Thank you very much. I want to.

00:15:18:25 - 00:15:39:11

Speaker 3

But a process that I want to talk today is about more than what you do. But what you need to learn to participate in the future. The world is changing and quickly.

00:15:39:14 - 00:15:48:06

Speaker 3

Remember that I had a George Washington when I was in school. And now George Washington was not live in.

00:15:48:08 - 00:16:12:09

Speaker 3

One of the things. I want. George Washington was it made it in the world to invent. Everything the world. Not going to change very much in my life. That remember thinking is that boy. George Washington was really smart. Because I know that then what the time I was that. And then every thing was going to be in. And then that was going to be very much.

00:16:12:09 - 00:16:17:27

Speaker 3

Change in my lifetime. Bobby was around.

00:16:18:00 - 00:16:36:22

Speaker 3

The things ever happened before a couple questions. ¿How many of you? ¿Just? Call to graduate school Great to say.

00:16:36:24 - 00:16:46:14

Speaker 3

¿Many of you? How many of you have access to a computer at school on a regular Bases.

00:16:46:17 - 00:17:01:06

Speaker 3

You can use computer school que cambió. Have a computer at home. Good. Good part of.

00:17:01:08 - 00:17:29:01

Speaker 3

Us if you're going to be a dressing a similar group in high school over apps. Would say that they have computers at home. Everyone would say that they have a computer at home. This is in datetime of change to do today. Yoyo couple of videos. One right now. I want to the end of my talk to give you what life might be like the first person was produced by Pacific Bell.

00:17:29:03 - 00:18:04:07

Speaker 3

Shows of life five is like it's going to be on this screen right here.

00:18:04:10 - 00:18:07:20

Speaker 3

So.

00:18:07:22 - 00:18:24:07

Speaker 3

Check out.

00:18:24:10 - 00:18:27:13

Speaker 2

From.

00:18:27:16 - 00:19:03:00

Unknown

A lot of like the work was you to.

00:19:03:02 - 00:19:14:19

Speaker 3

Explore me and you out.

00:19:14:22 - 00:19:29:12

Speaker 3

To people. Chat. Cuando llegan allí, hablan.

00:19:29:14 - 00:19:40:05

Speaker 3

Sobre ideas.

00:19:40:08 - 00:20:07:09

Speaker 3

I know things. I think it's interesting about that video is that It's five things. We can see it. Most of that technology is already here. I think about the map bus. And you see in the commercial where you can get a car exactly where you need to go a videoconferencia. Being able to see the person that you're talking to on the phone.

00:20:07:12 - 00:20:42:03

Speaker 3

That's available. Now you can via machine from Alphabet five thousand dollars. How to do that the difference between nine five, five, five and I think Pacific Bell is probably right on the money. That's kind of things are going to be available to you in the same teléfonos are available today. So there's no question that people change your living in time of change in fact century is the time change with my mother was born.

00:20:42:05 - 00:21:17:08

Speaker 3

There we know radios very difficult to get seven. Seven. When I was born to this. It just my family after born. When you are born. Personal computers adjust been embedded most families didn't have one when you're children they're going to be a born in do a world looks more like this one is going to have a personal computer or the personal computer in the television set are going to be the same thing to be a time of dramatic.

00:21:17:10 - 00:21:52:24

Speaker 3

One of the things that define too much change. There is how much. There is in the world information keeps going. Hup, hup, hup between hundred and sixty. Sixty years time information that was inexistente in the world double between nineteen sixty seventy five because of the have been of computers time out of information in the world double again and only fifteen years between night to.

00:21:52:26 - 00:22:24:07

Speaker 3

Only three years time out of world double in the next time out of the world. We'll double again. So we're usually rapid change happening now because computers are getting more powerful, but it's also happening because we're building a network that looks like the one Pacific Bell Sporting together late network is called the national information infrastructure. You may about the national information super highway.

00:22:24:10 - 00:22:57:14

Speaker 3

It's the same thing many of you know it is the internet. The Internet. Is started for kind of funny reason started by the defence. And it was series of computers and universities super computers at the time together together. Because the department of defense was Firefly state would be attacked a nuclear attack from sistemico out. So this is Internet of computers was going to be a backup communications system today.

00:22:57:14 - 00:23:31:07

Speaker 3

It's very different. Three many of you have access to the internet. Email accounts a few years every student what happened the internet allows you to talk to people real time by connecting Peters over the

world in Mexico or in Russia do that for just to be a very dramatic to see that. We're not like George Washington.

00:23:31:07 - 00:23:57:12

Speaker 3

We can see the changes happening. We can see that it's happening quickly and we can see that it's happening in. ¿What for you to understand? What I want you look away with today. I understand how you need to adapt. So that you can participate super out. Some of the changes that are going to happen are going to be great now you like I'm going to be a lot of fun terms of entertainment.

00:23:57:15 - 00:24:23:18

Speaker 3

You'll be able to get to your TV channels movies to you. Whatever you want to watch them. You just be able to put your button show up to be able to save the only thing you want to be able to get realistic video games to virtual reality. Pero make you feel like the game feel very similar life in terms of communication.

00:24:23:21 - 00:24:50:22

Speaker 3

I have to do videoconferencias with people who you know you don't know you be able to share data files if you were going to report somebody you'll be able to work on that report together in the same way that study. Usted in Madison, there was in there was an example in the video things will change right now if you want to get a second opinión you have to drive cross them ability to skip and X-Ray.

00:24:50:24 - 00:25:28:13

Speaker 3

Offers to another the old video conference a second opinion. So potentially just a medicine can go way down potentially depart communities. No Medical Services. Right now in schools changed going to be very dramatic. Side unified by next year. We have computer access to the Internet classrooms. Is part of the project are working on in unified. You have computer access in your classroom by the end of every classroom.

00:25:28:15 - 00:25:57:07

Speaker 3

But that change a great deal more than having access to movies more than being able to talk to people install nature of the way teachers stage and students learn is going to change. But now where is this change going to be more dramatic teniendo world of business and if you're going to be very if you're going to be ready to participate to have good jobs.

00:25:57:09 - 00:26:45:24

Speaker 3

You're going to need to change along with what I want to do today is love with five things that I want you to remember that a critical to your being able to participate economic play super highway. The first is got to become computer later. Doesn't mean how to use word. It means software is going to change over time in five years people so you're going to need to be able to learn new computer software new application you're going to understand enough how computers work to be able to pick up nature computer lots of software and be able to use it.

00:26:45:26 - 00:27:13:14

Speaker 3

Every job that is where it would have an century where require to use of a computer be be thinking. Well, I'm going to go after job. It is something that is may be called blue collar working in factory during manual labor and be very many of those jobs century many factory jobs Jobs are going to be done by robots computers has to do action your reading.

00:27:13:17 - 00:27:41:08

Speaker 3

Good luck. If you want to participar on the national information Super highway, you must become computer letter second have to become an informed consumer of information. It's not enough to know how just to use a computer learn how to use the internet. We have done students all over the world. But I think about it. We're all the information in the world.

00:27:41:10 - 00:28:03:13

Speaker 3

Just a computer que a lot of information is just junk. You've got to be able to find information. You've got to be able to decide what information is important and then you've got to be able to think critical about it. You've got to be able to add value to it to create economic that you for you say help in your job sort.

00:28:03:16 - 00:28:25:10

Speaker 3

I've got to be able to work. Well, ers in a group. I know you're doing that again. But the way jobs are going to be Structured. It's absolutely critical getting growth project id school or you get really you're doing all of work and somebody else is not doing anything. So you say what I'm just going to do with that person again.

00:28:25:12 - 00:28:37:20

Speaker 3

Going to get the same grade that I got even know. I did al work. Well, that's the kind of situation you're going to be in in your job all the time in the century.

00:28:37:22 - 00:29:24:00

Speaker 3

People. Uh, good projects. You're going to have to depends on other people for the job. You do is going to depend ability to communicate. Those people to get información from human. You can't you will be able to your job forcing. You're going to have to become a lifelong learning when I was in college. I talk to my friends people who was with me and we also have got to get my degree and that's a good get your, but that's not going to be in that job change the job that you get when you get out of college o out of high school may be completely obviously by the time five years old think about the

00:29:24:00 - 00:30:04:19

Speaker 3

job a printer. When I went to high school. I was on the staff to school newspaper. We had to do was type our stories up on a type reader ended up to a printer type of board. Printer newspaper today if in the staff paper you probably create a discount page maker which to the printer get back to and then years you're going to do the printing school.

00:30:04:22 - 00:30:40:29

Speaker 3

Job printer is not becoming a absolute in the way. It was only people to produce things, but there jobs changed a hundred percent in the last mini five years project. I think about how much you're going to have to learn. Traders to get into so you're going to have to use information to get yourself a

competitive advantage. ¿Last technologies a critical to put communication skills information Super always what we call infrastructure?

00:30:41:01 - 00:31:13:13

Speaker 3

It's just a tool. It's not education. It's not anything, but it would just like a car. May be great to have a Mercedes, but it's still just a machine. Another really successful. You're going to have to be able to communicate effectively in riding to be able to use math numbers. Actually, I have the information information super highway. It's been able to project make your job.

00:31:13:16 - 00:31:35:04

Speaker 3

You have to be able to presentare information about others. I have to use mathematics justify your thinking. Just just substitute for being able to learn a drive. Well a computer is not a substitute for being able to communicate with others recently talk to my mother yours.

00:31:35:07 - 00:32:07:21

Speaker 3

About to project three working on a but getting access to technology to every student everywhere. You said. You know. We really lucky to live when I did when I was born nobody in my town a car to have seen radio sin televisión. Tremendous change management. I was born to get across the country today. Get across the country electronic secrets when you want years old.

00:32:07:21 - 00:32:53:23

Speaker 3

Yo probably soy much the same thing What happens in the century is going to do. ¿What every century? You is don't be standard much you're going to have to participate in order to do the things that you want to do and five things. I want you to remember number one become technological number. Of information. Three develop. Good skill in working with others number four become a lifelong learning new skills your life number five develop ability to communicate in riding in math.

00:32:53:25 - 00:33:19:08

Speaker 3

If you do these things you will be in exciting participant in the next century. You've change all of your good luck. I can take couple minutes answer any questions might have like you to see how the future. What I mean it's longer, but it's the best money more high tech daily questions that anybody has task.

00:33:19:10 - 00:33:26:01

Speaker 3

Diez.

00:33:26:03 - 00:33:50:22

Speaker 3

Talk about how many of how economic is determined education and ideas and maybe more money in my life that I making now what I was in business people in business make more money. Then people around organizations like mind. Um, but what I'm doing right now is much more important to make them. What I did when I was in business.

00:33:50:22 - 00:34:11:27

Speaker 3

So you've got to make choices that is the church salary is going to be. ¿Determine in the future is how you can find information how you can analyze it and how are you? ¿Can you think critical about it? No matter what you do. Other questions.

00:34:11:29 - 00:34:39:18

Speaker 3

Que come. Take a look at that second video. Thank you very much.

00:34:39:20 - 00:34:53:22

Speaker 1

Even. Even. Donde estás por el momento en el que no estás.

00:34:53:24 - 00:35:11:08

Speaker 1

But if you want 31. End If you don't get your.

00:35:11:10 - 00:35:22:11

Speaker 1

This Fernández. I'm.

00:35:22:13 - 00:35:30:20

Speaker 1

Estoy out.

00:35:30:23 - 00:35:39:21

Speaker 1

Sent College. Okay. Okay.

00:35:39:24 - 00:35:59:00

Speaker 1

And it's not so much. Genetic. This is what I need to do it. I want to whatever I I didn't have any other thing was that I have parents. Well.

00:35:59:03 - 00:36:48:14

Speaker 1

Hermano, when too much McCrae, Padre. Ya eso llega to work. So. Was really important school whenever guidance so. Okay. You have to be. Okay. People who have to go school. Mejor que han went to school. ¿That was expected say you could you have to do really? Well called. Los amigos abogados And so you know you got to school and you got to school.

00:36:48:16 - 00:36:53:11

Speaker 1

Now.

00:36:53:13 - 00:36:57:16

Speaker 1

High School. No dos.

00:36:57:18 - 00:36:59:20

Speaker 1

Porque todos.
