He was a member of the college's Wind Symphony Concert Band, orchestra, and numerous chamber music groups.

00:22:51:24 - 00:23:18:05

Speaker 2

He received a scholarship to tour with the Wind Symphony in the summer of 1991, when they were invited to play at the International Festival of Bands and Museums. With so many, he has been playing music since the fourth grade and the French Horn for ten years. He is presently the student at the University of California at Los Angeles, majoring in music Performance and Education.

00:23:18:07 - 00:23:53:07

Speaker 2

He is a member of the UCLA Wind Ensemble Chamber Orchestra, a full orchestra, and numerous chamber music groups. Is also an advocate for active advocate in the teaching of music and public schools, participating in several UCLA campus organizations which outreach and teaching the community, including the very rigorous Alternative Program and Technique of Practice. This organization. Its future plans include going on to graduate school and then teaching music at the high school or college level.

00:23:53:09 - 00:24:13:20

Speaker 2

He is the son of very proud parents, Al and Carmen Christiana, and it is with great honor for me to introduce him, Armando Garcia.

00:24:13:22 - 00:24:40:25

Speaker 4

For you both. Very much for that wonderful presentation. I'd like to begin by thanking Leah and its members who invited me here, to speak and, for organizing this function to help support, future

scholarship as other city College public, as we have this that I attended, so this city college before transferring to UCLA in the fall of 1992.

00:24:40:28 - 00:25:26:12

Speaker 4

I transferred as music education and music performance major, which I am right now. During the time that started City College, it meant a lot to me to know that, groups like the Latino Education Association existed, as as a city college, to help you a voice to to the southeast because Latino Chicano faculty and staff and the students, the success of their efforts in the recruitment and workshops and scholarships, awards and supportive activities and groups which affected Latinos and Chicano City College really helped them give me a drive to, pursue, and motivate me to become to to in my pursuits towards music education and music performance.

00:25:26:14 - 00:25:45:16

Speaker 4

the successes of the Latino Education Association will continue as more and more Latinos and Chicanos graduate, and we turn to San Jose City College as counselors, professors and deans and president.

00:25:45:19 - 00:26:16:26

Speaker 4

I'd like to give a, say a word to this year's scholarship recipients. I want to let you know that the road ahead is not easy. but you, with persistence and without moves like that, you can pursue any field that you choose. your success means turning around such statistics as, in community colleges, out of every 100 Latino students who enter through college, out of high school, on the average around 6 to 7 and up, transferring to a four year institution.

00:26:16:28 - 00:26:46:11

Speaker 4

Being one of those sevens is a great responsibility, which must not be taken lightly. It's something you must be proud of thinking, thinking, taking your success into the community is important so that other Latino students can see that you can do what they can to one that you know that there are other Latinos in Chicano study in every subject that UCLA, we are in the School of Law, School of Medicine, school board, any school, political science, schools of art, engineering, math, Sciences, anthropology, School of Education.

00:26:46:11 - 00:27:18:24

Speaker 4

But even in the schools of music, whatever field of study you choose, although Latinos and Chicano students, as they're study right next to you, we are students who can work as a support network for each other and with the support from other students and with groups like LA, we can we will have more and more successes. Like yourself, I would like to personally congratulate all of you on your accomplishments and your family should be very proud of.

00:27:18:26 - 00:27:32:13

Speaker 4

I would like to thank you for inviting me here this evening, and thank you for the scholarship which I received, which, went towards, towards helping me. And then, actually with the money, I bought a computer, which helped me immensely helpful.

00:27:32:13 - 00:27:35:18

Speaker 1

My, my friends.

00:27:35:20 - 00:27:57:18

Speaker 4

Who joined computers, we all use it. And, it's really great. And, especially I like to thank my parents, who, without their help and their support and over forever letting me do whatever I want to do with music, even though it's not as traditional or as maybe they don't think I can make as much money allowing me to continue that.

00:27:57:25 - 00:28:09:07

Speaker 4

I think that.

00:28:09:09 - 00:28:15:25

Speaker 4

Reminder just motivated me to go back to school.

00:28:15:28 - 00:28:43:13

Speaker 4

00:33:42:17 - 00:33:56:24

Speaker 4

Well, I didn't kill her in time, but there were five of us graduated in college. I think the real importance of the City College is that, you know, at 18, sometimes you don't know what you want to do. And a lot of us go back. Could be 13 year graduate. It took a sister, 20 years to graduate.

00:33:56:24 - 00:34:14:02

Speaker 4

But they all have master's. And, so my mother always practiced education so they can take away your life in a big way. Your money. And take what? Your job and carpet and take away your money. And

that's what education's all about. And I also need to thank my wife, Joanne, because everybody said, well, the other day.

00:34:14:05 - 00:34:26:12

Speaker 4

Don't take the other kids. And, she has gave me the support, allowed me to be in all these activities. And I do want to thank you, Joanne. And I know I'm lonely, but they're not.

00:34:26:14 - 00:34:48:26

Speaker 4

Thank you very much. And again, here's due to the allegations. Defense, please use your scholarships wisely. Please come back to the community and help other kids like yourself. Because that's the chain that we need to salvage. Thank you very much.

00:34:48:29 - 00:35:23:29

Speaker 3

Thank you. George, gives me great pleasure to introduce tonight's keynote speaker, Doctor Noelia Villa. Doctor Villa is the president of our sister college, Beverly Valley College. Prior to assuming the presidency, Doctor Villa was the dean of students services at Career mocha College. And then, of course, she has been in the student services profession for 21 years and has served in administration instruction as a counselor, and in leadership positions in community colleges in Illinois, Flint, Texas, and California.

00:35:24:01 - 00:35:53:01

Speaker 3

Among her professional affiliations are the following. She has served on the staff for the California Community College Women's Leadership Conference and the new Majority Administrators Leadership Conference. She is currently serving on the California Community College Board of Governors, Task Force on Management and Matriculation Regulations Task Force, and on numerous other state level task forces and committees. She was on the board of the statewide Baca organization.

00:35:53:04 - 00:36:16:08

Speaker 3

I would like to quote Doctor Villa from an article that I read in a local newspaper, responding to the question, what makes you tick? She said, and I quote, I put a big charge on empowering people, but helping people to meet their potential and helping people stretch to the limits of their potential and expand their expectations even further.

00:36:16:08 - 00:36:30:14

Speaker 3

To quote I like that statement. Doctor Varma, please join me in welcoming Doctor Vela to speak to you this evening.

00:36:30:17 - 00:36:54:01

Speaker 3

Thank you. Karen. Good evening. It's it's a pleasure for me to be here tonight. I want to first applaud the Latino Education Association and the rest of you for your efforts in creating opportunities for our future leaders. It's an honor for me to be part of that opportunity building. But I must say, before I go on to the recipients of these scholarships.

00:36:54:03 - 00:37:16:05

Speaker 3

And, Armando, I hope you reconsider. I hope you really consider coming back to the community colleges. We need you. But please give us fair warning. I just started my job. I want to be here a while, but, I'll be happy to move aside for. For the rest of you, we all get tired. Well, we don't.

00:37:16:08 - 00:37:39:19

Speaker 3

Well, tonight is a celebration, and we're going to have some, wonderful and dancing. But I'd like to ask, if you will, to, to, listen to a story that I'd like to share with you. I want to talk with you tonight about opportunities, about seizing them. And I know that many of you are community leaders and leaders in your own world.

00:37:39:22 - 00:38:17:07

Speaker 3

And I know that to some degree this may be speaking to the fire, but today, okay, I can provide the, I'm a believer that we are, at any one time, an accumulation of all of our experiences, our trials, our failing exams from time to time, our successes. But I think also, more importantly, the reactions that we have had to these experiences, because I, I believe that they build character and they they build our essence when we're made up.

00:38:17:09 - 00:38:48:29

Speaker 3

And so I want to illustrate that through a story of a young girl and the score this girl was born in, very poor, a small rural area, one rancho in Texas. But the richness that she was born into was a strong Catholic family grandparents, aunts, uncles, parents and brothers. She was the youngest of three children and the only daughter.

00:38:49:01 - 00:39:16:04

Speaker 3

For the first seven years of her life, she grew up in a house with no running water, television, or many other modern conveniences. She even helped the family pick cotton in the fields. She started school when the time came in a very small school in a border town, and she found that she loved them. She really found her niche.

00:39:16:07 - 00:39:47:12

Speaker 3

The time period is the early 50s, and there was a recession going on in Texas. Her father was a carpenter and was unable to get work during this time. And so because many of his friends found themselves in the same dilemma, he joined them in, to to find work in the steel mills in Illinois. And he was gone for about a year, and that year seemed like an eternity to this little girl.

00:39:47:15 - 00:40:33:27

Speaker 3

But her father would write and tell the family to just be a little bit more patient for a little longer, because he was working to make a better life for the family. Well, they finally came during a summer when the father moved the entire family north to a suburb of Chicago. Imagine the transitional shock. This little girl went from rural, undeveloped to urban modern from a predominantly Latino environment to a very culturally, linguistically, and racially mixed environment, from a very warm, oftentimes hot climate to a very, very cold climate.

00:40:33:29 - 00:41:09:25

Speaker 3

In some, she went from the familiar to everything that was unfamiliar. Her father had wanted the best for his kids and family. And so while he was there that year, he checked schools out and he talked with his friends, and he made the decision to enroll the kids in the Catholic school. Although this was very expensive on meager wages of minimum wage and steel mills, he placed a very high priority on education because he and his wife had only reached the eighth grade.

00:41:09:27 - 00:41:35:02

Speaker 3

So the girl and her brothers went on to school, and the mother was very, very active in the school and also the church. Well, for any of you that are Catholic, you know that oftentimes you're very involved with the church. The boys start preparing at a young age to become altar boys. Well, this little girl wanted to become an altar boy.

00:41:35:04 - 00:42:11:06

Speaker 3

So she found out that what it would require was learning her prayers in Latin. Not wanting to be left out, she learned all the prayers along with her brothers. She studied and practiced together with them. Well, needless to say, she was quite disappointed when she found out that despite the fact that she had learned all the prayers in fact sometimes better than some of the boys, she found out that she could not become an altar boy because only boys could be altar boys.

00:42:11:08 - 00:42:36:03

Speaker 3

She didn't understand this and insisted that she was going to have to talk to the priest to try to understand why. Well, this was an awesome proposition for a nine year old. Although her parents were mortified of the thought that their daughter would question the priest. I mean, that's questioning the church. They knew that their own answer to her questions did not satisfy her.

00:42:36:06 - 00:43:04:16

Speaker 3

Well, she soon became aware of the double standard, at least in her mind. Although she questioned the church's stance on this. She couldn't fight the church, but she was determined that this wouldn't happen to her again. So this behind her, she went on and have a very good time in school. He was very active. Well, when her oldest brother graduated from eighth grade, he had left the paper delivery job that needed a career.

00:43:04:18 - 00:43:24:26

Speaker 3

Her middle brother was handed down the job, but he never really took to it. That wasn't his cup of tea. He really didn't want to do that. So she saw this as a great opportunity to make some money. And so she asked for the job. Yes. What? You're right. The good old double standard rose is ugly head again.

00:43:24:28 - 00:43:55:09

Speaker 3

Only boys could be newspaper carriers. She had vowed not to be stopped by that again, so she begged her folks to obviously were distressed with this. Yet another unusual request. How could they let their youngest, a girl, yet deliver papers? It could be dangerous, they thought, and surely their friends would think that they would work with that. They would be totally irresponsible.

00:43:55:11 - 00:44:23:23

Speaker 3

Well, not easily discouraged. This young girl talked to the newspaper, both, and they were willing to give it a try. So, sure, she went home and told her parents and of course her parents couldn't say no. Damn, those poor parents. Well, through this experience, she really got the entrepreneurial fever. She increased the number of subscribers, and she found that she was making a lot more trips than either has ever been.

00:44:23:25 - 00:44:55:21

Speaker 3

Well, this was to be one of several jobs that she held during junior high and high school. Graduation day came from eighth grade, and the class had a whopping number of 21. Her freshman class in high school consisted of 1000 students. Imagine that transition. Another big one. She went from a small, nurturing Catholic school to a very large urban public high school.

00:44:55:24 - 00:45:15:05

Speaker 3

At least half of her graduating class had gone to the local Catholic school, but she was unable to do that because of cost. So she also went from a very short walk to school to a very long bus ride. Sure, she was terrified and so were her friends. In fact, they shared their fears during the first few months.

00:45:15:07 - 00:45:47:09

Speaker 3

But as teenagers often do, her friends birth birthday. Why don't you run for class office? Well, she thought about it. Sure. Of course, that was it. She thought that would be a way to make new friends and to handle this awesome big high school experience that she was fearful about. Fear? Well, it started creeping in because she knew that obviously, part of the campaign would require that she give speeches in front of a thousand kids.

00:45:47:11 - 00:46:14:10

Speaker 3

So she wavered a little bit. In fact, the same goofy fear that she had remembered when asking the priest why she couldn't be an altar boy or her. But she thought about that again, and she said, no, not again. This time nothing is going to stop me. She said, well, so she mustered all of her courage campaign for the decision and became the class treasurer and the only Latina student officer.

00:46:14:13 - 00:46:36:10

Speaker 3

She thoroughly enjoyed her high school years. She was very active in floods and helped several part time jobs during the academic year and a full time job during the summer was a fairly good student. Well came time for her senior year in high school, and she noticed that her classmates were getting called by the counselor to talk about college plans.

00:46:36:12 - 00:47:09:25

Speaker 3

She waited for her fall, feeling sure it would come since she was in pre-college courses and was a very good student, she simply thought the counter hadn't gone to that end of the alphabet yet. Well, the call never came and having learned slowly to be assertive, she went to the counselor. When she asked the

counselor about college information, the counselor looked at her quite surprised and said, well, why would you want to go to college?

00:47:09:27 - 00:47:37:15

Speaker 3

After all, Latinas get married and have 12 kids. It would be a waste of your time and money. Well, this young girl could not believe her ears. She she couldn't understand how or why a counselor of all people would say that all college had been a goal of hers. She'd been encouraged to do that, and she even did what she was supposed to do get good grades.

00:47:37:18 - 00:48:07:14

Speaker 3

She went home very confused, and her and when relating the conversation to her parents, she was further dismayed because her father actually discouraged her from any further thinking about college, and her mother remained silent. Well, now she felt very betrayed because her father had always told her, you can do anything you want, can be anybody you want to be.

00:48:07:14 - 00:48:40:15

Speaker 3

If you're willing to work for and work hard. And her mother had always been very supportive to her and had always displayed unconditional love. Imagine the confusion and the the feeling that this young girl had over these reactions. Well, after many tearful and sleepless nights full of frustration and anger, she decided to go it alone. So she wrote up all about financial aid and college, and she managed to get financial aid and acceptance to college.

00:48:40:18 - 00:49:18:06

Speaker 3

And when it came time to leave, her mother gave her her blessing and her father didn't speak with her for for several weeks. She was deeply hurt by this, but she was determined to pursue her goal and to get her education. It wasn't until years later that she came to understand her father's silence, that she came to understand that it was an expression of very deep pain, because he was unable to help his daughter financially go to school.

00:49:18:08 - 00:49:46:17

Speaker 3

And his pride was moving. He didn't realize at all that she really wanted from him was his blessing and his moral support, because certainly dad had been there all along for all these years. Well, in time, with lots of dedicated studying and part time jobs during the year and two full time jobs during the summer, she finished her bachelor's degree in her master's degree and began her professional career with tremendous enthusiasm.

00:49:46:19 - 00:50:11:01

Speaker 3

This was going to be her world and she was going to create it, and she often found herself in positions where she was the youngest and or the only Latina or both. And as one can imagine, that was very stressful for many reasons. Well, as she progressed in her career, she would oftentimes hear people say, the only reason you've got the job is because you're a minority and we have to hire minorities.

00:50:11:03 - 00:50:37:11

Speaker 3

Well, she was outraged by this even as an adult, because she had always strived to excel in whatever she did. Yet those words haunted her and at times made her question her competence. She nonetheless persevered, and over the years gained a strong professional reputation in a field she loved what she did, and she found over time that she was ready for more responsibility.

00:50:37:13 - 00:51:10:05

Speaker 3

And by some she was encouraged and so she wanted to accept the challenge of the next level position. However, invariably what that meant was that those opportunities didn't exist in her current organization. So to move up, she had to move out. Well, after much thought, and despite the turmoil and the inconvenience of relocating and moving, she chose to move well during the 17 years of her professional career up to this point, she had worked in three states.

00:51:10:07 - 00:51:36:19

Speaker 3

Yes, you're right. More transition, more adjustment. Well, eventually this led to the number two decision in an organization. And the CEO who hired her really, was pleased with her work and oftentimes demanded more work with her because he knew that she would produce, oftentimes would demand more work from her than from her counterpart, who happened to be male.

00:51:36:21 - 00:51:59:14

Speaker 3

Although she and her counterpart were peers, he made 16% more than she did. Well, yes, this was the double standard again, and she felt she had had a lifetime of the double standard and given a lot of thought as to what she would do, and so she requested parody of her CEO.

00:51:59:16 - 00:52:32:00

Speaker 3

And she not only did not get it, but instead experienced more oppression for having exposed the topic. And the more she accomplished it seemed, the more threatened the CEO became, because the more she had to experience the consequences of insecure, of his insecure. Well, by this time, this young girl had just grown in years, and through the years she had learned that everything happens for a reason, despite the fact that we don't always know what that reason is.

00:52:32:02 - 00:53:13:08

Speaker 3

But she intuitively felt that there was a lesson, or maybe lessons to be learned from all of this. After all, up to this point, every move and major transition in her life had positioned and prepared her for what was to follow, so she knew patience and faith were necessary. Well, instead of allowing her anger to consumer, which would have been very easy to do, she focused on simply being herself and on continuing to do a good job, and decided to try very hard not to let this eat away at her and destroy her, because she had gained strength in something that he Brown says.

00:53:13:08 - 00:53:53:09

Speaker 3

And that is that 1st May not reach the dawn, save by the path of a knight. These words have been so applicable to her many, many times in her lifetime, well over the years. Indeed, the dawn came. A new day was experienced when this young cotton picker newspaper carrier who took risks to questioned the status quo and existing paradigms, who persisted through double standards and barriers, who created and seized opportunities, became a CEO herself.

00:53:53:12 - 00:54:33:06

Speaker 3

Oh yes, yet another transition and more lessons to learn and hopefully share. Well, I think that this is just one story of one young girl. And as I hear the honorees and the scholarship recipients tonight, there are many stories similar to these. And I think the message is that taking stock of our trials, our failures and our successes and of what we do with these experiences sets the foundation for whether or not we will seize opportunities when they present themselves to us in the future.

00:54:33:08 - 00:55:19:24

Speaker 3

And obviously, in order to see them, they must exist. And sometimes they don't. So I think it's possible for us to create our own opportunities, and sometimes they're created for us, and we must be alert enough to recognize when those opportunities are there and seize them. The Latino Education Association is doing just that. They're creating opportunities through scholarship, and the rest is up to the potential recipients who are our students and our future leaders who will one day be sitting up here and will be the CEOs of organizations, and to them and to you, I wish a new dawn and a new day.

00:55:19:27 - 00:55:38:00

Speaker 3

Thank you.

00:55:38:02 - 00:56:11:26

Speaker 4

We have had many outstanding alumni. Sally City College. We have had the international, national, global, regional, heroes, people who have been it's have you spotlighted the media? People who have done face the background but yet got things done. And our honoree is one of them who is a Nandez was born in, Brady, Texas and came to us via, considering Arizona, where he was raised.

00:56:11:28 - 00:56:43:07

Speaker 4

his parents were worked at Cotton Fields, and like many of us here in the summers, came to Santa Clara Valley. The crews picked him. Apricots, string beans and whatever else. But when he started school, first grade, as a matter of fact, because he spoke no English when he entered the first grade, Lewis was placed in a disability learning disabilities class with mentally just mentally disabled students.

00:56:43:10 - 00:56:54:04

Speaker 4

Only because he spoke no English. He later went on to earn a number of outstanding scholarship awards in elementary and junior high school.

00:56:54:07 - 00:57:23:15

Speaker 4

While in high school, he demonstrated his, future leadership skills by being a sophomore class president, senior class president on the varsity football team, varsity track team, varsity cross-country team. At the insistence of his father, after high school, boys traveled to San Jose to attend San Jose City College as a physical education major. Due to a mix up with his high school transcripts at the other end, I had to go.

00:57:23:17 - 00:57:53:26

Speaker 4

College never have to. Lewis registered late, and the only college of college classes available at City College at the time were law enforcement classes in the newly established law enforcement department. By the end of the first semester, Lewis had decided to change his major from physical education to law enforcement. While attending City College, Lewis was appointed captain of the campus police, made the Dean's List, and was on the City College's Honor Scroll.

00:57:53:29 - 00:58:22:27

Speaker 4

While in his last semester of City College, Lewis tested for the position of police officer with the police department and placed high visibility on this. Immediately upon graduation in June of 1963, he was appointed to the South. The police department has a police officer where he has served for over 30 years. During the first few years with the department, police attended San Jose State University on a part time basis and eventually earned a degree.

00:58:22:27 - 00:58:47:00

Speaker 4

In a situation of justice graduates graduating with honors. During his 30 years with the South Bay Police Department, he has been assigned to all the different bureaus within the department and has worked his way up to the position of Deputy Chief of Police, the third highest position in San Jose's 1500 person department. And I like to note that he is only the second Chicano in the history of the department.

00:58:47:03 - 00:59:10:29

Speaker 4

At the time to move up to such a high position. The only other one was his brother, Mike Hernandez. Over the years, Lewis's assignment have included patrol officer, hybrid officer, undercover narcotics investigator last year to Commander, patrol area commander, so on and so on and so on.

00:59:11:01 - 00:59:30:07

Speaker 4

What a career to his wife, Maria, a registered nurse with whom we have been married for 26 years, has been at his side throughout his career and shared in his many triumphs as well as his disappointments. Recent marriage I have two daughters, Christina.

00:59:30:09 - 01:00:03:10

Speaker 4

Who is a recent graduate of UCLA, and Monica, Who's who is a graduate of Masters Institute. Monica's married and has a son, Noah, who is Luisa's pride and joy. In retirement, Lewis and Maria plan to travel, continue their many volunteer efforts in the Hispanic community in San Jose, and generally enjoy life and so this is a quote again from Luis enjoying the grass and knowing Noah, which he says is the love of his life.

01:00:03:12 - 01:00:08:21

Speaker 4

I've heard a lot about Noah.

01:00:08:24 - 01:00:34:17

Speaker 4

During his many busy and sometimes hectic years with the police department, police has always found time to serve the community. In many ways, he has done so by serving the board of directors of numerous community organizations and giving them his time to work and helping improve the quality of life for many needy families and individuals. I'm going to read a partial list of some of his activities.

01:00:34:20 - 01:01:12:03

Speaker 4

He formerly served as police department representative for Motsepe Youth Conference program member, board of directors, Los Mosquitos. Excuse me to serve Chavez Elementary School.

01:02:38:06 - 01:02:58:20

Speaker 4

A couple of years ago, I had lunch with Luis. You know, something that you mentioned to me? I had just started City College, and he says if there's anything any of the students do that was a quote. Anything

any of the students need from you only go to classroom if you'll be talk to a group. If there's individuals you want me to talk to, you call me.

01:02:58:23 - 01:03:31:13

Speaker 4

So I've called him Luis. eop. And as we we put on a transfer program for the past several lives in the past 30 years, but for the past three years, I called on the lease, and he's been right there talking to students regarding law enforcement and other, career, career situations that students might get into. I'm proud to say that Luis was the keynote speaker to our first annual Chicano commencement at San Jose City College this past May, which was sponsored by La.

01:03:31:14 - 01:04:04:09

Speaker 4

My sister alliance. And Luis continues to be a great supporter of San Jose City College. Talk about the homeboy coming home, please. I'd like to present to you retired like Deputy Chief of Police Luis segment.

01:04:04:12 - 01:04:40:01

Speaker 4

Thank you, Philip, for the, kind words. And, thank you, Leah, for this wonderful, award. I it doesn't seem like it's been 30 years since, 1963, when I walked off with my diploma in Salt Lake City College. And probably because, I've made many my contact with San Jose City College over the years. But, I can tell you that, when I did leave City College in 1963, I really felt that I was ready to go out and do what I had planned to do, and that was to make a career in law enforcement.

01:04:40:03 - 01:05:14:29

Speaker 4

I was motivated, I was confident, and I felt that I could go out and compete with anyone. And I was fortunate enough to be able to do that, with, my wife Maria by my side and, a lot of friends, and relatives and a lot of you who are here tonight, I, managed to, work 30 wonderful years with the San Jose Police Department, and I can truly say that, I really got my start at San Jose City College, and I'll never forget that as long as around.

01:05:15:04 - 01:05:39:29

Speaker 4

so I want to thank you again for, giving me this award. 30 years ago, I never would have dreamed that, I would be standing here receiving this award. And I'm truly thankful. thank you very much. And good luck to all the new, students that are coming up. I can tell that, the plaza is in great hands because we've got some wonderful young people coming up.

01:05:39:29 - 01:05:54:01

Speaker 4

Thank you very.

01:05:54:03 - 01:06:15:14

Speaker 2

For closing tonight, I would like to express my deepest appreciation to the fundraising committee. With the committee, please stand up. That's Carmen Castellano.

01:06:15:16 - 01:06:27:11
