and those cuddled
one root a multitude
of many individualists :

To talk with Fritz Kaiss - I
did not anticipate:

He called me "snappy".

"Never force, manipulate & be
patient"

"If you wish to know him or
make a lasting impression,
never envy or show admiration")

A man - a man. His beauty
spans - into, about, against every
color, every shadow, billow,
and this human ...

I take to.

Instantaneous
warmth -
to love -

of life
I kiss thee
as you fly by.

And: Alan Watts:

"psychologists are attacking the whole problem wrong --- they should be analyzing the levels of consciousness, not the unconscious levels"

ex: "an american goes to Berlin. He is surrounded by German speaking people. He feels they are all crazy, ^{but} himself. An american stops & says "you speak english - hear, I'll take you to those who speak English so you'll get along." or "I'll translate German for you & you can still stay in Berlin."

Faiss & Watts =

yellow color = mass for all paintings =

Sun

All become through:
Drugs & phy. application

Watts:

"in the warm vagueness of
immediate contact --"

and so it was with this man
walked Watts, too his eyes &
the vibrant life of his body
brought within (me) an awareness of
his presence there before me
as well as my stance -
exposure instantaneous.

Life - the blossoms of
pulsation bloom -
you call...

I shall answer,
attempt to answer.
