The Japanese families interned at Fresno Assembly Center as of August 1, 1942 are listed by family head name - Assembly Center address - number in family and community of origin.

All members of each family were assigned the same family number and the head of the family listed here is consistent with that which appeared on the Social Data Registration Form compiled at the Control Station where evacuees were first registered. The family head listed was usually the father but in some cases where there was no father the head of the family might be the oldest son or the mother. In many instances the family was only one individual. Sometimes these were grandfathers or grandmothers of another family in the Center. The housing location of anyone interned in the Center can be determined by checking the Fresno Assembly Center lay out map for location of block, building number and apartment number. Each building was divided into 5 apartments.

Fresno Assembly Center Directory

(Includes Name - Center address - No. in family and community of origin).

Where more than one apartment number is shown, it indicates that the family was large and occupied more than one apartment.
