

Dear Mr H

[C. Nov. 1, 1921]

There are about
fats of ~~the~~ white Bay
state cement costing at
San Simon. My son
expressive here with " "
fillers sitting on the "size"
principal I have not been
satisfactory - Using the
"Bay state", thinned down,
has been more so - However
I am open minded. What do you

you do on the sample wall
of B?

We can use the "Boy
State" we have on ^{concrete}
retaining walls, pergolas etc
in fact it seems best.

I question the economy
of "plain" painting from
afar - ~~the~~ ^{the} men
here are more active &
used to working full hours
if they are helped to it at all
firmly & ~~the more~~ we want
as few men & as active

as possible, on acct of having
to house & feed them.

Don't forget in your
calculations of time that

there are elaborate
windows & door trims in

all rooms ~~of~~ ^{to}. As
well as walls of big room

in C. - besides the
plain wall surfaces.

~~as yet~~
Do try to be here about
for a time before Mr H^s
come as there is much

Nothing together to be done.
as always
yours. J. T.
