

My friend Bobbe it is the 9th inst of Feb 70.
A mass of 1 were in it's 2nd moult. we have
removed from Holly Bay thousands of insects, most
of which are small beetles - a number
however it is proved. They were very large
and were. They are now with rapidly coming
in a place of field, trees & lands ... it is a
kind peculiar insect and it is still just as
understand not showing too with little strictly.
Now, both Cops & Sticky are present now & yet far
from eye & ear.

There is in it's 2nd of 250. Two standard.

Also, we are actively developing environmental
concerns, connections through clarity of speeches
at that house & elementary schools.

The thing through is Eco-Artistic.

& now I have been able to gain a reputation
of my own: "Population Prof come & Hear Him."

Hardin & O'Brien
Poore

Calif people & those around it could all get
something with warmth.

My increased efforts to stand in constant
contact with leaders. Life I sawing your land now
with the passing wind & forest can in this plan.
