

00:00:01:13 - 00:00:30:22

Speaker 1

There's a language very your there and so latinas are more likely to be more frequently do to die and from diabetes applications such as kidney Failure lines and infecciones. So this is a real scary disease that we need to be aware of it earlier stage can be in a much more appropriate manner that was something. Bajo impacto de diabetes on the american population.

00:00:30:23 - 00:01:14:12

Speaker 1

We started now that we are working in the help Glades society. Diabetes with the latino population. But it came to learn that is a big problem in our community. City crossing workers that our present as latinas from there and that's quite a large number and it's mexican american women in particular. How do have it and take of a color carbohidratos, colesterol and meat over a population en addition Addict physical activity of factor that contribute the problem um and actually a study.

00:01:14:15 - 00:01:35:20

Speaker 1

Overtime culture rated latinas become less and I don't know about the facts. Well, that was in interesting observations. And this is something that in terms of the Well, we can play into the dealing with our children and making sure that our children are getting the addict exercise because.

00:01:35:22 - 00:02:13:25

Speaker 1

You see the genetic predisposición to be city exist as well, um. And so that's where we can play helping culture that are children or getting the addict exercise and addict nutrition education. I've been in Baldwin a wonderful project during California called can fit the California adolescente Nutrition Fitness Program and it's a great making program the kids wants to community groups states to find a nutrition and fitness programs in my community and so in the um on the board of a great maker review applications, etcetera.

00:02:13:28 - 00:02:24:29

Speaker 1

And there were ser real wonderful innovative programs and targeting Minority used to the one that I was particularly taken by.

00:02:25:01 - 00:03:01:12

Speaker 1

Um, quebradita dancing. Which is a real rage in a County and they had a proposal to um have quebradita dancing classes. And then during the breaks snacks reasons of things like to get that. Because you know like we want to get the way to get the kids there. Actividad in and also cultural. Um, something that was a proper latino population and that program didn't success another one again.

00:03:01:14 - 00:03:23:23

Speaker 1

Latino community was a soccer program and it was the call child already existed in was already up and running. And you know they had resources, but they wanted to incorporated. Um, nutrition education along with the Captivate to have the kids and it was kind of the same concept breaks and after the week.

00:03:23:25 - 00:03:48:24

Speaker 1

And so um, that was another night programada ended up getting her. Um, and just the things happening communities but do have to say nutrition fitness is one of the order um terms of getting funding funding programs with that is really hard when the reason a lot of attention pay do that, but in the minority community with the population that we have funding.

00:03:48:24 - 00:04:01:24

Speaker 1

Thanks for school and programs and the week program, etcetera. There's a grounded for that so I think.

00:04:01:26 - 00:04:40:18

Speaker 1

Community Thank you about of finally the school of cancer. Um, cancer accounts for one of every six among. Latinos en California. So cancer is really big kill country and um and interesting fact is that cánceres diagnosis percent less stuff and in latinas emails efi percent less often but the following diagnosis shorter for latinas and a lot of the reasons for that is simply the bottom like that.

00:04:40:20 - 00:05:11:28

Speaker 1

We don't have access to help health care and maybe wanted to keep started with the latino population forty percent latinos en el sur de California. And this is do to where employee a lot of the population services. Sector agricultural um small business lower manufacturing industries that provide health insurance to their employees because latino population participate in the workforce greater numbers and any other group.

00:05:12:02 - 00:05:46:02

Speaker 1

So, it's not that we're not working or looking jobs that by the benefit. So you have that problem. Um, and and that's part of the reason with the with the cancer because you're not enough order to take care of this problem. So that's a key issue, but another problem is to latino has being relatively anywhere a warning signs of cancer available diagnostic test and the west cancer risks and this is the whole issue of health education in the latino community.

00:05:46:07 - 00:06:12:19

Speaker 1

Where we going to get that education. If we don't have health insurance eventos there can be a problem with your county local hmong and if you don't speak English not having those materiales available to understand. Um or maybe just not being cultural to you and and how you new year old health and well-being. And so that cancer is the real issue in the latino population.

00:06:12:22 - 00:06:47:07

Speaker 1

Um for the question a breast cancer. Incidentes a breast cánceres actually lower ten latinas that in other groups. Um, however 11 again it's been diagnostic a leader stage it makes it a killer for latinas of latina women are diagnosis woodbridge cancer et a leader stage compared to only try to women a later stage these things that make a difference in the treatment access to make the grams seven Hispanic women over the edge of.

00:06:47:09 - 00:07:18:03

Speaker 1

That means of them getting a mama grand as hispanic female over the much last like we. To the general population. So that they had children and that they're not first cancer in the first place. And we see this is a killer one nine women in the country at risk of getting breast cancer. So this is not something that just affect a latina population.

00:07:18:03 - 00:08:11:28

Speaker 1

That's something that all we need to be. Um, another issues of language. Um women who only speak Spanish. Even to ever heard of a mama Graham or automatic English language a particular cancer that latinas need to be cáncer cervical cancer which is much more common among hispanic women the white female and again latinas get in more advantages of cervical cancer and significantly is that information on cancer screening procedures just failed hispanic women and this is the whole question a Pat Sommers a lot of us here who have that have something that we know that and that we do that one and and will be.

00:08:12:00 - 00:08:49:04

Speaker 1

Um, but what you believe that have hispanic female over eighteen. I've never had the. Is that that kind tupper women over the age of summer. So there's a big information get there in the latina community and we're also the group please likely to have a pasmar. Um of those overflow having the latinas over never read more and that's something to be doing an annual voices from the time know what.

00:08:49:07 - 00:09:12:16

Speaker 1

It's something that supposed to be done sister important procedure so you can imagine when we talk about the need for early detection disease is like breast Cáncer cervical Cancer diabetes All the different things we talk another one be there. Are you can take in treatment por calls you can follow to help problem. Your life and in all these.

00:09:12:16 - 00:09:50:19

Speaker 1

¿Are you with the literature shows Is that latinas? AT least access to this information that they're more advance stages and so I wanted to share desinformación. What you think because I think that's what this type of how we can talk about we can talk among ourselves, hombre talking about to get more whether it's going to get mine. To do worst post to be talking about those things You know as much better, but

now, I'm not really have to because you know it is going to grow, but you know I'm concerned about that we need to be able to talk about our own community.

00:09:50:26 - 00:10:14:16

Speaker 1

And that's really the message. I wanted to leave with today that when work and with this kind of knowledge to know what the issues are in our community something about that the different talking about knowledge being power. I think it is a que area Where are you with the knowledge Even for ourselves about a breast self examination. Wire.

00:10:14:19 - 00:10:28:25

Speaker 1

Empowered to do something to take care of well-being. As well as those of the people we love and that's what I want to share with you. Today questions.

Speaker 1

Now that I wish you from. You said most of the aids causes intravenosa Drug us or latina sexual country with contact with intravenosa drug users. But um, another issue I should have mentioned. Um a major reason as well as because latina aids victims have this perception that there for the disease because they believe that it's a boy medio type of disease.

00:11:15:27 - 00:11:36:09

Speaker 1

Um, then which every perception which can be in forced in the media that it's a camel disease and so you think that your um that your funcional that you're not at risk right and so as um, the teenage that's a problem. Engaging in hybris, sex without being protected.

00:17:20:04 - 00:17:42:01

Speaker 1

Who's actually getting a lot of that money. I'm not from small Janet mentioned and that they have done a lot of that work and it's main principles through federal grants. I believe in the age prevention area. Um, but clearly there's a need for much more efforts in in our communities. Yeah.

Speaker 2

00:19:40:12 - 00:20:13:00

Speaker 1

I think it's probably some of the saying that to has been unable to talk about the prevention issue within a community and I don't like to use this word. Use it, but what some talked about is the whole impact of machismo on the ability to accept a issue the whole caster talking about by sexuality with in the latino community as one of the factors that can um do the spirit of the question and the drag and all that these are difficult things to talk about it in our own communities.

00:20:13:02 - 00:20:33:09

Speaker 1

Um, you know the same associated with something like related that are coming out that way that your child was going on may be. Um other people didn't know again. It's one of the trágico worlds of this disease and the movie can come to grips. We're talking about the prevention side of it. The more will be able to come with dealing with that.

00:20:33:09 - 00:20:48:11

Speaker 1

We also have to get that this disease casos, but it's over decade and um, I don't know really at the latino community has come that for in terms of talking to the kids about prevention and dealing with that we have a long way to go.

00:20:48:18 - 00:21:11:29

Speaker 2

Yeah, enfrascada know, en la en we have a. With a mujeres latinas and a we're going to have a conference on a también and for.

Speaker 2

Mutual So so let's go.

00:21:20:04 - 00:21:43:05

Speaker 1

That's outstanding domestic violence. I didn't thing to it might be marks. However, another issue that it's wonderful that you can address that because that's another one of those closer issues within the latino community and they're is a need to put out there and educate women on what they're rights and the resources that are available for them if they are in fact victims.

00:21:43:08 - 00:21:50:13

Speaker 2

Domestic valenciano because they.
