Academic Programs and Planning

Welcome!

Academic Programs and Planning has responsibility, working closely with University faculty and administrators, for developing and updating the campus academic master plan. Our office facilitates the development and approval of new degrees, programs, and credentials, and coordinates academic planning with those offices engaged in enrollment management, assessment, and physical space planning. We coordinate the activities of the Academic Planning Committee (APC), which is co-chaired with the faculty chair of the Curriculum Committee.

Reporting to the Provost, our office interacts with several committees of the Academic Senate, including the curriculum committee and the general education committee on the review of new courses and modifications of degree requirements. We assist the chairs of the academic programs areas and the Dean of Faculty with relations with community colleges and schools on issues of articulation, course transfer, lower-division transfer patterns (LDTP), and facilitating degree completion.

With the Chief Assessment Officer of Academic Affairs, we direct the work of the Program Assessment and Review Committee (PARC). PARC is composed of the faculty assessment coordinators in each major. PARC coordinates the annual assessment activities of each program area and is responsible for overseeing the program review process.

Our office is responsible for the University Catalog and also administers the CSU Predoctoral Program. Please contact us if we can provide assistance.
