Chemistry	Sci E-28
Computer Science and Statistics	CSc 256
Mathematics	M&HE 148
Military Science	Lib 130
Physics	Sci E-29

Cal Poly is a vital resource of the Central Coast of California. As a source of documents, research materials, laboratory skills and academic knowledge, Cal Poly is an important asset to the surrounding communities and all of us accord it prestige as a neighbor we value and respect.

*Burt L. Talcott, Member
U.S. House of Representatives*

By providing assistance in cooperation with the Federal Government to the emerging nations in Africa, Asia, and Latin America, Cal Poly has made and continues to make a significant contribution to economic development and international understanding.

*Donald R. Fiester
U.S. Agency for International
Development*

Among all the state's institutions of higher education, Cal Poly in San Luis Obispo emerges as a college which consistently pursues its responsibilities to the whole community.

*Donald L. Grunsky, Member
California Senate*

Cal Poly's place in the community of San Luis Obispo County and the Central Coast is well established. I am extremely proud to represent a college which has gathered such an enthusiastic, progressive group of instructors. Cal Poly stands out among all State Colleges in the eyes of members of the California Legislature.

*William M. Ketchum, Member
California Assembly*

CALIFORNIA STATE POLYTECHNIC

Cal Poly is a unique community made up of students with identifiable career goals, a skilled faculty dedicated to superior teaching, and an instructional commitment not only to statewide service but also service to this nation and to our friends around the world.

*E. Guy Warren, Chairman
Trustees of the California
State Colleges*

Cal Poly is a dramatic illustration of the application of knowledge to the advancement of the economic and social development of California. Although faculty members are active in their professional fields, this has never been at the expense of their campus and community obligations.

*Glenn S. Dumke, Chancellor
California State Colleges*

Because its citizens are our citizens, because they contribute in so many ways to all of our communities, Cal Poly as an institution is the foremost "citizen" of San Luis Obispo.

*Hans Heilmann, Chairman
San Luis Obispo County Board
of Supervisors*

The response of my colleagues at Cal Poly to the needs of our city is a true indicator of the close interrelations between town and gown which are characterized by mutual respect, understanding and support.

*Kenneth W. Schwartz, Mayor
City of San Luis Obispo*

As narrowly or as broadly as we define the word "community" there exists a strong tie between this college and its neighbors; similarly the various groups within the college are closely interdependent. We are each measured by many others in whatever we do or fail to do. We are also assisted by many others and are given opportunities to assist; thus, together, we created our community.

*Robert E. Kennedy, President
California State Polytechnic
College*
