EDC may be giving us an updated fax sheet. I will let you know.

It is difficult for Dianne to forward this to you, so I am doing this for her. What do you think? I am sure you have other ideas!

Lupe

Hi Dianne --- I/we miss you. It is raining in Oxnard - a heavy rain, keeping us inside.

Using EDC's Fact Sheet for the first ad is a great idea. I was wondering how to insert some anadotes - such as for example:

1. According to experts; hired by the California Lands Commission (name the environmental firm who did the revised EIR) bhp billiton's Cabrillo Port "the project would cause irrversal damage to the Oxnard and surrounding communities."
2. Parents of Oxnard School District oppose bhp billiton's LNG Cabrillo Port because " The project would emit over 270 tons of smog-producing air pollution per year - harming the health of children, women and men. quote Debbie Morris, President of PTA Council.
3. Oxnard Neighborhood Council leaders oppose LNG because the project would devaluate their propertises. Trevor Smith, Vice President of Oxnard Neighborhood Councils
4. The City of Oxnard opposes LNG because it would harm the economy; the City is a Tousist community - who has invested in development of Ormand Beach and other beautiful areas. Mayor and City Council members.
5. Former Navy ---- Larry Godwin views LNG as interfering with the Navy's missle testing activities. An accident would cause serious effects not only to the LNG Tanker but also spilling in the Ocean
6. Earthquake

Another idea would be to select Facts that would make major impact on the Community.

My Thoughts/ideas - am sure many others have great ideas. Trevor, Larry, Shirley, Bill and Gloria I am sure have other or similiar great ideas.

Lupe

> Hi Lupe. I'm in Astoria, Oregon, overlooking the beautiful Columbia River. We are meeting early tomorrow, 7 am, to demonstrate before the FERC workshop starts at 8. I can't use my regular E-mail for some reason on the internet connection in the hotel, so I have to go into the Internet to access my Adelphia account to send an E. I remember your E-mail address, but I don't remember most people's, so I won't be able to write many Es while I'm here.

>

> I have been thinking about the first ad for the VC Reporter. What do you think about using the EDC Fact Sheet, maybe with a few edits, including a bullet on "need" and another on "pricing". And making an appeal to attend the Hearing, of course. We would have a different heading, such as "The Facts about LNG" and essentially EDC's closing paragraph inviting people to write letters, plus announce our April 11 meeting. And a sentence about donations to EDC.

>

> I'm wondering if the whole thing would fit on a half page ad. If not we will have to edit.
