

There were 32 children born to Japanese evacuees while interned at Fresno Assembly Center according to the Western Defense Command, Final Report. The publications issued at Fresno Center during the period of Japanese occupation reveal the names of twenty-four mothers and the sex of the child born. The eight children unaccounted for were probably born during the several weeks prior to the transfer of evacuees to Relocation Centers. We list here-in the names of the 24 born before the 10th of October 1942.

The first five children born while mothers were interned at Fresno Center were delivered at the Fresno County Hospital outside the confines of the Center. Here are the Dates, Sex and Mothers Name of the first five.
