit for a maximum of 4 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 691 - University Thesis

Units: 4

Development of a formal writing project for submission to the University in the specified format.

Supervision by a departmental faculty committee. (See also, "University Thesis Writing Guide," www.csueastbay.edu/thesiswritingguide.)

Prerequisites: Department consent.

Equivalent Quarter Course: ENGL 6910.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 698 - Internship

Units: 1-3

Formal advanced work opportunities integrating the academic program with their career aspirations.

Integral advanced hands-on experience enhancing education and preparing for professional and personal success.

Prerequisites: Department consent and minimum 3.0 GPA.

Credit Restrictions: No more than 3 units may be applied to the English major.

Equivalent Quarter Course: ENGL 6898.

Repeatability: May be repeated with department consent for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

ENGL 699 - Departmental Thesis

Units: 2-4

Development of a research-based project for departmental submission. The written project, focusing on TESOL research or practice, includes a survey of relevant scholarly literature. Supervised by the TESOL coordinator. A portfolio M.A. TESOL program work also required.

Prerequisites: Department consent.

Equivalent Quarter Course: ENGL 6909.

Repeatability: May be repeated for credit for a maximum of 4 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

English: Language/Grammar

ENGL 350 - Study of Language

Units: 4

Theory of language and communication; role of language in the personal and social development of the fully "human" being; origins, development, acquisition, and diversity of language; nature and function of symbolic systems; phonology, morphology, syntax, orthography, sign language, and semantics.

Equivalent Quarter Course: ENGL 3005.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 351 - Modern English Grammar

Units: 4

A traditional philological description of the structure of standard written English.

Equivalent Quarter Course: ENGL 3010.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 352 - Introduction to Phonology

Units: 4

An introduction to the methods that linguists use to describe the sound systems of the languages of the world. Particular emphasis given to English sound patterns.

Equivalent Quarter Course: ENGL 3015.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 353 - Linguistic History of the English Language

Units: 4

A linguistic approach to the origin and development of English, and its relations to cognate languages.

Equivalent Quarter Course: ENGL 3040.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ENGL 354 - Advanced Studies in English Vocabulary

Units: 4

Advanced studies in English vocabulary: etymology, word-formation, and meaning-development. Particular attention to Latin and Greek etymology. Course offered in both classroom and online formats.

Equivalent Quarter Course: ENGL 3045.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

ENGL 355 - Language and Gender

Units: 4

Critical analysis and discussion of gender as it shapes and is reflected in spoken and written discourse.

Equivalent Quarter Course: ENGL 3050.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 450 - Current Theories in Formal Grammar

Units: 4

Introduction to current theories in the study of formal grammar.

Equivalent Quarter Course: ENGL 4010.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 451 - Language in the U.S.A.

Units: 4

Overview of the language situation in the U.S.A. Regional, social and ethnic dialects. Stylistic variation, Spanish-English code switching/mixing. African American language. Pidgin-creole varieties. Implications for teaching and learning.

Equivalent Quarter Course: ENGL 4040.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

ENGL 497 - Topics in the Study of the English Language

Units: 4

Intensive study of a single aspect of the English language, or of a group of closely related aspects.

Equivalent Quarter Course: ENGL 4060.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

English: Literary Theory

ENGL 340 - Critical Theory of Literature

Units: 4

Examination and application of major critical approaches to literary analysis and interpretation.

Equivalent Quarter Course: ENGL 3080.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

English: Rhetoric and Composition

ENGL 251 - Grammar for Writers

Units: 4

Instruction in the structure and style of the standard, literary English sentence. Review of traditional grammar and usage, with attention to the integration of the sentence into its logical and rhetorical contexts.

Equivalent Quarter Course: ENGL 2005.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 252 - Vocabulary Building

Units: 4

Designed to help students build varied, precise vocabularies; introduces the historical development and present-day resources of the English vocabulary; special attention given to Latin and Greek word-building prefixes, suffixes, and elements.

Equivalent Quarter Course: ENGL 2010.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

ENGL 300 - Writing for Proficiency

Units: 3

Practice writing skills to reach proficiency, determined by portfolio assessment, required for students to enroll in next level writing course and complete the University Writing Skills Requirement. Some students may demonstrate necessary proficiency for UWSR upon completion of ENGL 300.

Prerequisites: All of: ENGL 101, ENGL 102, ENGL 104, junior standing.

Credit Restrictions: Not for English major credit.

Equivalent Quarter Course: ENGL 3000.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: CR/NC grading only.

ENGL 301 - Writing for Proficiency (English for Speakers of Other Languages)

Units: 3

Practice in writing skills necessary for proficiency, determined by portfolio assessment, required to enroll in next level writing course and complete University Writing Skills Requirement. Designed for multilingual students. Some students may demonstrate proficiency for UWSR upon course completion.

Prerequisites: All of: ENGL 101, ENGL 102, ENGL 104, junior standing.

Credit Restrictions: Not for English major credit.

Equivalent Quarter Course: ENGL 3001.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

ENGL 302 - Discursive Writing

Units: 3 ; GE/GR Area: UWSR

Theory and practice of discursive writing; critical reading and evaluation of formal and informal prose.

Prerequisites: Junior standing or above; and either CR (credit) in ENGL 300 or ENGL 301 and a score of 7 on the first-tier portfolio; or score of 7 or better on the Writing Skills test; or satisfaction of the graduation writing assessment requirement (GWAR) at any CSU campus including the UWSR at Cal

State East Bay. Credit unavailable through challenge.

Credit Restrictions: Not for English major credit.

Equivalent Quarter Course: ENGL 3003.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *University Writing Skills Requirement*

ENGL 303 - Advanced Expository Writing

Units: 4

An advanced course in the theory and practice of expository writing.

Equivalent Quarter Course: ENGL 3020.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

ENGL 304 - Introduction to Technical and Professional Writing

Units: 4

Overview of technical, professional, and workplace writing. Emphasis on finding and evaluating information, creating well-crafted, user-oriented documents, and using suitable applications to make information available in appropriate formats. Ethics of technical writing and writing in a multicultural context.

Equivalent Quarter Course: ENGL 3025.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENGL 499 - Senior Seminar

Units: 4

English major portfolio development, preparation for exit examination, preparation for career options, and information on educational opportunities beyond the English undergraduate degree.

Prerequisites: English major and senior standing.

Equivalent Quarter Course: ENGL 4890.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

English: World Literature

ENGL 312 - Renaissance Humanism

Units: 4

Influence of classical learning; revival of humanistic studies; development of European Renaissance; major authors and representative works will be studied.

Prerequisites: Completion of GE areas A1, A2 and A3.

Equivalent Quarter Course: ENGL 3720 or ENGL 3725.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

English: Writing Workshop

ENGL 205 - Beginning Workshop in Fiction

Units: 4 ; G.E./G.R. Area: C1

Introduction to fiction writing with emphasis on the short story. May be repeated once for credit for a maximum of 8 units.

Equivalent Quarter Course: ENGL 2070.

Repeatability: May be repeated for credit for a maximum of 8 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C1 - Lower Division Arts*

ENGL 206 - Beginning Workshop in Poetry

Units: 4 ; G.E./G.R. Area: C1

Introduction to poetry writing of various types with emphasis on basic techniques. May be repeated once for credit for a maximum of 8 units.

Equivalent Quarter Course: ENGL 2075.

Repeatability: May be repeated for credit for a maximum of 8 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C1 - Lower Division Arts*

ENGL 305 - Intermediate Workshop in Fiction

Units: 4

An intermediate-level fiction writing workshop. Close analysis of student manuscripts and published stories.

Strongly Recommended Preparation: English 205.

Equivalent Quarter Course: ENGL 3070.

Repeatability: Course may be repeated twice for credit for a maximum of 12 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ENGL 307 - Intermediate Workshop in Creative Nonfiction

Units: 4

Writing and workshop critique of long and short creative nonfiction.

Equivalent Quarter Course: ENGL 3071.

Repeatability: Course may be repeated twice for credit for a maximum of 12 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ENGL 405 - Advanced Workshop in Fiction

Units: 4

An advanced-level fiction writing workshop. Close analysis of student manuscripts with some attention paid to suitability for publication.

Strongly Recommended Preparation: ENGL 305.

Equivalent Quarter Course: ENGL 4070.

Repeatability: May be repeated for credit for a maximum of 8 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ENGL 406 - Advanced Workshop in Poetry

Units: 4

An advanced-level poetry writing workshop. Close analysis of student manuscripts with some attention paid to suitability for publication.

Strongly Recommended Preparation: ENGL 206.

Equivalent Quarter Course: ENGL 4075.

Repeatability: May be repeated for credit for a maximum of 8 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

Environmental Science

ENSC 210 - Physical and Environmental Geology

Units: 4 ; G.E./G.R. Area: B1, B3

Nature and distribution of earth materials, the processes by which the materials are formed and altered, and the nature and development of the landscape.

Equivalent Quarter Course: GEOL 2100 or GEOL 2101.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *B1 - Lower Division Physical Science, B3 - Lower Division Laboratory Activity*

Cross-listed: GEOL 210.

ENSC 211 - Historical Geology

Units: 4

Principles of interpretation of Earth history. Study of plate tectonics and sea-floor spreading as related to the development of continents, ocean basins, and mountain belts. Origin, evolution and diversification of life through time. Laboratory work includes hands-on exercises with fossils.

Strongly Recommended Preparation: GEOL 210.

Equivalent Quarter Course: GEOL 2102.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Cross-listed: GEOL 211.

ENSC 220 - Warming Planet, Rising Seas, and Global Change

Units: 3 ; G.E./G.R. Area: B1; Sustainability

Introduction to important environmental issues connected with global change, including climate change, greenhouse gases, extreme weather, sea level rise, ocean acidification, impacts on humans and other species. Critical analysis of media coverage of global change, climate science. Non-science majors welcome.

Equivalent Quarter Course: ENSC 2300.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B1 - Lower Division Physical Science, Overlay - Sustainability*

ENSC 235 - Disasters on Earth and in Hollywood

Units: 3 ; G.E./G.R. Area: B1; Sustainability

Investigates the portrayal of Earth Science and natural disasters in popular cinema. Focuses on fundamental geologic principles and processes, the scientific method, and the importance of differentiating science from pseudo-science in modern culture, and implications for a sustainable future.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B1 - Lower Division Physical Science, Overlay - Sustainability*

Cross-listed: GEOL 235

ENSC 240 - Environmental Biology

Units: 3 ; G.E./G.R. Area: B2; Sustainability

Introduction to living organisms focusing on organismal interactions with their environment and with other organisms, relationships between organismal structure and function, effects of humans on biological diversity and ecosystems, and conservation of species.

Equivalent Quarter Course: ENSC 2400.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B2 - Lower Division Life Sciences, Overlay - Sustainability*

ENSC 241 - Environmental Biology Laboratory

Units: 1 ; G.E./G.R. Area: B3

Introductory investigations of living organisms, focusing on biological processes, biodiversity, how the environment influences organisms, and how organisms in turn influence the environment. Methods of scientific inquiry, experimental design, data analysis, science as a creative process.

Co-requisites: ENSC 240.

Equivalent Quarter Course: ENSC 2401.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *B3 - Lower Division Laboratory Activity*

ENSC 250 - Oil, Water and Future Earth

Units: 3 ; G.E./G.R. Area: B1; Sustainability

Focuses on the complex interactions of fossil fuels, water, climate and humans, which are all interconnected and interact in multiple ways. Various interconnections and dependencies are investigated regarding the evolution of these systems with emphasis on sustainability.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B1 - Lower Division Physical Science, Overlay - Sustainability*

ENSC 260 - Introduction to GIS in Earth and Environmental Sciences

Units: 3 ; G.E./G.R. Area: B1, B3

Interpretation of spatial data and preparation of maps using Geographic Information Systems. Display and manipulation of vector and raster data. Map scale, projections, and coordinate transformations. Basic database queries. Global Positioning Systems. The course will include examples from Earth sciences.

Lecture Units: 2; Lab Units: 1

Credit Restrictions: Must be taken graded A-F for credit toward the major.

Equivalent Quarter Course: GEOL 2600.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B1 - Lower Division Physical Science, B3 - Lower Division Laboratory Activity*

Cross-listed: GEOL 260.

ENSC 280 - Humans and the Environment in California

Units: 3 ; G.E./G.R. Area: B1; Sustainability

Human impacts on the biologic and geologic environment in California. Topics include climate change, resource needs and sustainability, waste issues, species diversity, and ecosystem degradation.

Equivalent Quarter Course: ENSC 2800 or ENSC 2801 or ENSC 2802.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B1 - Lower Division Physical Science, Overlay - Sustainability*

ENSC 297 - Introductory Field Experience

Units: 1

Applied field-based inquiry activities to introduce lower-division students to fundamental field skills that are common to field research in geology and the environmental sciences. Students spend extended periods in a natural, outdoor laboratory setting.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Cross-listed: GEOL 297.

ENSC 311 - Geomorphology

Units: 3

Landforms as products of diastrophism, volcanism, and surficial processes; morphogenetic regions of the Earth and the effect of climate on the processes that shape them; rates and stages of landscape evolution and their dependence on time, process and structure.

Strongly Recommended Preparation: GEOL 211.

Prerequisites: GEOL 210.

Equivalent Quarter Course: GEOL 3110.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Cross-listed: GEOL 311.

ENSC 320 - The Science of Global Change

Units: 3 ; G.E./G.R. Area: B6; Sustainability

The science of global environmental change over time; impacts on the physical environment and living organisms (including humans). Topics include orbital variations, greenhouse gases, ozone, extreme weather, ocean acidification, sea level rise, climate variability, climate modeling.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Credit Restrictions: Not for Environmental Science major credit; majors should enroll in ENSC 420.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *B6 - Upper Division Science Inquiry and Quantitative Reasoning, Overlay - Sustainability*

ENSC 330 - Weather and the Atmosphere

Units: 3 ; G.E./G.R. Area: B6; Sustainability

Application of physical science principles in the study of the structure and circulation of the atmosphere; weather and weather forecasting. Emphasis on current issues and topics of local and global interest.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Credit Restrictions: Not for Geology or Environmental Sciences major or minor credit.

Equivalent Quarter Course: GEOL 3040.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B6- Upper Division Science Inquiry and Quantitative Reasoning, Overlay - Sustainability*

Cross-listed: GEOL 330

ENSC 340 - The Oceans

Units: 3 ; G.E./G.R. Area: B6; Sustainability

An exploration of the interaction of oceans with the earth's geosphere, atmosphere, and biosphere. Topics include seafloor morphology, coastlines, seawater chemistry, the role the oceans play in controlling weather and climate, marine ecosystems, human impacts and dependence on the oceans.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Credit Restrictions: Not for Environmental Sciences major credit; not for Geology major credit. Cannot earn credit for both GEOL 340 and GEOL 341.

Equivalent Quarter Course: GEOL 3401.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F or CR/NC (student choice)

G.E./G.R. Area Satisfied: *B6 - Upper Division Science Inquiry and Quantitative Reasoning, Overlay -*

Sustainability

Cross-listed: GEOL 340

ENSC 343 - Atmospheric Science

Units: 3

Composition, structure, and thermodynamics of the atmosphere. Cloud and precipitation formation processes. Atmospheric-ocean feedbacks. Implications of human modification of the atmosphere.

Strongly Recommended Preparation: PHYS 125, PHYS 126, and CHEM 110 or CHEM 111.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

Cross-listed: GEOL 343.

ENSC 350 - Environmental Hydrology

Units: 4 ; G.E./G.R. Area: Sustainability

The hydrologic cycle and human impacts on the hydrologic cycle; quantitative assessment of hydrologic processes and concepts including precipitation, evapotranspiration, runoff, water budgets, and groundwater flow; surface water and groundwater contamination and remediation. *Lecture Units: 3; Lab Units: 1*

Prerequisites: CHEM 100, MATH 120 and PHYS 115.

Equivalent Quarter Course: ENSC 3500.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *Overlay - Sustainability*

Cross-listed: GEOL 350.

ENSC 397 - Advanced Field Experience

Units: 2

Applied field based inquiry activities to develop advanced field skills, common to field research and professional activity in geology and the environmental sciences. Students spend extended periods in a natural, outdoor laboratory setting.

Prerequisites: GEOL/ENSC 297 and junior or senior standing.

Repeatability: May be repeated for credit for a maximum of 6 units when the content varies.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Cross-listed: GEOL 397.

ENSC 410 - Geohealth

Units: 3

An exploration of the multitude of environmental exposures, both natural and human-derived, that affect human health. Use of mapping in determining spatial relationships between the environment and health. Case studies including radiation exposure, contaminated drinking water, and air pollution.

Prerequisites: ENSC 280.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

Cross-listed: GEOL 410

ENSC 414 - Hazardous Waste Management

Units: 3 ; G.E./G.R. Area: Sustainability

Study of the investigation and cleanup of hazardous waste sites. Environmental regulations, hazard awareness, contaminant characterization, personal protective equipment, monitoring and sampling equipment, site characterization and control, decontamination, operational hazards and overview of emergency response.

Prerequisites: CHEM 112.

Equivalent Quarter Course: ENSC 4140.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *Overlay - Sustainability*

Cross-listed: GEOL 414.

ENSC 420 - Global Change

Units: 3 ; G.E./G.R. Area: Sustainability

Interaction of climate and Earth's systems. Links between past and future climate, life, oceans, and the solid earth. Topics include orbital variations, greenhouse gases, ozone, extreme weather, ocean acidification, sea level rise, climate variability, climate modeling, mitigation, adaptation, and sustainability.

Prerequisites: CHEM 112, ENSC 280 and PHYS 126.

Equivalent Quarter Course: ENSC 4200.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *Overlay - Sustainability*

ENSC 460 - Geographic Information Systems for Earth and Environmental Sciences

Units: 4

An introduction to applications of Geographic Information Systems (GIS) to geology and other earth sciences. Application of GIS software for interpretation and analysis of spatial data. Use of digital terrain data and remotely-sensed imagery. Creation of maps and report generation.

Prerequisites: GEOL 210.

Equivalent Quarter Course: GEOL 4600.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Cross-listed: GEOL 460.

ENSC 490 - Independent Study

Units: 1-4

Independent study under the supervision a department faculty member.

Prerequisites: Department consent and minimum 2.0 GPA.

Credit Restrictions: No more than 12 units of independent study may be applied in the major department and 8 units in other departments to a baccalaureate degree.

Equivalent Quarter Course: ENSC 4900.

Repeatability: May be repeated for credit, with department consent, for a total of 12 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENSC 497 - Special Topics and Issues in Environmental Sciences

Units: 3

Readings, discussion, and research on contemporary and/or significant issues in Environmental Sciences.

Equivalent Quarter Course: ENSC 3999.

Repeatability: May be repeated for credit for a maximum of 6 units when content varies.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ENSC 499 - Capstone Seminar in Geosciences

Units: 3

Critical, in-depth study of selected topics of current and classical research in environmental geosciences; topics not repeated in two-year interval. Emphasizes development of information literacy and writing skills to effectively communicate in the language of the discipline.

Prerequisites: Junior or senior standing.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Cross-listed: GEOL 499

Environmental Science: Graduate

ENSC 601 - Professional Ethics in Environmental Geosciences

Units: 1

Exploration of the ethics, roles, and responsibilities of professionals in the fields of geology and environmental science. Examination of ethics codes of professional organizations and best practices for promoting ethical behavior.

Prerequisites: Post-baccalaureate standing.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

Cross-listed: GEOL 601.

ENSC 631 - Isotope Geochemistry

Units: 4

This course covers rules and assumptions for radiometric dating and examples of dating rocks and other natural materials, and rules governing fractionation of stable isotopes and applications of stable isotopes as tracers of geologic and biogeochemical processes.

Equivalent Quarter Course: GEOL 6310.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Cross-listed: GEOL 631.

ENSC 632 - Groundwater Flow and Contaminant Transport

Units: 4

Groundwater resource evaluation methods. Mathematical development of multi-dimensional flow equations. Introduction to computer models and numerical simulation. Properties of inorganic and organic groundwater contaminants. Contaminant transport processes.

Prerequisites: M.S. Geology major.

Equivalent Quarter Course: GEOL 6320.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Cross-listed: GEOL 632.

ENSC 633 - The Science of Soils

Units: 4

Aspects of soil science, including soil formation and structure, soil mineralogy, soil chemistry and fertility, soil physics, and soil ecology. Includes agricultural and urban environments, and issues such as

soil contamination.

Prerequisites: CHEM 112.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

Cross-listed: GEOL 633

ENSC 634 - Biogeochemistry

Units: 4

The movement of elements (including nutrients and contaminants) through the biosphere, atmosphere, geosphere, and hydrosphere. Mechanisms of transformation, including redox transformations. Elemental cycles discussed can include carbon, nitrogen, phosphorus, sulfur, iron, arsenic, chromium, selenium, etc.

Prerequisites: CHEM 112.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

Cross-listed: GEOL 634

ENSC 671 - Field Experience

Units: 1-2

Applied field based inquiry activities that provide students with opportunities to acquire and practice professional and technical field skills. Students spend extended periods in a natural, outdoor laboratory setting working closely with peers and instructor.

Repeatability: Course may be repeated for credit for a maximum of 6 units when content varies.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Cross-listed: GEOL 671

ENSC 698 - Internship

Units: 1-3

Research or professional experience with a public or private organization involved in geologic or environmental studies, summarized in a written report.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: GEOL 6420.

Repeatability: Course may be repeated for credit for a maximum of 3 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

Cross-listed: GEOL 698.

Environmental Studies

ENVT 101 - Environmental Challenges of the 21st Century

Units: 3 ; G.E./G.R. Area: D1-3; Sustainability

Are earth and humanity at the turning point of Environmental Armageddon or Sustainability and Social Justice? A study of Anthropogenic impacts, environmental limits, societal implications, and possible alternatives.

Equivalent Quarter Course: ENVT 2000.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D1-3 - Lower Division Social Sciences, Overlay - Sustainability*

ENVT 225 - Fundamentals of GIS

Units: 3

Fundamentals of location-related information management, manipulation, and display. Usage of ArcGIS software in business; education; and physical, social and life sciences. Special topics on GIS layer formats, elementary spatial analysis techniques, and the manipulation of spatially explicit information.

Lecture Units: 2; Lab Units: 1

Equivalent Quarter Course: GEOG 3030.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

Cross-listed: GEOG 225

ENVT 307 - Social Impact through Sustainable Solar Design

Units: 3 ; G.E./G.R. Area: B6; Sustainability

Topics include: hands-on instruction of solar energy and design, energy poverty, and social justice impacts of solar energy. Construct stand-alone solar energy system designed for delivery of energy to the energy poor. Opportunities to teach solar science in local schools.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Repeatability: May be repeated for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B6- Upper Division Science Inquiry and Quantitative Reasoning, Overlay - Sustainability*

Cross-listed: PHYS 307.

ENVT 310 - Literature and Research Methods

Units: 4

Seminar in geographical and environmental literature, source materials, and research methods. Examination of seminal ideas associated with each discipline. Intensive exercises in both written and oral communication.

Prerequisites: Department consent and ENVT 101 or GEOG 125.

Equivalent Quarter Course: GEOG 3450.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Cross-listed: GEOG 310

ENVT 320 - Environmental Resource Analysis

Units: 4

Quantitative methods in environmental and resource studies. *Lecture Units: 2; Lab Units: 2*

Prerequisites: CHEM 100 and STAT 100.

Equivalent Quarter Course: ENVT 3400.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Cross-listed: GEOG 320

ENVT 330 - Environment, Sustainability, and Social Justice

Units: 3 ; G.E./G.R. Area: D4; Sustainability

Environmental sustainability and social justice interactions, US and international. Social and ethical implications of environmental and resource limits. Sustainable development as a vehicle for social justice.

Prerequisites: Completion of GE areas A1, A2, A3 and B4; and junior, senior, or post-baccalaureate standing.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D4 - Upper Division Social Sciences, Overlay - Sustainability*

ENVT 340 - Climate Change

Units: 3 ; G.E./G.R. Area: B6; Sustainability

Pre-modern and modern variations in climate with emphasis on geological, geomorphological, and biological records. Causes (natural and anthropogenic) and consequences (natural and cultural) of climate change. Factors determining vulnerability to climate change impacts and strategies for adaptation and mitigation.

Strongly Recommended Preparation: GEOG 200.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: GEOG 3120.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B6 - Upper Division Science Inquiry and Quantitative Reasoning, Overlay - Sustainability*

Cross-listed: GEOG 340.

ENVT 380 - Applied Field Studies

Units: 3

Application of field techniques and methods in environmental studies, including field observation, sampling, data collection, and computer-based analysis. Presentation of results in graphic and written forms.

Prerequisites: ENVT 320.

Equivalent Quarter Course: ENVT 3480 or GEOG 3480.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Cross-listed: GEOG 380

ENVT 398 - Internship

Units: 1-3

Supervised work experience in which the student completes academic assignments integrated with off-campus paid or volunteer activities closely related to the discipline of environmental studies.

Prerequisites: Department consent.

Equivalent Quarter Course: ENVT 3898.

Repeatability: May be repeated for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

ENVT 410 - Environmental Impact Analysis

Units: 3

Examination of the origins, applications, and changing dynamics of the environmental review process. Policy implications of environmental impact assessment, land-use planning, and public decision-making in the U.S., with an emphasis on California.

Strongly Recommended Preparation: ENVT 330.

Prerequisites: ENVT 380.

Equivalent Quarter Course: ENVT 4100.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENVT 445 - Water and Watershed Resources

Units: 4 ; G.E./G.R. Area: B6

The science, policy and practice of urban water and watershed resources management. Watershed and stream system identification, hydrology, assessment, and restoration. Municipal water systems and their management, water and wastewater treatment, water quality monitoring, stormwater, water conservation, and supply reliability.

Strongly Recommended Preparation: GEOG 200 or ENVT 101.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: GEOG 4350.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B6 - Upper Division Science Inquiry and Quantitative Reasoning*

Cross-listed: GEOG 445

ENVT 447 - Energy, Climate and Society

Units: 4 ; G.E./G.R. Area: B6; Sustainability

The science and technology of societal energy choices as they affect global environmental sustainability, national security, equity, and social justice.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ENVT 4320.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B6 - Upper Division Science Inquiry and Quantitative Reasoning, Overlay - Sustainability*

Cross-listed: GEOG 447

ENVT 465 - Sustainable Communities and Development

Units: 4 ; G.E./G.R. Area: D4; Sustainability

An assessment of the personal, corporate, local, national and global dimensions of sustainability, the challenges facing humanity, and the identification of future options and alternatives at each scale, with special emphasis on urban sustainability issues, goals, progress, and process.

Strongly Recommended Preparation: ENVT 101/GEOG 200.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: GEOG 4330.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D4 - Upper Division Social Sciences, Overlay - Sustainability*

Cross-listed: GEOG 465

ENVT 490 - Independent Study

Units: 1-3

Faculty-guided independent research on an environmental topic.

Prerequisites: Department consent and minimum 2.0 GPA.

Equivalent Quarter Course: ENVT 4900.

Repeatability: May be repeated for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ENVT 493 - Environmental Projects

Units: 3

Original project-based research on an environmental issue, working under faculty guidance as an individual and in groups.

Prerequisites: ENVT 310, ENVT 320 and ENVT 445.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

ENVT 495 - Environmental Internship

Units: 1-3

Campus-based internships working on environmental projects.

Strongly Recommended Preparation: ENVT 101.

Prerequisites: Department consent.

Equivalent Quarter Course: ENVT 4910.

Repeatability: May be repeated for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

Ethnic Studies

ES 100 - Introduction to Social Justice in Communities of Color

Units: 3 ; G.E./G.R. Area: D1-3; Social Justice

A survey of social justice movements in communities of color beginning with the 1968 Third World Liberation Strikes at SFSU and UC Berkeley. Course considers the formation of Ethnic Studies and ongoing relationship between social justice and Ethnic Studies scholarship.

Equivalent Quarter Course: ES 1001.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D1-3 - Lower Division Social Sciences, Overlay - Social Justice*

ES 120 - The People's History I

Units: 3 ; G.E./G.R. Area: US-1, US-2, US-3; Social Justice

Topical and comparative approach to the contributions of diverse peoples and cultures to the development of the United States from European contact to 1877.

Equivalent Quarter Course: ES 1201.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *American Institutions/Code US-1 and US-2 and US-3, Overlay - Social Justice*

ES 121 - The People's History II

Units: 3 ; G.E./G.R. Area: US-1, US-2, US-3; Social Justice

Topical and comparative approach to the contributions of diverse peoples and cultures to the development of the United States from 1877 to the present.

Equivalent Quarter Course: ES 1202.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *American Institutions/Code US-1 and US-2 and US-3, Overlay - Social Justice*

ES 200 - Race and Resistance

Units: 3 ; G.E./G.R. Area: C1; Diversity

Overview of the history of people of color through activism and resistance in art, politics, and music. Emphasis is on major artists, organizations, movements, and events that sought social change from the 20th century to the present.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C1 - Lower Division Arts, Overlay - Diversity*

ES 244 - Mixed Race Identities in the US

Units: 3 ; G.E./G.R. Area: D1-3; Diversity

Examination of mixed race peoples-their legal and social status, U.S. Census designations, and identities--from the one-drop rule to President Obama and beyond.

Equivalent Quarter Course: ES 3434.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be*

taught both online and on-ground).

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: D1-3 - Lower Division Social Sciences, Overlay - Diversity

ES 247 - Hip Hop Nation

Units: 3 ; G.E./G.R. Area: C1; Social Justice

Hip Hop Nation explores the diasporic origins and the national, and international evolution of hip hop as a transformative cultural and political force.

Equivalent Quarter Course: ES 2175.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: C1 - Lower Division Arts, Overlay - Social Justice

ES 300 - Writing for Social Justice

Units: 3 ; G.E./G.R. Area: UWSR; Social Justice

The theory and practice of persuasive writing with a focus on producing prose that advances a social justice mission.

Prerequisites: Junior standing or above; and either CR (credit) in ENGL 300 or ENGL 301 and a score of 7 on the first-tier portfolio; or score of 7 or better on the Writing Skills test; or satisfaction of the graduation writing assessment requirement (GWAR) at any CSU campus including the UWSR at Cal State East Bay. Credit unavailable through challenge.

Equivalent Quarter Course: ES 3000.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *University Writing Skills Requirement, Overlay - Social Justice*

ES 302 - Eating The Landscape

Units: 3 ; G.E./G.R. Area: C4; Sustainability

Survey of traditional small-scale agroecological systems of North American indigenous farmers. Exploration of these dedicated stewards of foods who continue to enhance the sustainability, diversity, and beauty of the places that they live in.

Strongly Recommended Preparation: For ES Majors: ES 100 and ES 200.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: C4 - Upper Division Arts or Humanities, Overlay - Sustainability

ES 308 - Cultures of Habitat

Units: 3 ; G.E./G.R. Area: B6; Sustainability

A focus on ethnoecology and the study of the interrelationships between local ecosystems and people. Students will learn ethnoecological knowledge of some East Bay communities of color and the role they play in culturally sustainable adaptations to the Bay Area.

Strongly Recommended Preparation: Ethnic Studies Majors should successfully complete ES 100 and ES 200

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B6 - Upper Division Science Inquiry and Quantitative Reasoning, Overlay - Sustainability*

ES 322 - Oral Traditions

Units: 3 ; G.E./G.R. Area: C4; Diversity

An examination of oral traditions in a cross cultural context, with special emphasis on collective memory, folklore, and testimonial literature of indigenous and mestizo/a populations. Students will examine oral history, interviewing techniques, immigration, popular culture, and genealogy.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ES 3230.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities, Overlay - Diversity*

ES 326 - Peoples of Central America

Units: 3 ; G.E./G.R. Area: D4; Social Justice

The developmental relationship between United States communities of Central America origin and contemporary Central America. Focus on historical, socioeconomic, and cultural factors, as well as revolutionary movements, economic dependence, migration patterns (to the United States) and social change.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ES 3800.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D4 - Upper Division Social Sciences, Overlay - Social Justice*

ES 389 - Engaging Communities of Color

Units: 3

Supervised internships designed to enable students to apply ethnic studies analytical perspectives that center on race, class, gender and sexual identities. Students will be directed toward organizations reflecting their personal interests in social justice, the environment, health, art, youth, etc. *Lecture Units: 1; Supervision Units: 2*

Prerequisites: ES 100, ES 200, ES 300, ES 301 and ES 302.

Equivalent Quarter Course: ES 3889.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

ES 398 - Internship

Units: 1-3

Introduction to the internship experience; integration of the academic program with career aspirations; emphasis on internship readiness and preparation for professional success.

Prerequisites: Department consent and minimum 2.0 GPA.

Credit Restrictions: No more than 3 units may be applied to the Ethnic Studies major or minor.

Equivalent Quarter Course: ES 3898

Repeatability: May be repeated with department consent for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

ES 490 - Independent Study

Units: 1-4

Independent study under the supervision a department faculty member.

Prerequisites: Department consent and minimum 2.0 GPA.

Credit Restrictions: Students may apply no more than 12 units of independent study in the major department and 8 units in other departments to a baccalaureate degree.

Equivalent Quarter Course: ES 4900.

Repeatability: May be repeated for credit, with department consent, for a total of 12 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

ES 497 - Issues in Ethnic Studies

Units: 3

Readings, discussion, and research on contemporary and/or significant issues in ethnic studies.

Equivalent Quarter Course: ES 3999.

Repeatability: May be repeated for credit when content varies, for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

Ethnic Studies: African American Studies

ES 245 - Black Flix

Units: 3 ; G.E./G.R. Area: C1; Diversity

Black Flix offers a history of African American produced representations of Black life through cinema and focuses on the social/cultural/political importance of Black cinema and its critique of dominant culture.

Prerequisites: Completion of GE areas A1, A2 and A3.

Equivalent Quarter Course: ES 2300.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C1 - Lower Division Arts, Overlay - Diversity*

ES 301 - Black Feminisms

Units: 3 ; G.E./G.R. Area: D4; Diversity

Examination of key issues, assumptions, and debates in contemporary, post civil rights Black feminist thought. Highlights pioneering contributions to anti-racist and feminist thought.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ES 3303.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D4 - Upper Division Social Sciences, Overlay - Diversity*

ES 340 - Black Literature

Units: 3 ; G.E./G.R. Area: C4; Diversity

An eclectic exploration of the Black literary tradition as a source of theorizing about the Black condition utilizing graphic novels, genre writing, classic literature, poetry, and playwriting.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ES 3691.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities, Overlay - Diversity*

ES 341 - Enslavement and Resistance in the Americas

Units: 3 ; G.E./G.R. Area: D4; Diversity

Investigation of the history and resistance of African American enslavement throughout the Diaspora and implications for the modern world.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ES 3130.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D4 - Upper Division Social Sciences, Overlay - Diversity*

ES 342 - James Baldwin

Units: 3 ; G.E./G.R. Area: C4; Social Justice

This course assesses James Baldwin's vanguard role in American discourses of race and gender and appreciates the impact of his radical synthesis of race and gay consciousness on American politics and the construction of an aesthetic of radical Black masculinity.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ES 3720.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities, Overlay - Social Justice*

ES 343 - Black Power

Units: 3 ; G.E./G.R. Area: D4; Social Justice

Black Power examines the histories of the Black Panther Party for Self-Defense with special emphasis on the regional East Bay manifestations of the movement.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ES 3120.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D4 - Upper Division Social Sciences, Overlay - Social Justice*

ES 344 - Malcolm X: Third World Revolutionary

Units: 3 ; G.E./G.R. Area: D4; Social Justice

An intensive seminar course that examines the life and political/cultural influence of the iconic third world revolutionary known variously as Malcolm Little, Detroit Red, Malcolm X, and El-Hajj Malik El-Shabazz.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ES 3190.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D4 - Upper Division Social Sciences, Overlay - Social Justice*

ES 345 - Jazz Cultures and Communities

Units: 3 ; G.E./G.R. Area: C4; Diversity

The social, cultural, political and economic histories of African American communities from New Orleans to Los Angeles formed around the practice and performance of jazz music.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ES 3146.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities, Overlay - Diversity*

ES 346 - Afrofuturism

Units: 3 ; G.E./G.R. Area: C4; Diversity

Afrofuturism explores cultural aesthetic that combines elements of science fiction, historical fiction, fantasy, Afrocentricity, and magical realism with non-Western cosmologies in order to critique present-day dilemmas of people of color, imagine Black futurity and re-examine historical events.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities, Overlay - Diversity*

ES 347 - Black Sexualities

Units: 3 ; G.E./G.R. Area: D4; Diversity

An introduction to a broad range of sexual diversities within Black communities including LGBTQ identities to BDSM and polyamory. The course deals with the impact of slavery, pornography, sex work, and hip hop culture on affirmative Black sexual awareness.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ES 3165.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: D4 - Upper Division Social Sciences, Overlay - Diversity

Ethnic Studies: American Indian Studies

ES 303 - Debates in Contemporary Native America

Units: 3 ; G.E./G.R. Area: C4; Diversity

Exploration of contemporary debates and issues specific to American Indian communities including theories of American Indian origins, stereotypes, racism, resistance, and sovereignty.

Strongly Recommended Preparation: ES 100 and/or ES 200.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ES 2400.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: C4 - Upper Division Arts or Humanities, Overlay - Diversity

ES 304 - American Indian Oral Literature

Units: 3 ; G.E./G.R. Area: C4; Diversity

Examination of American Indian oral tradition in historical and contemporary contexts. Compare and contrast oral and written literatures, indigenous and western knowledge systems, the different form and function of orality and literacy, and subjective and objective ways of knowing.

Strongly Recommended Preparation: ES 100 and/or ES 200.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ES 2320.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: C4 - Upper Division Arts or Humanities, Overlay - Diversity

ES 305 - Reel Injun: American Indians in Film

Units: 3 ; G.E./G.R. Area: D4; Social Justice

Critical study of portrayals of American Indians in the mass media (film, television, advertising, journalism, arts) and the consequences of simplification, disinformation, and the promotion of stereotypes.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: D4 - Upper Division Social Sciences, Overlay - Social Justice

ES 306 - American Indian Liberation

Units: 3 ; G.E./G.R. Area: D4; Social Justice

Study of organized American Indian liberation and revitalization movements, resistance to colonialism and continued exploitation.

Strongly Recommended Preparation: ES 100 and/or ES 200.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ES 3330.

Possible Instructional Methods: Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: D4 - Upper Division Social Sciences, Overlay - Social Justice

ES 307 - God is Red: American Indian Worldview

Units: 3 ; G.E./G.R. Area: C4; Sustainability

Investigation of American Indian worldview and spirituality, the philosophical tenets behind these different forms of knowledge production and their influences on American Indian societies. The study of how cultures construct and classify their universe and reality based on cultural criteria.

Strongly Recommended Preparation: ES 100 and/or ES 200.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ES 3310.

Possible Instructional Methods: Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: C4 - Upper Division Arts or Humanities, Overlay - Sustainability

Ethnic Studies: Asian American Studies

ES 360 - Asian American Intimacies and Families

Units: 3 ; G.E./G.R. Area: D4; Diversity

This course problematizes the patriarchal heterosexual nuclear Asian American family based on marital and biological ties. It examines how and why cultural practices and public policies continue to prioritize biological familial bonds despite the emergence of intentional family formations.

Strongly Recommended Preparation: For ES Majors: ES 100 and ES 200.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ES 3555.

Possible Instructional Methods: Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be

taught both online and on-ground).

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: D4 - Upper Division Social Sciences, Overlay - Diversity

ES 361 - Asian Immigrant and Refugee Women in Literature and Cinema

Units: 3 ; G.E./G.R. Area: C4; Social Justice

This course explores the lives and images of Asian immigrant and refugee women. We will investigate their real-world conditions as they are inflected in literature, visual media, television and advertising.

Strongly Recommended Preparation: ES 100 and ES 200.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ES 3030.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: C4 - Upper Division Arts or Humanities, Overlay - Social Justice

ES 362 - Concentration Camps, USA

Units: 3 ; G.E./G.R. Area: D4; Social Justice

The personal, social, legal, and economic impact of U.S. government evacuation and internment of U.S. citizens of Japanese ancestry during World War II. Comparison with contemporary and historical detainments of U.S. residents during times of national crisis.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ES 3556.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: D4 - Upper Division Social Sciences, Overlay - Social Justice

ES 363 - Asian American & Pacific Islander Film Festival

Units: 3 ; G.E./G.R. Area: C4; Diversity

In-class scholarly research on Asian American and Pacific Islander films from local annual film festivals. Hands-on film festival experience with the Center for Asian American Media and/or the San Francisco International Film Festival.

Strongly Recommended Preparation: For ES Majors: ES 100 and ES 200.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ES 3557.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: C4 - Upper Division Arts or Humanities, Overlay - Diversity

ES 364 - Asian American & Pacific Islander Communities

Units: 3 ; G.E./G.R. Area: D4; Diversity

This course examines contemporary Asian American and Pacific Islander communities in California. It will combine community analysis and knowledge derived from service learning in AAPI social justice organizations.

Strongly Recommended Preparation: ES Majors: ES 100 and ES 200.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D4 - Upper Division Social Sciences, Overlay - Diversity*

ES 365 - Asian American and Pacific Islander Environmental Voices

Units: 3 ; G.E./G.R. Area: C4; Social Justice

An analysis of key literary texts in the emerging field of Asian American & Pacific Islander Environmentalism and their relationship to important issues such as sustainability, neoliberal globalization, labor, environmental justice, environmental disaster, post-colonial ecology/tourism, indigenous culture, and ecofeminism.

Strongly Recommended Preparation: For ES Majors: ES 100 and ES 200.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities, Overlay - Social Justice*

Ethnic Studies: Genders and Sexualities in Communities of Color

ES 380 - Queer of Color Histories, Cultures, and Identities

Units: 3 ; G.E./G.R. Area: C4; Social Justice

Study of queer of color communities in the US, historically and in the present. Course examines the ways that queer of color communities have resisted the confines of "the normal" by creating resistant cultures, liberatory spaces, and political solidarities.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ES 4300.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities, Overlay - Social Justice*

ES 381 - Racialized Masculinities

Units: 3 ; G.E./G.R. Area: D4; Diversity

This course explores the intersection of race, class, gender, sexuality and the construction of masculinity for gay, straight, bisexual, transgender, queer men of color in contemporary American society.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ES 3710.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D4 - Upper Division Social Sciences, Overlay - Diversity*

ES 382 - Women of Color Writers: Race, Sex, and Resistance

Units: 3 ; G.E./G.R. Area: C4; Diversity

Structured as a "reading salon," this course involves student-centered discussions of writings by US women of color. May include discussion of novels, short stories, poetry and/or essays that address racial uplift, sexuality, radical self-love, resistance, and revolution.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ES 3730.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities, Overlay - Diversity*

ES 384 - Interracial Sex and Marriage

Units: 3 ; G.E./G.R. Area: C4; Social Justice

Interracial sexuality is a critical nexus where race and sexuality intersect with social anxiety and desire. Considering both Hollywood and independent film, this course examines filmic representations of changing social attitudes toward interracial sex and marriage in the US.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ES 3430.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities, Overlay - Social Justice*

Ethnic Studies: Latino/a Studies

ES 320 - The Chicano/a Movement

Units: 3 ; G.E./G.R. Area: D4

This course covers the historical and social aspects of the Chicano/a Movement. It examines the artistic, political, and literary contributions of the Chicano Movement and its impact on US society.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ES 3255.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D4 - Upper Division Social Sciences, Social Justice*

ES 321 - Latinas in the US

Units: 3 ; G.E./G.R. Area: C4; Diversity

A study of Latina feminism through an examination of key writings, film, drama, art, and activism.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ES 3210.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities, Overlay - Diversity*

ES 323 - Latinx and Latin American Film

Units: 3 ; G.E./G.R. Area: C4; Social Justice

An exploration of Latinx and Latin American film with a focus on transnational identities and cultures, im/migration, political resistance, and gender relations.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ES 3243.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities, Overlay - Social Justice*

ES 324 - Latin American Immigration

Units: 3 ; G.E./G.R. Area: C4; Diversity

This course examines Latin American immigration to the United States from a comparative and trans-border perspective. Focus is on refugees, children, economic displacement, and undocumented immigrants. Students will learn current and past policies and their affects on immigrant lives.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ES 3805.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be*

taught both online and on-ground).

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: C4 - Upper Division Arts or Humanities, Overlay - Diversity

ES 325 - Cultural Production in Mexico and Mesoamerica

Units: 3 ; G.E./G.R. Area: C4; Social Justice

Exploration of culture, artistic production, and identity from pre-Colombian times to the present. Major topics of discussion are Mesoamerican religion and culture, conquest and colonialism, Spanish influences, cuisine, music, gender and sexuality, revolution, and contemporary Mexican and Mesoamerican world views.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: C4 - Upper Division Arts or Humanities, Overlay - Social Justice

ES 327 - Decolonize Your Diet

Units: 3 ; G.E./G.R. Area: D4; Sustainability

An examination of the indigenous roots of Mesoamerican cuisine and an exploration of social, political, and spiritual aspects of food and diet in Mexican and Central American communities in the US.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: ES 3010.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: D4 - Upper Division Social Sciences, Overlay - Sustainability

Finance

FIN 230 - Personal Finance

Units: 3 ; G.E./G.R. Area: E

Principles and practices of money management, consumer credit, savings, investments, taxation, and consumer protection.

Equivalent Quarter Course: FIN 2300.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: E - Lifelong Learning and Self-Development

FIN 380 - Real Estate Principles

Units: 3

Fundamental tools of real estate decision-making and survey of real estate finance, investment, valuation, development, spatial economics, law, brokerage, and operations.

Equivalent Quarter Course: FIN 3400.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

FIN 382 - Real Estate Practice

Units: 3

Responsibilities of real estate sales and brokerage practices, the selling and buying processes of real property from listing to closing escrow, the purpose and importance of title. Ethical responsibilities of owning and operating a real estate business.

Equivalent Quarter Course: FIN 3410.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

FIN 384 - Real Estate Law

Units: 3

Legal facets of real property acquisition, ownership and disposition. Importance of titles, deeds, easement creation, zoning laws, leases and contracts, community property, types of tenancies. Introduction to mortgage and construction laws, brokerage laws and land-use regulation.

Equivalent Quarter Course: FIN 3420.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

FIN 398 - Internship

Units: 1-3

Introduction to the internship experience; integration of the academic program with career aspirations; emphasis on internship readiness and preparation for professional success.

Prerequisites: Department consent and minimum 2.0 GPA.

Credit Restrictions: No units may be applied to any CBE major or minor.

Equivalent Quarter Course: FIN 3898.

Repeatability: May be repeated with department consent for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

FIN 405 - Corporate Finance

Units: 3

In-depth study of theories and practices of corporate financial management. Emphasis on corporate financial decision-making, including capital budgeting, capital structure, dividend policy, risk management, and international financial management.

Prerequisites: BUS 330.

Equivalent Quarter Course: FIN 4300.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

FIN 410 - Problems in Corporate Finance

Units: 3

Studies of specific problems in corporate financial policy formulation and decision-making using financial data bases and models.

Prerequisites: BUS 330.

Equivalent Quarter Course: FIN 4320.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

FIN 420 - Investment Analysis

Units: 3

Introduction to the theory and practice of investment analysis. Topics include asset classes and financial instruments, markets and trading, investment companies, modern portfolio theory, fundamental and technical analysis of securities, and portfolio management.

Prerequisites: BUS 330.

Equivalent Quarter Course: FIN 4310.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

FIN 430 - Derivatives Markets

Units: 3

Financial derivative markets. Topics include futures and forward markets, valuation, and strategies; option markets, valuation, and strategies; risk management and hedging; swaps and financial engineering.

Prerequisites: BUS 330.

Equivalent Quarter Course: FIN 4315.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

FIN 435 - Risk Management in Financial Institutions

Units: 3

This course examines the US financial system. Topics include Federal Reserve mandates of monetary policy; money and mortgage markets; risk management and techniques in financial institutions; and issues leading up to financial crises.

Prerequisites: BUS 330.

Equivalent Quarter Course: FIN 4328.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

FIN 445 - Financial Modeling

Units: 3

Using spreadsheets to solve a range of financial problems in investments, small business and corporate finance. Hands-on application of financial concepts in order to develop skills useful in a variety of jobs in finance, accounting, insurance, real estate and management.

Prerequisites: BUS 330.

Equivalent Quarter Course: FIN 4330.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

FIN 460 - International Business Finance

Units: 3

Markets and monetary systems in different countries where multinational firms operate. Topics include analyses of exchange rate risk, import/export dynamics, international parity conditions, exchange rate regimes and hedging.

Prerequisites: BUS 330.

Equivalent Quarter Course: FIN 4375.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

FIN 470 - Entrepreneurial Finance

Units: 3

Features of entrepreneurial finance. Emphasis on examining the financing options available for ventures, the structure of different financing options and the characteristics of the venture capital industry.

Prerequisites: BUS 330.

Equivalent Quarter Course: FIN 4305.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

FIN 475 - Advanced Investment Analysis and Ethics

Units: 3

Advanced analysis of equities, fixed income, and alternative investments including the portfolio management process and investment related ethics and professional standards.

Prerequisites: FIN 420.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

FIN 480 - Real Estate Finance

Units: 3

Study of equity, mortgage, lease, sale and lease-back, and innovative methods of financing residential and commercial real estate, including related tax effects. Analysis of mortgage-backed securities, including related pricing techniques.

Equivalent Quarter Course: FIN 4410.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

FIN 482 - Real Estate Valuation

Units: 3

Applications of appraisal theory and investment analysis to the field of Real Estate.

Equivalent Quarter Course: FIN 4415.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

FIN 484 - Sustainable Real Estate Development

Units: 3

Analysis of sustainability applying to real estate development including resources and costs of rehabilitation and construction of green building technology. Topics include building sustainable infrastructure, financial impacts, developer's costs, and returns on "green" projects.

Equivalent Quarter Course: FIN 4420.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

FIN 486 - Real Estate Markets and Housing Policies

Units: 3

Study of real estate markets, regulations, housing policies, and related topics.

Equivalent Quarter Course: FIN 4470.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

FIN 488 - Seminar in Advanced Topics in Real Estate

Units: 3

Advanced topics in real estate, including contemporary environmental, sociological, financial, economic, and political issues.

Repeatability: May be repeated for a maximum of 6 units when content varies.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

FIN 490 - Independent Study

Units: 1-4

Independent study under the supervision a department faculty member.

Prerequisites: Department consent and minimum 2.0 GPA.

Credit Restrictions: No more than 12 units of independent study may be applied in the major department and 8 units in other departments to a baccalaureate degree.

Equivalent Quarter Course: FIN 4900.

Repeatability: May be repeated for credit, with department consent, for a total of 12 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

FIN 497 - Seminar in Financial Theory

Units: 3

Selected topics dealing with recent developments in financial theory and management practice.

Prerequisites: BUS 330.

Equivalent Quarter Course: FIN 4370.

Repeatability: May be repeated for a maximum of 6 units when content varies.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F grading only.

Finance: Graduate

BUS 605 - Corporate Financial Management

Units: 3

Theory and practice of corporate financial management. Topics include corporate governance, corporate

performance analysis, capital investment decisions, firm valuation, cost of capital, short-term financing, long-term financing, capital structures, and dividend policies.

Prerequisites: BUS 604.

Equivalent Quarter Course: FIN 6215.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

FIN 620 - Seminar in Security Analysis and Portfolio Management

Units: 3

Theory and practice of security analysis and portfolio management. Topics include asset classes and financial instruments, markets and trading, investment companies, modern portfolio theory, fundamental and technical analysis of securities, bond analysis and management, and performance measurement.

Prerequisites: BUS 605.

Equivalent Quarter Course: FIN 6310.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

FIN 630 - Seminar in Options and Futures

Units: 3

Financial derivative markets. Topics include futures and forward markets, valuation, and strategies; option markets, valuation, and strategies; risk management and hedging; swaps and financial engineering.

Prerequisites: BUS 605.

Equivalent Quarter Course: FIN 6315.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

FIN 640 - Financial Markets and Institutions

Units: 3

The U.S. financial system. Topics include Federal Reserve mandates of monetary policy and inflation; money and mortgage markets; risk management and techniques in financial institutions; and issues leading up to financial crises.

Prerequisites: BUS 605.

Equivalent Quarter Course: FIN 6320.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

FIN 650 - Financial Management of Banking Institutions

Units: 3

Commercial bank management in today's financial services industry. Modern approach to understanding and managing the risks faced by banks. Methods of optimizing shareholder value, risk-return tradeoffs, regulatory and strategic issues.

Prerequisites: BUS 605.

Equivalent Quarter Course: FIN 6325.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

FIN 660 - International Financial Management

Units: 3

Financial and currency markets and monetary systems in which multinational firms operate. Topics include analyses of the balance of payments, international parity conditions, foreign exchange markets and exchange rate behavior.

Prerequisites: BUS 605.

Equivalent Quarter Course: FIN 6375.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

FIN 670 - New Venture Financing

Units: 3

Unique features of entrepreneurial finance. Emphasis will be on examining the characteristics, structure, and valuation of ventures. Various aspects of the venture capital industry are addressed.

Prerequisites: BUS 605.

Equivalent Quarter Course: FIN 6305.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

FIN 690 - Independent Study

Units: 1-4

Independent study under the supervision of a member of the graduate faculty.

Prerequisites: Department consent and minimum 3.0 GPA.

Equivalent Quarter Course: FIN 6900.

Repeatability: May be repeated for credit, with department consent, for a total of 12 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

FIN 697 - Issues in Finance

Units: 3

Readings, discussion, and research on contemporary and/or significant issues in finance.

Equivalent Quarter Course: FIN 6999.

Repeatability: May be repeated for credit when content varies, for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

FIN 698 - Internship

Units: 1-3

Formal advanced work opportunities integrating the academic program with their career aspirations.

Integral advanced hands-on experience enhancing education and preparing for professional and personal success.

Prerequisites: Department consent and minimum 3.0 GPA.

Credit Restrictions: No units may be applied to any CBE graduate degree.

Equivalent Quarter Course: FIN 6898.

Repeatability: May be repeated with department consent for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

General Studies

GS 101A - Foundations of Success I

Units: 1 ; G.E./G.R. Area: E

Develops skills for success in college and beyond. Activities focus on self agency, growth mindset, working styles, and sense of community; exploration of academic resources. Required for freshmen during Fall semester as part of the Freshman Year Experience program.

Co-requisites: Enrollment in linked courses as part of the Freshman Year Experience program.

Equivalent Quarter Course: GS 1011.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *E - Lifelong Learning and Self-Development*

GS 101B - Foundations of Success II

Units: 1 ; G.E./G.R. Area: E

Builds on skills from GS 101A with teamwork, effective communication, and preparing for sophomore success. Activities emphasize diversity, social justice, and sustainability through community engagement. Required for freshmen during Spring semester as part of the Freshman Year Experience program.

Co-requisites: Linked courses within Freshman Year Experience program.

Equivalent Quarter Course: GS 1012.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *E - Lifelong Learning and Self-Development*

GS 201 - Leadership

Units: 1 ; G.E./G.R. Area: E

Theory and practice of Peer Mentoring. Focus on understanding the mentoring role in and outside of the classroom. Develop leadership through practical application by practicing the competencies to work with instructors and students.

Prerequisites: Department consent.

Equivalent Quarter Course: GS 2500.

Repeatability: May be repeated for credit for a maximum of 4 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *E - Lifelong Learning and Self-Development*

GS 202 - Peer Mentor Practicum

Units: 1 ; G.E./G.R. Area: E

Development of Peer Mentor Leadership through practical application. Strategies for communicating effectively with diverse students; developing small and large group facilitation skills; ethical and reflective leadership; and personal and professional self-development including the study of emotional intelligence.

Prerequisites: GS 201 and department consent.

Credit Restrictions: This course will be reserved for students officially admitted into the peer mentor program.

Equivalent Quarter Course: GS 2500.

Repeatability: May be repeated for credit for a maximum of 2 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *E - Lifelong Learning and Self-Development*

GS 305 - Advanced Peer Mentor Practicum

Units: 1 ; G.E./G.R. Area: E

Development of Peer Mentor Leadership through practical application. Study of student development and topics of equity and social justice; strategies for guiding group activities/discussions across a broad range of topics and tasks; developing resources for Peer Mentor Services including activities and discussions for GS 201; ethical and reflective leadership; and assessment and design of an individualized professional growth plan.

Prerequisites: Department consent.

Repeatability: May be repeated for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *E - Lifelong Learning and Self-Development*

GS 309 - Honors Service and Leadership

Units: 3

Introduction to the practice and theory of civic leadership, with emphasis upon community engagement. Service learning hours required. Please note: effective spring 2019 this course prefix will change from GS to HON. *Discussion Units: 1; Activity Units: 2*

Prerequisites: Department consent.

Equivalent Quarter Course: GS 3099.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

GS 321 - General Studies for Students in Special Transfer Programs I

Units: 1 ; G.E./G.R. Area: E

Introduction to University services. Academic skill development for transfer students. Strategies for success in upper-division course work and developing career and life goals. Multicultural focus for students enrolled in an academic success program, such as GANAS or Sankofa.

Prerequisites: Department consent.

Equivalent Quarter Course: GS 3011.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *E - Lifelong Learning and Self-Development*

GS 322 - Strategies for Success in College and Career II

Units: 1 ; G.E./G.R. Area: E

Second part of course designed for transfer students. Continues to bolster academic success and career exploration with an increased emphasis on strategies for professional success, including exploration of internship and fellowship opportunities. Offered in Spring semester. *Note: please see Errata chapter of this catalog for course modification.*

Prerequisites: Junior or senior standing and department consent.

Equivalent Quarter Course: GS 3012.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice)

G.E./G.R. Area Satisfied: *E - Lifelong Learning and Self-Development*

GS 331 - Community Engagement and Leadership Seminar for GANAS I

Units: 1 ; G.E./G.R. Area: E; Social Justice

Further academic skill development and improvement to support success in upper division GE and major courses. Focus on connecting learning to students' communities through service learning and to understanding the importance of educational equity in the 21st Century. (*see Errate - Course page for update)

Prerequisites: Completion of GE areas A1, A2 and A3.

Repeatability: May be repeated for credit for a maximum of 3 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *E - Lifelong Learning and Self-Development, Overlay - Social Justice*

GS 332 - Community Engagement and Leadership Seminar for GANAS II

Units: 2 ; G.E./G.R. Area: E; Social Justice

Further academic skill development and improvement to support success in upper division GE and major courses. Focus on connecting learning to students' communities through service learning and to understanding the importance of educational equity in the 21st Century. (*see Errate - Course page for update)

Prerequisites: Completion of GE areas A1, A2 and A3.

Repeatability: May be repeated for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *E - Lifelong Learning and Self-Development, Overlay - Social Justice*

GS 398 - Internship

Units: 1

Introduction to the internship experience; integration of the academic program with career aspirations; emphasis on internship readiness and preparation for professional success.

Prerequisites: At least 2.0 GPA and department consent.

Repeatability: May be repeated for credit for a maximum of 4 units.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: ABC/NC grading only.

GS 399 - Honors Seminar

Units: 1

Students in the University Honors Program produce and present a digital portfolio of their academic and service accomplishments, assessing their Honors work in the context of program learning outcomes and professional goals. *Please note: effective spring 2019 this course prefix will change from GS to HON.*

Prerequisites: Admission to Honors Program, Junior standing or higher, and department consent.

Equivalent Quarter Course: GS 3999.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

GS 401 - Approaches to Tutoring for Learning

Units: 1-3 ; G.E./G.R. Area: E

Introduces the dynamic processes of tutoring and learning. Surveys the literature on tutoring theory and combines tutoring observation and experience in the university learning center to provide informed training for tutors and teachers.

Equivalent Quarter Course: GS 4010.

Repeatability: May be repeated for credit for a maximum of 9 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *E - Lifelong Learning and Self-Development*

GS 498 - Internship

Units: 1

Formal work opportunities integrating the academic program with their career aspirations. Integral hands-on experience enhancing education and preparing for professional and personal success. *Lecture Units: .5; Supervision Units: .5*

Prerequisites: At least 2.0 GPA and department consent.

Repeatability: May be repeated for credit for a maximum of 4 units.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: ABC/NC grading only.

GS 698 - Internship

Units: 1

Formal advanced work opportunities integrating the academic program with their career aspirations. Integral advanced hands-on experience enhancing education and preparing for professional and personal success. *Lecture Units: .5; Supervision Units: .5*

Prerequisites: At least 2.0 GPA and department consent.

Repeatability: May be repeated for credit for a maximum of 4 units.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: ABC/NC grading only.

Geography

GEOG 110 - Physical Geography: Earth Processes and Outcomes

Units: 3 ; G.E./G.R. Area: B1

Major processes and components of the physical environment, including landforms, climate, hydrology, vegetation, and soils. *Lecture Units: 2; Activity Units: 1*

Equivalent Quarter Course: GEOG 2100.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B1 - Lower Division Physical Science*

GEOG 120 - Human Geography: Diversity and Globalization

Units: 3 ; G.E./G.R. Area: D1-3

Exploring cultural diversity in this increasingly globalized world. Contemporary topics of human population, food and agricultural systems, social organization, spatial interaction, and globalization.

Equivalent Quarter Course: GEOG 2300.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D1-3 - Lower Division Social Sciences*

GEOG 125 - World Regions and Development

Units: 3 ; G.E./G.R. Area: D1-3

Geographic analysis of the physical, cultural, environmental, economic and demographic patterns of world regions and selected nations. Patterns of global wealth, poverty and inequality from a geographical perspective and trends in important economic, environmental and sociocultural dimensions of world development.

Equivalent Quarter Course: GEOG 2400.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D1-3 - Lower Division Social Sciences*

GEOG 200 - Sustainable Resource Management

Units: 3 ; G.E./G.R. Area: D1-3

The Earth as a source of land, water, biotic, mineral and energy resources. The role of human populations in their use, development and exploitation. Drivers, trends, patterns and consequences of renewable and non-renewable resource use.

Equivalent Quarter Course: GEOG 3000.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D1-3 - Lower Division Social Sciences*

GEOG 225 - Fundamentals of GIS

Units: 3

Fundamentals of location-related information management, manipulation, and display. Usage of ArcGIS software in business; education; and physical, social and life sciences. Special topics on GIS layer formats, elementary spatial analysis techniques, and the manipulation of spatially explicit information.

Equivalent Quarter Course: GEOG 3030.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

Cross-listed: ENVT 225

GEOG 310 - Literature and Research Methods

Units: 4

Seminar in geographical and environmental literature, source materials, and research methods. Examination of seminal ideas associated with each discipline. Intensive exercises in both written and oral communication.

Prerequisites: Department consent and ENVT 101 or GEOG 125.

Equivalent Quarter Course: GEOG 3450.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Cross-listed: ENVT 310

GEOG 320 - Environmental Resource Analysis

Units: 4

Quantitative methods in environmental and resource studies.

Prerequisites: CHEM 100 and STAT 100.

Equivalent Quarter Course: ENVT 3400.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Cross-listed: ENVT 320

GEOG 330 - Historical Geography of North America

Units: 3 ; G.E./G.R. Area: D4

Historical-geographic processes of exploration, settlement, urbanization, cultural integration, land use, and resource exploitation from the 16th century to the present. Geographic and economic forces driven by

migrants from Europe, Africa, Asia and Latin America is emphasized.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: GEOG 3360.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D4 - Upper Division Social Sciences*

GEOG 336 - Asian Americans: Multiculturalism and Spatial Disparity

Units: 3 ; G.E./G.R. Area: D4

Ethnic diversity and settlement patterns of Asian communities in California and the United States; immigration history and demographic changes of major Asian ethnic groups; socio-economic profiles, cultural identities, and contemporary issues of Asian Americans.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: GEOG 3200.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D4 - Upper Division Social Sciences*

GEOG 340 - Climate Change

Units: 3 ; G.E./G.R. Area: B6; Sustainability

Pre-modern and modern variations in climate with emphasis on geological, geomorphological, and biological records. Causes (natural and anthropogenic) and consequences (natural and cultural) of climate change. Factors determining vulnerability to climate change impacts and strategies for adaptation and mitigation.

Strongly Recommended Preparation: GEOG 200

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: GEOG 3120.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B6 - Upper Division Science Inquiry and Quantitative Reasoning, Overlay - Sustainability*

Cross-listed: ENVT 340

GEOG 350 - California

Units: 3 ; G.E./G.R. Area: D4

A study of California's uniqueness and diversity from the aspects of physical landscape, environmental resources, human and cultural diversity, historical transformation, and economic activities.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: GEOG 3505.
Possible Instructional Methods: *Entirely On-ground.*
Grading: A-F or CR/NC (student choice).
G.E./G.R. Area Satisfied: D4 - Upper Division Social Sciences

GEOG 351 - United States and Canada

Units: 3 ; G.E./G.R. Area: D4

A regional survey of the physical, cultural, demographic, economic, and political patterns in the United States and Canada. Special focus on the spatial history of human settlements, economic activity, land use and environmental resources.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.
Equivalent Quarter Course: GEOG 3500.
Possible Instructional Methods: *Entirely On-ground.*
Grading: A-F or CR/NC (student choice).
G.E./G.R. Area Satisfied: D4 - Upper Division Social Sciences

GEOG 352 - Latin America and the Caribbean

Units: 3 ; G.E./G.R. Area: D4

The geography of Latin America and the Caribbean and its present-day patterns and processes. A systematic review of physical characteristics, social and political systems and problems, economic issues, cultural variations, and regional integrations and interactions in a globalized society.

Strongly Recommended Preparation: GEOG 125.
Prerequisites: Completion of GE areas A1, A2, A3 and B4.
Equivalent Quarter Course: GEOG 3510 and GEOG 3515.
Possible Instructional Methods: *Entirely On-ground.*
Grading: A-F or CR/NC (student choice).
G.E./G.R. Area Satisfied: D4 - Upper Division Social Sciences

GEOG 353 - Africa

Units: 3 ; G.E./G.R. Area: D4

An overview of the diverse regions, environments and peoples of contemporary Africa and the changing patterns of resource utilization and human development.

Strongly Recommended Preparation: GEOG 125.
Prerequisites: Completion of GE areas A1, A2, A3 and B4.
Possible Instructional Methods: *Entirely On-ground.*
Grading: A-F or CR/NC (student choice).
G.E./G.R. Area Satisfied: D4 - Upper Division Social Sciences

GEOG 354 - China: Economic Development and Social Transformation

Units: 3 ; G.E./G.R. Area: D4

China as a concept and a rising world power; geographic survey of China's changing physical and cultural landscapes; recent decades of economic reforms and social transformation; special focus on energy and environmental issues, demographic shifts, and globalization.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: GEOG 3540.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D4 - Upper Division Social Sciences*

GEOG 355 - Asia Pacific

Units: 3 ; G.E./G.R. Area: D4

Physical resources, human land use, economic systems, and political patterns in the Asia Pacific region; historical footprints and modern transformation; economic cooperation and geo-political realignment; demographic transition and environmental challenges.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: GEOG 3550.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D4 - Upper Division Social Sciences*

GEOG 356 - Europe

Units: 3 ; G.E./G.R. Area: D4

The regional geography of Europe, with emphasis on present-day patterns and processes. A systematic review of physical characteristics, social and political systems and problems, economic issues, and regional integrations and interactions.

Strongly Recommended Preparation: GEOG 125.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D4 - Upper Division Social Sciences*

GEOG 360 - Computer Cartography

Units: 3

Fundamentals of map design and communication theory; hands-on experience in computer mapping. Effective graphic representation of spatial data; concepts in spatial data structure and database management; and lab-oriented software applications.

Equivalent Quarter Course: GEOG 3605.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

GEOG 380 - Applied Field Studies

Units: 3

Application of field techniques and methods in environmental studies, including field observation, sampling, data collection, and computer-based analysis. Presentation of results in graphic and written forms.

Prerequisites: ENVT 320.

Equivalent Quarter Course: GEOG 3480 or ENVT 3480

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Cross-listed: ENVT 380.

GEOG 397 - Issues in Anthropology, Geography and Environmental Studies

Units: 3

Readings, discussion, and research on contemporary and/or significant issues in anthropology, geography and environmental studies.

Equivalent Quarter Course: GEOG 3999.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

GEOG 398 - Internship

Units: 1-3

Supervised work experience in which the student completes academic assignments integrated with off-campus paid or volunteer activities closely related to the discipline of geography.

Prerequisites: Department consent.

Equivalent Quarter Course: GEOG 3898.

Repeatability: May be repeated for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

GEOG 425 - Advanced GIS

Units: 3

Advanced tools, data management, and functions in geographic information systems (GIS) on the mapping, monitoring, analysis, management and conservation of environmental resources; topics in spatial data analysis, 3D-visualization, and modeling of geographic information science (GISci). *Lecture*

Units: 2; Lab Units: 1

Prerequisites: GEOG 225.

Equivalent Quarter Course: GEOG 4605.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

GEOG 445 - Water and Watershed Resources

Units: 4 ; G.E./G.R. Area: B6

The science, policy and practice of urban water and watershed resources management. Watershed and stream system identification, hydrology, assessment, and restoration. Municipal water systems and their management, water and wastewater treatment, water quality monitoring, stormwater, water conservation, and supply reliability.

Strongly Recommended Preparation: GEOG 200 or ENVT 101.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: GEOG 4350 or ENVT 4350.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B6 - Upper Division Science Inquiry and Quantitative Reasoning*

Cross-listed: ENVT 445

GEOG 447 - Energy, Climate and Society

Units: 4 ; G.E./G.R. Area: B6; Sustainability

The science and technology of societal energy choices as they affect global environmental sustainability, national security, equity, and social justice.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: GEOG 4320.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B6 - Upper Division Science Inquiry and Quantitative Reasoning, Overlay - Sustainability*

Cross-listed: ENVT 447

GEOG 450 - Earth Surface Processes and Landforms

Units: 3 ; G.E./G.R. Area: B6

Earth surface processes and the erosion, deposition and formation of landforms by gravity, wind, water, ice and waves. The physical geography of river, valley, glacier, mountain, slope, coast, desert and estuary environments.

Prerequisites: Completion of GE areas A1, A2, A3 and B4 ; and GEOG 110.

Equivalent Quarter Course: GEOG 3115.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B6- Upper Division Science Inquiry and Quantitative Reasoning*

GEOG 455 - Sustainable Food Systems

Units: 4 ; G.E./G.R. Area: D4; Sustainability

Basis for sustainable food systems from local to global scales, including social, economic and environmental dimensions of food production and consumption. Examination of the sustainability of daily food choices and tools for determining impacts of local, processed and imported foods.

Strongly Recommended Preparation: GEOG 200.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: GEOG 3320.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D4 - Upper Division Social Sciences, Overlay - Sustainability*

GEOG 461 - Remote Sensing of the Environment

Units: 3

Remote sensing applications for Earth resource management. Focus on space-borne Earth observation systems sensing at the near-infrared, thermal-infrared, and microwave spectrums; basic principles and strategies of digital image enhancement, classification, and interpretation.

Strongly Recommended Preparation: GEOG 462.

Equivalent Quarter Course: GEOG 4425.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

GEOG 462 - Air Photo Interpretation

Units: 3

Principles of airborne remote sensing and image interpretation for environmental resource management. Hands-on experience in photogrammetric stereoscopy, target recognition, and image measurement of spatial data. *Lecture Units: 2; Lab Units: 1*

Equivalent Quarter Course: GEOG 3410.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

GEOG 465 - Sustainable Communities and Development

Units: 4 ; G.E./G.R. Area: D4; Sustainability

An assessment of the personal, corporate, local, national and global dimensions of sustainability, the

challenges facing humanity, and the identification of future options and alternatives at each scale, with special emphasis on urban sustainability issues, goals, progress, and process.

Strongly Recommended Preparation: GEOG 200/ENVT 101.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: GEOG 4330.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *D4 - Upper Division Social Sciences, Overlay - Sustainability*

Cross-listed: ENVT 465.

GEOG 490 - Independent Study

Units: 1-3

Independent study for Geography

Prerequisites: Department consent and minimum 2.0 GPA.

Equivalent Quarter Course: GEOG 4900.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

GEOG 497 - Issues in Geography

Units: 3

Readings, discussion, and research on contemporary and/or significant issues in geography.

Equivalent Quarter Course: GEOG 3999.

Repeatability: May be repeated for credit when content varies, for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

GEOG 499 - Senior Seminar in Geography

Units: 3

Advanced research, analysis and evaluation of major geographic issues. Synthesis and application of knowledge and understanding of the student's major area of interest in the form of a capstone paper on a relevant contemporary issue.

Strongly Recommended Preparation: GEOG 310.

Prerequisites: Senior standing, and declared Geography or Environmental Studies major.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

Geology

GEOL 100 - Earth Systems Science

Units: 4 ; G.E./G.R. Area: B1, B3; Sustainability

Introduction to the nature and evolution of the solid Earth, its composition and structure, geologic systems and deep time, hazards and resources, the hydrosphere, atmosphere and our solar system, evolution and human interaction with the planet now and future. *Lecture Units: 3; Lab Units: 1*

Credit Restrictions: Not for Geology or Environmental Sciences major or minor credit; not open to students with credit for GEOL 101.

Equivalent Quarter Course: Either GEOL 1000; or GEOL 1001 and GEOL 1002.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B1 - Lower Division Physical Science, B3 - Lower Division Laboratory Activity, Overlay - Sustainability*

GEOL 101 - Introduction to the Earth Sciences

Units: 3 ; G.E./G.R. Area: B1; Sustainability

Introduction to the nature and evolution of the solid Earth, its composition and structure, geologic systems and deep time, hazards and resources, the hydrosphere, atmosphere and our solar system, evolution and human interaction with the planet now and the future.

Strongly Recommended Preparation: Optional concurrent enrollment in GEOL 102.

Credit Restrictions: Not for Geology or Environmental Sciences major or minor credit; not open to students with credit for GEOL 100.

Equivalent Quarter Course: GEOL 1001.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B1 - Lower Division Physical Science, Overlay - Sustainability*

GEOL 102 - Earth Sciences Laboratory

Units: 1 ; G.E./G.R. Area: B3

Laboratory investigation of the Earth system: solid Earth, hydrosphere, atmosphere, and solar system. Geologic materials, maps, earthquakes, landslides, weather, oceans and currents, planets. Required field trip.

Co-requisites: GEOL 101.

Credit Restrictions: Not for Geology or Environmental Sciences major or minor credit

Equivalent Quarter Course: GEOL 1002.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B3 - Lower Division Laboratory Activity*

GEOL 120 - Introduction to Oceanography

Units: 3 ; G.E./G.R. Area: B1; Sustainability

Origin of ocean basins, nature of the sea floor, physical/chemical characteristics of sea water, formation of water waves, ocean currents, marine life, relationships between humans and the sea.

Credit Restrictions: Not for Environmental Sciences major credit; not for Geology major or minor credit

Equivalent Quarter Course: GEOL 1201.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B1 - Lower Division Physical Science, Overlay - Sustainability*

GEOL 210 - Physical and Environmental Geology

Units: 4 ; G.E./G.R. Area: B1, B3

Nature and distribution of earth materials, the processes by which the materials are formed and altered, and the nature and development of the landscape. *Lecture Units: 3; Lab Units: 1*

Equivalent Quarter Course: GEOL 2100 or GEOL 2101.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *B1 - Lower Division Physical Science, B3 - Lower Division Laboratory Activity*

Cross-listed: ENSC 210

GEOL 211 - Historical Geology

Units: 4

Principles of interpretation of Earth history. Study of plate tectonics and sea-floor spreading as related to the development of continents, ocean basins, and mountain belts. Origin, evolution and diversification of life through time. Laboratory work includes hands-on exercises with fossils. *Lecture Units: 3; Lab Units: 1*

Strongly Recommended Preparation: GEOL 210

Equivalent Quarter Course: GEOL 2102.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Cross-listed: ENSC 211

GEOL 230 - Natural Disasters

Units: 3 ; G.E./G.R. Area: B1; Sustainability

Geologic processes and their effects on human populations. Topics include earthquakes, landslides, volcanic eruptions, coastal erosion, fire, floods, weather phenomena, atmospheric and water pollution.

Credit Restrictions: Not for Geology or Environmental Sciences major or minor credit

Equivalent Quarter Course: GEOL 2300 or GEOL 2301.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B1 - Lower Division Physical Science, Overlay - Sustainability*

GEOL 231 - Natural Hazards

Units: 3

Earth and human-induced processes and their effects on human populations. Topics include earthquakes, landslides, volcanic eruptions, coastal erosion, floods, severe storms, atmospheric and water pollution.

Credit Restrictions: Not for Geology or Environmental Sciences major or minor credit.

Equivalent Quarter Course: GEOL 2300 or GEOL 2301.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

GEOL 235 - Disasters on Earth and in Hollywood

Units: 3 ; G.E./G.R. Area: B1; Sustainability

Investigates the portrayal of Earth Science and natural disasters in popular cinema. Focuses on fundamental geologic principles and processes, the scientific method, and the importance of differentiating science from pseudo-science in modern culture, and implications for a sustainable future.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B1 - Lower Division Physical Science, Overlay - Sustainability*

Cross-listed: ENSC 235

GEOL 260 - Introduction to GIS in Earth and Environmental Sciences

Units: 3 ; G.E./G.R. Area: B1, B3

Interpretation of spatial data and preparation of maps using Geographic Information Systems. Display and manipulation of vector and raster data. Map scale, projections, and coordinate transformations. Basic database queries. Global Positioning Systems. The course will include examples from Earth sciences.

Credit Restrictions: Must be taken graded A-F for credit toward the major.

Equivalent Quarter Course: GEOL 2600.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *B1 - Lower Division Physical Science, B3 - Lower Division Laboratory Activity*

Cross-listed: ENSC 260.

GEOL 297 - Introductory Field Experience

Units: 1

Applied field-based inquiry activities to introduce lower-division students to fundamental field skills that are common to field research in geology and the environmental sciences. Students spend extended periods in a natural, outdoor laboratory setting.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Cross-listed: ENSC 297

GEOL 301 - Earth Science Connections

Units: 3

Connections between Earth science, planetary science, Earth systems (solid Earth, atmosphere, hydrosphere, biosphere), and other natural sciences and engineering, with real-world applications and examples. The goal is to prepare future teachers to implement K-12 Next Generation Science Standards with confidence.

Prerequisites: GEOL 100, and Mathematics/QR Placement Category I or II, or completion of GE area B4.

Credit Restrictions: Not for Geology or Environmental Science major credit.

Equivalent Quarter Course: GEOL 3011.

Possible Instructional Methods: *Entirely On-line.*

Grading: A-F or CR/NC (student choice).

GEOL 302 - Earth Science Connections Laboratory

Units: 1

Laboratory investigations demonstrating connections between integrated Earth system science (geology, atmosphere, oceanography, planetary science) and other natural sciences and engineering. The course focuses on K-12 Next Generation Science Standards with the goal of teaching science with confidence. Concurrent enrollment in GEOL 301 recommended.

Prerequisites: GEOL 100, and Mathematics/QR Placement Category I or II, or completion of GE area B4.

Credit Restrictions: Not for Geology or Environmental Science major credit.

Equivalent Quarter Course: GEOL 3012.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

GEOL 310 - Geology of the Western National Parks

Units: 3 ; G.E./G.R. Area: B6

An introductory course using selected U.S. National Parks as examples to introduce geologic topics and concepts, the features which make each park unique, and the geologic history western North America, as interpreted by features preserved in our national parks.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Credit Restrictions: Not for Geology or Environmental Sciences major or minor credit.

Equivalent Quarter Course: GEOL 3100.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: B6 - *Upper Division Science Inquiry and Quantitative Reasoning*

GEOL 311 - Geomorphology

Units: 3

Landforms as products of diastrophism, volcanism, and surficial processes; morphogenetic regions of the Earth and the effect of climate on the processes that shape them; rates and stages of landscape evolution and their dependence on time, process and structure.

Strongly Recommended Preparation: GEOL 211.

Prerequisites: GEOL 210.

Equivalent Quarter Course: GEOL 3110.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Cross-listed: ENSC 311

GEOL 325 - Volcanoes and Plate Tectonics

Units: 3 ; G.E./G.R. Area: B6

An introductory geology course exploring volcanoes and volcanic eruptions on Earth and in the solar system. How volcanoes work and how they affect environment, life, and society. Recent volcanism and ancient examples of mega-eruptions, and challenges of predicting future eruptions.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Credit Restrictions: Not for Geology or Environmental Science major or minor credit.

Equivalent Quarter Course: GEOL 3050.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: B6 - *Upper Division Science Inquiry and Quantitative Reasoning*

GEOL 330 - Weather and the Atmosphere

Units: 3 ; G.E./G.R. Area: B6; Sustainability

Application of physical science principles in the study of the structure and circulation of the atmosphere; weather and weather forecasting. Emphasis on current issues and topics of local and global interest.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: GEOL 3040.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be*

taught both online and on-ground).

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: B6 - *Upper Division Science Inquiry and Quantitative Reasoning, Overlay - Sustainability*

Cross-listed: ENSC 330

GEOL 340 - The Oceans

Units: 3 ; G.E./G.R. Area: B6; Sustainability

An exploration of the interaction of oceans with the earth's geosphere, atmosphere, and biosphere. Topics include seafloor morphology, coastlines, seawater chemistry, the role the oceans play in controlling weather and climate, marine ecosystems, human impacts and dependence on the oceans.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Credit Restrictions: Not for Environmental Sciences major credit; not for Geology major credit. Cannot earn credit for both GEOL 340 and GEOL 341.

Equivalent Quarter Course: GEOL 3401.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: B6 - *Upper Division Science Inquiry and Quantitative Reasoning, Overlay - Sustainability*

Cross-listed: ENSC 340

GEOL 341 - General Oceanography

Units: 4

Interdisciplinary examination of the geologic, chemical, physical, and biological aspects of the oceans. Topics include seafloor morphology, coastlines, seawater chemistry, the role the oceans play in controlling weather and climate, marine ecosystems, ocean circulation, and waves. *Lecture Units: 3; Lab Units: 1*

Prerequisites: GEOL 210.

Credit Restrictions: Student cannot earn credit for both GEOL 341 and GEOL 340.

Equivalent Quarter Course: GEOL3400.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

GEOL 342 - Planetary Geology

Units: 3

A survey of the composition, evolution, and geologic features of planetary bodies in the Solar System. Topics include origin of the Solar System, planetary atmospheres, comparative planetology of terrestrial and Jovian planets, small bodies such as moons, comets and asteroids.

Strongly Recommended Preparation: GEOL 361, GEOL 362

Prerequisites: GEOL 210.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

GEOL 343 - Atmospheric Science

Units: 3

Composition, structure, and thermodynamics of the atmosphere. Cloud and precipitation formation processes. Atmospheric-ocean feedbacks. Implications of human modification of the atmosphere.

Strongly Recommended Preparation: PHYS 125 and 126, CHEM 110 or 111

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

Cross-listed: ENSC 343

GEOL 350 - Environmental Hydrology

Units: 4 ; G.E./G.R. Area: Sustainability

The hydrologic cycle and human impacts on the hydrologic cycle; quantitative assessment of hydrologic processes and concepts including precipitation, evapotranspiration, runoff, water budgets, and groundwater flow; surface water and groundwater contamination and remediation.

Prerequisites: CHEM 100, MATH 120 and PHYS 115.

Equivalent Quarter Course: GEOL 3500.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *Overlay - Sustainability*

Cross-listed: ENSC 350.

GEOL 360 - Mineralogy and Optical Crystallography

Units: 4

Hand sample and optical mineralogy. Lecture covers crystallography, crystal chemistry, crystal structure, crystal growth, and optical properties. Laboratory emphasizes physical properties and identification of minerals in hand sample and thin section. *Lecture Units: 3; Lab Units: 1*

Prerequisites: CHEM 112 and GEOL 210.

Equivalent Quarter Course: GEOL 3601.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

GEOL 361 - Igneous and Metamorphic Petrology

Units: 4

Characteristics, phase relations, and origin of igneous and metamorphic rocks. Plate tectonic setting of magmatism and metamorphism. Rock classification based upon hand-lens and microscopic examination of mineralogy and texture. Petrologic study of selected rock suite and written report. *Lecture Units: 3; Lab Units: 1*

Prerequisites: GEOL 360.

Equivalent Quarter Course: GEOL 3701.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

GEOL 371 - Sedimentary Geology and Stratigraphy

Units: 4

Depositional systems and sedimentary processes. Facies models, succession, age relationships, and correlation of strata. Petrology and provenance of sedimentary rocks. *Lecture Units: 3; Lab Units: 1*

Prerequisites: GEOL 361.

Equivalent Quarter Course: GEOL 3801.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

GEOL 381 - Structural Geology

Units: 5

Geometric, kinematic, and dynamic analysis of geologic structures and their origins and evolution. Laboratory emphasis on descriptive geometry, stereographic solutions to structural problems and data analysis; geologic maps and structure sections. Computer methods. *Lecture Units: 3; Lab Units: 2*

Prerequisites: GEOL 360.

Equivalent Quarter Course: GEOL 3810.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

GEOL 397 - Advanced Field Experience

Units: 2

Applied field based inquiry activities to develop advanced field skills, common to field research and professional activity in geology and the environmental sciences. Students spend extended periods in a natural, outdoor laboratory setting.

Prerequisites: GEOL 297, junior or senior standing.

Repeatability: Course may be repeated for credit for a maximum of 6 units when the content varies.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Cross-listed: ENSC 397

GEOL 398 - Internship

Units: 1-3

Introduction to the internship experience; integration of the academic program with career aspirations; emphasis on internship readiness and preparation for professional success.

Prerequisites: Department consent and minimum 2.0 GPA.

Equivalent Quarter Course: GEOL 3898.

Repeatability: Course may be repeated for a total of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

GEOL 410 - Geohealth

Units: 3

An exploration of the multitude of environmental exposures, both natural and human-derived, that affect human health. Use of mapping in determining spatial relationships between the environment and health. Case studies including radiation exposure, contaminated drinking water, and air pollution.

Prerequisites: ENSC 280.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

Cross-listed: ENSC 410.

GEOL 414 - Hazardous Waste Management

Units: 3 ; G.E./G.R. Area: Sustainability

Study of the investigation and cleanup of hazardous waste sites. Environmental regulations, hazard awareness, contaminant characterization, personal protective equipment, monitoring and sampling equipment, site characterization and control, decontamination, operational hazards and overview of emergency response.

Prerequisites: CHEM 112.

Equivalent Quarter Course: ENSC 4140.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *Overlay - Sustainability*

Cross-listed: ENSC 414.

GEOL 431 - Applied Geophysics

Units: 4

Geophysical methods for determination of subsurface geology, including seismic refraction and reflection, ground-penetrating radar, gravity, magnetism, and resistivity. Basic geophysical theory. Collection of geophysical data in the field and computer analysis. *Lecture Units: 3; Lab Units: 1*

Prerequisites: GEOL 210, MATH 130 and PHYS 126.

Equivalent Quarter Course: GEOL 4010.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

GEOL 432 - Hydrogeology

Units: 4

Characteristics of aquifers, aquitards, and the vadose zone. Flow and transport in porous media. Groundwater occurrence and use in California and the Western U.S. Water-rock interaction, groundwater contamination, and cleanup methods. Groundwater management and artificial recharge.

Prerequisites: CHEM 100, MATH 120 and PHYS 115.

Equivalent Quarter Course: GEOL 4320.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

GEOL 441 - Earthquake Geology

Units: 3

Aspects of earthquake geology, plate tectonic and geographic location of seismicity; the source region and rock mechanics and deformation; seismic waves; event dating techniques and tectonic geomorphology; fault types and behavior.

Prerequisites: GEOL 381.

Equivalent Quarter Course: GEOL 4414.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

GEOL 460 - Geographic Information Systems for Earth and Environmental Sciences

Units: 4

An introduction to applications of Geographic Information Systems (GIS) to geology and other earth sciences. Application of GIS software for interpretation and analysis of spatial data. Use of digital terrain data and remotely-sensed imagery. Creation of maps and report generation. *Lecture Units: 2; Lab Units: 2*

Prerequisites: GEOL 210.

Equivalent Quarter Course: GEOL 4600.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Cross-listed: ENSC 460

GEOL 490 - Independent Study

Units: 1-3

Students may apply no more than 9 units of independent study in the major department and 6 units in other departments to a baccalaureate degree.

Prerequisites: Department consent and minimum 2.0 GPA.

Equivalent Quarter Course: GEOL 4900.

Repeatability: May be repeated for credit for a maximum of 9 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

GEOL 497 - Issues in Geosciences

Units: 3

Readings, discussion and research on contemporary and/or significant issues in the Geosciences.

Equivalent Quarter Course: GEOL 3999.

Repeatability: May be repeated once for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

GEOL 499 - Capstone Seminar in Geosciences

Units: 3

Critical, in-depth study of selected topics of current and classical research in environmental geosciences; topics not repeated in two-year interval. Emphasizes development of information literacy and writing skills to effectively communicate in the language of the discipline.

Prerequisites: Junior or senior standing.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Cross-listed: ENSC 499

Geology: Graduate

GEOL 601 - Professional Ethics in Environmental Geosciences

Units: 1

Exploration of the ethics, roles, and responsibilities of professionals in the fields of geology and environmental science. Examination of ethics codes of professional organizations and best practices for promoting ethical behavior.

Prerequisites: Post-baccalaureate standing.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

Cross-listed: ENSC 601

GEOL 602 - Graduate Seminar

Units: 2

Investigation of a selected topic in environmental geosciences.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: GEOL 6811, which is taken twice for a total of four units under quarters; GEOL 602 (2 units) and GEOL 601 (1 unit) will be required once each under semesters

Repeatability: May be repeated once for elective credit with consent of instructor, for a maximum of 4 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

GEOL 621 - Near Surface Geophysics

Units: 4

High-resolution seismic, ground penetrating radar (GPR), electrical resistivity, magnetic, and electromagnetic methods. Geophysical data processing methods. *Lecture Units: 3; Lab Units: 1*

Equivalent Quarter Course: GEOL 6040.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

GEOL 622 - Seismic Exploration

Units: 4

Seismic exploration methods, including data acquisition, processing, modeling, and interpretation. Survey design, source and receiver types, selection of acquisition parameters. Use of processing software static and gain corrections, deconvolution, velocity analysis, migration and inversion methods. *Lecture Units: 3; Lab Units: 1*

Equivalent Quarter Course: GEOL 6020.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

GEOL 631 - Isotope Geochemistry

Units: 4

This course covers rules and assumptions for radiometric dating and examples of dating rocks and other natural materials, and rules governing fractionation of stable isotopes and applications of stable isotopes as tracers of geologic and biogeochemical processes.

Equivalent Quarter Course: GEOL 6310.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Cross-listed: ENSC 631

GEOL 632 - Groundwater Flow and Contaminant Transport

Units: 4

Groundwater resource evaluation methods. Mathematical development of multi-dimensional flow equations. Introduction to computer models and numerical simulation. Properties of inorganic and organic groundwater contaminants. Contaminant transport processes.

Prerequisites: M.S. Geology major.

Equivalent Quarter Course: GEOL 6320.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Cross-listed: ENSC 632

GEOL 633 - The Science of Soils

Units: 4

Aspects of soil science, including soil formation and structure, soil mineralogy, soil chemistry and fertility, soil physics, and soil ecology. Includes agricultural and urban environments, and issues such as soil contamination.

Prerequisites: CHEM 112.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

Cross-listed: ENSC 633

GEOL 634 - Biogeochemistry

Units: 4

The movement of elements (including nutrients and contaminants) through the biosphere, atmosphere, geosphere, and hydrosphere. Mechanisms of transformation, including redox transformations. Elemental cycles discussed can include carbon, nitrogen, phosphorus, sulfur, iron, arsenic, chromium, selenium, etc.

Prerequisites: CHEM 112.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be*

taught both online and on-ground).

Grading: A-F grading only.

Cross-listed: ENSC 634.

GEOL 641 - Earthquake Geology

Units: 4

Aspects of earthquake geology, plate tectonic and geographic location of seismicity; the source region and rock mechanics and deformation; seismic waves; dating techniques and tectonic geomorphology; fault types and behavior.

Prerequisites: M.S. Geology major.

Equivalent Quarter Course: GEOL 6414.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

GEOL 643 - Tectonic Geomorphology

Units: 4

Effects of earthquakes on modern landforms; types of geomorphic markers and determination of their ages; geologic structures resulting from earthquakes; geodesy and deformation rates; deformation and geomorphology at different timescales.

Prerequisites: M.S. Geology major.

Equivalent Quarter Course: GEOL 6430.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

GEOL 644 - Structural Styles of Plate Margins and Regions

Units: 4

Thematic topical study of important regions, deformational styles, or plate-margin types. Focus on reading seminal papers on the subject and contemporary work. Format is combined lecture, seminar-style discussion, and student presentations. Students write weekly précis and make one class presentation.

Prerequisites: M.S. Geology major.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

GEOL 645 - Engineering Geology

Units: 4

Application of engineering geology practices and techniques in locating and planning geological engineering projects. Use of near-surface geophysical techniques and applied methods to solve on-the-ground problems. Study of important case histories.

Equivalent Quarter Course: GEOL 6411.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

GEOL 646 - Quaternary Geology

Units: 4

Evolution of climate and landforms of the Quaternary. Emphasis on interpretation of sedimentary deposits and erosional landforms. Techniques for determination of age relationships.

Equivalent Quarter Course: GEOL 6300.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

GEOL 650 - Professional Certification Preparation

Units: 3

Content and strategies for successful completion of the requirements for the California Professional Geologist Certification. Course covers California geology, public health and safety, geologic hazards with an emphasis on seismic hazards, and California specific regulations.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

GEOL 671 - Field Experience

Units: 1-2

Applied field based inquiry activities that provide students with opportunities to acquire and practice professional and technical field skills. Students spend extended periods in a natural, outdoor laboratory setting working closely with peers and instructor.

Repeatability: May be repeated for credit for a maximum of 6 units when content varies.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Cross-listed: ENSC 671

GEOL 690 - Independent Study

Units: 1-3

Independent faculty-guided study. Students will provide a written proposal on individually selected academic topics in the discipline. Approval from a faculty member in the Department and a final report is required.

Prerequisites: Department consent and minimum 3.0 GPA.

Equivalent Quarter Course: GEOL 6900.

Repeatability: May be repeated for credit for a maximum of 3 units.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: CR/NC grading only.

GEOL 691 - University Thesis

Units: 1-6

Development and writing of a formal research thesis for submission to the university in the specified format. Supervision by a departmental committee, at least two of whom must be CSU East Bay faculty members. Oral defense required.

Equivalent Quarter Course: GEOL 6910.

Repeatability: May be repeated for credit for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

GEOL 693 - Project

Units: 1-2

Development of an original product (e.g., manuscript, education module, field map, computer model) that is summarized in a written abstract. Both project and abstract are submitted to the department, which specifies their format. Oral defense may be required.

Equivalent Quarter Course: GEOL 6899.

Repeatability: May be repeated for credit for a maximum of 2 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

GEOL 697 - Issues in Geosciences

Units: 3

Readings, discussion and research on contemporary and/or significant issues in the Geosciences.

Equivalent Quarter Course: GEOL 6999.

Repeatability: May be repeated for credit when content varies, for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

GEOL 698 - Internship

Units: 1-3

Research or professional experience with a public or private organization involved in geologic or

environmental studies, summarized in a written report.

Prerequisites: Post-baccalaureate standing.

Equivalent Quarter Course: GEOL 6420.

Repeatability: May be repeated for credit for a maximum of 3 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

Cross-listed: ENSC 698

Health Care Administration: Graduate

HCA 611 - Evolution of the U.S. Health Care System, Health Disparities and Policy

Units: 4

Provides critical examination of the U.S. health care system, including definitions of health and health determinants, key policies, health disparities, the role of insurance, reform efforts, and the influence of different system stakeholders including providers, patients, policymakers and payers.

Prerequisites: Admission to the MS-HCA or MPA program.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HCA 612 - Health Care Management, Leadership and Strategic Planning

Units: 4

Provides an exploration of management principles, roles and responsibilities in health care organizations, including organizational design, motivation, management theories and applications, conflict management, teamwork development, leadership styles and application, and strategic alliance formation.

Prerequisites: Admission to MS-HCA or MPA program.

Co-requisites: HCA 611.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HCA 621 - Health Care Quality Improvement Tools and Methodologies

Units: 4

Provides the development of quality assessment and improvement skills, a survey of methodologies and tools such as Six Sigma and Lean Thinking, an exploration of emerging trends, and an overview of the principles of instrumentation and measurement of health outcomes.

Prerequisites: Admission to the MS-HCA program, HCA 611 and HCA 612.

Co-requisites: HCA 622.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HCA 622 - Health Care Technology and Informatics

Units: 4

Provides an introduction to information technology and informatics, a review of the effects of information on health service design and delivery, and an examination of the primary types of health information tools, including electronic health records, telehealth and mobile health.

Prerequisites: Admission to the MS-HCA program and HCA 612.

Co-requisites: HCA 621.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HCA 631 - Health Care Financial Management and Third-Party Reimbursement

Units: 4

Provides an introduction to the tools, concepts, and applications of financial management in the health care system, including accounting, financial statement creation and analysis, working capital management, investment strategies, capital needs financing, budgeting, and third-party service reimbursement systems.

Prerequisites: Completion of University Writing Skills Requirement (UWSR), admission to the MS-HCA or MPA program and HCA 611.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HCA 641 - Health Care Legal, Diversity and Ethical Issues

Units: 4

Provides an examination of the legal, compliance, and ethical dimensions of service delivery, including the development and effects of laws and regulations, patient and human subject rights, contract law, professional ethics, tort law, malpractice, criminal law, and emerging ethical issues.

Prerequisites: Completion of University Writing Skills Requirement (UWSR), admission to the MS-HCA or MPA program and HCA 611.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HCA 642 - Health Care Program Development and Grant Writing

Units: 4

Provides introduction to the fundamentals of program development and grant proposal writing in the health care sector, including an overview of historical philanthropy, current trends, program development planning, potential funding source identification, and grant application and letter of intent writing.

Prerequisites: Completion of University Writing Skills Requirement (UWSR), admission to the MS-HCA program, HCA 621, HCA 622 and HCA 631.

Co-requisites: HCA 641.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HCA 690 - Independent Study

Units: 1-4

Independent study under the supervision of a member of the graduate faculty.

Prerequisites: Department consent and minimum 3.0 GPA.

Equivalent Quarter Course: HCA 6900.

Repeatability: May be repeated for credit, with department consent, for a total of 12 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

HCA 693 - Capstone Project

Units: 6

Provides a culminating set of personal, academic and professional experiences where students synthesize, integrate and apply knowledge and skill sets developed in the program in order to develop an original field-based project and demonstrate competency in the program learning outcomes.

Prerequisites: Completion of University Writing Skills Requirement (UWSR), admission to the MS-HCA program, HCA 621 and HCA 622.

Co-requisites: HCA 631.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HCA 697 - Issues in Health Care Administration

Units: 3

Readings, discussion, and research on contemporary and/or significant issues in health care administration.

Equivalent Quarter Course: HCA 6999.

Repeatability: May be repeated for credit when content varies, for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

HCA 698 - Internship

Units: 1-4

Formal advanced work opportunities integrating the academic program with their career aspirations.

Integral advanced hands-on experience enhancing education and preparing for professional and personal success.

Prerequisites: Department consent and minimum 3.0 GPA.

Equivalent Quarter Course: HCA 6898.

Repeatability: Course may be repeated with department consent for a maximum of 4 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

Health Sciences

HSC 100 - First Year Seminar in Health Sciences

Units: 3

Introduction to health care and delivery from an interdisciplinary perspective focusing on critical thinking, effective communication, research and writing, and team building skills. Emphasis is on introducing students to self-directed learning skills that are critical for a health professional.

Equivalent Quarter Course: HSC 2200 and HSC 1000.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 110 - Introduction to Health Systems & Social Determinants of Health

Units: 3

The US health care system within a paradigm emphasizing social determinants of health. An exploration, using ecological frameworks, of how this integrated system incorporates social determinants of health to impact individual, community, and population outcomes, including disparities.

Equivalent Quarter Course: HSC 3300.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 115 - Human Health and Wellness

Units: 3

Analysis and application of the Wellness concept for healthful living. Instruction in techniques and procedure for self-care, self-examination, emergency care and efficient utilization of the medical care system.

Equivalent Quarter Course: HSC 1100.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 130 - Health Humanities

Units: 3 ; G.E./G.R. Area: C2

Introduction to the role of the humanities in health. Exploration of the importance of humanities in developing empathy, observation, and self-reflection skills necessary in health care. Human experience of illness will be explored.

Equivalent Quarter Course: HSC 3720.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *C2 - Lower Division Humanities*

HSC 250 - Health Disparities and Health Equity

Units: 3 ; G.E./G.R. Area: Diversity

History, development, and current state of health disparities. Introduction to research methods in health disparities. Discusses the concept of disparity in a public health context, and contributing factors. Covers theoretical frameworks and strategies to address health disparities.

Prerequisites: HSC 100 and HSC 110.

Equivalent Quarter Course: HSC 3800.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *Overlay - Diversity*

HSC 270 - Investigating Disease Outbreaks and Epidemics

Units: 3 ; G.E./G.R. Area: C2; Social Justice

The social, cultural and historical impact of epidemics from a humanities perspective. Applications of epidemiology to public health practice and our society. Study of the ethical and social context of epidemiology, through great works of literature and selected historical narratives.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: C2 - Lower Division Humanities, Overlay - Social Justice

HSC 300 - Environmental Health

Units: 3 ; G.E./G.R. Area: B6; Sustainability

Ecological basis of environmental issues, problems and solutions to better understand and recognize human health needs and environmental well-being. The impact of climate change on the physical, biological and human environments in California will be explored.

Prerequisites: Completion of GE areas A1, A2, A3 and B4 ; and ENSC 280.

Equivalent Quarter Course: HSC 3200.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: B6 - Upper Division Science Inquiry and Quantitative Reasoning, Overlay - Sustainability

HSC 310 - Community Engaged Health Promotion

Units: 3

Students will develop dynamic understandings of what constitutes a community. Focus on identifying and evaluating situations and contexts for which community engagement is pivotal for health promotion, and strategies to accomplish goals and objectives to improve public health.

Strongly Recommended Preparation: HSC 300.

Prerequisites: All of: HSC 130, HSC 250, HSC 315.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 315 - Public Health

Units: 3

A critical examination of the major public health challenges facing our society. Explores how the health of a population is shaped by environmental, cultural, social and economic factors, as well as by medical care. *Lecture Units: 2; Activity Units: 1*

Prerequisites: HSC 100 and HSC 110.

Equivalent Quarter Course: HSC 3400.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 323 - Plagues, Peoples, and Populations

Units: 3

The historical impact of plagues in human populations. The development of primary, secondary, and tertiary responses to epidemic and pandemic outbreaks. Focus on population-level reactions to infectious diseases such as plague, smallpox, cholera, tuberculosis, HIV, etc.

Prerequisites: HSC 315.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 325 - Health Care Payment Systems

Units: 3

Fundamentals of health financing. Discussion of public and private funding mechanisms. Discussion of various payment structures, including value-based payments, fee-for-service, capitation, etc. Overview of funding streams for research, prevention activities, and education.

Prerequisites: HSC 110 and ECON 200.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 327 - Genes and Human Health

Units: 3 ; G.E./G.R. Area: B6

Cell biology concepts necessary to understand genes, how they work, their role in inherited conditions that affect human health. Exploration of specific inherited diseases and recommended therapeutic technologies of gene cloning, stem-cell therapy, gene screening and gene therapy.

Strongly Recommended Preparation: BIOL 100.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: HSC 3250.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *B6 - Upper Division Science Inquiry and Quantitative Reasoning*

HSC 330 - Epidemiology

Units: 3

Meaning, scope, and applications of epidemiology to public health practice and the use of vital statistics (descriptive epidemiology and measurement of disease occurrence) and research data in the scientific appraisal of community health challenges. *Lecture Units: 2; Activity Units: 1*

Prerequisites: One of: STAT 100, STAT 110, STAT 303A.

Credit Restrictions: Not open for credit for students who have completed BIOL 3410.

Equivalent Quarter Course: HSC 3410.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 335 - Pharmaceutical, Biotechnology and Medical Device Policy

Units: 3

Overview of policy issues that face the pharmaceutical, medical device and biotechnology industries. Key issues include drug development phases, patent law, mergers and acquisitions, and the role of the US industries in the global marketplace.

Prerequisites: HSC 315.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 340 - Climate Change and Public Health

Units: 3

Health implications of climate change for populations. Students will explore associated health benefits accruing from mitigation strategies plus health policies involved in adaptation strategies.

Prerequisites: HSC 300.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 345 - Aging and Long Term Care

Units: 3

Overview of public health and policy issues in aging and long term care. Implications of chronic illnesses and disability in the aging population. Impact of economic, political and social conditions in the provision of health care services to the elderly.

Prerequisites: HSC 315.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 350 - Health Behavior and Health Education Theory

Units: 3

Major theories explaining health behaviors, and how behaviors may be modified through health education for positive outcomes. Emphasis will be on the selection and application of appropriate theories for various individual and social behaviors.

Prerequisites: All of: HSC 130, HSC 300, HSC 315.

Equivalent Quarter Course: HSC 3700.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 355 - Bioethics

Units: 3

Ethical issues that arise in the health sciences including, but not limited to, clinical ethics, ethical issues in new technologies, public health ethics, and distributive justice. The course will focus on sound reasoning through discursive writing.

Prerequisites: HSC 100 and HSC 130.

Equivalent Quarter Course: HSC 3550.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 360 - Health Law

Units: 3

Current federal and state health legislation, regulations, and standards. Historical development of various health programs, policies and procedures and their current legal status. Discussion of key court cases which have shaped health law in the US.

Prerequisites: HSC 110.

Equivalent Quarter Course: HSC 3350.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 362 - Environmental Health Policy

Units: 3 ; G.E./G.R. Area: D4

An overview of the development, content, and implementation of environmental health policy. Students will also be introduced to concepts of environmental justice and the relationship of environmental policy to health equity. Course relies on case examples.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: D4 - Upper Division Social Sciences

HSC 365 - Mental Health and Policy

Units: 3

Public health and policy issues in mental health. Impact of economic, political, social and cultural factors in the provision of mental health care services.

Prerequisites: B.S. Health Sciences major and HSC 315.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 370 - Health Economics and Public Policy

Units: 3

Economics of health and healthcare. Application of economic theories to public policy in health sector. Cost analysis, healthcare financing, public and private health insurance, and provider reimbursement models. Analysis of medical education, hospital, pharmaceutical, mental health, and long-term care markets.

Prerequisites: ECON 200 and HSC 110; HSC 110 is not required for ECON and BUAD majors.

Equivalent Quarter Course: HSC 3690.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

Cross-listed: ECON 370.

HSC 375 - Program Planning and Evaluation

Units: 3

Introduction to program planning and evaluation. Students will cover topics related to problem definition, implementation, evaluation and program theory.

Prerequisites: BS HSC major, HSC 130 and HSC 250.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 380 - Health Regulation

Units: 3

The regulatory environment affecting different types of health organizations; clinical regulations involving accreditation and clinical practice; and regulations affecting populations, the environment and

other consumer products.

Prerequisites: HSC 360.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 385 - Vector Control

Units: 3

The biology of vectors that transmit diseases to humans including invertebrates, vertebrates and microbes. Current methods for their control and management will be a key feature in the course.

Strongly Recommended Preparation: BIOL 230 with a C or better.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 390 - Lesbian, Gay, Bisexual and Transgender (LGBT) Communities and Health

Units: 3 ; G.E./G.R. Area: C4

From the medicalization of homosexuality to the AIDS epidemic to gender expression, LGBT communities have been defined in many ways in relation to concepts of health. Relying on health humanities, this class explores LGBT cultural expression o health as meaning-making.

Strongly Recommended Preparation: HSC 130.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities*

HSC 398 - Internship

Units: 1-3

Introduction to the internship experience; integration of the academic program with career aspirations; emphasis on internship readiness and preparation for professional success.

Prerequisites: Department consent and minimum 2.0 GPA.

Equivalent Quarter Course: HSC 3898.

Repeatability: May be repeated with department consent for a maximum of 6 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: CR/NC grading only.

HSC 400 - Health Policy Research and Analysis

Units: 3

Healthcare is a highly complex and highly regulated industry. Using problem-based learning, students will be introduced to research and analysis of complex policy problems in healthcare. *Lecture Units: 2; Activity Units: 1*

Prerequisites: HSC 315.

Equivalent Quarter Course: HSC 4010.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 405 - Toxicology

Units: 3

An introduction to the field of toxicology. Topics include toxicokinetics, organ and non-organ toxicity, environmental toxicology, and applications of toxicology in clinical, public, and environmental health settings.

Strongly Recommended Preparation: BIOL 230 with grade C or better, CHEM 112.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 410 - Qualitative Methods in the Health Sciences

Units: 3

Purpose and appropriate use of qualitative methods in the health sciences. Special emphasis will be placed on the generation and interpretation of qualitative data necessary for understanding and addressing community and public health issues.

Prerequisites: HSC 130 and HSC 250.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 420 - Occupational Health

Units: 3

Health and safety issues related to occupations including workplace physical, biological, and psychological hazards, safety legislation, ergonomics, workers compensation, industrial hygiene, workplace violence, disaster preparedness and terrorism.

Prerequisites: ENSC 280.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 423 - Homelessness, Urban Poverty, and Health

Units: 3

Structural factors contributing to homelessness and poverty in US urban populations. Exploration of legal, political, and economic approaches to developing and delivering services at the community level. Evaluation and comparison of local efforts in different metropolitan areas.

Prerequisites: HSC 400.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 435 - Life Course Perspective on Health

Units: 3 ; G.E./G.R. Area: B6

Understanding and improving public health using a life course perspective. Health outcomes reflect multilevel influences at specific developmental stages; emphasis will be on the interrelatedness of biological, social, and environmental factors on poor health and disparities.

Strongly Recommended Preparation: HSC 315

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *B6 - Upper Division Science Inquiry and Quantitative Reasoning*

HSC 440 - Global Health and Disability

Units: 3 ; G.E./G.R. Area: D4; Social Justice

Global health from the perspective of people with disabilities. Eighty percent of people with disabilities live in developing countries. Reflecting an awareness of the needs of fifteen percent of the world's population, an estimated one billion people.

Prerequisites: HSC 315; and completion of GE areas A1, A2, A3, and B4.

Equivalent Quarter Course: HSC 3100.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

G.E./G.R. Area Satisfied: *D4 - Upper Division Social Sciences, Overlay - Social Justice*

HSC 445 - HIV/AIDS in a Global Context

Units: 3

Global overview of the HIV/AIDS pandemic and issues in prevention of HIV/AIDS among vulnerable populations. Emphasis on the importance of a multidisciplinary approach to the comprehension of and response to the HIV/AIDS pandemic.

Prerequisites: HSC 315.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 450 - Health Communication

Units: 3

Overview of health communication theory. Covers advertising, marketing, advocacy and lobbying. Examines funding mechanisms, legal requirements and restrictions on communication campaigns. Discusses the impact of health communication on health behavior. Use of data to measure campaign effectiveness.

Prerequisites: HSC 315 and HSC 360.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 455 - Management and Employment Issues in the Health Professions

Units: 3

Overview of labor and employment issues common in a health care context. Workplace health and safety, labor and employment law, civil rights in the workplace, and workforce composition. Discusses management theory, organizational behavior, professionalism and the development of leadership skills.

Prerequisites: HSC 360.

Equivalent Quarter Course: HSC 4600.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 460 - Emergency Preparedness and Response

Units: 3

Introduction to public health emergency preparedness and response. It provides students with a comprehensive, multidimensional understanding of the needs of various populations in emergencies, considering the political, economic, and cultural contexts.

Prerequisites: HSC 110.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 465 - Health Data and Information Management

Units: 3

Accumulation, storage and use of health information and data at the individual level and in aggregate. Topics include electronic health records, health information systems, research standards, health informatics, and applicable regulations. Includes a lab component. *Lecture Units: 2; Lab Units: 1*

Prerequisites: HSC 330 and HSC 360.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 470 - Health and The Built Environment

Units: 3

Exploration of the built physical environment where humans live in the context of health. It will explore infrastructure, regional/city planning, and open spaces and how this influences individual and community health outcomes.

Prerequisites: All of: ENSC 280, HSC 100, HSC 110, HSC 300, HSC 350.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 480 - State and Local Health Systems

Units: 3

Role of state and local institutions in health policy, public health, and health care. Discussion of municipal, county, and state health departments and related agencies. Impact of different types of policies, local ordinances, state legislation, case law, etc.

Strongly Recommended Preparation: HSC 380

Prerequisites: HSC 315 and HSC 360.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 485 - Applications of Research Methods in Health Sciences

Units: 3

Research paradigms and concepts commonly used in health sciences. It focuses on developing pertinent health research questions, and employing appropriate methods to address current and emerging issues in public health, particularly among at-risk populations.

Strongly Recommended Preparation: HSC 350 Health Behavior & Health Education Theory

Prerequisites: All of: HSC 100, HSC 110, HSC 315, HSC 330, HSC 375, HSC 410.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both*

online and on-ground).

Grading: A-F grading only.

HSC 490 - Independent Study

Units: 1-4

Independent study under the supervision a department faculty member.

Prerequisites: Department consent and minimum 2.0 GPA.

Credit Restrictions: No more than 12 units of independent study may be applied in the major department and 8 units in other departments to a baccalaureate degree.

Equivalent Quarter Course: HSC 4900.

Repeatability: May be repeated for credit, with department consent, for a total of 12 units.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

HSC 497 - Issues in Health Sciences

Units: 3

Readings, discussion, and research on contemporary and/or significant issues in health sciences.

Equivalent Quarter Course: HSC 3999.

Repeatability: May be repeated for credit when content varies.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

HSC 499A - Capstone in Health Sciences

Units: 3

Capstone course where students apply knowledge and skills gained in their courses by exploring select issues in health, researching and analyzing existing policies to make a recommendation. Students prepare a summative professional portfolio. Lecture Units: 2; Activity Units: 1

Prerequisites: HSC 400.

Equivalent Quarter Course: HSC 4500 and HSC 4700.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 499B - Capstone in Public Health Interventions

Units: 3

Capstone course where students apply knowledge and skills gained in their courses by exploring select issues public health, research and analyze existing policies to make a recommendation. Students prepare a summative professional portfolio. *Lecture Units: 2; Activity Units: 1*

Prerequisites: B.S. HSC: Concentration in Public Health major and HSC 400.

Equivalent Quarter Course: HSC 4500 and HSC 4700.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HSC 499C - Capstone in Health Policy

Units: 3

Capstone course where students apply knowledge and skills gained in their courses by exploring select health policy issues, research and analyze existing policies to make a recommendation. Students prepare a summative professional portfolio. *Lecture Units: 2; Activity Units: 1*

Prerequisites: B.S. HSC: Concentration in Health Policy major and HSC 400.

Equivalent Quarter Course: HSC 4500 and HSC 4700.

Possible Instructional Methods: *Entirely On-ground, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

History: Applied

HIST 402 - Introduction to Public History

Units: 4

An introduction to Public History as a field and a methodology, exploring what happens to history when it leaves the classroom for public consumption in the form of museum exhibits, documentaries, etc.

Prerequisites: HIST 201.

Equivalent Quarter Course: HIST 4032.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

HIST 403 - Introduction to Digital Historical Methods

Units: 4

An introduction to Digital History-its past, its current state, and its possible future. The creation of digital projects and the evaluation of various digital tools for historical research; discussion on the place of Digital History in historiography.

Equivalent Quarter Course: HIST 3025.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

HIST 404 - Introduction to Teaching of History

Units: 4

Seminar in teaching history at the K-16 level. The course presents an overview of the way history has been taught in the U.S.; survey of current pedagogical trends; use of primary sources in the history classroom; methods for developing curriculum.

Equivalent Quarter Course: HIST 4033.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

History: Lower Division

HIST 101 - World History I

Units: 3 ; G.E./G.R. Area: C2

Prehistory to 16th century C.E.; Rise of civilization and the control/allocation of resources in the ancient/medieval world; development and spread of world religions and philosophies; empires; focus on cross-cultural encounters, social justice, and sustainability in pre-modern societies.

Equivalent Quarter Course: HIST 1015 and either HIST 1014 or HIST 1017.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C2 - Lower Division Humanities*

HIST 102 - World History II

Units: 3 ; G.E./G.R. Area: C2

16th century to present. Globalization and the world system; mass culture; managing diversity and cultural identity; fall of monarchies and the emergence of republican ideals; transformative technologies and ideologies; challenges of western colonialism; cross-cultural assimilation; industrialization, secularization, environmentalism.

Equivalent Quarter Course: HIST 1015 and HIST 1016.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C2 - Lower Division Humanities*

HIST 110 - The United States to 1877

Units: 3 ; G.E./G.R. Area: D1-3; US-1, US-2

The American Revolution, U.S. Constitution, Bill of Rights, federalism, Civil War, and Reconstruction in context of American diversity and socio-economic change. Meanings of freedom, equality, democracy through Reconstruction. Practice in civic engagement, historical thinking, and collaborative learning.

Equivalent Quarter Course: HIST 1101.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: D1-3 - Lower Division Social Sciences, American Institutions/Code US-1 and US-2

HIST 111 - The United States Since 1877

Units: 3 ; G.E./G.R. Area: D1-3; US-1, US-3

Major developments in United States since the Civil War, including California state and local government, in context of American diversity and socio-economic change. California as microcosm for understanding freedom, equality, democracy. Practice in civic engagement, historical thinking, and collaborative learning.

Equivalent Quarter Course: HIST 1102.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: D1-3 - Lower Division Social Sciences, American Institutions/Code US-1 and US-3

History: Graduate

HIST 600 - Reading Seminar in History

Units: 4

Readings and discussion in significant historical literature of a specific thematically or geographically-defined area of history, emphasizing the chief areas of historical controversy and interpretation. Refining skills in analysis and use of evidence through study of major historians.

Equivalent Quarter Course: Any one from: HIST 6100, HIST 6200, HIST 6300, HIST6400.

Repeatability: May be repeated for credit for a maximum of 12 units when content varies.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

HIST 610 - Research Seminar

Units: 4

Historical methodology including critical analysis and use of source materials, research and writing. Investigation of selected topics in political, economic, diplomatic, intellectual, and social history. Reports and discussion.

Equivalent Quarter Course: HIST 6010.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

HIST 630 - Graduate Historiography

Units: 4

Intensive readings and discussions on the writing and philosophy of history. Written and oral critical

analyses are required.

Equivalent Quarter Course: HIST 6030.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

HIST 641 - Graduate Internship

Units: 4

Supervised field work in non-academic settings, such as museums, libraries, archives, private business and government agencies, or historical preservation programs.

Prerequisites: Department consent.

Equivalent Quarter Course: HIST 6901.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

HIST 642 - Public History Practicum

Units: 4

Advanced hands-on experience in the field of public history. Working as a project team, students will contribute to a public history project in collaboration with a museum, historic site, agency, or organization in the SF Bay Area. Field work may be required.

Prerequisites: HIST 402.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

HIST 643 - Digital History Practicum

Units: 4

The creation and maintenance of a digital historical project; creation of a responsible digital presence that can be used for a portfolio; critical examination into the history and use of digital research.

Prerequisites: HIST 403.

Possible Instructional Methods: *Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F grading only.

HIST 644 - Teaching History Practicum

Units: 4

Regular discussions of problems and trends in the teaching of history. Completion of project related to methods and theories of the teaching of history. May count as elective or substitute (with approval) for HIST 404.

Prerequisites: HIST 404.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

HIST 651 - Graduate Portfolio

Units: 2

Under the direction of a graduate advisor, student will create a digital portfolio that they will use to compile graduate work from all subsequent graduate courses.

Equivalent Quarter Course: HIST 6050.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

HIST 652 - Scholarly Practicum

Units: 2

Under the direction of a graduate advisor, students will professionally present, submit for publication and/or otherwise publicly present their research from their graduate work.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

HIST 690 - Independent Study

Units: 1-4

Individual or small group work with faculty member on specific topic not offered as regular coursework according to the catalog. May substitute for electives in certain circumstances, with approval.

Prerequisites: Department consent and minimum 3.0 GPA.

Equivalent Quarter Course: HIST 6900.

Repeatability: May be repeated for credit for a maximum of 8 units when content varies.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

HIST 691 - University Thesis

Units: 6

Development and writing of a formal research paper for submission to the University in the specified format. Supervision by a departmental committee, at least one of whom must be a Cal State East Bay faculty member.

Prerequisites: Department consent.

Equivalent Quarter Course: HIST 6910.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

HIST 692 - Comprehensive Exam Review

Units: 6

Selected readings in consultation with two faculty members in preparation for the Master's Comprehensive Written Examination in history. The reading list and the exams must be consistent with the student's areas of concentration and approved by the faculty mentors.

Prerequisites: Completion of GE area B4.

Equivalent Quarter Course: HIST 6905.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

HIST 697 - Issues in History

Units: 4

Readings, discussion, and research on contemporary and/or significant issues in history.

Equivalent Quarter Course: HIST 6999.

Repeatability: May be repeated for credit for a maximum of 8 units when content varies.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

HIST 699 - Departmental Thesis

Units: 6

Development and writing of a research paper for submission to the department which specifies its format. Supervision by a departmental committee, at least one of whom must be a Cal State East Bay faculty member. Oral defense normally required.

Prerequisites: Completion of GE area B4.

Equivalent Quarter Course: HIST 6909.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F grading only.

History: Migration and Globalization

HIST 322 - Warfare, Genocide, Terrorism: Globalization Through Conflict Since 1914

Units: 3 ; G.E./G.R. Area: C4

History of violence as a catalyst for globalization. Troop mobilizations, forced resettlements, genocidal regimes, transnational terrorist networks, mass migrations; conflict prevention, peace movements, human rights, refugee response. World Wars I & II, Holocaust, Cold War, rise of terrorism, United Nations.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities*

HIST 327 - Love, Sex, Family: Globalization and Private Life Since 1914

Units: 3 ; G.E./G.R. Area: C4

Impact of globalization on private life: effects of migration, decolonization, diasporas, international education on personal relationships. "World" literature as a window into personal experiences of globalization. Reading novels, plays and short stories historically; using diaries and memoirs as primary sources.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities*

HIST 328 - 20th Century World

Units: 3 ; G.E./G.R. Area: C4

World history from WWI to Soviet collapse, focusing on diplomacy, economics, and political/social trends. The world wars, Russian revolution and Stalinism, fascism and Nazism, Chinese Revolution, Cold War, decolonization and end of Western hegemony, globalization of world economy.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: HIST 3017.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities*

HIST 331 - The Barbarians

Units: 3 ; G.E./G.R. Area: C4

To ca. 1000 C.E. The Franks, Visigoths, Ostrogoths, Angles, Saxons, and the Vandals. Early movements/cultures/religions of these non-Roman peoples.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities*

HIST 336 - Ancient Greece

Units: 3 ; G.E./G.R. Area: C4

From the Bronze Age to the Roman takeover. The Mycenaean world; the Homeric World; the development of the city-state; classical thought and culture; the Persian and Peloponnesian Wars; the rise of Macedon; its defeat by Rome.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: HIST 3107.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities*

HIST 338 - The Roman Empire

Units: 3 ; G.E./G.R. Area: C4

Roman history from the rise of Augustus to 565 AD; The Age of Augustus; pax Romana ; the rise of the empire; Christianity and decline of paganism; barbarian incursions; decline of the empire in the west; rise of Byzantium.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities*

HIST 344 - Revival and Reform in Early Modern Europe

Units: 3 ; G.E./G.R. Area: C4

Europe from 1350-1550. Renaissance arts, science, humanism, and individualism; the rise of Protestant movements and the Catholic response; new global connections and a changing economy

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: HIST 3130.

Possible Instructional Methods: *Entirely On-ground.*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities*

HIST 352 - Modern Europe: Unity and Diversity

Units: 3 ; G.E./G.R. Area: C4

Survey of European history from the French Revolution to today. Fall of monarchy, rise of competing political ideologies/regimes, industrialization, secularization, science. Special attention to internal and external colonization, race and multi-ethnic societies, national cultures, personal identities, social justice.

Prerequisites: Completion of GE areas A1, A2, A3 and B4.

Equivalent Quarter Course: HIST 3170.

Possible Instructional Methods: *Entirely On-ground, Entirely On-line, Hybrid (every section of this course may be taught both online and on-ground).*

Grading: A-F or CR/NC (student choice).

G.E./G.R. Area Satisfied: *C4 - Upper Division Arts or Humanities*
