

## ANTHROPOLOGY DEPARTMENT

## FACULTY

Dirk H. van der Elst, *Department Chairman*

Thomas Bowen ■ Shien-min Jen ■ Roger M. LaJeunesse ■ Sydney R. Story ■ Dudley M. Varner

Anthropology offers an extremely broad yet integrated approach to the study of man and his culture. Various aspects of the field view man as a biological product of the evolutionary process, a participant in diverse ecological systems, a bearer of alternative cultural traditions, and a creator of complex symbolic worlds. Because of its wide coverage and holistic approach, anthropology provides an unusually versatile liberal arts education which can serve as a solid foundation for many fields and vocations. Individuals with anthropological training at the baccalaureate level are not only prepared for graduate study but also have open to them a large number of employment possibilities including state and local social services, public health, archaeological research, and personnel administration.

The department offers a major in anthropology leading to the bachelor of arts degree, and a minor in anthropology for students who wish to major in other disciplines. In conjunction with other departments it offers courses leading toward a major in Latin American Studies and a minor in Asian Studies (See *Special Programs—Asian Studies, Latin American Studies*). With the Departments of Biology and Geology, the Department of Anthropology offers the 17-unit cluster course "*Man and the Natural Environment*" each fall semester (see p. 287).

## ANTHROPOLOGY MAJOR

The following degree major requirements are in addition to general education requirements.

	Units
Anth 1, 2, 3, 4, 104, 115 .....	18
Anthropology electives, upper division .....	18
Elementary statistics .....	3
	<hr/>
	39

## ANTHROPOLOGY MINOR

The following minor requirements are in addition to the general education requirements.

	Units
Anth 1, 2, 3, 104 .....	12
Electives in anthropology, upper division .....	9
	<hr/>
	21

## COURSES

## ANTHROPOLOGY (Anth)
