THE CHRISTIAN POSSE COMMITTEE

TO: THE GOVERNOR OF THE STATE OF CALIFORNIA, THE CALIFORNIA STATE LEGISLATURE AND THE JUDICIAL BRANCH OF CALIFORNIA GOVERNMENT.

-----HONORABLE CITIZENS: It is well known the Executive and Legislative branches of Government have done an exceptional job of work in their elective positions, however, they have at times overstepped their authority.

-----IT IS WELL KNOWN the judicial branch of government was created as a check upon the excesses of the other branches of government, The Judges of the State of California have not done their duty of protecting the Citizen against the excesses of the Executive and Legislative branches of government, but have ;in many instances held that the branches of government are immune from even prosecution, the Judges have maintained a stature of being aloof and niggardly in their actions toward balancing the Power of Government by allowing unconstitutional acts to remain in force.

There is in the Constitution of the State of California a section th at states the Constitution is self activating, mandatory and prohibitory (Art 1. Sec 22) and therefore it is the duty of the Judges to point out and rescind unconstitutional acts of the other governmental bodies, (or even their own branch). In deed in Article VI Section 24, the wording is such that should unconstitutional actions still remain in effect after a period of 90 days within the district of Jurisdiction of a judge, his salary shall not be paid.

There are acts which are blatantly unconstitutionally being foisted upon the Citizens of California. No Judge should receive any salary until these acts are declared unconstitutional and made null and void in fact.

There is historical precedence for refusal to accept the dictates of governmental excesses, Notably Runnymede wherein King John was forced under threat of arms to correct excesses by guaranteeing the rights of the people in the great "Magna Carta" charter, The "Declaration of Independence" Signed against the throne of England, again, and against that same government declared the rights of the people to be free of tyranny.

WE THE PEOPLE OF THE CHRISTIAN POSSE COMMITTEE HEREBY PETITION REDRESS OF WRONG TO BE ENABLED IN PART BY THE WITH HOLDING OF SALARY FROM JUDGES UNTIL THE FOLLOWING ABUSES OF EXECUTIVE OR LEGISLATIVE GOVERNMENT ARE DECLARED UNCONSTITUTIONAL, NULL AND VOID.

In order to attain good governmental process, certain suggestions are also given so that chaos will not reign.

1. Involuntary servitude and slavery be dispelled;

a. CHILDren ages 8-16 years of age are made, by California Educatio Code Section 12101, to be slaves of the State by their parents in violation of Article 1. Section 18. (children can be taught reading and writing from before one year of age by parents and TV education, the needs of progress in education are beyond th at available in the compulsory classroom programs, English and other languages need progressive revision which are not forthcoming in the present education process. Mathematical advances such as digital base twelve need to be accomplished as do computer technology and many more math avenues.

b; Clerks and customers are made involuntary, unpaid servants of the merchant by the state by California Revenue and taxation section 6052.50 wherein each individual transaction is taxed (with exceptions) when in fact the sales tax is upon the merchant, thereby again, as with the children, subordination of involuntary servitude is executed.

C. Involuntary servitude, and confiscation of private property without judicial decision by the City Governments is accomplished by "Inspection Warrants" California Code of Civil Proceedure Section 1822.50-.57 whereby local laws (like Oxnard ordinances Section 9-24.6 and H-1101) whereby the 1st article section 1 the right of privacy, AND property and article I Section 19, the prohibition against unreasonable searches and seizures, found in the Constitution of California, as well demands of Involuntary servitude in repair and maintainance and other work is accomplished and demanded, all these gross violati ons need correction. (Repair and maintainance are desirable when a governmental body demands such acts then that government should also supply the funds or workman, especially where elderly, children, or hardship are claimed as reasonable objections to work exist.)

d. Federal invo luntary service in the armed forces is not necessary now that Atomic Power is able to be brought into use.

2. Searches and Seizures of Private property without judicial decision is accomplished many ways:

a. Property is confiscated in part by the "Uniform Building code" which is grossly not uniform and therefore violative of the IV, V, XIV amendments of the United States Constitution.

b. Zoning and Planning confiscate Civil rights and disparage rights and privileges of the people and are unequal application of the Law, violating numerous constitutional guarantees United States Constitution 9th amendment, paying a broad coverage of these.

c. Withholding taxes as a condition of having a job are Unconstitutional confiscation of property, taxes are seized in violation of search and seizure provisions and Due process of law Provisions of both Federal and State Constitutions. (Pay may be demanded daily and no question for hiring necessary except for actually determining the competency of a person for a particular job, these are necessary more and more in our motor home society progress)

d. The possession or sale or purchase of any item, service, chemical in itself shall not be considered a crime. The unalienable right of the person is involved. The abuse of any item, chemical or service may be considered as a crime against ones self, or against public interest, a jury may decide such legitimately. (U.S.S.C. 1973)

3. BILLS OF ATTAINDER AND TITLES OF NOBILITY VIOLATE ARTICLE I Section 10 of the United States Constitution, They need a definition, "Bill of Attainder" is a legislative act which imposes a punishment without Judicial decision; "Title of Nobility" encompasses a legislative act which grants immunity to persons or entities, so they may not be prosecuted without extraordinary legal process. (taken from definition of Noble metals, those immune to ordinary corrosive attack, and ancient immunities of titled and noble families in other countries).

a. perhaps the most annoying and common Bill of Attainder encountered by the Automobile driver or rider is the "stop light" wherein no judicial decision is made and the light times traffic independent of actual traffic flow. (Separate levels of cross traffic, grade separation, should be made at each intersection of roadway how having a traffic regulating light or a member of the Judicial branch of government should be stationed at each control light, while it is functioning to make a judicial decision as to the efficacy of traffic flow),

(Electrical mechanical flow controls are a step in the right direction but should only be used for certain sparcly used intersections, or only until a grade separation is made otherwise.) ("Stop Signs" warn of danger at crossroads and give th driver the judicial decision to proceed after being warned of danger.)

b. Perhaps the second most annoying traffic problem is the right to park an automobile, the regulation of motor parking in many places violates several constitutional provisions, "Titles of Nobility" are found in "special privilege parking areas" such as those saying; Reserved for Judges", Councilmen or other executive, legislative or Judicial branch of Government members serves to shelter those who are responsible for supplying good government from knowing the probdém exists or the extent of the problem and therefore do nothing about the problem. Violating a~~b~~ Article I Section 21 of the California Constitution.

c The refusal of government to provide for a full use of a private automobile, boat or airplane (or other vehicle house, building or property) by not allowing that owner to engage in using that venicle or property in service for hire or business;(yea,even encouraging that profitable use of their own property should be done) contributes to "Smog", welfare distress and proliferation among other things. Licensing is a giving of a "Title of Nobility", therefore Uncondtitut-ional.

d. Licensing of Drivers, businesses, professional people and other things and services amounts to granting a "Title of Nobility" Under our Constitutions, revocation of the right to do anything because of criminality, malpractice, or other dishonest or inept tort against another person or entity only should be the basis of stopping any per-son from freely acting. Education id multitudenously available through books, radio, TV. newspapers, individual tutoring, apprenticeship, family living heritage, and practice doing many things and im many aresa do the granting of a license, or other special privilege permit by a state board or other government entity is unnecessary and undesirable, The Power of the Judicial Branch to enjoin someone from doing an act due to their inability, or fraudulant practice is well established. To license certain people means others are denied in fact a similar right ane we believe therefore that much of our

" Welfare payments" need not be made, as they are given to people who are denied competitive privilege to work where they can by the unfair competition of the licensee of the State. Licensing disparages many people their right to use their bodies, their minds , or their property their product ore usefulness to themselves and their community.

3. (Federal Legislation and Constitutional Amendment needed)

a. Money has become nil of actual value in many cases, legislative action needs to be taken to legally back up money. Money represents work. Silver and Gold are in short supply to back money, and they are needed for their peculiar values as metals also. Brass Iron, reinforced Concrete, are all solid materials which could back up money, precious stones and other chemicals and metals too could be used, In suggesting these we also feel that technical advanced machines, semi precious stones and other things should be able to back up money.

b. If honesty, computer control of work and credit for work are universally available money could disappear in love and kindness for every one and their effacy (We might call this a Christian Ideal).

c. Those servants of the State Involuntary Servitude of past years, and any future ones, need to be provided for monetarily so they may reach as high a usefulness to themselves and society as possible. (high interest rates and loan sharking and usury of money now robs the person and society of their rightful, reasonable accomplishments)

d Speculative land buying without improving the land drives the builder, especially the single or family person builder, into unnecessary financial arearwardness and is counter productive, Executive, legislative and Judicial action is needed in this area. (for no one even the richest man on earth has his pro rata portion of the earth's wealth, therefore if a person is making so much money that speculative buying is excessive, then guidance toward more productive investments in actual fact should be available,).

4. Planning, Zoning Commissions and Building Codes are bills of attainder and promote titles of Nobility. Security of design and construction of building plans and practices should be the limit of governmental involvement not encroachment upon the right of a person to use and build upon his property.

THESE ARE SOME OF THE EXCEEDING VEXATIOUS ACTIONS TO BE STOPPED AND SUGGESTIONS TOWARD THE BETTER ROAD ARE INCLUDED, NOT BEING AN EXHAUSTIVE STUDY BUT ONLY THOSE OBVIOUS AND APPARENT TO NEARLY ALL CITIZENS OF THINKING AND CONCERN.

Therefore be it resolved;" NO JUDGE SHALL RECEIVE A SALARY UNTIL ALL THE NOTED UNCONSTITUTIONAL EXCESSES OF GOVERNMENT WITHIN HIS JURISDICTION ARE STOPPED.

THE CHRISTIAN POSSE . COMMITTEE.

Date July 29. 1973

BY Wendell L. White

TOOT NOTE, AUGUST 1, 1973;

Claire Kelley in our July 17th meeting had said that many should not sign so there would be more difficulty in identify and coerce some.

At our July 31. meeting Ardie Mc Brearity Presiding of "Citizens for Constitutional Taxation" suggested that one Judge be selected and that he be made an example, that the other Judges through out the State would be carefully be watching.

A red-headed gentleman suggested Judge Richard D. Love and I can concurr in that he is one of the defendants in Ventura County Superior court case (Oxnard Branch) 2904 X, which as one of its aspects claims acts of his violations of Constitutional rights and the delay of over 90 days of receipt of return of service and certain decisions which he should have made.

Frank Hanes acting as a " sounding board" said the Judges acting so the Legislature would have a review of the constitutionality of all laws passed might be opening Judges to being publicity seekers I replied that I thought that, if my menory served correctly that it takes three Judges to rule upon Constitutionality of a Legislative act, this really needs doing. Signed *Wendell L. White*
