

The Mission of the School

The School of Engineering is the only publicly supported engineering school in the San Joaquin Valley. The mission of the school is to develop each student's potential to the greatest extent possible, provide a quality engineering education to all students, and to serve students from groups that historically have not participated in a university engineering education.

To reach these goals, the school provides excellent scholarship support for students, has installed a new computer system with more than 100 student workstations, and continues the development of new degree programs. Meanwhile, the completion of the new building, addition of the Computer Science Department and the Construction Management Program to the school, and continued strengthening of relations with industry have enhanced the school's ability to deliver quality education.

The Civil, Electrical, Industrial, Mechanical, and Surveying Engineering programs are accredited by the Accreditation Board for Engineering and Technology (ABET). The Construction Management Program is accredited by the American Council for Construction Education (ACCE).

The school fosters programs and activities that support and enhance instruction and that encourage the development of the faculty.

The School of Engineering

Engineering East, Room 122
(209) 278-2500

Dean: Elden K. Shaw

The School of Engineering includes the departments of Civil and Surveying Engineering and Construction, Computer Science, Electrical and Computer Engineering, and Mechanical and Industrial Engineering.
