HAWESPIPE 1970

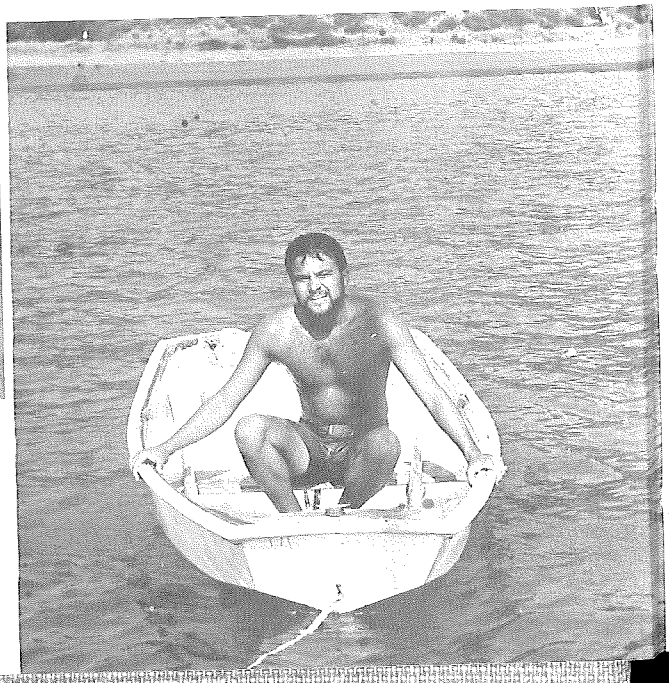

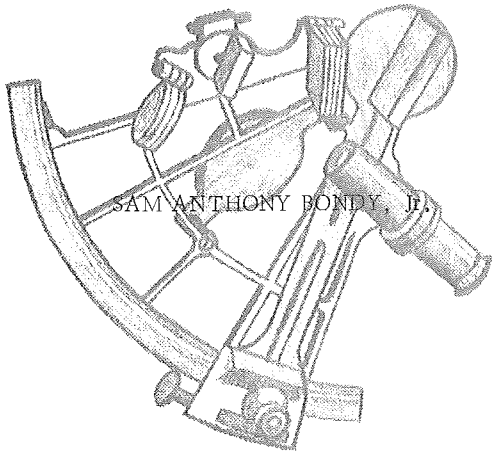

SAM ANTHONY BONDY, JR.

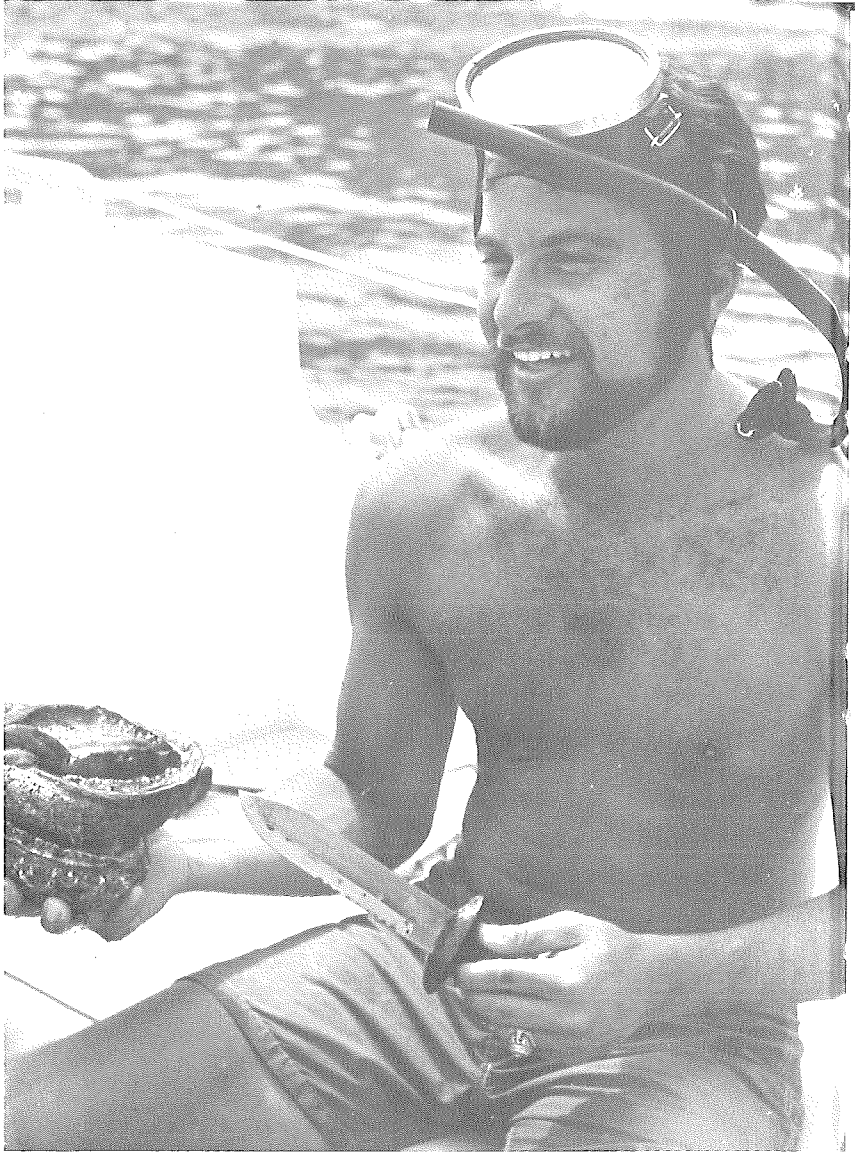

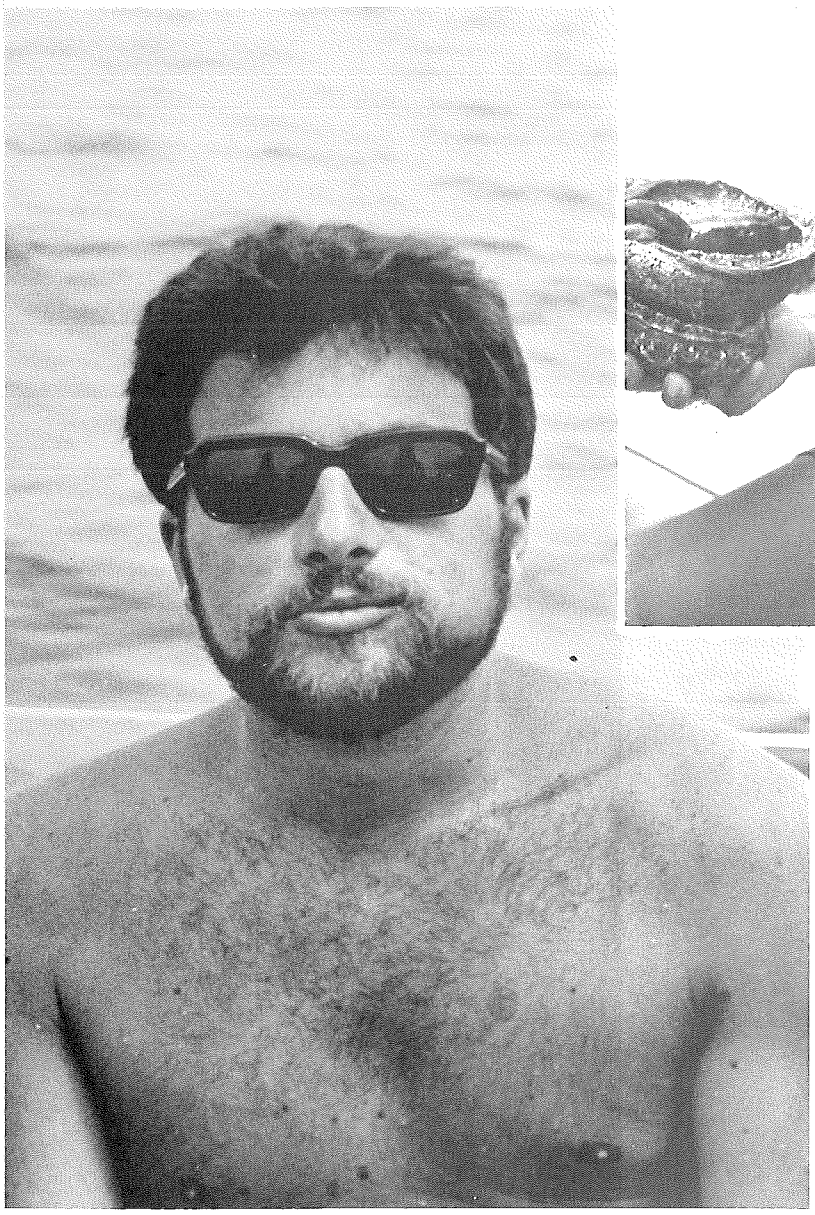

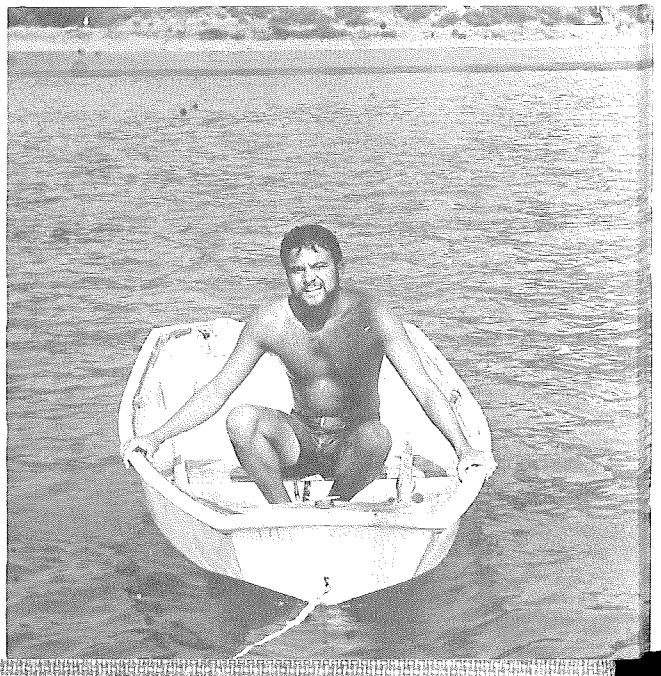

SAM ANTHONY BONDY, Jr.

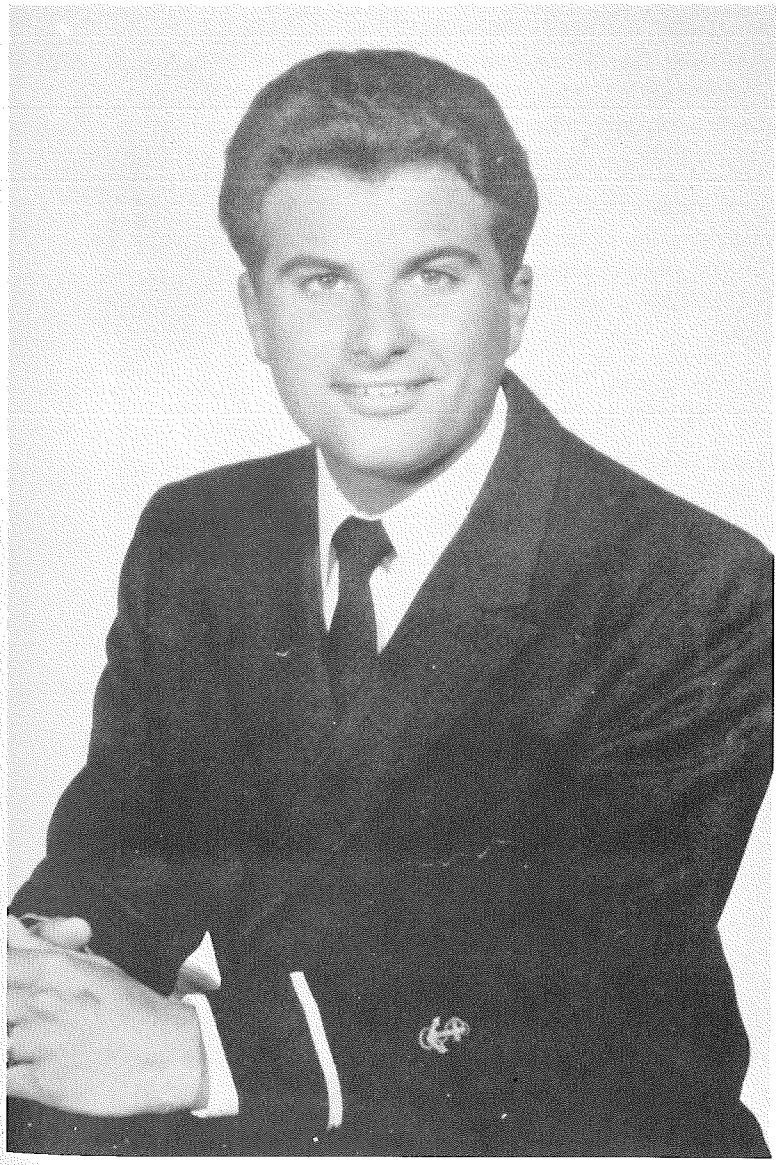

On the twenty-sixth day of December, 1969, an American ship and her crew were in trouble somewhere in the mid-Pacific. Surrounded by heavy seas, in the middle of a storm, the S.S. Badger State's cargo of ammunition suffered an explosion. In the ensuing abandonment of the ship, twenty-six of the forty-man crew were lost. Among these men was a member of the Academy's Class of 1967; Sam Anthony Bondy, Jr., Third Mate.

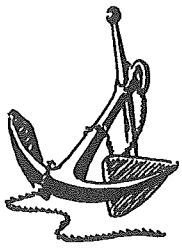

To those who knew Sam, it is his smile, his fantastic sense of humor, and his spirit which most characterized him. To those who did not know Sam, he can serve as an example- a man who laughed through every day of his life, but whose ability and professional knowledge gained him respect on every ship on which he served.

Sam loved the sea. He was a sailor, a skin diver, a swimmer, and a surfer. And now the sea is his home.

"They that go down to the sea in ships, that do business in great waters; these see the works of the Lord, and his wonders in the deep."

Psalms.

SUPERINTENDENT'S MESSAGE

To the Graduates of the Class of 1970:

I congratulate you, the graduating Class of 1970, for the successful completion of your academic and professional courses here at the Academy.

You are very fortunate to be entering the maritime service just as President Nixon has initiated a program that calls for the construction of three-hundred new ships over the next ten years. This should lead to a resurgence of maritime power that is so essential to our country's economy and national defense.

To operate these ships the country needs merchant marine officers with professional competence, courage, good judgment, and good health. Of these virtues I would say professional competence in a merchant marine officer will be the most noticeable to your shipmates. As you grow in knowledge, you will most certainly grow in foresight, courage, dependability, endurance, initiative, judgment, and also enthusiasm, drive and ambition.

The California Maritime Academy motto "TO WORK, OR FIGHT, WE ARE READY", admirably sums up the necessity for professional competence.

The Class of 1970 has contributed in a great measure to the improved image of the Academy. We all have benefited from knowing you, from sharing your views and from exchanging ideas. We hope that you on your part will take with you pleasant memories and enduring friendships, not only with us but with each other, for friendships of this sort are the personal bonds which will strengthen our merchant marine ashore and afloat.

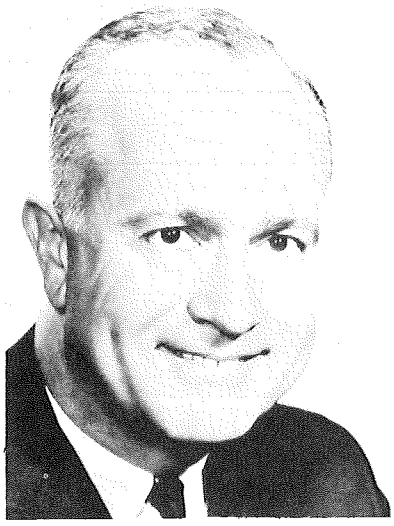

As Superintendent, and in behalf of the Board of Governors, Administration, Faculty and Staff, I wish you all great success and happiness in your future careers.

SPORTS

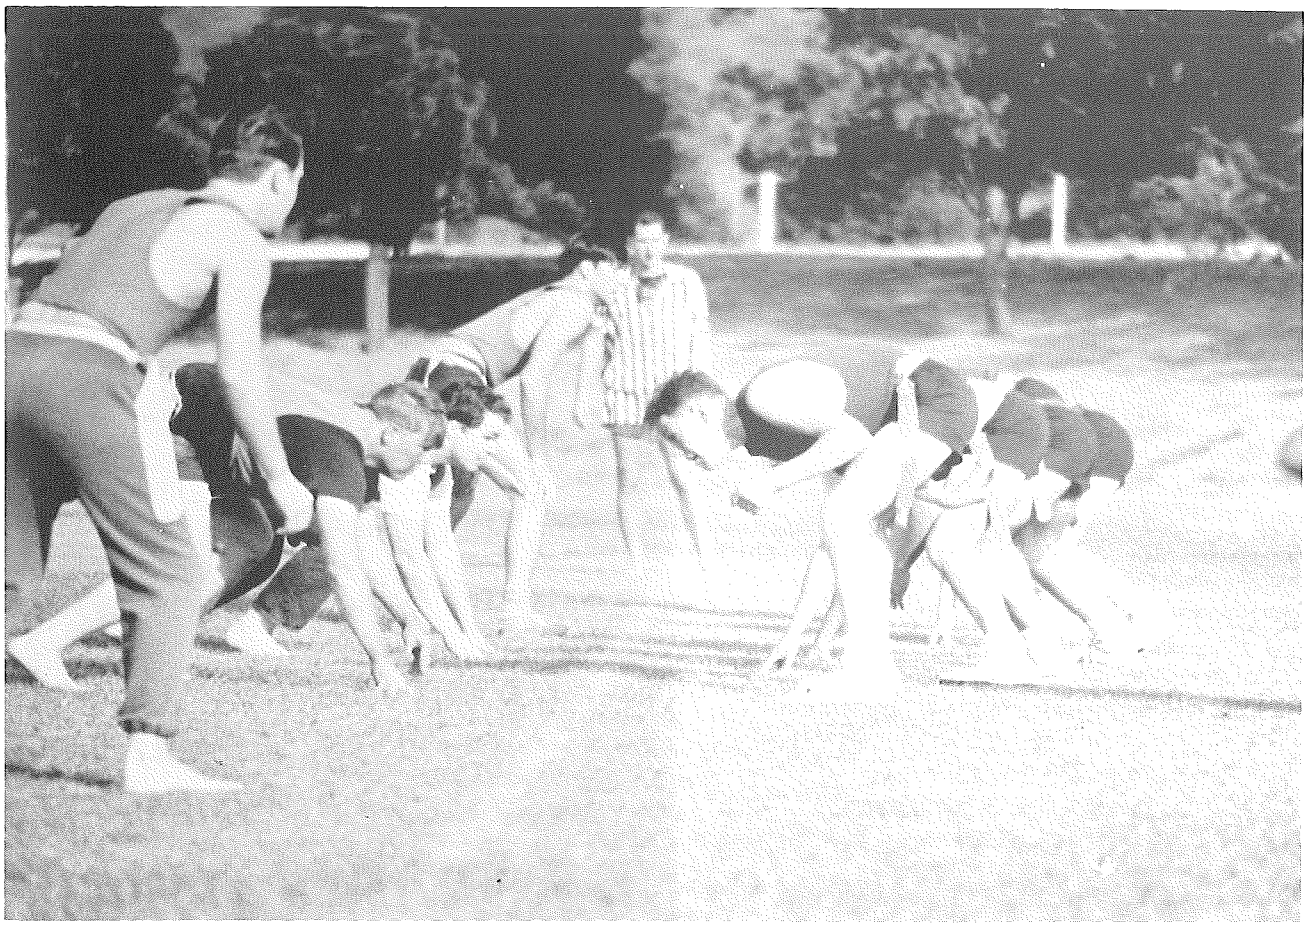

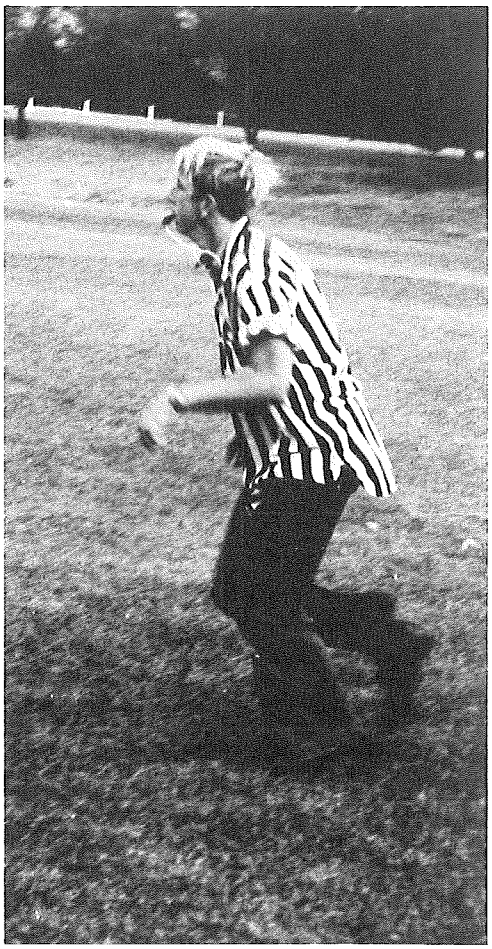

FOOTBALL

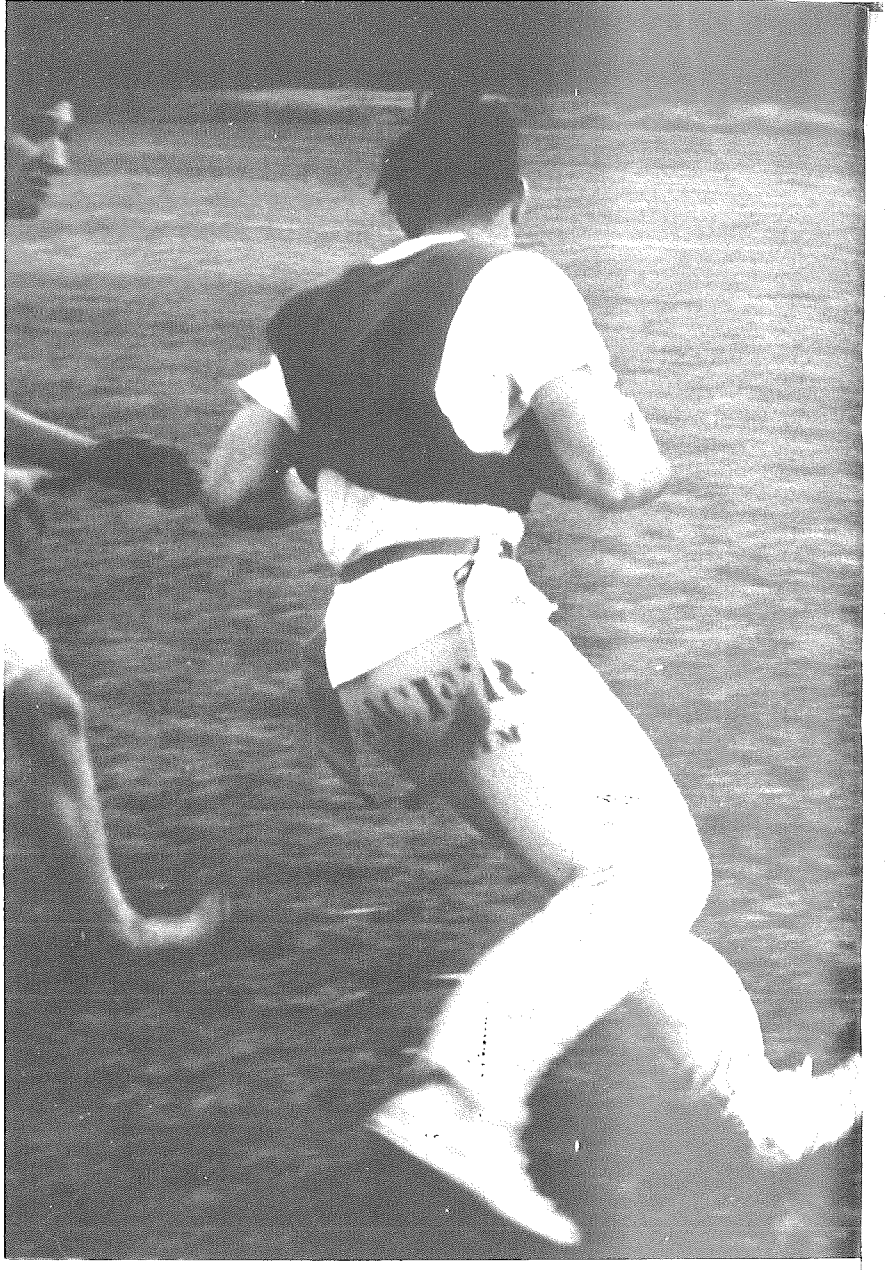

Football is THE sport at the Academy. It is a fine means of relieving all the tensions we build up in us. We bang heads, smash bodies, and just generally have good "clean" fun.

This year Division 1-E, led by "shooter" Jack Orme, took the school's championship by beating (sometimes literally) all contenders.

Basketball is our only varsity sport. Those who went out for it this year included Captain Barry Barrett, Wayne Muggli, and the Gibson brothers.

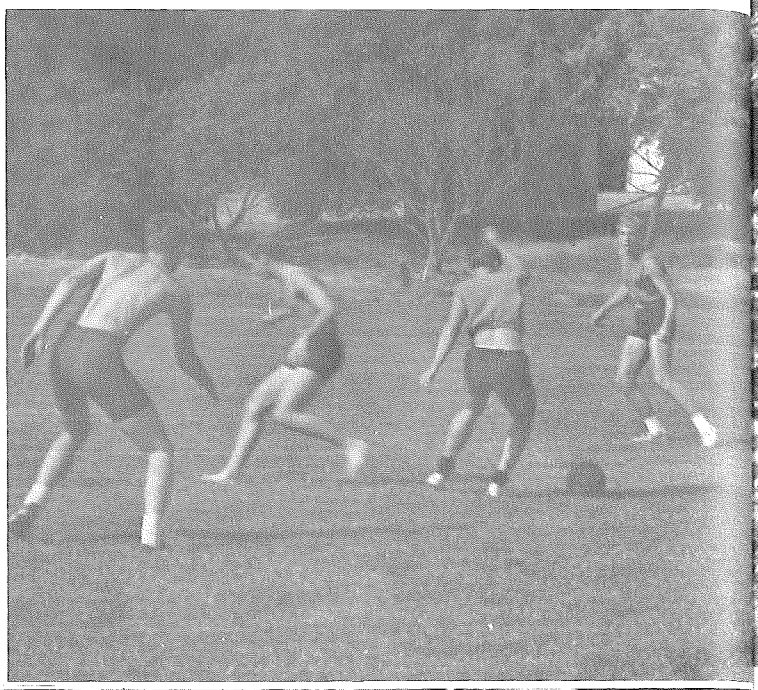

SOCCER

Midshipmen soccer players showed great form and delicate footwork this year. Errol Kody led the scoring, when his opponents didn't eliminate him.

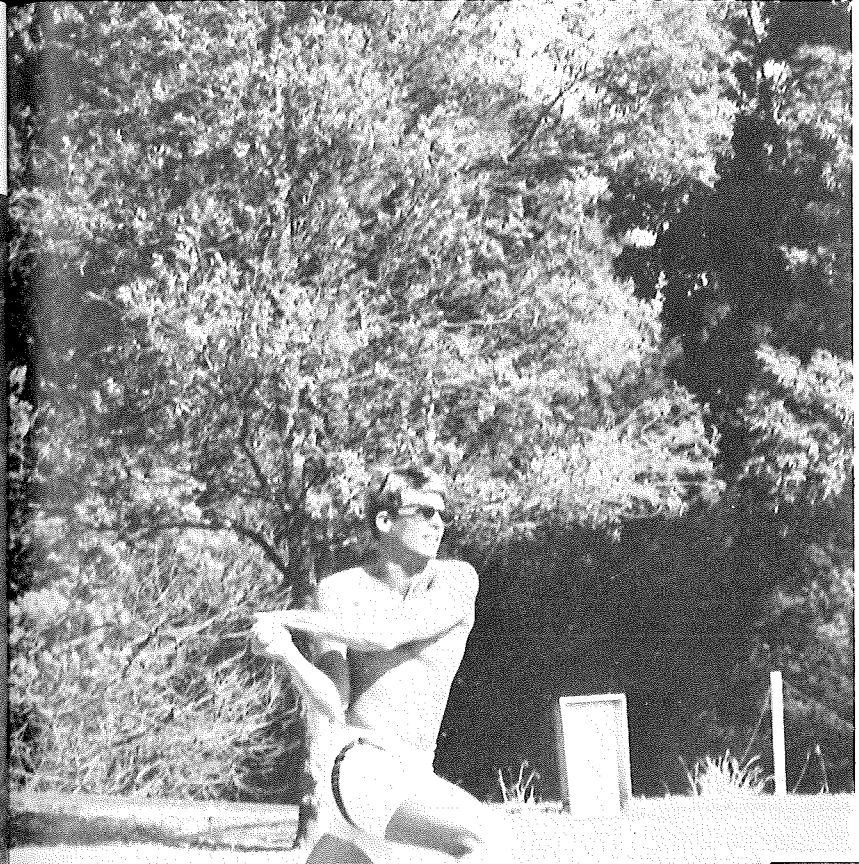

SOFTBALL

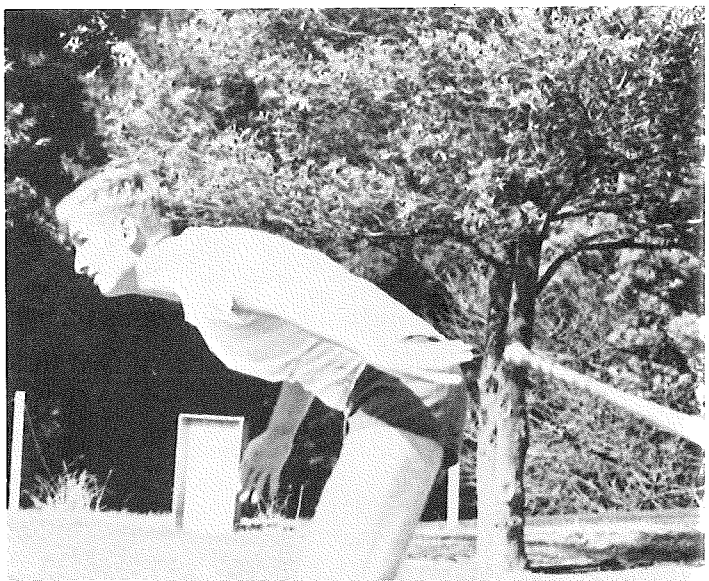

Softball is the sport that comes around at a time when most people have other things to do, so only the REAL enthusiasts show up.

For a non-violent, non-contact game, it does surprisingly well at our animal school.

DAMAGE CONTROL SCHOOL

Damage Control School was the highlight of the first semester for the first class. It gave the first class middies a chance to learn the rudiments of damage control aboard ship, and put it into practice aboard the "Buttercup". But most of all, it was three days away from the daily drudgery of Keema routine.

A DECADE OF DEVOTION

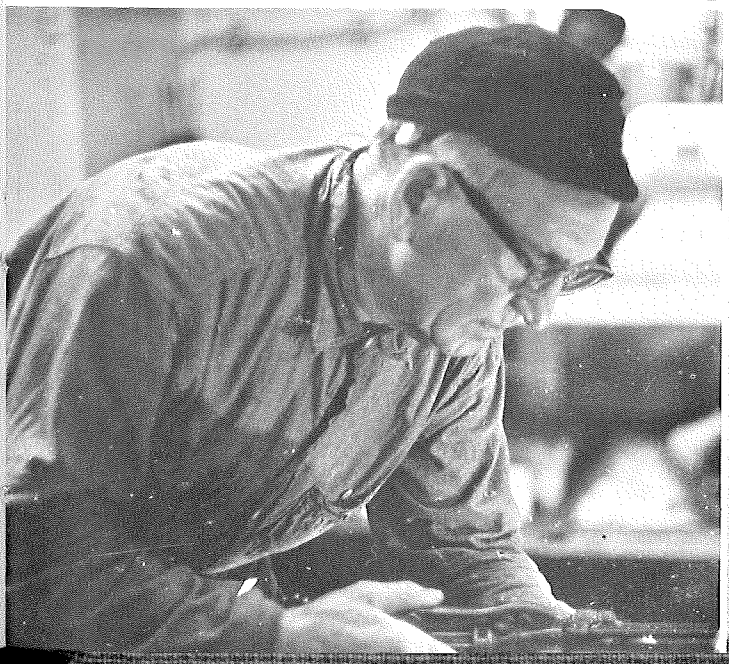

For more than a decade "Red" Autem has provided both the faculty and the midshipmen at the Academy with an enviable pillar of character and skill. His initial responsibility when he arrived at the Academy in December 1959 was ship's welder. In this role he provided the midshipmen with an example of skill, patience, and precision which put new life in the cliche, "pride in one's work." As a friend, he was constant, a quality not hard to achieve but difficult to find. Perhaps his most productive roles at the Academy was as a teacher. Beside producing an effective welding program from next to nothing, Red had the gift of inspiration. Work was performed not through fear of a disciplinary program, but for desire to produce.

Val Autem retired in March 1970 after a valuable and legendary career at the Academy. He will long be remembered as a friend for his willingness to help the midshipmen on both their personal and school projects, and as a teacher for imparting only a small portion of his vast knowledge of welding to each midshipman.

THE SMOKER

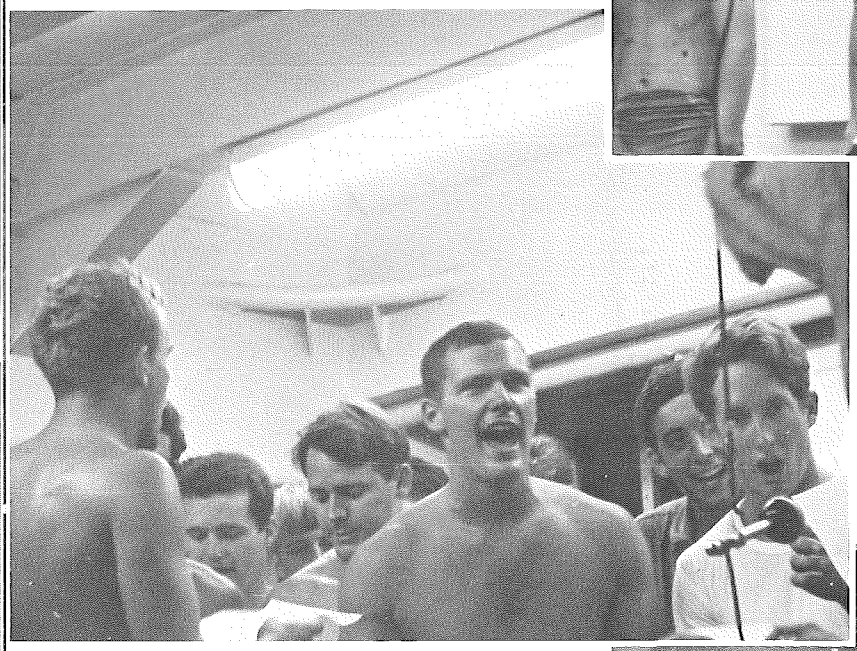

Dale brings them out

The Mast Board is brought under attack.

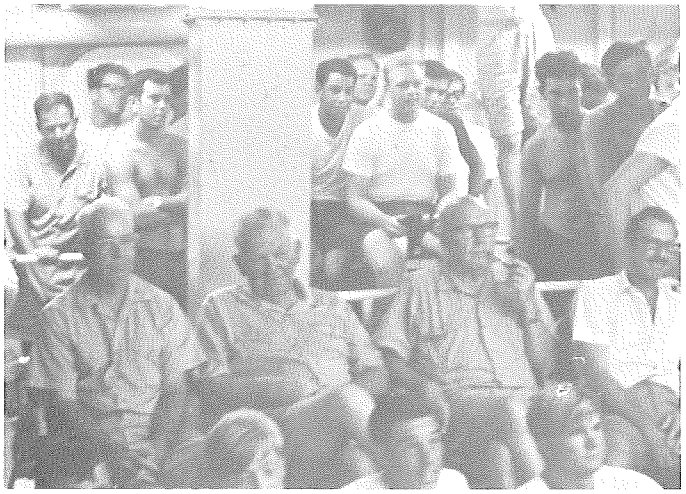

The Second Class sings about cruise.

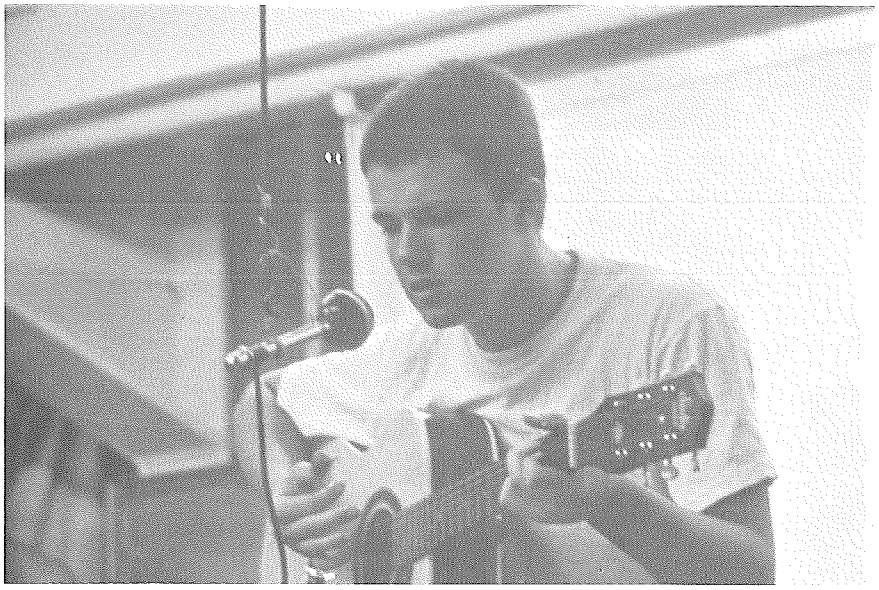

The First Class Deck songs and Limericks all dealt with their officers.

WHAT are all these strange people looking at? Why, it's only the Cruise Smoker!!

On the second March 8 (thanks to the International Dateline) the Corps of Midshipmen, under the direction of Mark Foulk and Chris Jensen, put on a "smoker."

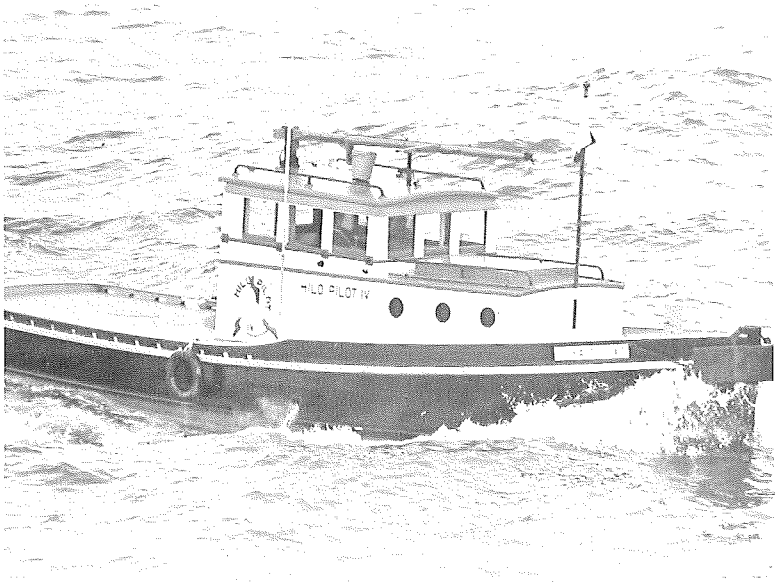

Entertainment was the keynote of the smoker, its success was such that there are going to be many such evenings in the years to come.

HILO

Hilo was, for seventy-nine of us, our last port of call on the Golden Bear. As a port Hilo, wasn't the wildest, the most girl-infested, or the drunkest; just one of the nicest. Four days in the sun, seeing craters, waves, and flowers- that was Hilo.

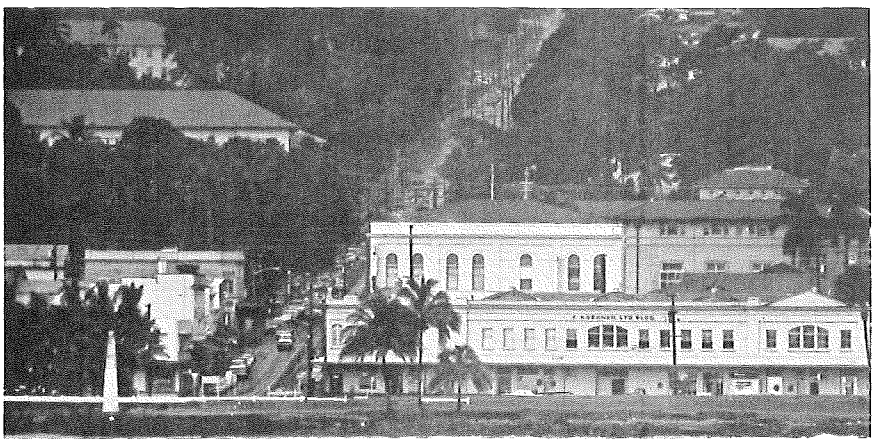

The "Hilo Pilot" greeted us to the fair island of Hawaii.

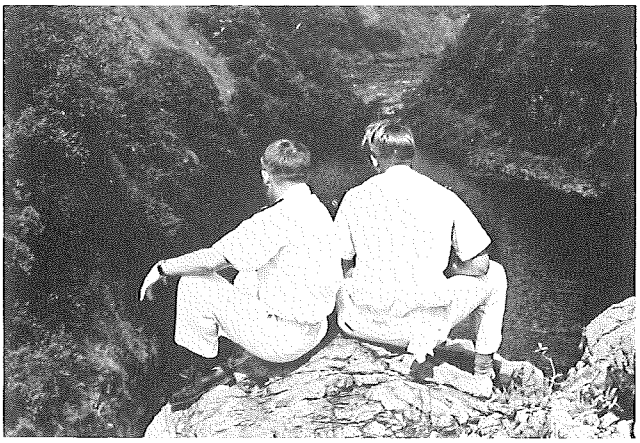

We were pushed in by the tug. . .and tied up.

Letter from the Editors

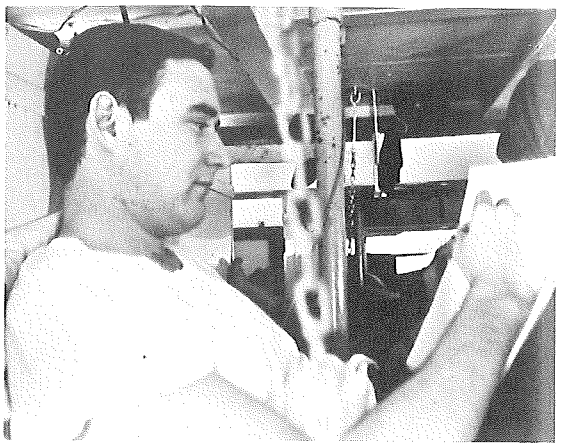

We hope everyone likes this year's HAWSEPIPE, it's a yearbook we're proud of. It's the first annual of the new decade and we wanted to make it one of the best. To accomplish that goal took a lot of work and a lot of time from a small group of people. So, because they put out this effort: Special thanks go to Tony and Lou for their photographic work; Charlie and "Old" Bill for their typing; Jake and Bruce for their special assistance; John, Dennis, Randy, and Ken for aid beyond the call of duty; and Jeff for the money.

This is an annual for everyone, but most especially it's a book for the class of 1970, the best class that there ever was. Our hope is that this HAWSEPIPE will cause them to look back on their last year here at the Academy and remember the good times and good friends they had during their three-year stay.

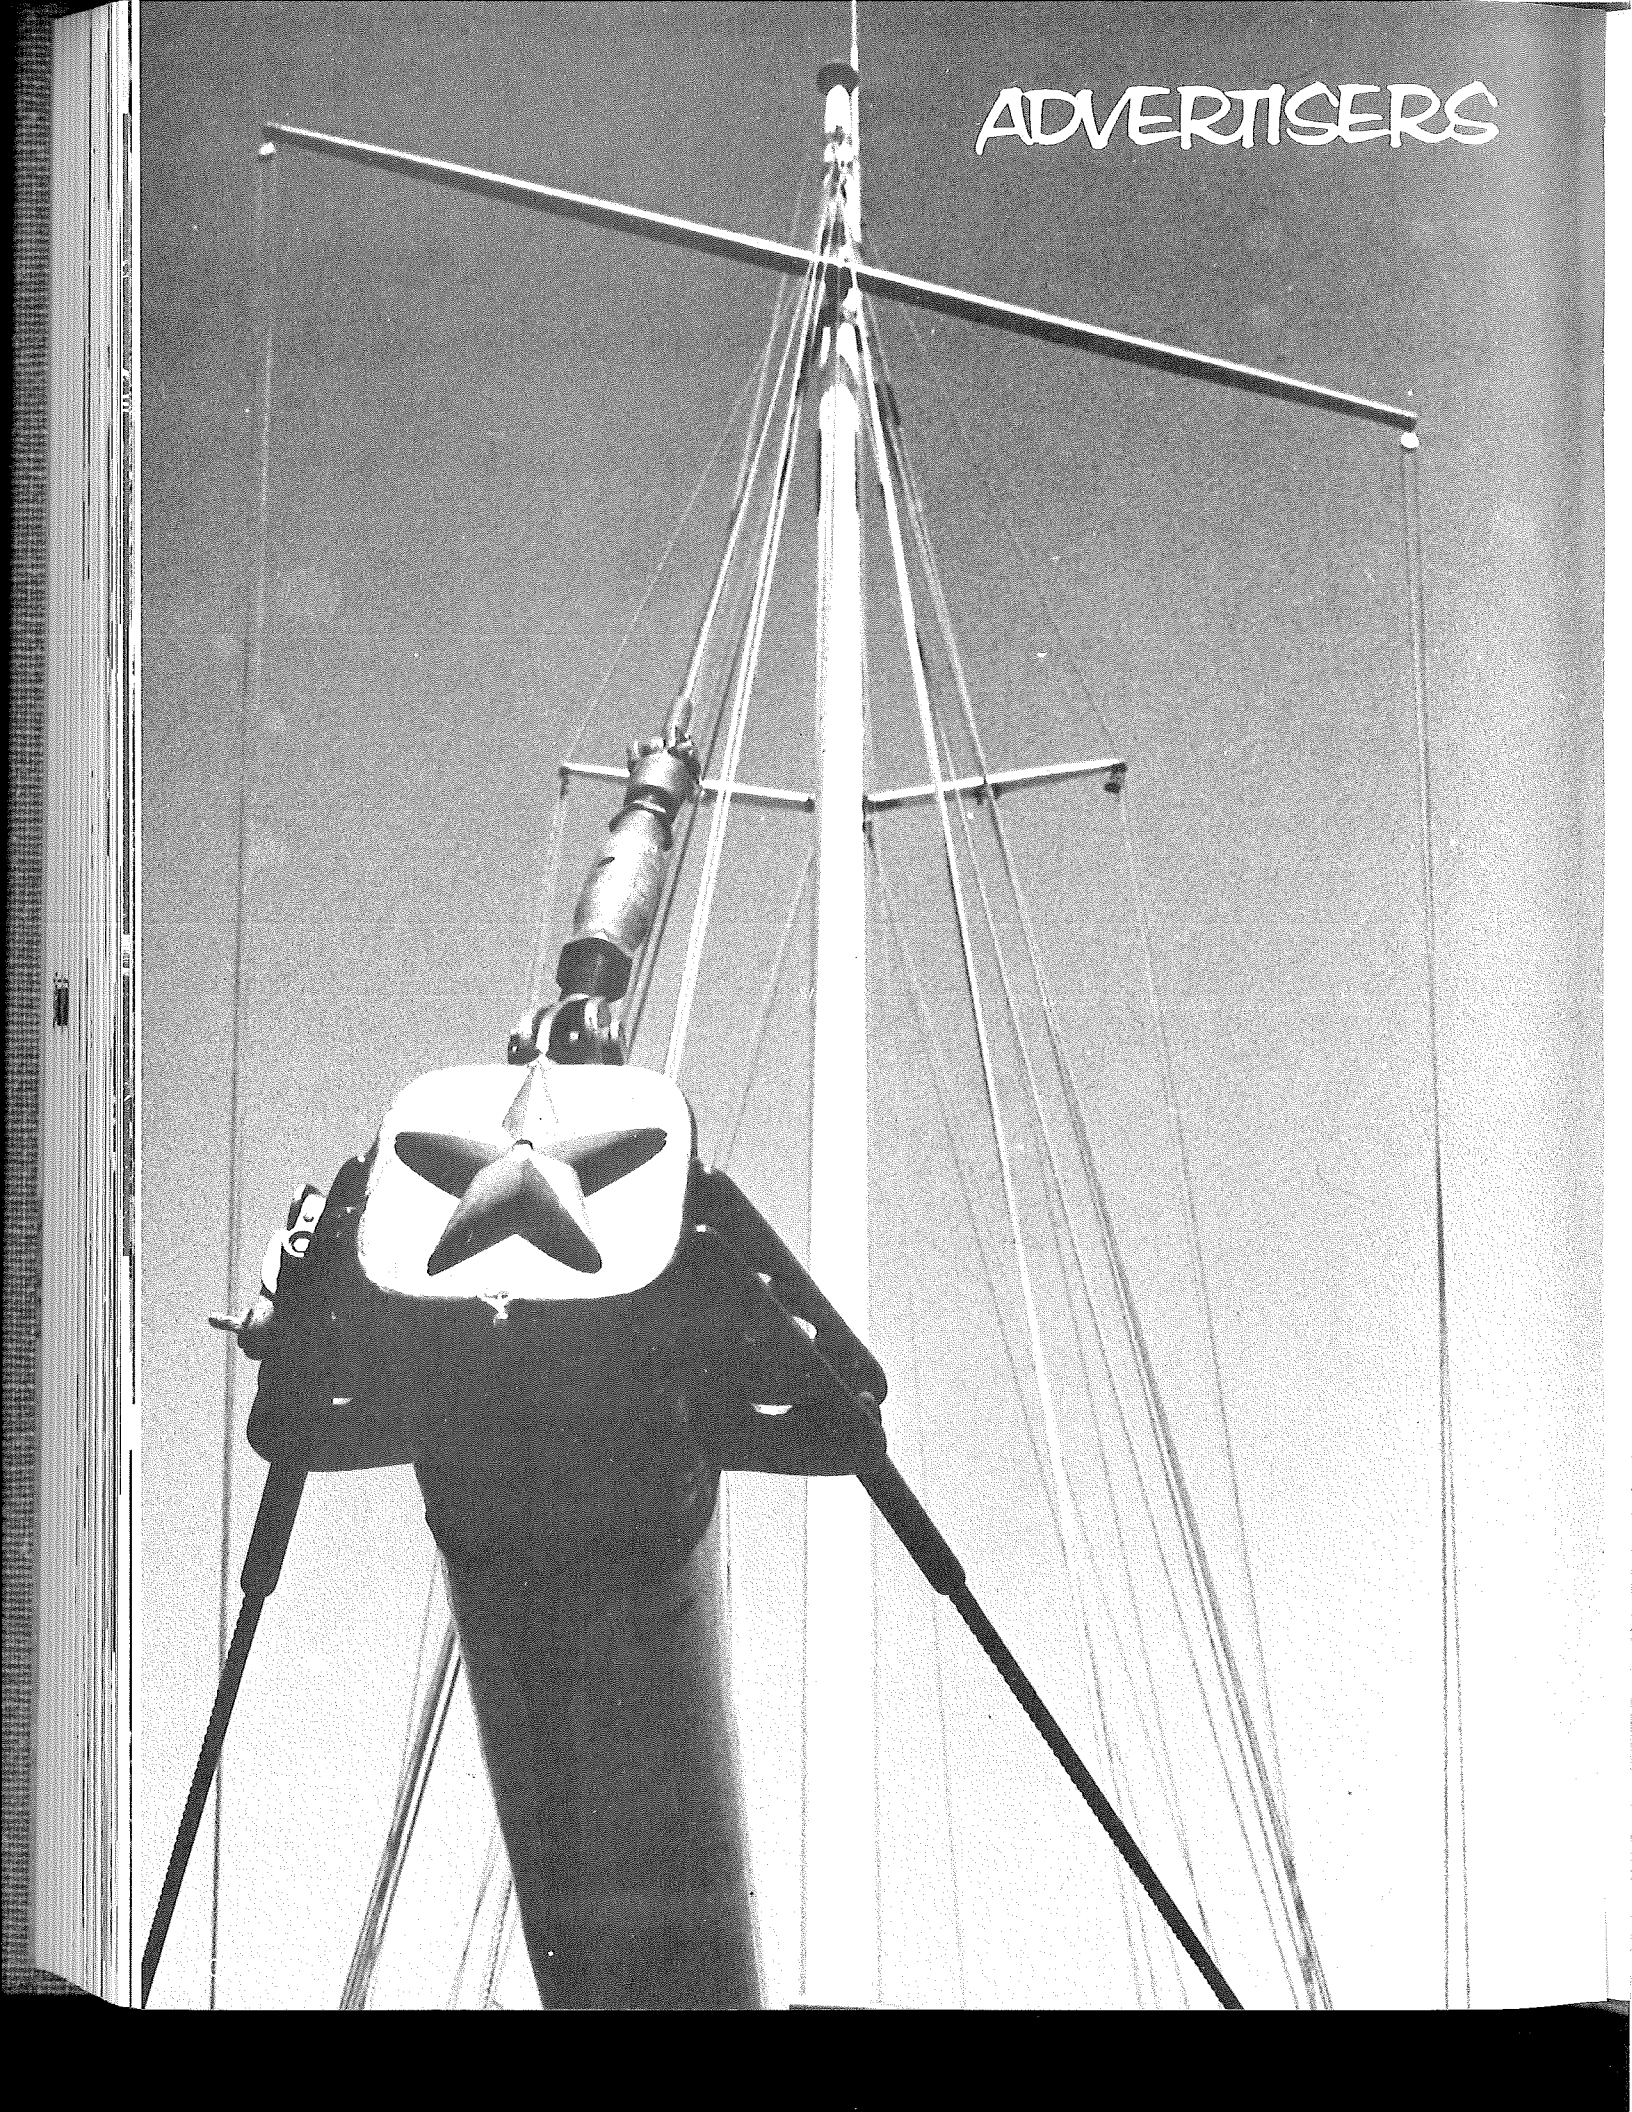

Oh, and before we forget:
Thank you, Paul.
Thank you, too, Bill.

. . . . . AND IT CAME TO PASS after the afflicted spent the allotted three full circles of the sun in the purgatory of Keemaland, they were released from darkness and sent out into the light again as had been promised them by the oracles of Establishment. The disciples of the dark gave them papers to show the bondage had ended. These papers named them and called their names mates and ensigns and bachelors of nautical science. Verily even the one called Admiral could no longer cause them to part the waters of the Straits of Carquinez so he might walk across. Those called officers and instructors came with honeyed words and bid them go into light and solicit for others who might be sent into the bowels of the bear to cause the bear to growl and heave and move across the dangerous waters of the seven seas which were created in the Beginning.

It happened the two who were called Union and Navy bowed before them saying well done. They called their names and looked upon their papers and said come with us. We will be your new masters, and we will lead you in the world of light and reward you with goods from the horn of plenty, for you have served in darkness your appointed time. And so those who were in those days called middies and who had dwelt in the foul darkness and partaken of the poisonous berries which was then called Harry's chow, went with the new masters, and were indeed rewarded with bountiful goods and a green exchange unit of dollars.

The wise among them journeyed then to an oasis known as Burbank bringing with them a secret pass called i.d. card so they might be recognized as the unshackled middies from Keemaland. There they sought the woman called Jeff's Mom who was known to them to reserve special power for middies because she was greater than even the Oracle of Delphi and could trade a portion of the green exchange unit for that called commercial and industrial real estate. As the people of Earth multiplied thousandfold, the zones of C and M did not, and the middies collected more green exchange units as the land yielded double and triple so their children and their children's children after them gave thanks saying verily it is true my father and his father before him were wise, and we need not go into the darkness of Keemaland even as they did, for we may buy our own bear and sit upon his golden head and send others into his bowels to serve us. We need not eat the poisonous berries of Harry's children and Harry's children's children, and we need not part the waters for the admiral. And it came to pass that they gave thanks to the wise old woman of Burbank known to them as Jeff's Mom and who had been called

Whatever happened to Greg Marton?

When Greg graduated from California Maritime Academy in 1969, he came to Chevron Shipping Company. And we launched him into a fine career as Third Mate of the "Utah Standard." We're proud to have Greg with us. He was well trained and ready to step right into a position of responsibility. We're partial to that kind of man, and we're proud that he chose to sign on with us. The Academy has provided us with men who know their job and do it well. We're looking to the class of 1970 for more men like that. How about you? You've started out well by preparing at the California Maritime Academy. When you're ready to put your education to work, come see us. Join Greg at the Chevron Shipping Company.
