

## GENERAL INFORMATION

were only four completed buildings on what was then an 880-acre site. Ten years later, in 1963-64, major buildings on campus included administration, agricultural classroom, agricultural mechanics, home economics, bookstore, business, cafeteria, education-psychology, engineering, home management cottage, industrial arts, library, gymnasiums for men and women, music science, social science, speech arts, student health service and the first residence halls. Subsequent to 1964, student administration, residence hall commons, classroom, office buildings, a three-story college union, bookstore, art building of contemporary design, student health center, residence dining facility, engineering building, industrial arts building addition, and science building were constructed. There are now more than 45 buildings in service. A \$5,000,000 addition to the library and a 30,000 seat stadium were just completed in 1980.

The buildings are in a setting of colorful trees, shrubbery, flowers, and lawns. A tree-lined amphitheater accommodates commencements, convocations, and other large assemblages and provides an outdoor setting for numerous programs and gatherings during the year. A centrally located memorial court, benches, and fountain are favorite spots for relaxation. The adjacent free speech area and college union are centers of student life and activity.

25

A farm operated by the School of Agriculture and Home Economics includes more than 34 structures and is considered one of the most modern and best equipped agricultural plants in the west.

### CENTER FOR INFORMATION PROCESSING

The Center is organized to serve all information processing and computation needs of the university including instruction, research, and administration. It provides a variety of direct and indirect free services to students. Consultants are available in the Instructional Laboratories to give assistance in the use of facilities and computer programming. The laboratories provide timesharing terminals, keypunches, and sorters. Approximately 50 percent of the students now make substantial use of the facilities. Use of the computers in the instructional program is increasing at a rapid rate. The Center is located in the west wing of the School of Business Building with offices in San Ramon 4. The principal hardware, a dual processor CDC Cyber 170/720, supports most of the major computer languages and, via teleprocessing, has access to other larger computers. A DEC PDP 11/45 Timesharing Computer also provides local support for instructional programs, as does a state-wide interactive time-sharing network supported by a Cyber 174 located in Los Angeles.

A microcomputer laboratory, housing a number of Apple microcomputers, is also available and strengthens the campus emphasis on experimentation in computer assisted instruction.

### LIBRARY

The Henry Madden Library is housed in a building completed in 1980. Its resources include 620,000 catalogued volumes, 250,000 government publications, 11,000 pamphlets, 96,000 maps, and over 3,700 periodicals received on subscription. Special collections include the Roy J. Woodward Memorial Library of Californiana and the University Archives. The Music
