Where exposed agent orange land and it has close to diseases as a result of their being and in a process of going to review of the scientific material Bell was in that there would be new diseases could be services connected for those who are a current office and that cancer and that's a long list of of cánceres

in my love in my love is that we're on the list already in one very a president setting it as well regarding children of.

01:04:26:21 - 01:05:04:24

Speaker 7

That we will be producing developing legislación that would cover those children of our suffering. Which is an amount of the spinal and in. Deformación of the espinal card and and that is is very presidents. Never in the history of the children. But this particular disease there is there is evidence that there is an asociación with the parents. So so we're right now.

01:05:04:24 - 01:05:32:29

Speaker 7

Dropping legislación. I do that the different as costly for many years and that we had represented. Well, and this and also presidente gi forum where a different in it from the Washington area receive the president.

This is a wonderful opportunity to be able to connect with our interested in finding about the benefits.

01:05:58:21 - 01:06:25:23

Speaker 7

They can the world wide web good Bayside and if they speak Spanish. They can just punch up the Spanish of their federal benefits trends and we're very very proud of that. And we have this will help us. Communicate more and better with that means around country regarding their. On the health care side of the week. Have. Some of you.

01:06:25:25 - 01:07:03:28

Speaker 7

May may have had a opportunity from California from that You see Davis. Original name is is completely than health care. Another upside down on and reorganice the whole place where very very proud of organization for those of you. Go to the view hospitales. We help you don't notice anything better services, but a lot is happening stream lining changing our management structures what we're trying to do is we're trying to take a resources and we're trying to put the resources where we need it very simple.

01:07:04:01 - 01:07:30:18

Speaker 7

We should be able to just put the resources where we need. Well, never ever that we have users of congresional loss restrictivas will all those are the mundo. ¿And then I m actually quite all, but I am and what we are doing is what we are looking at the country and regions and we are where the what kind of needs do?

01:07:30:18 - 01:08:14:28

Speaker 7

They have a lot of their hospital and and and long term need to move the resources into where the needs are and we're doing this very effectively around the country and something a little bit more close to all my update on Travis for the that we have related that was proposed in the presidents budget last year as well for funding of the of the new center spaces supposed to replace that was close because of the the structured damage from the.

01:08:15:00 - 01:08:49:06

Speaker 7

President Added and is it's going through the house communities and they do have the funding. The house funding for the arcoseno. Travis in their now the center as not yet so it's still remains if they come up with anything different. They have to go to conference. But on the outside Travis is looking good million dollars into the construction Hospital tres already about five million seven million dollar in it.

01:08:49:09 - 01:09:09:12

Speaker 7

You know that hospital will be with the house and with Travis. Travis funding and I know that that's important to a lot of the northern californiana in the room, because. ¿How?

01:09:09:15 - 01:09:28:15

Speaker 7

Rough. But it is located in a catman area about are hundreds thousand that so it's a much needed facility that catenaria. And then hospital just need to be replace.

01:09:28:17 - 01:09:45:00

Speaker 7

We are in addition to travis and and I talk to to stay commander a little bit before we started, but in in our building this one hospital. But this is probably going to be one of the last hospital.

01:09:45:02 - 01:10:19:00

Speaker 7

Commander gofundme that we have more access point. And we need to have to have great health care. But if it's not where everybody needs to health care. Then it's not doing anybody any good. So we, we are very, very nice your future us to develop new access point. Right now a pilot program to all open access point and what else if it's a little bit different and Hamming hospital somewhere.

01:10:19:00 - 01:10:51:24

Speaker 7

It's well, it's been able to contract out here to put a position where they can provide access to healthcare or something and go go and get out patient treatment. We think that this is our future. We be able to take our resources. Input veterans need is necessarily in hospital. Is that from access a joint access point where they can get to it and we have been contemplado.

01:10:52:00 - 01:11:19:24

Speaker 7

You know how we're going to do this. We little congress and and they're going to let us do a pilot. Shifting access additional access point around the country and they're not a lot of money to go around a Washington. This is really doc health administration. So we are very pleased. We hope that we will be able to provide where access point future and this would be the way.

01:11:19:27 - 01:11:30:24

Speaker 7

They can be the needs to be regan with and and I know that you know that these are words for for young lives. But there is there are really strong.
