# Resolution to Approve New Projections

CSU Academic Master Plan  
Ten-Year Overview of Planned Programs

Project for Implementation between 2022-23 and 2031-32

Planned degree programs ("program projections") appear in bold red font and are proposed for board approval at the March 2022 meeting. Existing, previously approved program projections appear in black font. Projected degree programs may remain on the CSU Academic Master Plan for five years after the year approved by the Board of Trustees, which appears in the second column from the left. Within that five-year window, planned launch years may be adjusted in response to societal need or campus schedules and resources. Current planned implementation years appear in the column to the left of the degree designation. Subsequent to approval of a projection, the campus may develop a full degree implementation proposal, which requires the chancellor's approval in order for a program to enroll students.
